NEWS OF THE WORLD

BOILING OF THE POLITICAL POT IN THE UNITED STATES.

McKinley and Bryan Workers—Cuba—Europe—South Africa—Failures—Deaths—A Notable Marriage.

A \$100,000,000 BRIDE.

NEW YORK, Aug. 3.—Despite the determined opposition of his family and in defiance of the threat of being disinherited Cornelius Vanderbilt, Jr., was married today to Miss Grace Wilson.

Mr. Vanderbilt, Sr., warned the young man that if he contracted the marriage he would have to depend upon his own resources for a livelihood and he need expect no share of the Vanderbilt fortune. Thus the son by disobeying his father's wishes threw away his prospects of inheriting a large lump of the \$100,000,000 which Mr. Vanderbilt, Sr., is estimated to be worth.

Not a member of the Vanderbilt family was even invited to the wedding.

RESCUE AT SEA.

NEW YORK, Aug. 3.—The French line steamer La Bourgogne, which has just arrived in New York, had a thrilling experience last Tuesday during the voyage across. At great risk of life and with almost superhuman efforts the first officer, commanding the vessel's launch, rescued the crew of the German bark Ernst, which the liner met waterlogged and in a sinking condition.

DRAWING THE LINE.

CHICAGO, Aug. 3.—Ex-National Committeeman Ben T. Cable, one of the leaders of the bolting party in Illinois, was read out of the Democratic party today at the meeting of the State Central Committee, the committee under the leadership of Chairman Hinrichsen.

It immediately began the work of drawing the line which marks the split in Illinois between the silver or regular Democrats and the sound-money men or bolters.

FOR SOUND MONEY.

CHICAGO, Aug. 3.—Four National Committeemen were added to the list today of sound money Democrats who will attend the Indianapolis meeting.

SHOOTING REBELS.

HAVANA, Aug. 3.—Antonio Pena Lopez and Narcissuegez Lopez, respectively a lieutenant and a private in the insurgent army, were shot today at the Cuban Fortresses for the crime of rebellion against the Spanish Government, and Nunez Bravo, the rebel prefect of Santiago de Cuba, was executed yesterday at Santo Domingo for the same crime.

CHICAGO STOCK DISASTER.

CHICAGO, Aug. 3.—Moore Bros., promoters of the Diamond Match Co. and the New York Biscuit Company, announced tonight that they had failed for \$20,000,000.

A meeting of prominent financiers and Chicago bankers was held at midnight at the residence of one of them on the South Side, and it was agreed by them to close the Chicago Stock Exchange indefinitely tomorrow at 10 a. m.

It is thought by some that the adjournment of the Stock Exchange will last but a few days and that matters within that time can be straightened out in a way that will make the losses as easy as possible to bear.

GOLD RESERVE.

WASHINGTON, Aug. 3.—The treasury gold reserve at the close of business today stood at \$110,985,890. The day's withdrawals were \$485,100.

TERRIBLE DROUTH.

DALLAS, Tex., Aug. 3.—The awful heat of last week has caused great suffering. In this city the thermometer reached 107½. There has been no rain for several weeks, and of course everything in the fields is rapidly dying. Dispatches from Indian Territory report the thermometer registering 112 at Guthrie.

WITH MAJ. McKINLEY.

CANTON, O., Aug. 3.—Maj. McKinley has had a few days of quiet and he is turning over in his mind the points which he thinks of discussing in his letter of acceptance. He will not, however, aim to have a letter

ready for publication for three or four weeks.

Ex-Senator B. K. Bruce of Mississippi was one of the callers on Maj. McKinley today. He is familiar with the political situation throughout the South and thinks Maj. McKinley will carry Virginia, West Virginia, Maryland, North Carolina and Kentucky.

AN UNEQUAL BATTLE.

HAVANA, Aug. 3.—A fierce engagement between rebels and Government troops is reported to have taken place in the vicinity of Melones, near Manzanillo. The Spanish force consisted of only 100 soldiers, while the insurgents numbered 1,000. The Government troops were defeated and compelled to retreat. Two Spanish lieutenants were killed and the commander of the troops and a large number of his force were wounded. The rebel losses were heavy.

Yellow fever and smallpox are increasing throughout the island and in certain localities have become epidemic. The authorities are adopting measures to prevent the spread of the diseases to diminish the high death rate.

SOW WARRING ON WOMEN.

HAVANA, Aug. 3.—The Diario de la Marina's correspondent, writing from Pinar del Rio, reports Adela Azucena, the Cuban Louise Michel and the leader of Maceo's Amazons, and nine of her companions as captured by the Spanish forces near Pinar Blanca. The capture is regarded as highly important, the women having been the means of persuading hundreds of youths in the province to join the insurgent ranks. The women will be brought to Pinar del Rio for court martial.

A Matanzas dispatch reports that the insurgents have burned the buildings in various sugar estates around Bolondrove, leaving more than 190 families homeless.

GORMAN WILL MANAGE.

WASHINGTON, Aug. 3.—Senators Jones and Gorman had a long conference this morning regarding the work that will come before the Democratic National Committee at its meeting in New York on August 11. A number of topics were discussed.

It is regarded as absolutely certain that the management of the campaign will be intrusted to the hands of Mr. Gorman.

ALABAMA DEMOCRATIC.

MONTGOMERY, Ala., Aug. 3.—Reports from the State are to the effect that everything passed off quietly. In many localities a light vote was polled. All the black-belt counties have given round Democratic majorities. The Democrats have made heavy gains in a number of white counties which have heretofore given Populist majorities, and also gained a number of representatives in the Legislature.

NO "POP" NOMINATION.

NEW YORK, Aug. 3.—A special to the World from Washington says: Senator Jones of Arkansas, chairman of the Democratic National Committee, has returned to Washington. When asked by the World correspondent the question: "Will Mr. Bryan accept the nomination offered him by the Populists?" he answered slowly and deliberately: "How can he? He was nominated with Sewall on the Democratic platform, and he will do nothing that will reflect upon him as a gentleman or as the Democratic candidate."

AMERICANS HANDICAPPED.

NEW YORK, Aug. 3.—A letter dated Hongkong, June 30th, says: Through the disheartening foreign policy of the Cleveland administration, and as a direct result of the apparent desire of the authorities at Washington to avoid displeasing the Spanish Government, the only American firm in the Philippines and one of the largest in the Asiatic trade, goes down today. It will be succeeded by a firm in which Americans will have no share, a firm under British registry.

KRUEGER'S LATEST.

JOHANNESBURG, Aug. 2.—The Standard Diggers' News publishes an interview with President Krueger in which he states that he had declined to interfere in behalf of Dr. Jameson. The President pointed out that the British government had still to decide who were the ringleaders in the Jameson raid.

ALTGELD.

CHICAGO, Aug. 3.—Governor Altgeld said today that he had no desire to be Attorney-General in Bryan's

Cabinet, and declared there was no truth whatsoever in the story that he had made a bargain with Bryan to receive the portfolio in return for the support of the Illinois delegation in the convention.

BRYAN AT WORK.

CHICAGO, Aug. 3.—A special to the Record from Lincoln, Neb., says: "Last night Mr. and Mrs. Bryan worked several hours in the library. Mrs. Bryan has taken charge of the correspondence, leaving Bryan to devote himself almost wholly to the work of preparing the speeches for the coming trip."

BETTER TIMES.

NILES, O., Aug. 3.—All the rolling mills of this place will resume work, giving employment to about 2000 men. PROVIDENCE, R. I., Aug. 3.—Allen's print works, situated at the north end of the city, started up today after a three weeks' shut-down. The concern gives employment to 300 men.

ANDREE'S BALLOON.

STOCKHOLM, Aug. 2.—News has been received from Spitzbergen that Professor Andree's balloon had been filled and was ready to start on July 25th.

DESECRATION.

SOFIA, Bulgaria, Aug. 2.—The tomb of M. Stambuloff, the ex-Premier of Bulgaria, who was assassinated in the streets of Sofia in July last year, has been seriously injured with dynamite bombs.

DEAD.

LONDON, Aug. 2.—The Rt. Hon. Sir William Robert Grove, D. C. L., LL. D., F. C. S., F. R. S., is dead.

SUNSTROKES.

ST. LOUIS, Aug. 3.—Dr. Jordan, chief dispensary physician, made a report today, showing that during the hot spell last week 135 cases of sunstroke were treated at the dispensary. Of this number eighteen are known to have resulted fatally. This does not take into account the number of cases treated at the homes of the victims. There were a large number of these cases, several of which were fatal.

200 HOMES BURNED.

ATHENS, Aug. 3.—Th Mussulmans have burned 200 Christian houses in the village of Kaudike, in the province of Selice, island of Crete, and it is feared that the Christians, as a reprisal, are burning the Mussulman villages. Hostilities have been resumed in various parts of the island.

1,500 MASSACRED.

CONSTANTINOPLE, Aug. 3.—Official advices received here say that the Cretan insurgents have attacked the Mussulman families living in the Kournia district and that 1500 of the Mussulmans have been killed. The date upon which the massacre occurred is not given.

NICARAGUA FLOOD.

NEW ORLEANS, Aug. 3.—A dispatch from Managua, Nicaragua, announces that a fifty-foot freshet, due to excessive rains and a cloudburst, was precipitated down the Rama river, in the Mosquito territory, from the mountains, destroying all the plantations along that river, sweeping away houses and drowning scores of men, women and children.

WAGES RAISED.

LOUISVILLE, Aug. 2.—One of the first things done by the management of the Illinois Central Railroad in assuming control of the Chesapeake, Ohio and Southwestern was to restore the cut of 10 per cent made about three years ago by the receivers of that road in the wages of its employees.

CHINA'S TIDAL WAVE.

SHANGHAI, Aug. 1.—By the tidal wave thousands of tons of water were thrown for miles inland and everything in its path was swept away. Many villages were entirely destroyed and it is estimated that fully 4000 people perished. All the cattle were drowned and the rice fields were obliterated.

HEAVY FAILURE.

COLUMBUS, O., Aug. 1.—The business world of this city was shocked today by the announcement that the Columbus Buggy Company, one of the oldest concerns of the city, had made an assignment at 3 o'clock this afternoon.

No statement of assets and liabilities has been made, but they will each approach \$1,000,000.

FOUR-OAR.

HALIFAX, N. S., Aug. 1.—The professional four-oared race for the championship of the world and \$1000 was rowed this evening, and won by Canada against England, Bedford, St. John and Halifax.

S. A. QUARREL.

NEW YORK, July 31.—Ballington Booth, commander of the Volunteers and ex-commander of the Salvation Army, said today: "I have read in the San Francisco papers of the 24th inst. the statement of Commander Booth-Tucker, and I am amazed that he can dare to continue thus flagrantly to misrepresent the cause of the Volunteers. Such statements would be harmless in the East, only receiving ridicule, where the facts are better understood. Booth-Tucker knows that he misleads the public in stating that we have only two posts in the Volunteers. 'We have 100 organized separate posts, and we are not afraid to leave the public to judge of their strength, financially as well as numerically.'"

DEFICIT GROWING.

WASHINGTON, Aug. 1.—Comparative statement of Government receipts and expenditures issued by the Treasury department shows the total receipts from all sources during July to have been \$29,029,209; expenditures, \$42,088,458, leaving a deficiency for the month and the fiscal year thus far of \$13,059,249.

NINETEEN TO DIE.

VIENNA, July 31.—After six weeks the trial at Agram of the Stenjevec band of thirty-six persons charged with nineteen murders and numerous assaults and robberies, has been ended. Nineteen members of the band, including two women, have been sentenced to death.

WISCONSIN OPENING.

MADISON, Wis., July 31.—The political campaign of 1896 was opened in the West today in the presence of 8000 people, Senator John M. Thurston of Nebraska and Clarence S. Darrow of Chicago spoke two and a half hours, presenting the respective sides of the currency question. Each talked for an hour and a quarter.

SENATOR WOLCOTT.

DENVER, July 31.—Ever since the Colorado delegates, led by Senator Teller, walked out of the Republican National Convention, Senator Edward O. Wolcott has persistently refused to be interviewed in regard to his position in this campaign. Tonight he issued an address, giving his reasons for supporting McKinley for President.

REWARDS.

PHILADELPHIA, July 31.—The Spanish Consul here has issued the following circular, copies of which have been distributed among the captains of vessels: "Ten thousand dollars will be paid by the undersigned at his office in Philadelphia for information leading to the capture within Spanish waters of any military or naval expedition, or of any vessel engaged in carrying men and munitions of war to the island of Cuba, certain inhabitants of which are now in insurrection against the Government of Spain."

MARK TWAIN.

SOUTHAMPTON, July 31.—Samuel L. Clemens (Mark Twain), with his wife and daughter, arrived here today on board the steamer Norman from Table Bay, Cape Colony. Although he started out on his tour of the world in feeble health, being obliged often to take to his bed between the delivery of lectures, and notwithstanding an attack of illness in India, he looked the picture of health when he landed here.

HARRITY QUILTS.

PHILADELPHIA, July 31.—William F. Harrity, until recently chairman of the Democratic National Committee, and for years a leader in the party councils, made the interesting announcement today that he had retired from active politics.

SMALLPOX AT PORT TOWNSEND.

PORT TOWNSEND, Wash., Aug. 2.—The British ship Dundee from Kobe, Japan, arrived here yesterday via the Royal Roads with three cases of smallpox on board. She was ordered into quarantine at Diamond point.

WILL NOT ABDICATE.

London, Aug. 1.—The rumor which for some time past has been given circulation in social circles—that the Queen was about to abdicate is entirely without foundation.

DISHONORABLE DISCHARGE FOR CAPT. GOOD.

Published at the Garrison This Afternoon—Findings as Approved by High Officials.

The findings of the general court martial in the case of Capt. John Good were returned from the President at 1 o'clock this afternoon. At 1:30 they were published to companies E and F by Col. McLean. The Colonel prefaced his reading with the remark: "It gives me no pleasure to publish to you the following general order, etc." The specifications, findings and sentence were as follows:

CHARGE.

The charge was conduct unbecoming an officer and a gentleman. The seven specifications were given in The Star July 22. They may be summarized as follows:

1. Speaking to the men on the 10 per cent less work.
2. Speaking to officers the same after salary reduction.
3. Speaking to men individually suggesting less attention to duty.
4. Calling riot drill — sailor drill and saying "why didn't Government get a soldier instead of a sailor for Colonel."
5. Swearing at men.
6. Sight episode.
7. Sight episode.

FINDINGS.

The court having maturely considered the evidence adduced found the accused, Capt. John Good, Company E, First Regiment, N. G. H., as follows: Of the first specification, guilty, without criminality.

Of the second specification, guilty, without criminality.

Of the third specification, not guilty.

Of the fourth specification, guilty.

Of the fifth specification, guilty, without criminality.

Of the sixth specification: Guilty in part, guilty except as to the words "did" in the second line, "cause the" in the fourth line, and "cause such charge to be," in the sixth and seventh lines, which are not proved; and the court substitutes for the word "did" the word "was," for the words "cause the," the words "accessory to a," for the words "cause such charge to be," the words "which charge was." Of the sixth specification, as above amended, guilty.

Of the seventh specification: Guilty in part; guilty except as to the words "did," in the second line, "cause the" in the fifth line, "cause such charge to be," in the seventh and eighth lines, which are not proved; and the court substitutes for the word "did" the word "was," for the words "cause the" the words "accessory to a," for the words "cause such charge to be" the words "which charge was." Of the seventh specification, as above amended, guilty.

Of the charge, guilty. (This finds the Captain accessory to the "sight episode.")

SENTENCE.

The court thereupon sentenced the accused, Capt. John Good, Company E, First Regiment, N. G. H., to be dishonorably discharged from the service.

The proceedings, findings and sentence of the General Court Martial in the foregoing case of Capt. John Good, Company E, First Regiment, N. G. H., having been approved by me, were submitted to the President of the Republic of Hawaii for review, and returned to me with his approval.

Capt. John Good, Company E, First Regiment, N. G. H., is accordingly dishonorably dismissed from the service, and the court dissolved.

The sentence of the court will take effect from this date.

HENRY E. JOOPER.

Minister of Foreign Affairs.

At 2 o'clock the decision was served on Capt. Good in his tent. He was instructed to turn over all property of the Regiment and to vacate the place by sundown.

AUSTRALIA FOUL.

The S. S. Australia will likely go on the drydock in San Francisco when she returns, as her bottom is foul. The native divers who went down this morning so reported. The propeller worked stiff the latter part of the passage and an examination was made. The divers found coral growing thickly around the ends. This accounts for the lateness of her arrival.

EVERYONE WAS PLEASED

ELSIE ADAIR COMPANY HAS A FINE HOUSE.

An Evening of Clever Entertaining—Music and Comedy—Skirt Dancing Feature.

The military opera house was crowded Monday evening on the occasion of the initial performance of the Elsie Adair Company. Gallery seats were limited, on account of the demand, to a few near the entrance. The entertainment began at 8:15 and was over at 10:45. The Quintette Club furnished the music; Professor Herold officiated as piano accompanist.

The singing was very good. "What Could the Poor Girl Do?" "Oh, Georgie," and others were among the selections. Mr. Vanderlip proved a good vocalist, and Miss Jardyne made friends. Miss Adair was of course the star in everything. All were delighted with her.

The entertainment opened with an "up to date" drama by Mr. Vanderlip and Miss Adair. This abounded in comedy and kept the house in a roar of laughter. Some clever stage work was done by both of the performers. "Company D" was sung in concert to fine effect. It was sprung as a surprise and took the house by storm.

Miss Jardyne sang three specialties, two in English and one in German. She was twice encoored. Mr. Emmet's ventriloquistic performances proved very clever and afforded unbounded amusement.

Then came the feature of the evening—the serpentine dance by Miss Adair. All had waited anxiously for this part of the program. The house was darkened and the little lady appeared on the stage in her beautiful silk costumes. Four dances were given. By the agency of a bright light beneath the stage and a strong calcium, all the colors of the rainbow were successively thrown upon the graceful folds of the dancer's costume. In the first dance perfect imitations of vari-colored pauses were deftly made. The last dance, "Dreams" was pronounced the best of all.

The entertainment closed with "Confusion," a domestic comedy in which the whole troupe were seen to advantage. This lasted nearly an hour.

TERRIBLE LUCK.

One by One His Children Went Back on Him.

A gentleman who was rusticated in the northern part of New Hampshire took a tramp along the hills one day recently. In passing a hillside farm he saw an aged granger hoeing a very stony potato field near his house, and the gentleman stopped to converse with him.

"Your potatoes seem to be doing well?" he started in.

"Oh, I reckon I'll hev a few pertaters," rejoined the farmer drily, as he stopped hoeing the rocks off the vines and glanced at the stranger curiously from under the wide brim of his weather-beaten straw hat.

"Other crops good?" "Oh, the crops is jest toler'ble, as usual, I s'pose," replied the farmer indifferently as he came up to the rail fence, dragging his hoe after him. "But I'll tell yer jest how 'tis, squire," he continued confidentially. "I'm the most unfortunat ole critter in Coos county."

"Farming doesn't pay very well up here, I suppose."

"Pay! Nuthin pays me, squire, but I did expect a leetle or suthen from my crop of young uns."

"Children turned out bad, eh?" "Jes so, stranger. The hull on 'em has been a dead loss to me. Dan—I named him for Dan Webster an give him a good eddication—he's a hoss doctor; practiced on my old mare, an she died. Zeke went later what they call the green goods business—keeping a grocery store, I s'pose—but he busted up, an he writes me that he's now workin in a place called Sing Sing; says he's got a good stiddy job, but the pay ain't good, and he's allers wantin to borrow a dollar from me. Sam an Hi went ter brak in on the railroad, an I had ter pay the funeral expenses of both of 'em. Maria Ann got married to a drummer at the county fair last fall, an went up in a balloon, but they came down safe an heven honeycombed with me an the old woman ever since. Lizzy, my youngest, ain't with her keep, an she's a-cassin me to buy her a bysack—me, who hain't laid eyes on a \$5 bill sence the war. I tell ye, stranger, I'm the most unfortunat ole critter with my young uns that ever lived," he groaned.

"You certainly have had bad luck with your children."

"I should say I had. Now, there's Bill Durkee up ter Colebrook, he's had the greatest luck with his. They supports him in good style, an Bill hain't done a stroke o' work for five years."

"All smart and steady, eh?"

"That's where you miss it, squire. They ain't any on um taken that way."

"How is it they get along so well, then?"

"They are all freaks and have all got good, stiddy jobs the year round. Sam weighs 'bout a ton. Miranda's got tremendous long hair, an his oldest boy was born without legs. An here I be without even a mammoth hog or a two headed calf," sighed the aged farmer as he went back to his hoeing.—Boston Journal.

"It is the best patent medicine in the world" is what Mr. E. M. Hartman, of Marquam, Oregon, says of Chamberlain's Colic, Cholera and Diarrhoea Remedy. "What leads me to make this assertion is from the fact that dysentery in its worst form was prevalent around here last summer and it never took over two or three doses of that remedy to effect a complete cure." For sale by all druggists and dealers. Benson, Smith & Co., agents for H. I.

CHEATING CUSTOMS.

VARIOUS WAYS OF DEALING WITH THE INSPECTORS.

Stories of Bribing Are Secondhanded—A New Hampshire Man Who Was a "Little Near"—At the Ports of Some Foreign Countries—Costly Tobacco in France.

On the promenade deck of an Atlantic steamer, westward bound, one often sees groups of passengers engaged in conversation of apparently more than ordinary gravity. The same is noticeable in the smoking saloon and 'tween decks. Certain characteristics of such conferences unmistakably betray their subjects. Old ocean travelers say they can tell it at a glance. They would much sooner take chances on guessing right in such a case than the pools on the ship's run, for there is a certain wistful peering into the future about it, a mixture of nervous apprehension and bravado that is always present. Once correctly diagnosed the symptoms seldom fail. In such a conversational group it's 10 to 1 its members are anticipating their experiences in the customhouse.

On the eastward trip the subject is of little importance. People carry little to the other side, and the search at English ports, at least, is not very rigorous. Bound for an American port, however, the case is vastly different. The trunks below are filled with bric-a-brac and treasures from fascinating aggregations of pretty things in European stores, and it becomes the trying question of the moment how the customs officers shall be passed.

It is inevitable that some such advice as this will be heard: "Put a \$5 bill in an envelope and lay it on the top of the trunk which you intend to have first opened. See that that particular trunk is the first one to be examined. Then when the officer lifts the cover he will see the envelope, and with the remark, 'I'm glad to see you know the usages of this port,' will pocket it and put his hieroglyphics on your baggage without any further trouble."

A very sensible little pamphlet distributed on most of the north Atlantic steamers gives this advice: "Don't attempt to meddle with the customs inspectors. It don't pay."

Nevertheless it is one of the commonest things aboard ship to hear asseverations of such things being done, and that it is expected by customs inspectors. Peculiar difficulty is encountered in pinning such a statement down to a credible basis of fact, however, and it is undoubtedly true of most persons coming to United States ports that they neither bribe nor attempt to do so.

A fairly creditable story of a New Hampshire man is told, apropos of the bribe theory. In the popular parlance of his native place, he was one of those kind of men who habitually are a "little near"—that is, penurious. He was rich and had become so by saving. Shrewdness on the side of economy was his financial system. It was told of him that, having bought 21 street car tickets for \$1, he would sit at the head of the car and when the 5 cent fares were passed up from hand to hand he would pocket the money and put tickets in the cashbox. Thus he would make 5 cents on every dollar's worth of tickets. The story has been told of a good many besides the New Hampshire man, but it serves just as well to illustrate this individual's character.

He was bound in to New York from Cuba. When he went on shore he followed in the wake of a man who, as alleged, slipped a bank bill into the hand of the inspector, saying, "I've got quite a quantity of cigars here, and I am anxious to get an early train home to—"

"All right," the inspector is alleged to have replied, and, chalking the man's baggage, he went on his way rejoicing.

The New Hampshire man had observed the affair, and, approaching the same inspector, he said, "I've got about the same quantity of cigars that man had; I'm in just about as much hurry as he, but I haven't any money." The story goes that his luggage was passed quite as perfunctorily as that of his predecessor, and that he took the train for the Granite State, congratulating himself that a New Hampshire Yankee is as good as a New York customs inspector any day.

Whatever the facts may be, there is an impression quite generally prevalent on the other side that a gratuity judiciously presented obviates annoyance at the custom houses on this side very materially. Such opinions, however, have usually come to the speaker second hand. He has not learned the fact of personal experience. A careful observation of the operations, especially at New York, where by far the larger portion of passengers from Europe are landed, strengthens an impression to the contrary of the above opinion. There is certainly no sort of pay on the other side of a disagreeable duty is performed with greater courtesy or with more apparent honesty than in New York. There is nothing in the looks or behavior of the men to suggest corruption. Their work is certainly performed more thoroughly than at any frontier in Europe, save possibly that of Russia. The search is made quietly, intelligently and with much patience and tact.

Across the water the customs regulations do not greatly bother the average traveler. At a British port he is asked if he has anything to declare, and his luggage is examined in a most perfunctory manner. Liquor and reprints of English books are mostly sought. At French and Italian frontiers, "les douaniers" ask for "tabac." The temptation to take tobacco into these countries is very strong. In both countries the government holds a monopoly of the manufacture and sale of tobacco. Havana cigars are obtainable in Paris at enormous prices, but pipe tobacco, the good old Virginia leaf that Americans like, is unobtainable for love or money.

The French government permits half a pound to be brought in if declared. But if one is caught smuggling a duty of 14 francs per pound is levied, and a fine of several times the value of the goods may be inflicted. A bright American, who should have known better, recently undertook to smuggle a quantity of his favorite brand of pipe tobacco by hiding it in his shoes in the shape of "tacco." He was detected and detained. His tobacco was confiscated, and he paid at the rate of \$36 a pound on the small quantity he had with him for the experience. Still so great is the demand in Paris for American tobacco that much is sent in little packages marked "Samples of no value," in newspapers, and in the pockets of accompanying friends.—Boston Herald.

Electric

Company.

The cleanest, brightest safest and really, in the long run, the cheapest and best light for use in the family residence, is the incandescent electric light. Safe; nothing could be safer. A few days ago a prominent gentleman of Honolulu came rushing down to the office of the Electric Company and said: "Give me figures for wiring my house, and I want it done at once; no more lamps for me. Last night a lamp tipped over and it came so near setting fire to the house and burning my children and I take no more risks."

This is the sentiment of quite a number in the past few weeks, who have ordered their houses fitted with the perfect light.

Just think it over and make up your mind that you want the best and safest light; send for the Hawaiian Electric Company and tell them what you want.

We have a complete stock of everything in this line and have just received a lot of the very latest designs in chandeliers.

"Style" in Furniture

It is equally as poor taste to buy "out-of-date" Furniture as an "out-of-date" Bonnet or Wrap. We have the advantage of all others in having the only absolutely new and "up-to-date" stock of Furniture exhibited in Honolulu—and yet we ask less than you pay for the old elsewhere.

In Oak or Birch are selected by people whose tastes run to the refined or elegant. For room decoration as well as for service there is a certain elegance and richness about these woods not found in any other, and yet the prices are not what you would imagine them to be. Birch sets, with dressing cases having etched plate mirrors, are preferred by ladies, because the long glass allows them a view of the full figure. The old fashioned large, square glass is quite as fashionable and as much in demand because the mirrors to which they are attached give larger space for clothing.

Bedroom Suits.

Chiffoniers.

In these days when the ladies require many changes of clothing, there is a demand for space in which to put things away. The bureau drawers are crowded. A Chiffonier is necessary in every house where store room is scarce. These are made nowadays for gentlemen as well as ladies; some have a drop lid which unfolds to the gaze a regular receptacle for pens, ink, paper and other articles of stationery.

China Closets.

There is scarcely a family in Honolulu, or anywhere else on the Islands, who has not a few choice bits of china stowed away in out of the way places. Give them light—let your friends see them.

China Closets in oak are the proper thing, and a dining room is not complete without one; the price has been an obstacle in the past, but overproduction by a leading furniture maker in the States has helped us to offer them to you at ridiculously low prices. See those with the oval glass. Prices range from \$30 to \$45.

Secretary Book Cases.

Wall pockets and shelves for books are out of date; fashion demands something more modern and more artistic in design.

Side Boards.

Nothing sets off a dining room to more advantage, or adds to its convenience more than a Side Board. No dining room is complete without one. We have them to suit all tastes and purses.

"Oom Paul," President of the Transvaal, vaunted as ruling by Holy Writ, continues to view the raid the same as any modern human being subject to the desires for revenge and remuneration.

Having reduced his sugar interests in Hawaii somewhat, Col. Claus Spreckels proposes to enter upon the production of the staple in California on a scale of great magnitude. Perhaps the day is dawning when California beet sugar will have a prominent place in the world's market. However, it is safe to say the day is distant. Beet sugar is measured by pounds; cane sugar by tons.

Just why 1,000 insurgents failed to annihilate 100 Spanish, which circumstance the dispatches relate, is inexplicable. It is equally mysterious that the Weyler report did not have the 100 Spaniards put the 1,000 Cubans to flight. It is clear that published accounts of the Island engagements are not to be depended upon. The only thing that seems certain is that the rebels are doing lots of damage and that they will not down.

The hissing of the lantern picture of President Cleveland shown at the theater Monday evening, was in exceedingly bad taste. That the major portion of the audience disapproved of this low means of expressing hatred or prejudice was evinced by the applause heard. No matter what the opinions of individuals here of Mr. Cleveland as an individual or even as politician and statesman, it should never be forgotten that he is the Chief Executive of a Great Nation and is to publicly be considered in no other capacity. He is the President of the country with which this Republic seeks "closer political union." When Senator Tillman was treated at Chicago as was the picture of Mr. Cleveland here, he said: "But three things hiss—a goose, a serpent and a man."

KATE FIELD.

(San Francisco Chronicle.)

The body of Kate Field still lies in a receiving vault at Honolulu as there seems to be no one in the United States who is willing to bear the expense of its removal to the spot in the Adirondack woods, where Miss Field wished to be buried. Unless the Hawaiian annexationists, in whose behalf the journalist risked her health and lost her life, take it upon themselves to send the remains to this country, it is likely that they will stay where they are. Considering who Kate Field was and what she did for people and for causes in her useful life, the fact that her last wishes cannot be carried out for want of a beggarly \$1,000 verges very nearly upon scandal.

A TEACHER'S OPINION.

(San Francisco Call.)

R. Levison Ogilvie, who has for some time been in charge of a Government school at Hanalei, a district about twenty-five miles from Honolulu, arrived at the Lick yesterday with his wife. He says that when he went to the Islands he was inclined to be a strong royalist, but is now thoroughly convinced that the present form of the Hawaiian Government is best for all concerned and could hardly be improved. The Kanakas, he declares, are too easy-going to ever fight for anything, and there is no danger of them taking up arms against the Republic. The native children learn in a parrot fashion, but lack executive ability and the power of applying principles. What the Islands have to fear is the steady encroachment of Chinese and Japanese, who may even crowd the older merchants out of business and cause unsatisfactory comparisons to be made between conditions under the monarchy and those under the Republic. Mr. Ogilvie was a contributor to the Kihohani Art League, a society organized at Honolulu two years ago, with Mr. Hitchcock as president and with Mr. Hutchinson, the island sculptor, one of the prominent members.

THE BEET SUGAR PLANS

COL. SPRECKELS ADDRESSES THE FARMERS.

Largest Refinery in the World for California—Salinas Valley—Speaks of Heavy Outlays.

(San Francisco Call.)

The reception given at Salinas to Mr. Claus Spreckels by the people of Monterey County is one of the events of the day that can be regarded with no little satisfaction by Californians of all classes. It was a gathering of men representing all forms of industry in the county, both urban and rural, and gave expression to the common esteem which all industrious men have for those great promoters of industry whose works tend to increase prosperity, advance civilization and add to the welfare of all.

The occasion was in every way worthy of such a gathering. Mr. Spreckels went to Salinas to announce to the farmers of the surrounding district that if they would furnish him with the sugar beets he would erect in that county the largest and best equipped sugar refinery in the world. In his address he said: "The factory will cover a wide area of land. It will eat up 3000 tons of beets every day and turn out every day 450 tons of refined sugar ready for market. That means the distribution among the farmers of \$12,000 every day, and \$3000 more paid to workmen and for other materials in the manufacturing. You can see, therefore, that this is an important matter. Now, as I say, it is for you to grow the beets. I'll do the rest."

It is scarcely necessary to say that an address of that kind, containing a promise of such industrial munificence from a man whose promises are as good as gold, awakened a true enthusiasm among the listeners. Such an announcement of enterprise would be noted as a matter of importance even in the largest cities and to the wealthiest states in the Union. To the people of Salinas and Monterey county it was an assurance of the beginning of a veritable new era. An industry which will distribute \$12,000 among farmers and \$3000 among workmen every day of the year will surely exert a powerful and ever-widening influence for good, and by the wealth it diffuses through the community afford the means for the establishment of new industries and new enterprises as yet undreamed of.

PAUL NEUMANN.

He Is Ill at San Francisco—Business of the Trip.

At last accounts, per the Australia, Paul Neumann was quite a sick man at the Palace Hotel in San Francisco. He was taken ill on the way up on the Monowai, and his condition is reported to be such that he may be in bed for some days to come. A continuation of the trouble suffered from here seems to be the matter.

Speaking of Mr. Neumann's trip to the Coast, an exchange says:

Paul Neumann will go from here to Guatemala as soon as his health will permit him to undertake the journey. He says that he has not come here solely for his health. He has been advised that a steamer line may be started to run between Guatemala and the Orient, and he intends visiting Guatemala to induce the promoters of the enterprise to run their steamers into Honolulu. In this, it is said, he is backed by certain large business interests in Honolulu.

In every branch of industrial and mechanical activity there are manufacturers who, by superior talent and ability, attain a prominence and a reputation beyond that of all competitors and in few branches of trade has the march of progress wrought such a revolution as in cutlery and kindred lines of business. Only a few years ago it was impossible to induce a purchaser to use anything in the cutlery line, except what was made by two or three European houses. Our experience has taught these very same purchasers that manufacturers in the United States can equal and in many cases excel their cousins across the water.

Prominent among these American houses is that of the John Russell Cutlery Co. of Turner Falls, Mass. What with invention, improvements and the development of skill something closely akin to perfection has been reached by them in the manufacture of cutlery. We handle their goods in all lines from the largest and handiest somest carvers to the desert knives. You can have your choice of the sets in Whit-Bone (an excellent imitation of ivory) or the Black Hard Rubber. We have a bread knife that has the long, thin blade for cutting the wafer like slices. The handle has a sheaf of wheat carved in the natural wood, also the Jointing Carver, Cimeter Carver and Steel, a special feature is the welding of the handles to the blades in such a manner that water will not effect them.

We feel assured you will be pleased with the service they will give you.

Even with a super abundance of depredatory bugs the average woman of Honolulu takes a great interest in plants. The taste of many runs to ferns because they are little or no trouble to raise. And there is money in it to persons who wish to raise them for sale. A plant for a quarter will be worth two or three dollars in a year if properly attended to. That's the reason we included Fern Pans of English Pottery among our goods.

They are new here and have never been seen before. If you are raising ferns come and look at our window. We've lots of things in there suited to the flower garden or in the house.

In the celebrated Monmouth Pottery we have Stone Jars holding from a half gallon to ten. Then there are Butter Crocks, Fruit Jars, Bean Pots, Stew Pans and Water Pots.

The factory at Monmouth, Illinois, holds the record for the best glazing on stone of any place in the United States. It is their goods we handle. We have also small and large flower pots, with and without saucers, and absolutely perfect. We carry no second quality. Then we have other and cheaper flower pots of both English and American make.

An inspection may be to your interest.

SUSPENS COFFEE SHIPMENTS.

NEW YORK, July 31.—A special to the Herald from Buenos Ayres says: Owing to the fall in the price of coffee exports from Brazil to the United States have been suspended.

ROENTGEN RAYS.

NEW YORK, Aug. 2.—Chamberlain writes to the Sun from London, under date of July 25th, as follows: The adaptation of Professor Roentgen's discovery as an aid in the practice of surgery has made wonderful progress in the past few weeks in Berlin, Paris and London. Specialists in each of these cities now devote themselves almost exclusively to the use of this new method of diagnosis, and many are the marvelous reports of their revealing to the eye of science what was before visible only to the eye of faith.

DISTURBED HAYTI.

NEW YORK, Aug. 3.—A letter to the Sun dated Kingston, Jamaica, July 28th, says: Alarming reports are current here today as to the political and financial situation in Hayti.

The premium on gold has risen to prohibitive rates, 85 per cent being the latest quotation, and trade is almost at a standstill. Many of the large mercantile houses have announced their intention of closing down, some have gone into bankruptcy, and universal ruin seems almost inevitable. Foreign traders, who have done much in opening up the island, are leaving as fast as their business permits, and each steamer arriving at this port brings a large number of refugees.

Finance Minister Calisthene Fouchard has been charged with embezzlement of public moneys, and is undergoing an examination. Revolution is imminent.

TANDEM RECORD.

FORTY-SEVEN KILLED.

ATLANTIC CITY, N. J., July 31.—Forty-seven dead and forty-three injured. These are tonight's figures on the appalling railway disaster on the meadows last evening. Of these forty have been identified. Three of the unidentified were men and three women. The odd one consists of an arm to which no body has been found.

NOT TOO SECURE.

LONDON, Aug. 1.—The result of the naval maneuvers just concluded has given a shock to Englishmen who imagine that Great Britain's naval bulwark was impregnable. The idea of the maneuvers was that a foreign fleet was trying to reach Loughswilly and that a British fleet which was much stronger and faster had to prevent it.

ARBITRATION.

LONDON, Aug. 1.—The long and elaborate article by John Morley, the late Chief Secretary for Ireland, in the Nineteenth Century, on arbitration, is attracting considerable attention. Mr. Morley contends that while the line of difference between Secretary Olney and the Marquis of Salisbury is narrow, yet one British non possumus could easily convert it into a risk of a fratricidal war.

SOUTH AFRICA.

London, Aug. 1.—The news from Rhodesia is far from rosy. Sir Frederick Carrington's forces seem capable of little more than holding their own. In fact, some of the recent fights look very much like reverses. The intelligent natives have profited by the previous defeats inflicted upon them, and they now decline to rush into the open and provide food for the Maxim rapid-firing guns, which during recent encounters have been almost useless.

Mr. C. G. Strong, principal of the public schools at Anderson, Cal., says: "I have used Chamberlain's Pain Balm and have found it an excellent remedy for lameness and slight wounds." Lameness usually results from a sprain, or other injury, or from rheumatism, for which Chamberlain's Pain Balm is especially intended and unequalled. It affords almost instant relief and in a short time effects a permanent cure. For sale by all druggists and dealers. Benson, Smith & Co., agents for H. I.

Ripans Tabules

Mr. L. A. Rocher is a farmer residing about three miles out of Colon, N. C. His home is somewhat in the back woods. In an interview with Mr. S. T. Godfrey, a correspondent of the Telegram and Sunday Times, Mr. Rocher on the 17th of June, 1895, said: "I am 61 years of age, and until I was high onto fifty years old, I was always well and hearty, then for a long while and until last February, I suffered with indigestion and could not eat anything hardly at all. My daughter, who lives in the city, sent me some of Ripans Tabules, told me how to take them, and they have completely cured me. My wife is now troubled with the same complaint, and has written daughter to send some more of Mr. Ripan's medicine. I want you to tell everybody how I got cured, for it is a blessing to humanity. (Signed) L. A. ROCHER."

Ripans Tabules are sold by druggists, or by mail if the price (50 cents a box) is sent to the Ripans Chemical Company, No. 10 Spruce St., New York. Sample vial 10 cents.

A NOMINATING CONVENTION IS
HELD BY H COMPANY.

Recruit Drill—A High Jinks by H—B
This Evening—C's Squads—Meeting
of Officers.

Company H held a "nominating convention" in the old barracks Monday evening. Capt. Murray presided. After nominations were open Lieut. Matthews and Sergt. Heuss were named for first lieutenant. For second lieutenant, Lieut. Wolters, Charles Murray and W. J. Coon were named. The election will take place next Monday evening, at which time the officers will be selected from the names given above.

Sergt. Ferry drilled recruits of the second battalion in front of the old barracks Monday evening.

After the business meeting Monday evening H Company had a high jinks in honor of the persons nominated.

Company B will have a business meeting and drill this evening.

Company C will have squad drill again this evening.

Regimental officers will meet at headquarters at 7:30 this evening.

A Ghost at the Window.

A practical joke was played upon the archbishop of York on a recent Sunday evening in a suburban church near London. His lordship was in the midst of a most moving discourse when unearthly groans and cries, as of some creature in dire mental and bodily distress, were heard proceeding from one of the windows. The archbishop stopped speaking, and all eyes were turned fearfully toward the window.

In another moment the window sash was suddenly and noiselessly raised. A ghastly, grinning human skull appeared, hovered momentarily in mid-air and as quickly vanished. Women faintly, men howled, and the archbishop gasped and turned white, although, of course, being a very learned and godly prelate, he knew it could only be a poor joke.

Some strong nerved and brawny young members of the congregation rushed into the graveyard outside, but in the pitch darkness could discover neither the joker nor his property skull. Meanwhile the more hysterical women had been removed to the vestry, and the archbishop, pulling himself together, resumed his sermon without making any reference to the apparition. The window, however, all the evening exercised a disturbing fascination. More eyes were turned to it than to the preacher, and the effect of the discourse was entirely spoiled.

If the jokers can be found, they will be charged under an ancient statute with brawling in church. The lawyers hope they will be caught, so that the interesting question may be argued. How can any body brawl in church if he does not enter the sacred building?—New York Sun's London Letter.

Women in India.

In India the women of the higher classes are kept pretty well secluded, and the young and pretty ones are not on exhibition. Still, one occasionally catches a glimpse of a pretty face. Their costume is simple and invariably becoming. A skirt reaching to the ankles, a close fitting jacket and a mantle covering the whole is the usual outfit. Sandals or low shoes are often worn, but are frequently dispensed with. The mantle serves for head covering. It may be of white or light colored muslin, silk, linen or lace, from three to four yards square, and the Indian lady knows how to adjust her headpiece as effectively as her Spanish sister. The clothing is usually all white, but skirts of red, yellow, pink or fancifully figured silks are worn.

All, from the highest to the lowest, are fond of jewelry. Bracelets almost covering the lower arm from the wrist to the elbow, rings without number, anklets and heavy chains are seen in profusion. The field women aspire to all the jewelry they can carry, even of the commonest and cheapest kind. Many of the young ladies stain their eyelids black and their lips and teeth a bright red to add to the brilliancy of their appearance. In spite of over-decoration some of them are pretty and attractive.—New York Recorder.

One night when Mr. Isaac Reese was stopping with me, says M. F. Hatch, a prominent merchant of Quartermaster, Washington, I heard him groaning. On going to his room I found him suffering from cramp colic. He was in such agony that I feared he would die. I hastily gave him a dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He was soon relieved and the first words he uttered were, "what was that stuff you gave me?" I informed him. A few days ago we were talking about his attack and he said he was never without that remedy now. I have used it in my family for several years. I know its worth and do not hesitate to recommend it to my friends and customers. For sale by all druggists and dealers. Benson, Smith & Co., agents for H. I.

Notwithstanding the fact that we are receiving new goods by nearly every steamer and vessel arriving from the States and from England, we do sometimes get out of certain lines of goods that are much needed. We want our inquiring friends to know that we have just received probably the finest assortment of

Dog Collars and Padlocks ever offered here. In one lot we had over SIXTY DOZEN, of all sizes and kinds. We can fit the largest watch dog or the smallest Japanese pug.

Those friends who have asked so many times for Razor Straps will be glad to know that we have just received a new supply of the celebrated

Reppenhagen Razor Straps. We have several other kinds, all good. Our assortment of Razors is full, having just received a new lot.

We receive fresh **Ammunition** every month, and can supply all kinds needed. Rifles, Shot Guns and Revolvers always on hand.

That new lot of **Score Books** has just arrived. Also a fresh lot of

Cottage Paints, Enamel Paints, Varnishes, Oils and Brushes of all kinds.

We have sold thousands of feet of

Rubber Garden Hose lately and expect soon another large lot running from 1/2 inch to 12 inches. Also steam hose.

The demand for

Galvanized Water Pipe is constant and we keep on hand all sizes from 1/2 inch to 2 inches and sell it cheap.

Men Who Court Death.

Probably the most remarkable army division in the world is the Foreign Legion of France. It is this legion which is invariably sent into the greatest danger. Whenever there are hardships to be borne to which the French authorities do not care to expose the regular troops, the Foreign Legion is invariably designated for the purpose.

Naturally the question arises, Why is this so?

The character of the men who fill its ranks is the explanation. Almost without exception they are men who, while brave beyond question, have a past which they wish to bury. Many of them are serving under incognito and place no value upon their lives. Fully 50 per cent are foreigners, adventurers and refugees.

A writer states that in one company he has found a Roumanian prince who was under suspicion of having murdered his brother; an Italian lieutenant colonel of cavalry, bearing an illustrious name, who had been dismissed from King Humbert's army in disgrace, in consequence of being found cheating at cards; a Russian nihilist who escaped from Siberia; an ex-canon of the Cathedral of Notre Dame at Paris, who had been suspended from his ecclesiastical functions in consequence of an offense committed against public morality; an English ex-captain of the rifle brigade, and a German count who had not only served as lieutenant in the first regiment of guards at Berlin, but who had also held a position on the staff of the late German emperor.—London Tit-Bits.

The Shah the Eighteenth Victim.

The shah was the eighteenth sovereign or head of a state assassinated in this century. It was the Emperor Paul, murdered in 1801 by palace conspirators who led off. Next came the Sultan Selim, in 1808. There was then a long interval, extending to 1831, when Capodistrias, president of the provisional government of Greece, was shot at and then dispatched by a blow from a yataghan at Nafplia. At the end of another interval, extending to 1854, the Duke of Parma was assassinated.

The turn of transatlantic presidents began with the president of Hayti, in 1859. The South American series included Colonel Balta, president of Peru, in 1872; Moreno, president of Ecuador, in the same year, and his successor, Gutierrez, in 1873. President Lincoln was the first North American president to be assassinated; Abdul Aziz was shot to death in a warm bath in 1874; President Garfield was shot in 1880 and Alexander I blown up in 1881. Carnot was murdered in the midst of civic festivity at Lyons. The queen of Korea was the last to be added to the black list. Four days of Algeria were murdered in this century. The executed monarchs were Murat, Turbide and Maximilian of Austria, each and all of whom tempted fate.—London News.

When It Rained Stones Eleven Days.

There are hundreds of well authenticated accounts of stones falling from the skies—from the mysterious regions of the great sea of space—but such "falls" have usually been singly, or at the most in small showers.

According to a legend told by the Arabs of the Sahara, there was a time in that portion of the dark continent when pebbles and fine sand literally rained from above for several days, covering the earth to a depth of many feet. In fact, they claim that the great desert did not exist prior to the time when this great shower of aerolites came. In Jenckyn's "Trip to Ye Burning Sandes of Africa," page 131, the following is told under the head, "Another of God's Wonders." "Moreover, the natives of these parts say that it once rained small stones and sandes for a period of 11 days and nights. Much fertile land and many towns and thousands of animals and human beings were thus buried up." This story reminds one of the "cometary theory" advanced by Ignatius Donnelly in "Ragnarok."—St. Louis Republic.

To Abate the Smoke Nuisance.

It has been suggested by Mr. N. O. Nelson that instead of transporting the coal from the mines there should be erected in immediate proximity to the Illinois coal pits a great plant—consuming the slack and waste coal, which can be had for next to nothing—which could generate electrical energy, to be transmitted by wire to St. Louis, sufficient to furnish a complete supply of electrical heat, whether for warming buildings or driving machinery. No other city of magnitude, as Mr. Nelson assures me, is so favorably situated for this grand electrical solution of the fuel problem. Heat, power and illumination might thus, through electrical transmission, be supplied from the Illinois coalfields without transporting the coal any appreciable distance from the mouth of the mine. The smoke nuisance would thus disappear of itself.—Albert Shaw in Century.

A Hundred For Shoestrings.

A story is told of a now famous American artist who was seen one day during his struggling days in Paris with his clothes in the last stage of dissolution and his shoes tied up with twine. But there was a wild gleam in his eye. "I've got \$100," he shouted to a friend across the street, quite oblivious of the crowd, "I've got \$100, and I'm going to buy some shoestrings."

The Great Problem Solved.

"Dodger is going to have a law passed compelling women to wear their old hats to the theater."

"What good will that do?"

"Why, then they will always be willing to take them off."—Chicago Record.

A Peaceful Mind.

The mind is never right but when it is at peace with itself. The soul is in heaven even while it is in the flesh if it is purged of its natural corruptions and taken up with divine thoughts and contemplations.—Seneca.

SUMMER STYLES.

Fancy Buttons Still Fashionable—Variety of Trimmings—Flaring Collars.

Buttons still prevail and are employed in all varieties of gowns and wraps. There are small buttons of bright or dull gold, others covered with velvet or with the material of the dress, large ones of paste, steel, jewels and painted china for Louis Quinze coats and waistcoats. Passementerie has gone somewhat out of favor except when it is the foundation of jeweled trimmings, and for these embroidered lace is generally preferred, either in edging or insertion. Oriental decorations in spangles of every

WEDDING GOWN.

tint of the rainbow, gold and colored metal cords and imitation gems make the modern dress costume very rich and elaborate looking. Mouseline de soie in white and cream is sometimes worked with simple silks in delicate colors, but the majority of trimmings are dazzling with metal and jewel effects. Designs in cut jet are embroidered on bodices and capes. Raised flowers are worked in silk of the natural tints on gowns, and every device is employed to obtain brilliancy and elaboration.

Neck trimmings are many and voluminous. Collars to capes and jackets are made more flaring than formerly, which gives space for more fuss and feathers at the throat. Rufflike ruchings are seen everywhere. The plain neckband is finished at the top with tabs of silk velvet or the dress material bordered with lace or other narrow trimming, or fans or a ruffle of lace take the place of the tabs. Ruches of the large and fluffy variety are the preferred neck adornment, however. Black velvet, with a lace and chiffon, hemmed with narrow cream guipure, is one of the favorite materials for these ruches.

The illustration shows a wedding gown of the Louis Seize style in white satin. The skirt has a long, round train, and the sole decoration consists of a trail of orange blossoms that outlines the right side of the bodice. The bodice has a very short basque directly at the back and is pointed in front. The Marie Antoinette fleche of mouseline de soie is edged with a double flounce of plaited mouseline and opens over a full mouseline plastron, which is gathered into a high satin collar bordered with orange blossoms. The gigot sleeves are finished by a lace frill and a tiny garland of blossoms at the wrists. A cluster of orange flowers is worn at the breast and another at the right side of the waist.

JUDIC CHOLLET.

FASHIONABLE FANCIES.

Sleeves of Every Variety, Trimmed or Otherwise—Capes For Dress Occasions.

Black relieved with white or with dashes of color artistically placed is to be very fashionable. Black is always nice looking. It wears well as a rule and is the most generally serviceable of anything. A black gown well made and of good material is wonderfully useful and can be worn almost everywhere with different accessories.

Sleeves are now enjoying a season of the wildest license, owing to the sudden change of fashion which has been so abrupt that nobody as yet is much influenced by it. While the newest sleeves are tight to the arm and either smooth or wrinkled in the mousquetaire style, large ones have by no means disappeared, and some of the latest French gown models show balloon and gigot sleeves. A great deal of sleeve trimming is permissible and is seen on bodices of thin summer gowns.

Mohairs and enamines are in great vogue. They are used alone or in combination with lace flowered taffeta. Lace, embroidery and buttons form the decoration. Capes and jackets are both worn, but for all dress purposes capes are given a marked preference. They are round, cut in dalmatic form or arranged like a Marie Antoinette fleche and are usually made of taffeta or other light material, the trimming being principally tulle and mous-

seline de soie. For morning and serviceable wear the cape is of thin cloth, plainly made.

Linen—the ecrus grasscloth seen in such abundance now—is the most prominent feature of the season. It is to be had in all grades, the newer and more expensive varieties being embroidered with large flowers or having velvet dots of various colors. There are also some very attractive checks or plaids formed by narrow, crossing threads of bright colored or white silk. A sketch is given of a simple but striking summer costume. The skirt is of beige serge and is entirely plain. The blouse bodice, of glaze green taffeta, is ornamented with large cabochons of jet, which are sewed all over the body of the corsage. The taffeta sleeves are plain and have a frill of mouseline de soie at the wrist. The straight silk collar is surmounted by a double frill of mouseline, and the cravat of the same material is edged with lace. The belt of green satin is adorned with two buttons and pendants.

Building Papers,

FOR SALE BY

WM. G. IRWIN & Co., LIMITED.

Sole Agents for the Hawaiian Islands

The building papers are 1, 2, 3, and 4 ply. They come in rolls, each roll containing 1000 square feet. They are water proof, acid and alkali proof and vermin proof. A house lined with building paper is far cooler than one that is not. There is also a cheaper grade of paper adapted for use under matting keeping out insects.

HONOLULU, July 20th, 1895.

MESSRS. W. G. IRWIN & Co., LTD.

GENTLEMEN:—In reply to your inquiry as to how the Ideal Roof Paint you sold me lasted; I would say that I painted the roof of my house 12 months ago with your Red Ideal Roof Paint, and I find it is as fresh and bright in appearance today as when first applied; looking as well as others lately painted with other paints. I am more than satisfied.

J. G. ROTHWELL.

Have you a leaky gutter? If you have, make it perfectly clean and dry, apply a good coat of No. 3 P. and B. Paint over the leaky spots; then take a piece of stout Manila paper, or a piece of common cotton cloth, paint it well on both sides; lay it over the first coat, giving the whole a final coat, and there will be no more leak there. Or if the whole gutter is bad, make it clean and dry, and apply a paste of P. & B. Paint and Portland Cement.

SOAP

is a chemical compound. It is made up of an alkali and a fat. It is like neither of them, yet contains both, just as water is made up of two gasses, yet it is like neither. Alkali and fat unite only in certain proportions so that unless great care is taken an excess of one or the other remains mixed up with the soap. When the soap contains an excess of alkali it's not good for toilet purposes. It makes the skin rough and red. It makes the skin feel dry and harsh; causes irritation.

CURATIVE-SKIN SOAP is a soap known by its results. There is no other rule to follow. It is beneficial to the skin and scalp. It acts as a curative agent to the skin, healing instead of promoting irritation. You had better try it.
