MIHA bond ill-conceived

Some 500 housing units will be built in three years by the Mariana Islands Housing Authority (MIHA) to salvage what has been called its ill-conceived \$80-million bond project for mass housing.

"The entire bond issue has been a great risk from the very beginning because it was ill-conceived," Lt. Governor Pedro A. Tenorio said in a memorandum to Governor Pedro A. Tenorio. "I was not convinced that the construction of 1,450 units within three years was feasible nor realistic from the standpoint of needs."

He added that "given the fact that plans and commitments have pro-

gressed to this critical point in time, there is little that MIHA could do but salvage what can be salvaged from the project and continue to work to reduce further risks associated with the bond issue."

The Lt. governor said that failure to undertake even a part of the construction project "will be just as risky and potentially damaging to the government, specially in its ability to be involved in bond financing of public projects in the future."

MIHA issued \$80-million worth of home revenue bonds about a year and a half ago to finance the construction

of 1,450 housing units, which would be sold to CNMI citizens under long-term repayment schemes. The agency, however, must build the housing units within three years before the proceeds of the bonds are released. This means that interim financing for the construction of the houses must come from other sources.

Arrangements were made to allow the Commonwealth Development Authority (CDA) to bor-

row \$25 million from a group of institutions led by the Bank of America (Asia). The money would be relent by CDA to MIHA to finance the construction of housing units.

Lt. Gov. Tenorio came out with his memorandum following a meeting with officials of MIHA, CDA and CRC-OCK Consortium, the prime contractor in the project.

Tenorio said he was recommending the imple-

Pedro A. Tenorio

mentation of the limited project to prove that "MIHA does and always did intend to construct needed homes for our community..."

He recommended the

CNMI eyes Asia for investments

The Northern Marianas will continue to look towards Asia as a source of off-island investments in the Northern Marianas because of its proximity to the CNMI, according to Lt. Governor Pedro A. Tenorio.

In a press conference Tuesday, Tenorio said the Northern Marianas must consider its geographical location when thinking about investments. He said Asia is the CNMI's neighbor.

He noted that investors from the mainland should also "try and get a piece of the rock."

Because of the distance, however, little interest has been generated among investors in the mainland. Tenorio said that the foreign sales corporation (FSC) program was a "fiasco."

He said the CNMI spent over \$50,000 to promote the Northern Marianas as a site for FSCs, which are

subsidiaries of export-oriented American companies. Tenorio said only "one ambitious guy came."

He said that some mainland investors came here but wanted the CNMI, through the Economic Development Loan Fund (now Commonwealth Development Authority) to provide the capital for their proposed projects, after which they would operate such projects for a fee.

"Do they think we're crazy?" Tenorio asked. He said he even chased one such type of investor out of his office. He declined to identify the investor from the mainland.

Tenorio said that the provision in Public Law 5-13 which reduces the rebate rate for big taxpayers did not encourage investors. He said these investors continue to come to the CNMI to invest and take the risk.

Juan T. Guerrero

Hunting of deer, bats prohibited

Natural Resources Director Nicolas M. Leon Guerrero has declared a ban against the hunting of fruit bats and sambar deer because of the "dangerously low levels of the population" of these species.

The moratorium against hunting fruit bats will take effect starting Monday and will last for one year in the Northern Islands, two years in Rota and indefinitely in Saipan, Tinian and Aguigan.

The ban against the sambar deer-hunting in Saipan, Tinian and Aguigan will last for two years.

Projected deficit increases to \$4.9M

With three months remaining in fiscal year 1986, the projected deficit has reached a total of \$4.9 million.

Last June, the Department of Finance reported that local revenue collections totaled \$21.84 million as of April. Based on that figure, the projected collection for the whole fiscal year was estimated at \$37.439 million, or \$3.4 million short of the FY 1986 budget projection of \$40.847 million.

The latest report prepared by the department showed net local revenue collection of \$27.05 million by the end of June. Based on this figure, the department projected total collection up to the end of the fiscal year on Sept. 30 amounting to \$35.9 million, or about \$1.5 million lower than the projection made in June.

The new estimate is about \$4.9 million short

Police seize 271 marijuana plants

Police confiscated 271 suspected marijuana plants in two raids in Tanapag and Capitol Hill on July 30 and this Monday.

Daniel M. Sablan, in whose farm in Tanapag 187 young plants were uprooted by the police on July 30, has been charged in court and detained.

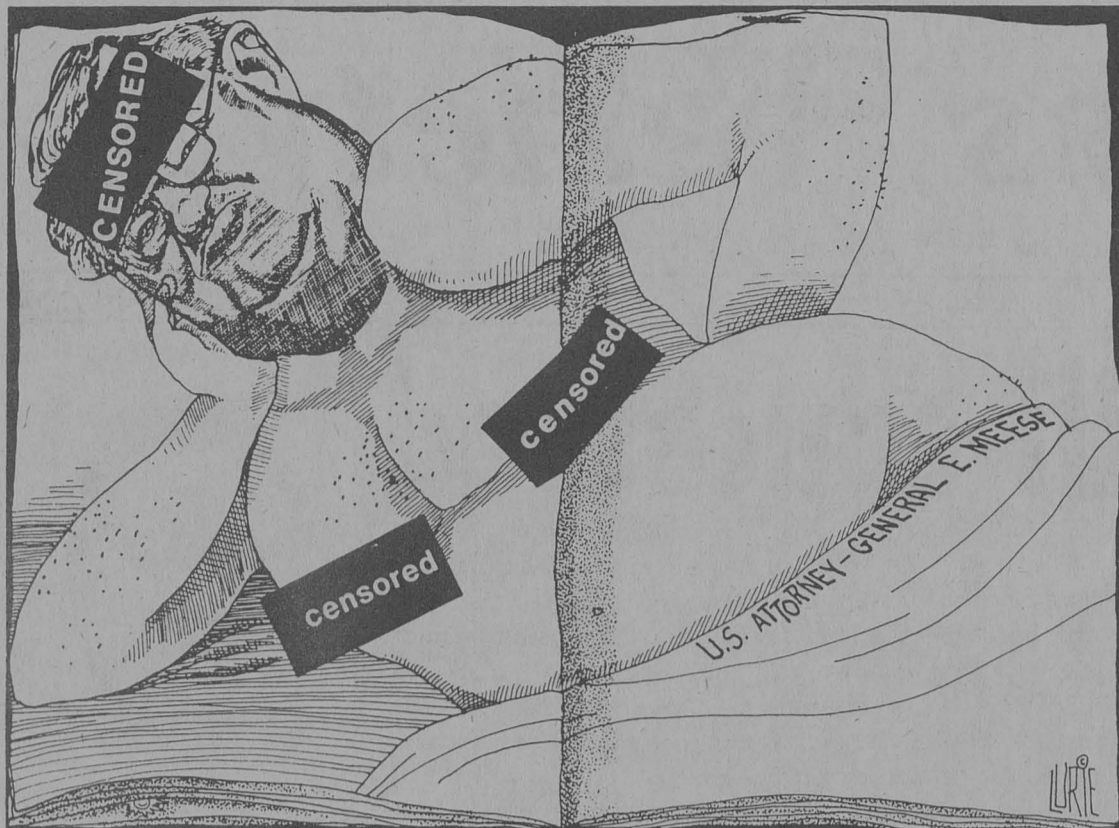

He was in prison for a previous conviction and was released on parole early this year.

Preliminary hearing on the new charge started Wednesday. Samples of the plants taken from his property were sent to Guam for analysis.

Capt. Jose M. Castro, investigation chief, said he suspected marijuana plants taken from Sablan's farm could be worth between \$5,000 and \$10,000.

The second raid con-

LETTERS

USAR radar plan backed

Dear Editor:

Not too long ago there were public hearings in reference to the U.S. Air Force's plan to build an early warning system (satellite) here in the CNMI. Unfortunately, I was not able to attend any for personal reason. However, by writing this letter I hope to get into the minds of those concerned citizens and duly elected officials who were against this plan and hopefully make them change their positions.

Here are some facts about the Russians or the communists that perhaps were overlooked by those who were against the satellite.

1. The communists' main goal is a complete domination of the world.

2. By virtue of our political relationship with the U.S., we are already a target as far as the "commies" are concern.

3. Any free country on this world is vulnerable to

the communists' attack and domination.

4. Russia and the U.S. have enough nuclear bombs to destroy the world ten times.

5. By refusing to have this satellite here in the CNMI we hope to discourage the Russians from attacking us. WRONG! The communists are not concerned whether we have this satellite or not. What they are concerned about is political status. In other words, if you are not a communist or a socialist state — you are my enemy. Remember fact No. 1.

6. In a communist or a socialist state, there's no such thing as freedom of speech, freedom of worship or the likes that we so often take advantage of. If you do value your freedom, help us in the Armed Forces help you protect them by permitting us to build this satellite here in the CNMI.

7. The Pacific Basin is

not free from communist influence. Look at the Philippines — the communist insurgence fighting a freely elected government. Look at what's happening in our world today, the African continent, Middle East, Central American, Afghanistan just to name a few of the countries the communist are trying to bring into their sphere of influence. So if you think the Russians will not attack us, your perception of them is totally wrong. Don't be fooled with your own perception of the communist because if they decide to attack us, they will in time of war whether we have this satellite or not.

8. The U.S. will not be the only beneficiary from the satellite. We too will benefit from it. What this satellite will do is warn the U.S. ahead of time of an impending nuclear or missile attack by the Russians or potential adversaries. The U.S. would then decide to shoot down the incoming missiles or retaliate. As to our benefit, it means giving us enough, if not ample time to gather our families and essentials for our survival. BETTER SAFE THAN SORRY!!

These are just few facts about the Russians and the communists and their real intentions. As a member

PERISCOPE

By John DelRosario Jr.

The recent exchange about the alleged "unfairness" in the way funds were distributed—money earmarked for the House of Representatives—had the undersigned wondering about the short memories some of our politicians have.

It was only last year that the Democrat denied the House Republican Minority almost 30 percent of their budget. It was a bitter pill to follow, thus, the GOP Minority cut down the size of its staff and reduced the salaries of those who remained on board. Congressman Greg B. Sablan was then the executive director who stretched out every dollar to the last ounce of elasticity. The Republican Minority survived it all however difficult their predicament.

I quizzed Sablan for his reaction. Said he: "It seems that some people really have such short memories. Last year, we were entitled to some \$59,000. They only gave us \$30,000. We tried to take them to court but we didn't even have the money to pay for attorney's fees. So we disregarded that alternative. We resorted to staff reduction and cut down salaries as much as we could and that was that. . . ."

The House Minority, therefore, have but one alternative: SIMPLY FOLLOW SUIT. To resort to the game of making the other guys look bad when in fact you have done them the same to them has got to be an acute case of the kettle calling the pot black! Ai adai, anai hun dandani-yo, bumaila-yo todos klasen break. Tareaho pago dumandan, pues, hafa mohon ya hun saulag lokue i break? Hombre timapot este na kuentas. Ilegna i fino' Chamorro: "Tareamo pago, guaho agupa!." So when they give you a pill to swallow today, however bitter they may be, it's your turn to take a huge gulp.

Japan may have given the Micronesian Governments some \$29 million. I suggest to our friend in Washington (Rick Montoya) that he identifies just how much went to i.e. Palau, Marianas, etc. This is an important aspect so to enable the U.S. Congress to determine the distribution of funds on an equitable basis. Congressman Luis A. Benavente suggested (on a personal basis) that this should be done and that he would follow it up with Washington shortly. Benavente is the Chairman of the House Appropriations Committee. * * *

Up and down beach road, we see small time business ventures most of whom are owned by foreigners. Several things come into mind whenever I pass by these places. 1). Isn't there a need now to impose a foreign investment law? 2). Why are we simply looking at this potentially dangerous situation and have dragged our feet beyond necessity? A lot is wrong with this business phenomenon. And it is sure to create a lot of social problems one of these days. What problems? We all know what they are and it is time that our public officials put their act together on this matter. Would you believe we now have 9,000-plus Filipinos here?

Our public officials have taken off to Japan to sign documents relative to the \$140 million bond that we would be spending for housing and other projects here. Perhaps we need to have that money for our purposes. But when you still have millions of dollars unspent in CIP funds, you begin to question the wisdom asking or trying to get more when we still have some in our coffers.

I am hopeful that we would be able to address the question of development—its implications, etc.—when in fact we have that money in our hands. I am somewhat fearful of straining economic, social and other problems that comes with the territory because we wanted to see an unprecedented development to take place here. If we are not careful, we might end up with 30,000 to 50,000 aliens here. We now have our share of problems with 9,000 of them here today. Well, we are now in the eye of a storm named: Development for who?

Funds sought for photovoltaic power system

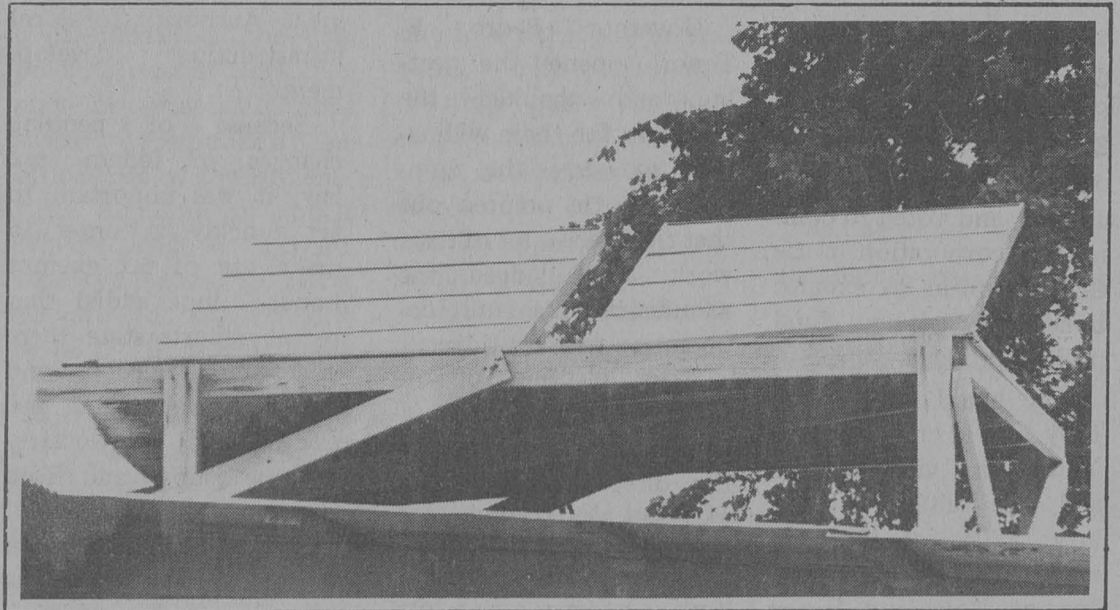

SAIPAN (CNS) — A review committee has recommended to the governor that the government spend \$200,000 for photovoltaic power systems for the islands of Agrigan, Tinian and Rota.

The funds come from a court award made due to overcharging for oil by Exxon Corporation years ago.

The governor's oil overcharge review committee has recommended that \$100,000 be spent for electrification of Agrigan by providing photovoltaic

powered lighting, fans, a refrigerator and an outlet to each house on the island. Fifty thousand dollars would be spent on both Tinian and Rota to put photovoltaic powered lights and fans in schools on those islands.

Energy Administrator Liz Udui says, "This use of the money will provide us with almost 100 percent electrification of the Northern Islands by alternate energy and demonstrate the usefulness of this technology in Tinian and Rota."

Solar panels lie idle on top of conference building in Susupe.

Tinian asks Mobil to cut gas price

TINIAN — Some 307 Tinian residents have asked Mobil Oil Micronesia, Inc. to reduce its price on diesel and gasoline fuel on Tinian and to bring in unleaded gasoline to the island, according to Mayor Ignacio K. Quichocho.

The petition specifically asked Mobil:

— To reduce the price of gasoline and diesel fuel comparable to at least that offered at Saipan and

Rota in order to alleviate the grave injustice and gross mistreatment given to the people of Tinian and their government; and

— To make available to the people of Tinian unleaded gasoline in order to improve the quality of fuel on the island."

"Further, we beg Mobil Oil Micronesia, Incorporated, to immediately implement the requests made herein without delay," stated the petitioners.

In his letter accompanying the petition, Quichocho pointed out that the concerns of these number of people regarding their grievance should not be taken lightly. "We have been mentioning in the past about the disparity of diesel and gasoline prices on Tinian with the other islands in the Commonwealth," he said. "We made that known to you in my letter of May 28, 1986 which, unfortunately,

was largely ignored."

The Tinian mayor in his letter said he hoped Mobil, with the petition of 307 residents, "will ultimately receive their attention" by pleading for the reduction of fuel prices and making available unleaded gasoline to the island.

Quichocho told the company: "Consequently, the matter for decision now rests in Mobil Oil Micronesia, Inc."

Meanwhile, in another letter sent to Governor Pedro P. Tenorio concerning the petition to Mobil, Mayor Quichocho said: "On behalf of the Tinian Leadership and the people of Tinian, I am again soliciting your input to induce Mobil by whatever means to remedy the plight as we have embodied in previous communications and again through this petition." He said he was not convinced that nothing could be done about the deplorable treatment the people (of Tinian) were getting.

"We have an economic as well as a social deprivation on the part of Mobil and we shouldn't allow the situation to prolong in the interest of fair play to our consumers," said the mayor.

Quichocho took note of the fact that people in Saipan may not experience too much difficulty in trying to live because of the seeming comfort that the island provides. "I only invite you and those

who wish to try living on Tinian that we are being hit quite excessively by exorbitant prices such as diesel and gasoline fuel," he told the Governor.

Quichocho told Tenorio that he hoped a solution is in sight as are as resolving any apparent legalities that might be involved with respect to the Mobil fuel contract, and said that he and the rest of the Tinian Leadership would be glad to assist him, but he pointed out that had the local leadership been initially involved in the fuel contract negotiation much of the problems now existing would have been easily accepted.

Meanwhile, in a statement made in his office, Mayor Quichocho said he is committed to do everything in his power to help the people of Tinian obtain the lowest possible price on fuel.

With the combined Tinian leadership consisting of the Tinian Legislative Delegation (Senators Jose P. Mafnas, Manuel P. Villagomez and Herman M. Manglona), the Tinian Municipal Council (Councilmen Jose P. San Nicolas, David B. Evangelista, and Edwin M. Hofschneider), and the Mayor of Tinian and Aguiguan, Quichocho said that with the support of the people Tinian must also play an important role in the development of its economy, and to do this it is necessary that we do away with a monopoly and invite competition.

Taga Petroleum did

Tinian Mayor Ignacio K. Quichocho recently announced that Taga Petroleum is selling diesel fuel to the government at a low price of \$0.54 per gallon which, he said, could result in substantial savings of our public dollars.

"I am so happy with the information I received from Mr. Mitshiru Ishihashi, Resident Manager of Taga Petroleum, that his company will be selling diesel fuel to the government on Tinian at fifty-four cents a gallon, which is about 92 cents cheaper than the \$1.46 per gallon charged by a competitor," Quichocho said in a press release.

"I have urged the Tinian resident directors and activity heads that they should buy diesel from Taga Petroleum by taking advantage of this low price which could be a great savings on their operations," said Quichocho.

cho, adding that while this is only for diesel fuel, he is hoping that gasoline may someday be offered which could really result in greater savings to both government and private consumers on Tinian.

Quichocho said he appreciated Taga's offer to sell diesel fuel at a very cheap price, and added: "I only wish Mobil Oil Micronesia would be the more responsive by lowering their fuel prices on diesel and gasoline, since they have their own fuel storage tank facility on Tinian."

"I and the rest of the Tinian Leadership will continue to ask Mobil to provide Tinian the same fuel prices as Saipan and Rota because we feel we are being deprived of the reduced prices of these essential commodities vital in our economic development," said Quichocho.

The departments that

will be most benefited by this low diesel price are Public Works and Natural Resources who have vehicles and equipments running on diesel.

"We have cut a requisition for diesel at a much higher price with one vendor, but since Taga Petroleum is selling at \$0.54 per gallon, I guess the alternative is to cancel that requisition and buy the cheaper fuel," said Jack Castro of Natural Resources, representing the resident head at a meeting of the department heads.

Public Works resident Director Silvestre T. Cruz stated that his department as a heavy diesel consumer will be benefited greatly by buying from Taga Petroleum at such low price.

CUC to spend \$89M for utilities

SAIPAN (CNS) — The Commonwealth Utilities Corp. (CUC) Board of Directors held its first organizational meeting July 31 and voted to commit the corporation to use \$89 million in tax exempt bond proceeds to fund utilities projects.

The board also elected Eloy Inos as chairman, Paz Younis as vice-chairman and Jose Taitano as secretary. The other board members are Oscar Quitugua of Rota and Henry Hofschneider of Tinian.

Governor Pedro P. Tenorio opened the meeting and thanked the directors for their willingness to serve the community. He pointed out that they face a lot of hard work and pledged the administration's full cooperation to assist them.

After election of officers and approval of board rules of procedure, the directors discussed a proposal to commit the corporation to using part of the proposed \$140-million bond issue by the Commonwealth Develop-

ment Authority for local infrastructure development.

Because of pending changes in federal tax law, it was important to act quickly in order to make use of tax exempt bonds. Inos added that recent reports state there is an urgent need to fund utilities development and expansion, particularly for the Saipan and Rota power systems.

The CUC directors then voted to authorize the chairman to sign an agreement binding the corpora-

tion to use \$89 million in bond proceeds for utilities projects. The figure is based on cost estimates for needed projects prepared by the CDA and the administration.

At its meetings Friday and Saturday the CUC board was briefed on the current status of Commonwealth owned utilities by Director of Public Works John Pangelinan and members of his staff.

THE CUC was created by P.L. 4-47 and is charged with operating the Commonwealth's electric,

water and sewer utilities and is expected to do so on a break even basis within three years. The CUC is required to regulate those utilities and telephone, waste removal and cable television service and to consider privatizing government utilities where feasible.

AG: Cops should not work as guards

Police officers should not be allowed to work as private security guards during their off-duty hours, according to the Attorney General's office.

'Accordingly, it is our position that police officers of the NMI should not be allowed to engage in private security businesses at all,' Acting Public Safety Director Edward Manibusan said in his former capacity as assistant attorney general.

The opinion, which was concurred in by Attorney General Alexandro C. Castro, was in response to a query from Representative Juan S. Torres. The legislator sought the AG's opinion on whether police officers should be permit-

ted to engage in security guard type of work.

Regulations of the Department of Public Safety allows its officers to engage in outside business or employment provided a permit is granted by the DPS director.

Manibusan said the DPS rule did not provide guidelines on when a request for a permit to work outside the department could be denied by the department head.

He said that Personnel Service System Rules and Regulations prohibited outside work "if said business or employment would conflict or raise a reasonable question of conflict of interest (be it real or apparent)."

Manibusan said the rules preclude outside work that may be reasonably construed by the public as an official act of government. "The functions of police officers and of private security guards are very similar and interrelated," he said. "It is, therefore,

safe to say that the general public may reasonably construe police officer's acts done during off-duty hours as a private security guard to be official acts and the appearance of impropriety exists."

Manibusan pointed out that the opinion does not

mean that police officers "should also be prohibited from doing other types of businesses or employment."

He suggested that the Legislature pass a law to curb the problem.

Manibusan: We'll wait for legislative action

Low pay is the main reason why police officers take outside jobs such as in private security companies, Public Safety Director Edward Manibusan said Wednesday.

Manibusan, in his former capacity as assistant

attorney general, told Representative Juan Torres that police officers should not be allowed to engage in the private security business because of conflict of interest.

In the absence of a law or rules prohibiting police

officers from working as security guards, Manibusan recommended the passage of such law.

In an interview Wednesday, Manibusan said he would wait for the Legislature to act on his recommendation before instituting any action on the situation.

During the same interview, he said the patrol and traffic divisions of the department had been merged to maximize use of available manpower and improve response to calls for police action.

The juvenile bureau has also been merged with the investigation division under Capt. Jose M. Castro.

To improve the department's public relations Manibusan appointed Lt. Frank M. Camacho as public information officer. Camacho will also handle public education programs such as in crime prevention.

Court dismisses bank from suit

The Commonwealth Trial Court has dismissed the United States Territories Bank and Trust Co. from the suit filed by three depositors who were allegedly deprived of about \$500,000.

In an order dated July 30, Chief Judge Robert Hefner also dissolved the writ of attachment issued against the bank's property last May 8.

Attorney David Wiseman, counsel for the US Territories Bank, moved for the dismissal of the institution as a defendant in the suit because of the failure of the complainants to state a claim for their request for relief.

The other defendants

accused by Norman and Joann Greisen and Marie Potter, all of Nebraska, remain in the suit. They are: Kenneth Appleby, president of US Territories Bank, Pacific Bank of Commerce, Bankers Management Corp. and Arthur Fertig, president of Pacific Bank.

In a complaint filed in May, the Greisens and Ms. Potter said they were encouraged to deposit their money with the three institutions in return for high interest income.

The depositors allegedly were not able to recover their money in 1984. They were allegedly told that the funds were lost to another investment firm. (See Variety, May 16).

New offices to issue US visas

United States representative offices will open in the three freely associated Micronesian states to process visa applications, including those from foreigners residing in the Northern Marianas, according to the Department of State.

The department made the statement in response to a resolution adopted by the Senate requesting the US to continue the operation of the US consulate office in Saipan after termination of the Trusteeship Agreement, or when the Northern Marianas achieves full US Commonwealth status.

Commenting on the same resolution (SR 5-20), CNMI Resident Representative Froilan C. Tenorio said: "A consulate office is established only in foreign

countries or cities and that is what we are and have been as far as the US is concerned. After termination of the trusteeship, we become a US soil somehow. Therefore, the consulate office cannot legally stay."

Jayne H. Plank, director for intergovernmental affairs under the Office of Legislative and Intergovernmental Affairs of the Dept. of State, said that the Northern Marianas, when it formally becomes a Commonwealth of the US, will be included within the visa-issuing district of one of the new representative offices in Kolonia, Federated States of Micronesia; Majuro, Republic of the Marshall Islands; and Koror, Republic of Palau.

Ms. Plank said foreign-

ers residing in the Northern Mariana may apply in one of these offices for visas to the United States. "Most well-established Commonwealth resident aliens will be able to obtain non-immigrant visas without a personal appearance before a consular officer by submitting passports and visa applications through the United States Postal Service, which will continue to serve the Northern Marianas and each of the three freely associated states," she said.

Ms. Plank added that applications, together with the necessary documents, may also be submitted through travel agencies and messenger services.

Can a New Appliance Save Money, Too?

When I buy a new appliance, how can I be sure that it will be energy efficient and save money?

Efficient use of appliances starts when you are out shopping for a new appliance. The Department of Energy requires that major appliances such as water heaters, refrigerators, clothes washers and air conditioners have an ENERGY GUIDE label on them. This ENERGY GUIDE label allows you to compare the energy efficiency and estimate the operating costs for these major home appliances.

How can I use the energy guide labels?

They're easy to recognize — they're yellow with black print, and they may not be removed from an appliance before it is sold. They contain information for you, the consumer, to use for comparison

shopping. You can read the ENERGY GUIDE labels to compare different appliances to get the best buy to fit your needs.

What can these energy guide labels tell me?

They can tell you the range of operating costs per year of a particular appliance, and they include a yearly cost table estimated for different electricity rates. With this information you can get a fairly good idea of what the appliance will cost you to operate per year. The ENERGY GUIDE labels also tell you the type of appliance, its capacity, and the capacity ranges of other models included in the cost scale indicated on the labels.

Will energy efficient appliances be more expensive to buy?

Perhaps; although more energy efficient appliances may cost more to buy, you will be saving money in the long run with lower operating costs.

What features should I look for when buying an energy efficient appliance?

When you buy an appliance, be sure to keep your family's needs in mind. Buy what you need; don't pay for extras that add to the price but won't fit your needs. Buy what you need and what you can afford.

Balance the advantages with the disadvantages. For example, a frost-free refrigerator requires 50% more energy to operate than a standard model; however, it will be working at peak efficiency.

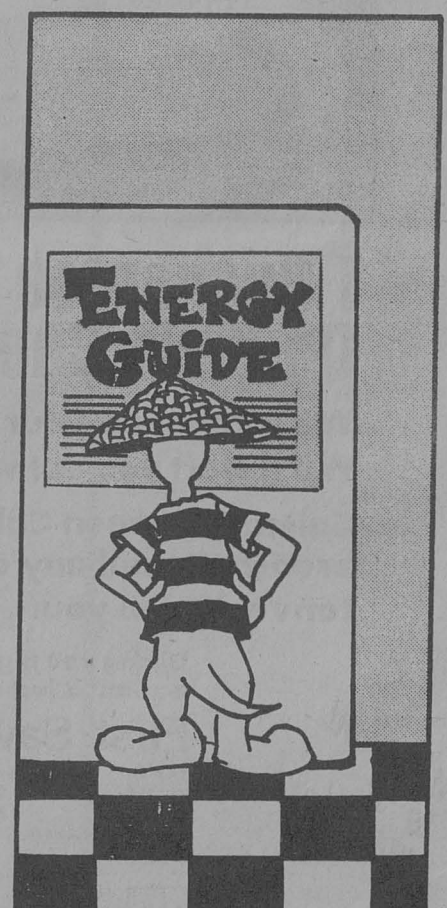

How can I be sure that my new appliance is working at peak efficiency?

Follow the operating and care instructions and directions in the appliance manual. For example, if a refrigerator manufacturer suggests 40°F as an optimal temperature, set yours for 40°F. Make sure that you follow all directions for installation of your new appliance; if you are not able to install the appliance yourself, have the dealer or another qualified person do the installation. Proper use and care will help to maintain efficient operation of your appliance

and ensure that you are getting your money's worth.

Keep all instruction manuals. Check them occasionally to make sure that your appliance is being kept in good working order. And don't forget — if the warranty requires you to mail a card, then do it. It won't do you any good if the warranty for your new appliance is forgotten in the bottom of a drawer somewhere in your house.

For more information, contact the Commonwealth Energy Office on Capitol Hill or phone 322-9236.

MIHA

From page 1

following measures to ensure the success of the project:

1. Advance funds for mobilization may be granted to local sub-contractors to encourage their participation in the project. The concept of a turnkey project, however, must be retained as much as possible.

2. A detailed progress payment schedule for other payments from the funds during construction should be submitted to either CDA or MIHA. This payment schedule should

reflect actual construction completion and actual expense required in payment for the completed work.

3. The bond counsel and underwriter should be informed about the status of the project and enlisted to provide expert advice and consultation to MIHA and the contractor in accordance with their respective responsibilities as consultants to MIHA.

In a press conference Tuesday, Tenorio said banks operating in the Northern Marianas are being encouraged to parti-

cipate in putting up the \$25-million loan.

Governor Tenorio, in a letter to MIHA Chairman Jesus P. Mafnas, told the latter to take into account the lt. governor's recommendations in finalizing the loan agreement. "While both the lt. governor and myself are generally satisfied with the explanations that have been provided us, I am urging that the lt. governor's recommendations be fully addressed," he said.

Projected

From page 1

of the budget projection.

In reaction to the latest financial report, Senator Juan T. Guerrero asked Senator Juan N. Babauta, chairman of the Senate Committee on Fiscal Affairs, to look into the actual revenue collection to determine the deficit in fiscal year 1986.

Guerrero criticized the proposed budget for fiscal year 1987 for not accommodating the anticipated deficit in 1986.

Governor Pedro P. Tenorio originally proposed a fiscal year 1987 budget of \$85.25 million. This was recently reduced to \$84.27 million.

The proposed FY 1987 budget estimates local revenue collections of \$49.9 million or about \$13.1 million or 37 percent higher than the projected net collection for the current fiscal year.

"The projection is out of line," Guerrero said. He added that the respective committees in both legislative houses would

find it hard to come out with a balanced budget based on the governor's proposal.

Major sources of local revenues include gross receipts taxes, total collection of which amounted to \$13.6 million from October (1985) to June (1986) and which is expected to reach \$18.2 million by the end of the current fiscal year; power, water and other fees, \$4.3 million as of June, and \$5.3 million by the end of the fiscal year; and excise taxes, which generated \$3.6 million at the end of June and is projected to generate a yearend total of \$4.9 million.

Aside from these internal resources, the CNMI is also expected to receive \$20.5 million from the Department of Interior, \$18.3 million from other federal grants, \$7.3 million for capital development programs, \$4.2 million for the new hospital and \$1.5 million in other federal grants.

Police

From page 1

ducted Monday at Mariano Falig's property in Capitol Hill yielded 84 suspected marijuana plants. The matured plants could be worth \$20,000, according to Castro.

Falig, employed by the Micronesian Telecommunications Corp. as field supervisor, was still under investigation as of Wednesday and had not been

formally charged in court, according to Castro.

Castro said information about the alleged marijuana crop was provided by concerned citizens. "People are cooperating with us," he said.

The court provided the search warrants to authorize the investigation and confiscation of the suspected illegal plants.

Foot therapy cures kidney trouble

Reflexology is one profession that gives high regard to the lowest part of the human body: the feet. To reflexologists like Earl Warren, the feet are the key to correcting abnormalities in the body, otherwise known as disease.

Warren says that reflexology is the nerve stimulation of the feet which produces reflex action to improve nerve and blood supply. "It aids nature to normalize things," he says.

Mrs. Lorena Yeoman, a medical technologist at the Dr. Torres Hospital, has twice benefited from the healing effects of reflexology.

In December, two months after moving to

Saipan from Florida, Mrs. Yeoman started suffering from backache. It got worse in February. She received treatment at Warren's clinic at San Jose and the backache was gone.

Last July 14 Mrs. Yeoman started suffering from pain which was diagnosed at the hospital as caused by a kidney stone. She was given pain medication and told to drink a lot of water.

The pain came and went. She suffered for 10 hours and for the rest of the day she felt nothing. On July 14 she was back at the hospital and was confined because the pain would not stop. She said she was given a lot of pain medica-

Mrs. Lorena Yeoman and Earl Warren.

tion and morphine.

After six days she was given another examination

which showed that the stone had moved down to the ureter, the tube that

carries urine out of the body. The pain also moved lower in the abdomen and became a 24-hour suffering.

Warren treated her on July 25 and the pain left Mrs. Yeoman for about four hours. Then it came back, this time more severe.

The next day, she went back to Warren's clinic for another treatment and then went home. After an hour the stone passed out of her body and so did the pain.

Mrs. Yeoman said the stone was estimated to measure about four millimeters in diameter. With this size a patient has 90 percent chance of passing it out the natural way. If it is more than four millimeters the patient will have a 50 percent chance.

The stone that actually passed out of Mrs. Yeoman's system measured about seven millimeters.

Warren, who has been in practice for 14 years after completing the four-year reflexology course at the International Institute of Reflexology in California, said he concentrates on prevention through regular treatment. "It is easier to treat a three-day situation than a three-year situation," he said.

Roundup

RAFFLE: Winners in the Mt. Carmel School Alumni Association raffle are requested to come and pick up their prizes no later than Aug. 31. If you fail to claim your prizes within this time period, then we will nullify the winners. The winning ticket numbers are as follows: 4983, 7980, 10758, 10014 and Baby Grand 9737.

If you have the ticket to any of the mentioned winning numbers, please come to Mt. Carmel School office anytime during working hours.

JURY CALL: Prospective jurors of Panel M are requested to report for jury duty at the Commonwealth Trial Court on Aug. 18, at 8:30 a.m. Please call 6401 for any change in trial date. (Clerk of Court).

Melon fly threatens Saipan crops

With the psyllid infestation of tangantangan trees still unchecked, another insect pest, the melon fly, now threatens Saipan's agricultural sector.

Plant Industry Chief Dr. Joaquin Tenorio says the fly was first detected in a routine check of surveillance traps in the Marpi area on July 25. Additional traps were immediately

set up around the island and a check on August 4 found melon flies in 14 of 18 traps.

The melon fly attacks more than 50 species of fruits and vegetables, including such local crops as tomatoe, papaya, eggplant, mango, hot pepper, squash, melon and cucumber. Tenorio says if the melon fly develops a sizeable local population

it could have a significant effect on local agricultural production.

The fly has been on Rota for a few years and the Division of Plant Industry has been working with the U.S. Department of Agriculture (USDA) and the Division of Environmental Quality (DEQ) and the U.S. Environmental Protection Agency (EPA) to obtain an ex-

perimental use permit for an eradication project on that island.

In 1984 the plant industry division asked for a local permit from DEQ for the use of an insecticide (malathion) and attractant bait to be used on Rota. Although the permit was granted, the concurrence of EPA is also required.

The USDA Agricultural Research Service in Honolulu applied for such a federal permit in February. Dr. Tenorio says federal approval was originally expected in June but has not yet been issued. He says that the request must not be modified to include Saipan and Tinian. As of

today, no flies have been found in traps on Tinian but Tenorio says they are very likely to appear there soon.

Director of Natural Resources Nicolas Leon Guerrero left for Honolulu this afternoon to have University of Hawaii and USDA entomologists verify the identity of the flies trapped on Saipan and to ask that the permit request be expedited and modified to include Saipan and Tinian.

The presence of the melon fly on Saipan is expected to have severe impact on local agricultural exports as unaffected countries will fear its introduction on Northern Marianas produce.

PATA president to teach local travel executives

Pacific Asia Travel Association (PATA) President Alwin Zecha and Dr. Dexter Choy, professor at the School of Travel Industry Management at the University of Hawaii, will teach a strategic management for travel agents seminar in Saipan on Oct. 10-13.

This is the first time a seminar has been offered by an international organization to train and certify travel agents in the CNMI.

The seminar which is co-sponsored by the PATA Micronesia Chapter and the Marianas Visitors Bureau will be held at Saipan Beach Hotel. The objective of the four-day intensive course is to enhance the professionalism of management staff in travel agencies.

"We strongly urge owners, managers, and senior supervisors of wholesale and retail travel agencies and related travel operations to sign up for the class," said MVB Managing Director and PATA Board member J.M. Guerrero. "This seminar is designed especially to meet the needs of travel agents in many aspects of their work," he added.

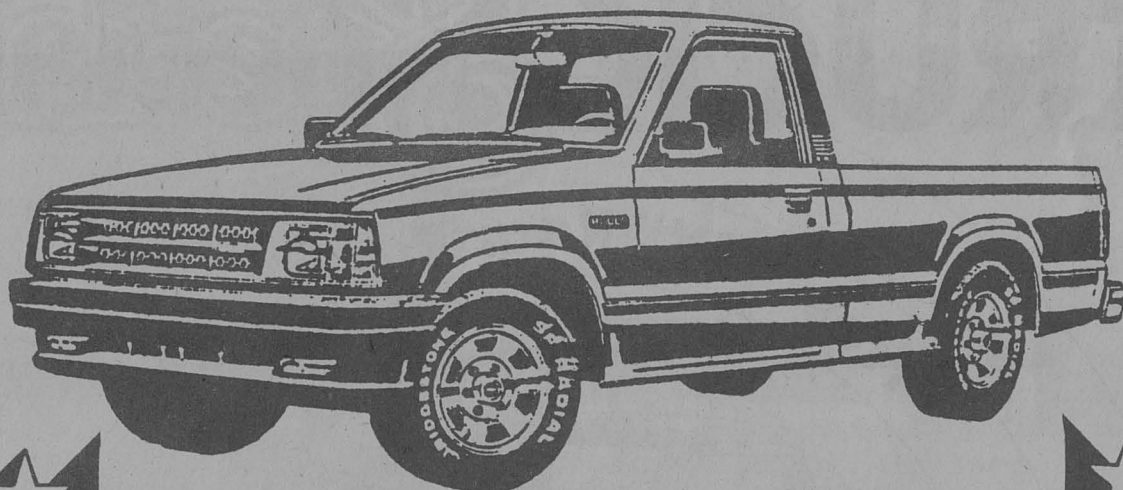

Topics to be covered at the seminar include finance, managing people for profits, selecting target markets, and changes in the distribution system.

"The announcement of the seminar is being circulated worldwide, however priority will be given

to applicants from the Micronesian region including Guam. The class size is limited to 30-40 people and interested

individuals should call our office immediately at 234-8325/8327 for more information, Guerrero said.

\$11.3M to finance capital projects

Governor Pedro P. Tenorio on Monday signed a law appropriating about \$11.3 million in federal funds for capital improvement projects, including the new health center in Saipan.

Public Law 5-17 gives Saipan a total of \$8.11 million, Rota a total of \$1.71 million, Tinian \$1.44 million and the Northern Islands \$30,000.

A total of \$1 million out of Saipan's share will be used to complete construction of the Commonwealth Health Center in Saipan.

Other projects to be funded on the CNMI's main island are: construction and renovation of

classrooms, \$451,000; construction of the San Vicente Elementary School cafeteria, \$66,000; improvements in the schools in San Roque, San Vicente and William S. Reyes, \$33,000; campus fencing at WSR, Oleai and Marianas High School, \$100,000; construction of homestead infrastructure, \$150,000; payment for the fourth and fifth installments on the fourth engine of the Saipan power plant, \$662,000; power distribution and extension project, \$625,000; water system extension and upgrading, \$150,000; sewer system expansion, \$680,000; design and construction of major roads, \$180,000; multi-

purpose auditorium, \$500,000; secondary road improvement, \$108,750; various school construction projects, \$108,750; water production improvement, \$2.71 million and new hospital equipment, \$476,000.

Rota's share will be used for the following: construction of classrooms at Rota High School, \$275,000; and construction of the water distribution system for the Sinapalo Village, \$1.44 million.

Tinian's share will be used for the following: initial payment for two power generators and parts, \$485,000; water system improvement, \$450,000; homestead dev-

elopment, \$135,000; construction and renovation of classrooms, \$130,000; architecture and engineering phase of a cafeteria, \$30,000; architecture and engineering phase of a vocational building, \$15,000; school fencing, \$40,000; water improvement and distribution, \$68,500; and site development for a 24-unit housing

project, \$83,500.

A total of \$5,000 will be used to renovate the dispensary in Agrihan in the Northern Islands and \$25,000 for the construction of classrooms.

Actual release and use of the funds will depend on appropriation by the federal government.

DNR, NMC test pepper variety

SAIPAN (CNS) — Preliminary results are now in from the Bell Pepper Project, a joint effort of the Department of Natural Resources and the North-

ern Marianas College.

Using production of marketable fruit as the key criteria, the preferred large varieties are Big Bertha and Argo and the preferred medium varieties are Yolo Wonder L, Bell Boy and Wonder Boy. One variety, Emerald Giant, which has been a local standard for years came out almost exactly in the middle of the varieties tested. Production of marketable fruit is based on crop yield and local market preference.

The two year project, which tested 28 varieties of bell pepper on Saipan, Tinian and Rota, to determine the best for local production, has been run by the college's Charles Frear and Research Supervisor George A. Manglona. Frear says there were no significant differences in production among the three main islands but adds that production is usually better during the dry season.

Frear says that a research bulletin on technical aspects of the project will be released this fall along with an extension publication discussing the relative merits of each variety in terms of yield, number of fruit per plant, weight of the fruit, disease resistance, plant height, consumer preference and storage life.

The two project officials will provide a poster presentation on their research at the 22nd International Horticultural Conference at the University of California at Davis from August 10-18.

Textile bill override attempt fails

WASHINGTON (AP) — The House of Representatives has rejected an effort to revive a bill which would limit U.S. imports of textiles, clothing and shoes as a measure vetoed by President Ronald Reagan eight months ago.

Reagan expressed satisfaction at Wednesday's 276-149 vote, eight short of the two-thirds needed to override the veto.

"We had to get 142 votes of those present in order to prevent them from overriding my veto.

... We got 149. So your present speaker comes before you as a very happy fellow, Reagan told a drug and alcohol abuse conference.

The House action ap-

parently put an end to the debate over the textile bill, which had been the spearhead of the trade battle in congress as U.S. imbalances in world markets reached record proportions.

No further action by the Senate was needed.

The measure would have rolled back garment and fabric imports from major producers, such as Hong Kong, Taiwan and Korea, to 1980 levels, cuts estimated at up to 30 percent of current levels.

Other textile and apparel exporters would have gotten lesser rollbacks. Canada and the European Community would have been exempted from the measure, a factor that

prompted complaints of racism against the bill in Asia.

Shoe imports would have been confined to 60 percent of the U.S. market and the Reagan administration would have been urged to negotiate copper production quotas with foreign suppliers.

After the vote, U.S. Trade Representative Clayton K. Yeutter reiterated that the measure would have violated a number of agreements with other countries and wrecked U.S. credibility at international bargaining tables.

House critics of the bill expressed the same fear, along with skepticism that imports have been as much

to blame as automation in a steady loss of U.S. textile industry jobs.

There will be another trade vote Nov. 4, House Speaker Thomas P. O'Neill Jr. said.

Kohn N. Gregg, chairman of the fiber, fabric and apparel coalition for trade, said, America's fiber, textile and apparel industry and its two million workers have lost the battle but not the war against unfair trade.

Representative Ed Jenkins, leader of the textile coalition in Congress, tried to summon support from a wide array of import-threatened industries as he made a final appeal to override the veto.

"I have helped microchips, I have helped steel, I have helped automobiles and I have helped wheat," he said.

The measure was approved by the House, 255-111, on Dec. 3 and vetoed by Reagan two weeks later.

Resident Representative Froilan C. Tenorio welcomed the vote as "extremely good news for the Northern Marianas garment industry."

H.R. 1562 was a very protectionist trade measure that would have completely ended the development of a textile industry in the NMI. Under the bill, which was passed by both houses of Congress last year, the NMI is treated as a foreign country and the textile products of its industry would be subject to the worldwide quota system.

According to Tenorio, the NMI quota would be based on its 1984 production levels. "Because our industry is so new, this would mean that in most product categories, the Marianas manufacturers would be virtually shut out of the U.S. market," he said. "Even our oldest manufacturers, the sweater companies, would have had their quota reduced by more than 40,000 sweaters."

Tenorio said that he was very happy to see the override effort fail because he had written to the White House last year urging that the measure be vetoed because of the bill's unfair treatment of the flag territories and Commonwealth as compared to the treatment of many developed foreign countries.

"This vote removes one more obstacle to the development of a manufacturing sector within our islands' economy.

"It is now up to the industry to demonstrate that they can produce a competitive product with maximum involvement of our local workforce. "If they can," he added, "Then I am hopeful that they will become a permanent part of our islands' economy."

Jet ski restriction gains support

Banning jet ski use anywhere in the Saipan Lagoon was advocated during a public hearing earlier this week and received support from several others in attendance.

Mrs. Jean Sakovich, a local swim coach, said she could no longer use any part of the lagoon for her classes because jet ski traffic made it unsafe. Other swimmers and small boat owners agreed. Jet skis are particularly dangerous as tourists are

learning to use them, or when driven as "hot rods," it was noted. Others complained that tourists are not steering clear of hotel-front swimming areas.

The well-attended hearing, conducted by the Coastal Resources Management Office, was intended to address general recreational uses of the lagoon, but the real issue turned out to be Saipan's newest tourist service — jet ski rental. Nearly 60 people

turned up at the Convention Center for the two hour-long hearing that was dominated by discussion of jet ski use. Four vendors currently hold temporary permits to rent a total of 20 jet skis in the lagoon; application from a fifth to operate an additional five skis is pending. The number of privately operated jet skis on island is unknown, but predictions were made that the total could rapidly grow into the hundreds

if limits are not set.

A proposal, unveiled at the hearing, to allow jet ski launchings from only two areas — between the Hafa Adai Hotel and the Samoan housing area on the north, and between the Diamond Hotel and the southern end of Civic Center Beach on the south — received broad support from hearing attendees. The proposal would prohibit jet skis from coming within 200 yards of the shore on all other lagoon beach front, and ban them entirely from the far north and

south parts of the lagoon.

Strongest advocate for the sport was Bruce Talley, a recently-arrived Guamanian and operator of one of the jet ski rental services. Talley refuted the unsafe charges, insisting that since jet skis are small, have no propeller but do make engine noise, they are safer than larger, but silent, Hobie cats or propeller-driven boats.

Input from the hearing will be used by the Marianas Visitors Bureau in developing beach vendor regulations.

Special assistant Ramon S. Guerrero receives a certificate of appreciation from Lt. Col. David Harri-gan as Governor Pedro P. Tenorio looks on. The certificate was signed by Brig. Gen. Thomas Leighton, deputy commanding general of the US Army Western Command. Frank Dela Cruz and Frank Duenas, also from the governor's office, received similar certificates.

FREE 5 GALLONS SPARKLE-CLEAN DRINKING WATER

House approves new Covenant funds

The lower house of the United States Congress have passed the legislation to implement the new Covenant funding agreement which gives the Northern Marianas a total of \$228 million for government operations and capital development in seven years, Lt. Governor Pedro A. Tenorio said Tuesday.

In a press conference, Tenorio said he received a call from Washington last Saturday informing him

about the passage of the funding legislation.

The funding agreement which was signed in July last year by CNMI representatives headed by Tenorio and Reagan's representative, Assistant Interior Secretary Richard T. Montoya, covers the period from 1986 to 1992.

Another bill which was passed by the House of Representatives Aug. 1 assure that the Northern Marianas will get the full amount provided under

the funding agreement instead of being reduced by the Gramm-Rudman-Hollings Act.

Section 19 of HR 2478, according to an analysis from Guam Delegate Ben Blaz' office, "authorized appropriation for the bill and provides for the full payment of funds committed to Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands pursuant to the laws establishing their relationships with the United

States."

Section 10 of the same bill "requires the granting of \$228 million to the Northern Mariana Islands for fiscal years 1986 to 1992 for local government expenses, capital development, pension reform and hospital start-up costs."

According to the statement from Blaz' office, HR 2478 or the Omnibus Territories Bill assures the return to Guam of Section 30 (tax money) funds without the cuts author-

ized under the Gramm-Rudman-Hollings Act.

During the press conference, Tenorio noted that HR 2478 was passed only by the House and must still be acted upon by the Senate.

He said that during previous congressional hearings he testified that the impact of the Gramm-Rudman-Hollings Act should not apply to the Covenant funding agreement.

Problems remain in Koblerville project

Many problems exist for current Koblerville residents, according to Acting MIHA Executive Director Felix Ayuyu, most of those same problems will also face the people who move into the 140 new homes about to be built there.

Koblerville resident Eddie Deleon Guerrero said the water is not even available the promised six hours per day, power fluctuations burn out the appliances, plumbing fixtures keep breaking, the houses themselves leak from wind-driven rain, the

paint peels off, and natural ventilation is so poor even the inside walls are hot to the touch.

"Even I fix the leaks, in three months they start leaking again, and I have to do it all over," he told government officials and others at a recent hearing on MIHA plans to expand the Koblerville turnkey housing project. "I don't think any new houses should be built until the problems are fixed," he added.

Ayuyu agreed there were problems, but said the construction contracts

were already in effect and could not really be changed. "We plan to eliminate the wood panels under the windows, to upgrade the hardware, and to substitute louvers for the windows so they can be replaced when they break," he said, but the basic house plans cannot be changed.

Asked if the Energy Office had been consulted on developing energy-efficient house plans, Ayuyu said he did not think so. Maybe in the next development, he said, they could consider higher

ceilings, more windows and roof overhangs, as was being suggested. Water catchment systems and outdoor kitchens were originally part of the design but were not included in the final construction contract because they would have made it too expensive.

The site itself is partly at fault, acknowledged another MIHA staff member, since it is on an old airstrip, and all the concrete just absorbs and reflects the heat; there are no trees or grass to help coll it off.

"Breaking up the ground to plant trees is very hard," Deleon Guerrero added. "I know, I've been trying." Deleon Guerrero said trees were the only way to try make the house cooler. "Right now I have to run three

big airconditioners all day to do that."

Questions were also raised about the status of plans for a park and other community facilities. "There are plans for a police and fire substation, and for a community hall," MPLC planner Frank Guerrero said, "but there is no money for them."

The sparsely-attended hearing was conducted by the Coastal Resources Management Office on Wednesday evening, Aug. 6, in conjunction with MIHA's application to build an additional 140 turnkey homes in the As Gonno project, and to install water and sewer lines for an additional 150 homestead sites.

STOP THE RADAR

YOUR HELP IS NEEDED TO STOP THE INSTALLATION OF THE U.S. AIR FORCE RADAR TRACKING STATION IN THE CNMI.

If this radar is put in the CNMI, we will surely be on Russia's target list for a nuclear bomb and all of us, including you and your children and your relatives, will die if there is a nuclear war. There is no defense against it. The U.S.A. cannot defend the CNMI against a nuclear missile. They will not even try. Our only defense is to keep the radar station out of the CNMI.

HOW CAN YOU HELP?

1

WRITE A LETTER NOW TO Gov. Pedro P. Tenorio, or cut the letter below, sign it and send it to the Governor:

The Honorable Pedro P. Tenorio
Governor, CNMI
Saipan, CM 96950

Dear Gov. Tenorio:

This will demonstrate to you that we, the people of the CNMI, are completely against the installation of the proposed U.S. Air Force Radar Station anywhere in the CNMI.

We refuse to become a nuclear target which the U.S. military may consider "expendable" to protect the continental United States. We believe that if the radar station is installed here, we will be placed on Russia's target list. The U.S. Air Force may say that the radar is of minor military significance, but the Russians will not believe them even if some of our citizens do.

We expect you to veto this U.S. Air Force proposal in response to the demands of your people.

Sincerely,

Please make copies for your friends to sign.

2

WRITE A LETTER NOW to our Washington Representative, Froilan C. Tenorio, or cut out the letter below, sign it and sent it to him at his Washington address:

The Honorable Froilan C. Tenorio
Commonwealth of the Northern Mariana Islands
Resident Representative to the United States
2121 R. Street, N.W.
Washington, D.C. 20008

Dear Mr. Tenorio:

As proven in a recent petition of more than 1,000 signatures, more than 95 percent of the Saipanese people oppose the installation of the U.S. Air Force PACBAR III Radar Station in Saipan or anywhere in the CNMI. Out of every 100 persons asked, 98 signed the petition according to the people gathering the signatures.

Subsequently, the CNMI House of Representatives passed House Joint Resolution 5-13 by a vote of 10 to 1. This resolution strongly opposes the radar station within the CNMI.

We understand the funding for this radar is being considered in the U.S. Congress now in the FY'87 DOD authorization bill. Please do everything possible to kill the authorization and funding for this radar station within the CNMI immediately. Try contacting Messrs. Schroeder, Green, Downey, Markey, Bennett, Mavroules, Fazio, Dicks, Fascell, and Aspin in the House, and Johnston and Evans in the Senate for possible support of this denial.

Sincerely,

Please make copies for your friends to sign.

3

SEND US ONE DOLLAR or more so we can buy: newspaper space, print postcards for you to sign, and pay for other minor expenses. WE GUARANTEE that NO MONEY will be used for personal gain or political purposes. All money left over after this effort is successfully completed will be used for a people's barbecue or be given to charity. Send your \$1.00 to:

Third World trade future bleak

BANGKOK (UNIS) — World trade is likely to make substantial gains this year, but the trade outlook for developing countries in Asia and the Pacific appears bleak, says Indian Minister of State for Commerce Brahm Dutt.

Minister Dutt said, in a statement at the recent Asia-Pacific Trade Ministers' Conference, that prices of commodity exports from developing countries have not stabilized. Synthetic substitution and high real interest rates have combined to maintain downward pressure on commodity prices.

As a result of the fall in commodity prices, he said that, in real terms, there has been a very large net outflow of resources from the developing to developed countries.

The situation of depressed commodity prices is being compounded by measures taken in developed countries for curtailing market access through the excessive use of production subsidies and for unloading large surpluses in world mar-

kets, he said.

To secure commodity prices, which are remunerative to producers and fair to consumers, he urged that the Common Fund for Commodities be made operational as "quickly as possible" and interest revived in negotiating intergovernmental commodity agreements.

China's Vice Minister for Foreign Economic Relations and Trade Wang Pingting traced "the source of difficulties (of) developing ESCAP countries (to) the existing unjust and unfair international economic order."

Since these are problems of international character, he said that they could never be resolved by any individual country.

The Government of China, therefore, considered the Trade Ministers' conference as an appropriate forum not only for reviewing trade and economic developments but also for formulating measures necessary for regional expansion of trade and economic cooperation.

Meanwhile, two South-east Asian nations --

Thailand and Indonesia — expressed support for the new round of multilateral trade negotiations scheduled for September this year. The negotiations, they said, would provide an appropriate venue for all trading nations to join in a worldwide effort to combat protectionism.

A commitment by developed countries to help end unfair trade practices "will inspire all of us to participate fully in the negotiating process," said Aried Riyadi, Indonesian ambassador to Thailand.

Thai Deputy Director-General of Business Economics Department Krirk-Krai Jirapaet blamed "unfair trade practices," such as subsidized on production and exports by some developed countries, for the decline in commodity prices.

"For the world trading system to operate efficiently and equitably," the Thai delegation added that "all trading nations, big or small, must be given full opportunity to compete on a free and fair basis."

Kosrae News Committees revamped

Kosrae State Legislature Speaker Thurston K. Siba has made some reshuffling of the committee members.

The reshuffling was made in order to improve the committee's performances, duties and the member's participations.

The Committee on Justice, Law and Legislature includes Chairman Hiteo Shrew, Vice Chairman Joshua Saimon, Floor Leader Gaius Nedlic, members Fred N. Skilling and James R. Palsis. With the reshuffling, Akira Tosie took the place of

Fred N. Skilling.

On the Committee of Finance, Budget and Development, Donald Jonah, chairman Renster Andrew, vice chairman, with the new members Fred N. Skilling and Luey K. Luey. Vice-Speaker Palsis is also a member of the committee.

The Committee on Government, Service and Municipality includes Peterson Benjmain Chairman. Other members are Kasuo Isisaki, Asher Asher, James Palsis, and new member Moleince Kephas.

Student gets grant

Kosraean student Marris K. Jackson of Tafunsak has received a \$2,000 scholarship from the Monsanto company in St. Louis, Missouri.

Marris is the son of Kiyus and Tulpe K. Jackson. Kiyus is the state immigration officer.

The scholarship was awarded through an innovative scholarship program set up by the Educational Assistance Ltd., a non-profit organization which financially assists college students through the cooperation of businesses and academic institutions.

Companies, like Monsanto, donate excess materials and equipments to colleges, which in turn provide scholarships to students.

The scholarships are given on a one-time basis and are credited to the students' account.

This is the first time Kosraean student has received scholarship from this company.

Jackson is a 1980 graduate of the Kosrae High School, and will be attending Park College, Parkville, Missouri.

Black skull shakes evolution theory

By Michelle Faul

Nairobi, Kenya (AP) — British, U.S. and Kenyan scientists have unveiled a fossil called The Black Skull, which they say shakes important theories on man's evolution and could cause revision of biology textbooks.

"This throws cold water on the notion that as recently as three million years ago there was only

one species (of early man) which rise to the others," said Richard Leakey, Kenya's National Museum Director and a member of the expedition that discovered the fossil in August 1985.

The fossil was discovered by Professor Alan Walker, a scientist from Braunstone, Leicester in England.

"It came as a surprise to us when this turned

up, and I think some of our colleagues are in for a shock," said Walker, a professor of cell biology and anatomy at the Johns Hopkins Medical School in Baltimore, Maryland.

Walker and Leakey, the son of Paleontologists Louis and Mary Leakey, told a news conference Wednesday the find supports their theory that there was more than one species of primitive man, three million years ago.

It strongly questions a rival school of thought led by U.S. paleontologist Don Johanson that at that time there was only one type of early man, like Lucy. Lucy is the nearly half-complete skeleton that Johanson discovered in neighboring Ethiopia in 1975, for which he named a species called *Australopithecus Afarensis*.

Leakey said the skull was going to raise many questions about things that have been taken for granted, about things that have been believed by some of our colleagues, and taught for example through most textbooks in the United States, for the past 10 years.

The skull belonged to adult male who roamed the western shores of Lake Turkana in remote northern Kenya 2.5 million years ago. It is the oldest specimen ever found of a species of early man called *Australopithecus Boisei*.

It has extremely primitive characteristics, including an ape-like forward-thrusting face and a brain that is the smallest of any fossil hominid measured to date, the scientists said. The brain was about the size of a modern apes, and less than a third the size of a human brain, they said.

Expert Eric Delson said in a later telephone interview that the skull was the most important find since Lucy.

Delson, of Lehman College of City University of New York, said the new species suggests the possibility of a different lineage that is now widely accepted for human ancestors in the mysterious time period ranging from 4 million to 2 million years ago.

On the oldest side of the gap is the ape-man *Afarensis*, represented by Lucy. A commonly ac-

cepted view, Delson said, is that the family tree splits after that, with one branch giving rise to *Homo Habilis* about 2 million years ago. *Homo Habilis* apparently led to modern man.

The other branch, the view maintains, led to a species called *Australopithecus Africanus*.

That led to two robust species called *Australopithecus Boisei*, which the new find represents, and *Australopithecus Robustus*. This branch was an evolutionary dead-end without any descendants alive today.

The new discovery, Delson said, has physical characteristics that suggest it could be a good intermediate between *Afarensis* and the robust species, displacing *Africanus* from that role.

Since *Africanus* shares some physical characteristics with *Homo Habilis*, it now seems best to return *Africanus* to the branch that led to modern humans, coming before *Homo Habilis*. That was a commonly accepted role before Johanson's theory gained acceptance, Delson said.

Sablan, Arriola act on problems

Democratic Representatives Pedro C. Arriola and Vicente M. Sablan took action and replaced the broken boards, nets, and other items so that the youths and residents of Susupe can again use the basketball court in the village.

Arriola and Sablan reaffirmed their strong positions in the development of youth activities and other community projects in their areas.

They paid that efforts are currently being undertaken to improve the other basketball courts in District No. 1, 3 and 4.

The two Democrats also asked Public Works Director John C. Pangelinan to repair the poor roads in Chalan Kanoa and Susupe villages.

Arriola and Sablan

noted that the residents of the two village were anxiously waiting the improvement of these poor roads in the area to prevent possible accidents.

They noted that improvements of the roads will enable vehicle drivers to drive safely and properly. More importantly, residents will save on transportation expense if the roads are improved.

In another letter to Pangelinan, Arriola noted the serious health problem confronting the residents of Susupe and Chalan Kanoa which must be corrected at once.

He stated that overflowing of the sewer manholes in certain sections of the villages not only pose health problems to these residents but to visitors as well.

Forum to discuss French nuke tests

SUVA, Fiji (AP) — French nuclear testing and the independent struggle in New Caledonia are expected to dominate the 13-nation South Pacific Forum conference which opens in the Fijian capital tomorrow.

Members of the South Pacific Forum are Australia, Cook Islands, Fiji, Kiribati, Nauru, New Zealand, Niue, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Western Samoa and Vanuatu.

The chief items of busi-

ness during the three-day meeting will be the continuing French rule of New Caledonia, French nuclear testing in the Pacific and efforts by Forum members to gain international acceptance of the proposal that the South Pacific be designated a nuclear free zone.

Jean-Marie Tjibaou, leader of the Kanak Socialist National Liberation Front, met Fiji Prime Minister Rato Uir Kamise-Mara yesterday to seek his support for the Kanak

campaign to have new Caledonia put back on the United Nations list of colonies.

France withdrew New Caledonia from the list of colonized territories in 1947 and has maintained ever since that it is an integral part of France.

Supporters of New Caledonian independence have expressed concern that momentum for independence in the nickel-rich French territory, was stalled since the change of administrations in France

last spring.

Vanuatu Prime Minister Walter Lini, an Anglican priest, said the Melanesian countries would push to have the Kanaks given observer status at the Forum meeting.

French Polynesian President Gaston Flosse is also seeking observer status. Flosse is also secretary of state for the South Pacific in the French national government.

His efforts to gain observer status have been viewed by some Pacific

leaders as an attempt by France to gain a voice in the Forum, which consistently has been critical of French activities in the region.

Lini also plans to ask the Forum to consider a regional peace-keeping force organized by Forum countries.

An underlying issue at the meeting will be the Soviet Union's overtures to negotiate fishing rights with the tiny island states. Australia and New Zealand.

Textile bill's death applauded

TOKYO (AP) — Industry and government officials welcomed yesterday the U.S. House of Representatives' failure to override a presidential veto of a bill imposing stiff import limits on textiles.

Common sense in the House won against protectionism, said Hiroshi Yamamoto, a senior official of the Japan Textile Products Exporters' Association, a group of 450 Japanese textile-related companies.

If such a restrictive textile-import bill would have passed, the world's textile trade would throw into confusion, he said.

The bill was introduced and passed by the U.S. Congress last year, but vetoed by U.S. President Ronald Reagan last December.

In a 276-149 vote Wednesday, the House failed to garner the two thirds majority needed to override Reagan's veto. Further action by the U.S.

Senate was not required to uphold the President's action.

The bill, which involved textiles, clothing and shoe imports, would have sharply cut textile imports, particularly from low-wage Third World nations.

An official of the international trade division at the Ministry of International Trade and Industry (MITI), who refused to be identified, said, we are pleased.

Airman guilty of espionage

Beale U.S. Force Base, California (AP) — An airman was found guilty of espionage Wednesday for passing classified U.S. Air Force documents to undercover FBI agents posing as Soviet spies.

Airman 1st Clss Bruce Ott was convicted by Lt. Col. Howard Sweeney, who deliberated for two days after testimony ended in the court-martial.

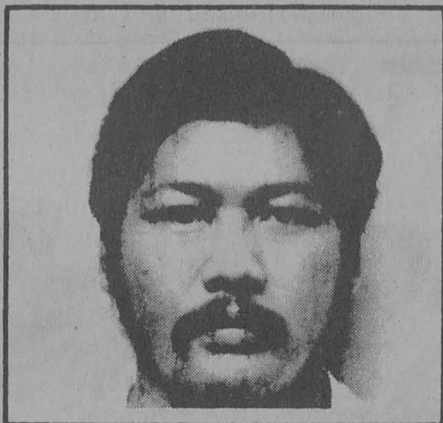

Ott, 26, faces up to 32

years in prison.

He was arrested Jan. 22 after he allegedly passed a copy of an Air Force strategic Air Command regulation relating to the SR-71 spy plane to two FBI agents posing as Soviets.

Ott was charged with contacting the Soviet consulate in San Francisco without obtaining permission and with taking the air command regulation.

LOOKING UNTO JESUS

Text: "Looking unto Jesus, the Author and Finisher of our faith..." (Heb.12:2)

LOOKING UNTO JESUS IN THE SCRIPTURES

to learn there what He is, what He has done, what He gives, what He desires; to find in His character our pattern, in His teachings our instruction, in His precepts our law, in His promises our support, in His Person and in His work a full satisfaction provided for every need of our souls.

LOOKING UNTO JESUS CRUCIFIED

to find in His shed blood our ransom, our pardon, our peace.

LOOKING UNTO JESUS RISEN

to find in Him the righteousness which alone makes us righteous, and permits us, all unworthy as we are, to draw near with boldness, in His Name, to Him who is His Father and our Father, His God and ours.

LOOKING UNTO JESUS GLORIFIED

to find in Him our heavenly Advocate, completing by His intercession the work inspired by His loving kindness for our salvation (1 John 2:1); Who even now is appearing for us before the face of God (Heb.9:24), the kingly Priest, the spotless Victim, continually bearing the iniquity of our holy things (Ex.28:28).

LOOKING UNTO JESUS

and not at ourselves, our thoughts, our reasonings, our imaginings, our inclinations, our wishes, our plans; nor at our meditations, and our prayers, our pious conversations and our profitable reading; nor yet at our taking part in the gatherings of our church, nor even to our partaking of the Communion, but unto Him who alone IS the living Bread.

LOOKING UNTO JESUS

and not at our faith. The last device of the adversary, when he cannot make us look elsewhere, is to turn our eyes from our Savior to our faith, and thus to discourage us if it is weak; to fill us with pride if it is strong; and either way to weaken us. For power does not come from the faith, but from the Savior BY faith. It is not looking at our LOOK; it is LOOKING UNTO JESUS.

of the United States Armed Forces (Army) my duties are to protect the constitution of the U.S. and its territories and those countries friendly to the United States of America. We are one of those territories.

Sincerely yours,

Donald M. Fleming

Earhart story fine, but...

Dear Editor:

I wish to thank you for your fine article on Amelia Earhart, but it contained two surprises that invite comment.

First, some of the names and facts were not accurately stated. The Roosevelt who had the airfield built was FDR not TR. There were spelling problems with several names, including mine.

Second, I thought the article was to serve a different purpose. Over the years many people here have helped me examine the stories told by Goerner, Gervais, Davidson and others. If any of these fine people object to my publishing the results of the research I will not go public with the findings. Their friendship is far more important than any book.

That message didn't come through in the article. If there are any comments or reactions please contact me. Just leave a message at the college.

s/Damon G. Nalty

Did they miss PL 5-13 issue?

Dear Editor:

It was surprising to find out that the Speaker and President of the Senate are such financial wizards. They seem so certain about the tax consequences of millions of dollars. Why do they have so much trouble handling the finances of their respective houses?

Mr. Speaker and Mr. President, you missed the main point of the controversy over Public Law 5-13. That is, the lack of a public hearing and the speed at which the law was passed. The Fifth Legislature started an ugly precedent with the poker machine bill—no hearing. The same thing happened with Public Law 5-13, section 5. Then you end up explaining and defending your laws, after the fact, in the editorial column. Now you are doing it with all these bonds. What's next gentlemen? Have you forgotten that you were elected to represent us? We shall gently remind you of that obligation—in next election.

One final question for you tax geniuses. If a person can manipulate his income over a period of years which you describe to stay within the 95 percent rebate, why did you even bother to pass this tax law? It is not our tax laws that will discourage investors—it's our flaky legislators.

s/Bernard S. Guerrero

Cable TV speaks on Rota action

Dear Editor:

I was quite surprised on August 1 to see front page articles in both the Marianas Variety and the Marianas Review on Rota Cable TV. I was surprised because some serious allegations were made regarding Saipan Cable and Guam Cable, yet no effort was made to contact either one. In the interest of accuracy and fairness, a responsible journalist would have contacted all parties involved. Since that was not done at the time, I am writing this letter of explanation.

Our disconnect policy is very simple, and I believe, very fair. If a subscriber has not paid the current month's charges by the 10th of the month, a reminder notice is sent out. If by the 20th of the month the account is still delinquent, a disconnect is prepared and processed in the field.

July reminder notices

were sent from Saipan to Rota on July 9. Disconnects on Rota were processed on July 23 which should have given subscribers two weeks to resolve any questions which they had on their account.

If a mistake is made and an account is disconnected in error, it is our policy to reconnect the account at no charge and give the subscriber 5 days free service as compensation for the inconvenience.

Any Rota subscribers disconnected in error will be promptly reconnected at no charge, under the above policy, and given the five days free service. We are currently investigating to determine why so many Rota subscribers were disconnected. Upon completion, a complete report will be made to the people of Rota.

On the related topics of rates and programming I would like to point out that normally the rates are higher and the programming not as extensive in smaller systems. This is true because it takes the same costly electronic equipment to serve a very few subscribers as it does to serve many thousands. Even on the mainland, where it costs less to operate a cable television system, most communities the size of Rota do not have cable television because they are too small to be economically feasible.

When we purchased the Tinian cable system, the rates were \$28 per month for two or three channels, and were soon to be raised to \$50 per month. We did

not raise the rates and we are currently building a microwave system to bring all Saipan programming to Tinian.

We have investigated the possibility of a microwave system to Rota from Guam to increase Rota programming and reduce expenses. However, with current technology the distance appears too great.

Even though we operate at a loss in Rota, we will continue to investigate ways to make Rota a profitable business and improve services.

On August 23, we will be adding an additional channel of programming for Rota subscribers.

We hope this and future improvements make Cable TV a valuable service for the residents of Rota.

Sincerely,

Northern Marianas Cable TV Corp.

Harrison O. Flora
Group Vice President

NOTE

The writer of the story was in Rota on July 28 when the disconnected viewers wrote a petition expressing their concerns. After the reporter returned to Saipan, he called the manager of Saipan Cable TV before lunch on July 30, but the young lady answering the phone said the manager was out of the office at that time. Eric Williams, manager of Rota Cable TV, was in the studio in Oleai Village at that time, and the reporter identified himself and in-

vited him for lunch so he (reporter) could get Cable TV's side of the story. But Williams said he could not come because he was busy, trying to finish up his business before departing for Rota on that day at 5:15 p.m. So they talked on the phone, and the contents of the petition were read to Williams, and he responded to each of the concerns. The story was responsible because both sides of the issue were presented.

Sumitomo to invest in Goldman

TOKYO (AP) — Sumitomo Bank Ltd., Japan's third-largest city bank, has agreed in principle to invest about \$500 million in Goldman Sachs and Co., a leading U.S. investment bank based in New York, according to a statement issued yesterday by the company.

The investment will be a limited partner arrangement under which Sumitomo has no rights to vote on Goldman's management committee, Sumitomo's release said. It said Sumitomo's participation ratio to expected profits of the U.S. bank would become about 12.5 percent by the end of 1988.

Sumitomo said it decided to invest in Goldman to meet with trends of an international financial market diversifying and highly developing.

EDUCATION

314 complete summer elementary courses

Some 314 students from all public elementary schools in the Commonwealth last week received certificates for completing summer school, according to summer school coordinator Connie T. Kaufer.

Education Superintendent Henry I. Sablan and CLASP project director

Kaufer signed the certificates for the eighty (80) teachers and for the site coordinators and principals at the schools who taught and coordinated the five-week program.

The teachers and site coordinators signed the students' certificates for completing the lessons in

language arts and math.

"This is the first time a planned summer school for all the elementary schools was coordinated through the education superintendent's office," Kaufer said. "Planning was done to coordinate the summer program in April and the summer school

rest had theirs June 30-August 1.

"Everyone enjoyed the program because of the small size of the student enrollment," Kaufer said.

A luncheon was held last Thursday at Canton Restaurant in Garapan where the teachers, vice principals, and site co-

ordinators received their certificates of appreciation.

staff were oriented about the program on June 20."

Tanapag, Garapan, and Tinian elementary schools held their summer school June 23-July 25; and the

7 receive special education scholarships

Seven Northern Marianas residents have received special education scholarships to study on the U.S. mainland and Hawaii, according to special education coordinator Daniel Nielsen.

Bernadino Taitano, a teacher at W.S. Reyes Elementary, and Suzanne Lizama, principal at Marianas Preschool, will leave Saipan this month for the University of Hawaii, where they will spend fifteen months working for their masters degrees in childhood development.

Also leaving Saipan this month are Carleen H.

Palacios, an occupational therapist aide at W.S. Reyes Elementary, and Michelle Mendiola, a recent graduate of Rota High School, who have four-year scholarships to work for their bachelor's in occupation therapy at San Jose State University in California.

Also given four-year scholarships to work for their B.A. in Physical Therapy are Corrine Anna Hofschneider and Macy Reyes, both 1986 Marianas High graduates. They will leave Saipan in January to study at the University of California at San Francisco.

Acelia Babauta Castro, an account clerk at the Education Department, will leave Saipan next January to work for her B.A. in Early Childhood Development for four years at the University of Hawaii.

The scholarships were made available by a Special Education proposal recently approved by Washington, Nielsen said, adding that Education Superintendent Henry I. Sablan and other local leaders were instrumental in seeking the proposal's approval.

According to Nielsen, the scholarship winners

were selected on the basis of their high grade point average, their ability to speak and write English, their fulfillment of entrance requirements, and their sincerity to return to the Northern Marianas and apply what they learned from their studies.

He explained that one advantage of selecting local people for these scholarships is that they will eventually take over the special education jobs now being held by personnel brought in from the U.S. mainland and the Philippines.

"It's very expensive to recruit off-island people,

who are at a disadvantage because they can't speak the local languages, making it hard for them to talk to children with special needs," Nielsen said. "Having local people selected for these scholarships will also reduce our expenses for hiring off-island personnel."

Operating on a one-million-dollar budget, the special education program in 1986 served over 450 students in 12 major programs, including multiple programs in Tinian and Rota, Nielsen said.

The program has a total of 60 teachers and staff including occupational and speech therapists,

DPS building converted to classroom

The former Department of Public Safety building in Rota has been renovated as a classroom for Rota High School.

The building will be ready for student occupancy when the school opens for school year 1986-87, Rota High School officials said in Rota last week.

The high school, with an enrollment of 115 students, now has seven classrooms situated on the school campus.

The former DPS building is about half a mile from the campus, requiring students to be bused to the building and back to the high school campus for other classes.

"We need CIP (capital improvement project) money for two more classrooms, a vocational building, one administration building, and one library," the officials said.

Art coordinators meet in Saipan

Artist-in-Education coordinators from the American territories in the Pacific held their meeting at the Convention Center on Capitol Hill here Aug. 5-7.

Attending were Ann Cortez of American Samoa, Paula Bamba of Guam, and Sandy McKenzie of the Northern Marianas.

Jocelyn Young, an arts-in-education consultant from Alaska, also attended the meeting as a facilitator. Also present were Olinka Cabrera of the Commonwealth Council on Arts and Culture and Maria Crisostomo, an Arts Council member.

Governor Pedro P. Tenorio and Education Superintendent Henry I. Sablan welcomed the participants and wished them a fruitful meeting in an August 5th luncheon held at Hyatt Regency.

At the meeting, the

Artist-in-Education Pacific Regional Committee members discussed new guidelines the National Endowment for the Arts has set up for the committee and how these guidelines can be implemented.

On Thursday, some of the artists who worked for the local Artist-in-Education program met the participants and discussed arts in the local schools. Artists who were in the program included Paul Perry, Doug Rankin, J.D. Crutch, Manny Perez, Balbina Kintaro, and Rose Jung.

This was the first time the committee had its meeting in Saipan, said McKenzie, who has served as the committee chairperson for the past two years. The committee held its first meeting in Honolulu two years ago and had its last year's meeting in Seattle, Washington.

Any weavers, storyboard carvers, dancers, musicians, beadwork artists, or other traditional Pacific Island, Japanese, Korean, or other craft-makers who might be interested in working with students and teachers in Saipan, Tinian, and Rota are asked to contact McKenzie at the DOE office at Lower Base.

This is the fourth year the Arts Program has incorporated traditional crafts as a major portion of the Arts Program, McKenzie said.

Artist-in-Education program provides artists to teach painting, weaving, puppetry, beadwork, dancing, storyboard carving, and other arts in the local schools.

Kosrae reports 75% unemployment rate

State statistician Morgan Jonas has reported on the Kosrae State Labor force.

The number of employees in the government total 624 with 606 from the executive branch, 14 from the legislative branch, and 4 from the judiciary.

Employment in the private sector totals

5,246, with a total employment of 870 people in the state of Kosrae, or 25 percent employed.

The labor force for Kosrae is 3,492, with 870 (25 percent) employed, and 2,622 (75 percent) unemployed. Employment plus unemployment equals labor force.

Minimum wage for the state of Kosrae is \$1.35.

s/Randall T. Fennell
Attorney for Leonardo
F. Boyer, Administrator
for the Estate of Jesus
Palacios Boyer

REQUEST FOR PROPOSALS

The Commonwealth Law Revision Commission, Civic Center, Saipan, Mariana Islands is requesting proposals for word processing and laser printer equipment for the operation of the Commission. All proposals must be sealed and submitted to the Chairman, Chief Judge Robert A. Hefner no later than 10:00 a.m., August 22, 1986 at the Court.

The proposal should include the various components of a system, one terminal station and a printer to meet the needs of the Commission. Of consideration is the capacity of the system, add-on capability, the compatibility with other manufacturers, the speed, efficiency, availability of service and parts. The proposal may also include options such as a stand-by power system and a maintenance contract. Any warranties of the equipment should be listed. Emphasis is on word processing to formulate and process the Commonwealth Code and its supplements as well as the publication of the Commonwealth Reporter. Of particular interest to the Commission is the ability of the word processor to be used in conjunction with a laser printer to print the Code and Reporter in reduced format to the specification of the Commission. Examples of this format is available at the court.

Of consideration for the proposals will be delivery and installation times.

Any company/person submitting a proposal should be available for negotiation shortly after the opening of the proposals and will be contacted by the Commission. Therefore, each proposal should contain a telephone number and responsible party who can negotiate the proposal.

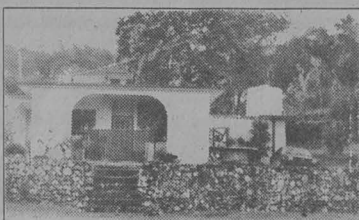

Dated: 7/30/86

s/Robert A. Hefner
Chairman, Law Revision Commission

PUBLIC ANNOUNCEMENT

The Division of Historic Preservation, Department of Community and Cultural Affairs is accepting proposals for archaeological testing in advance of Phase I sewer construction in Songsong Village, Rota, C.M.

This project calls for archaeological test excavations along the planned sewer right-of-way to collect stratigraphic data, recover subsistence and artifactual remains and to date components of sites.

Offerors must meet the minimum professional qualifications of the National Park Service to be considered. Deadline for submission of proposal and bid is 31 August, 1986. Interested parties may acquire specific project information from the Division of Historic Preservation located in the Community and Cultural Affairs building at Lower Base.

All proposals submitted should be addressed to the CNMI Historic Preservation Officer, Department of Community and Cultural Affairs, Saipan, CM 96950.

JESUS B. PANGELINAN
Historic Preservation Officer

Slammers beat D-8'ers for a tie with E'SPN

The Safeway Sammers moved up to a two-way tie for first place in the womens softball league with a victory over the Tanapag D-8'ers in the only game played last week July 30.

They tied with the E'Spn Motors with a 3-1 record.

The Slammers picked up 8-runs aided by six base on balls in the bottom of the second and held the

Tanapag lady 8-er's to just one run the rest of the way for a six inning shut out. Tonie Taitano led the Slammers with a perfect 4-for-4 including three runs scored and two RBI, and Jacky Taitano allowed just two hits, both to Agnes Lieto before being relied by Sue Ellis in the fifth.

The Tanapag lady 8-er's scored first with three runs in the first when Bobby

Norita, Evelyn Perez, and Rose Lieto on Fab Kani's fielder's choice for a 3-0 lead. The Slammers responded with a run in their half of the inning when Lilian Duenas walked and came home on Mary Aguon's triple before exploding for eight runs in the second, one in the third, fourth and fifth, and two more in the sixth for a 14-4 six-inning shutout.

Toyo University student Hiroiyuki Inoue, winning with a time of 18:11, followed closely by Tsyuyoshi Sugiyura (T.U.) with 18:32 and Yong Choi (Saipan), 18:38. Veteran Mike Newman was fourth,

followed by Saba Delong and Greg Baker. First girl Hosoi, from the Toyo University Club followed by Saipan's Julie Newman.

Following the run, all participants and friends

went to Mike and Julie Newman's house for a in was 13 year old Mariko Saipan barbecue hosted by the Saipan runners. Medals for the first three finishers were donated by the Marianas Visitors Bureau.

Saipan loses Far East bid

The 15 Marianas High School baseball players who competed last month in Taiwan were not victorious but they learned new techniques of playing and new methods of training there, according to their manager.

Jaun I. Tenorio, education department's physical education coordinator, also said the students visited educational places such as the National Palace Museum, Chiang Kaishek Memorial, and the heroes' memorial temple in Taipei.

They also visited arts and crafts shops and some of the schools, Tenorio said, adding that they learned a lot from the trip.

The students were in Taiwan July 4-10, competing in the Far East Big League Baseball Tournament. They lost to the Taiwan team 18-0 and 19-0.

They were accompanied by Tenorio and assistant coach Joe Atalig of Education Central, head coach Jack Aguon of the Public Safety Department, and assistant coach Greg Ada of Hopwood Junior High.

Tenorio said the Taiwan team has better players with much experience. "In fact, their little and senior leagues are world champions for three consecutive years, and they will be sending their big league to the world championship

for the first time."

Added Tenorio: "I won't be surprised if Taiwan wins all the three leagues. We competed against world champions."

Senior and little leagues will compete in Williamssport, Pennsylvania, and the big leagues will play in Fort Lauderdale, Florida, later this month.

The "CNMI Big League All Stars", who won the regional tournament against Guam hel here June 7-12, were sponsored by Sonnies and Victory, a local company.

A run that was established in 1982 between Saipan runners and Toyo University has attracted Saipan's top runners and the Toyo University's best including some of its alumni, staff, and friends.

The run will continue every other year and bring friendship among the two countries' runners, according to Teruaki Yoshida, Toyo University athletic sports club advisor.

Eleven runners and many friends from the university club visited

Saipan last weekend for the third friendship run and a Saipan holiday. The Japanese runners also participated in their first run with the Saipan chapter of the internationally known Hash House Harriers and want to take it back to Japan. The following evening, they competed against 17 of Saipan's runners in a 5-km run from the Saipan Grand Hotel to a turn around point just beyond Hakubotan and back.

Beating all runners was
