REPUBLICAN MAJORITY OF 137.

M'KINLEY CARRIES ALL BEFORE HIM

His Majority the Greatest Given Since Grant's Time.

CONGRESS HEAVILY REPUBLICAN IN BOTH THE SENATE AND HOUSE

Eastern Democrats Call for the Reorganization of the Party on the Old Lines Eliminating the False Gods of Free Silver.

N EW YORK, November 7.—McKinley and Roosevelt have been elected by the largest popular and electoral majority given any Republican Presidential ticket since 1872. Congress will be Republican by an increased majority in both branches. New York is Republican by about 150,000 and Pennsylvania by 200,000. Not only has McKinley carried all the States that were his in 1896 but has added several States in the far West. There will undoubtedly be a movement in the Democratic party to shelve Bryan and bring back the old leaders.

THE RETURNS IN DETAIL.

NEW YORK, Nov. 8.—The vote of all States in the Ricctoral College seems now clearly to be indicated. The last State to leave the doubtful column was Idaho, which shows a plurality of something over 1,000 for Bryan, four-fifths of the voting district having made returns. This seems to be conclusive, there being tittle probability of enough Republican votes in the late districts to change the result. Nebraska is apparently Republican, though there is still some doubt as to the complexion of the Legislature. Both parties still claim the State for Presi-4ential Electors and for Governor.

The vote in the Electoral College will probably be: For McKinley, 200; for firyan, 156 Accompanying is a table, showing the Electoral vote and pluralities by

The latest reports make few changes in the membership of the next House of Representatives and the probable political complexion of the Bonate after March 4, 1991, from figures announced yearerday. In the House the changes offset such other, and the prospective Republican plurality remains at 47. In the Bonate Charge is indicated a Republican plurality of B. The House will consist of 203 Resolutions, 199 Democrate, 2 Purcentess and 3 Populists.

COMPLEXION OF CONGRESS. symW volts, Nov. 6. The rost House of Depresentatives will be Republican a small mejority. The Republicans have enough Congressmen to outside the more as and all others in the House. Prom the present outlook the make-up.

President McRinley received the election returns tonight at his nome, sur-

rounded by a large number of his old friends and neighbors, including many ladies who came as the guests of Mrs. McKinley, to share with her the interest and excitement of this culminating event of the campaign. Direct wires connected the heise with the Republican national headquarters at New York and at Chicara, with Senator Hanna at the Union Clish i Cleveland and with the home of Governor Rousevelt at Oyster Ray, so that in President was in constant telegraphic touch with his associate on the ticker as with the campaign leaders.

The President made his headquarter in his library, where most of the gentlemen guests congregated, while Mrs. "Kinley entertained the ladies in the parior. The President was in his good hun-r, showing no signs of anxiety over the result."

The President in person read aloud some of the returns, but refrained from making any comment whatever on the result and accepted with unruffled composite the favorable reports which began t come in at an early hour. Hecretary Cortelyou read most of the dispatches, some of the more cheering announcements being heartily applicated by the greats. Most of the early advices were fragmantary and incombinity, but the strong in leations that New York and probably librals had gone for McKinley were received with great satisfaction.

At 9 o'clock the President received a dispatch from an entitusinatic individual

NO LEPERS FOR HAWAII

Mainland's Afflicted Not Wanted Here.

WHAT W. O. SMITH SAYS

It Would Be a Grievous Wrong To Islands and the Diseased Ones.

Honolulu, H. I., Nov. 15, 1909. Editor Advertiser-The suggestion which has been made from time to time in the past, and now seems to be receiving consideration in certain quarters, that lepers in the United States be sent to the settlement at Molokai, seems to deserve more than passing notice.

It would not seem that such a proposition could be seriously considered any more than the proposition to send all those afflicted with any other disease throughout the country to any one point.

Several years ago, the suggestion was made by the authorities of the State of California that the lepers of that State be sent to Molokai, and later the authorities at Samoa desired that certain lepers there should also be sent. In both instances the consent was not given, and the reasons for refusal are as potent now as then.

To send the lepers of the United States to Molokal would be a great wrong and injustice to them and to Hawaii. To the great majority of the people of the United States these Islands are a foreign country, and to send persons afflicted with disease to a foreign country, from three to five a foreign country from three to five a foreign country, from three to five a foreign country, from three to five a foreign country from three to five a foreign country, from three to five a foreign country from three to five days' fighting mentioned was very that the two that t acquainted and unaccustomed, would in any case be outrageous; but especially with leprosy, a disease which in so many cases gradually renders the person unable to care for himself, and needing the assistance of others, and meeding the assistance of others, and with the depression and wee that comes from the hopelessness of the case.

"To obtain the results that we desire this they were forced to retire by a wide turning movement by the Suffgiks and the Canadian mounted troops around their flank. All the first day one so as to hold prices down and the contract which Mr. Gunn has offered seems to be a fair and reasonable proposition.

"Our casualties the first day were easily killed and twenty wounded, chiefly and the contract which Mr. Gunn has offered seems to be a fair and reasonable proposition.

"The public as represented is to be protected in the matter of prices and

It would be a great wrong to these Islands to make them the dumping place for all lepers of the country, and cause them to be looked upon as a pest bole. And it would be a property to the cause them to be looked upon as a pest bole. And it would be a wrong to the Hawailans who live at the settlement to have people from foreign countries— unacquainted with them and their hab-its, traditions and sympathies—forced upon them and perhaps in considera-ble numbers. Furthermore, the intro-duction of such people would doubtless become a disturbing element in that peaceful community.

become a disturbing element in that peaceful community.

The presence of leprosy and the caring for the sick has been a most severand trying experience to the Hawaiians and people of these Islands.

Leprosy was introduced into these Islands from a foreign country and spread among the native people until measures had to be taken for the protection of the community. The problem presented was a very serious one, and in view of the conditions of the people, it was deemed imperative that the sick should be segregated from the well, and after various experiments, the sick should be segregated from the well, and after various experiments this spot on the Island of Molekai was selected for the permanent settlement, and for thirty-five years, with great pains and at great cost, the lepers have been gathered up from the various parts of the Islands and taken to this settlement. Here cottages have been provided for them; the home life has been maintained as far as possible, their wants supplied by the Government at public expense, and a comment at public expense, and a comment at public expense, and a comment of the co

Heing there in peace and harmony. The separation of families—parents from children, wives from husbands, brothers from sisters—has been a terable experience, and the result of disease brought to this people from abroad. First, a large portion of the mative people were tainted by disease brought by sailors and others, producing conditions favorable to the producing conditions favorable to the produc-

ing contained diseases.

In this soil the germs of leprosy seemed to run riot, and a great curse came upon the people. Over six thousend persons have been taken to this settlement at Molokai since its establishment. There are now 1.010 persons following nutionalities:

allowed to go there to care for them. These are called kokuns (helpers), and in very many cases the misery and wee of the final and long drawn outend has been much relieved and mitigated by the ministration of such friends.

Furthermore, there is weekly communication with Honolulu, and the mails and supplies are brought; necessary articles and comforts are sent by friends, and all is done that reasonably can be done to mitigate the sufferings.

country has worked out its own probountry has worked out its own probout so well and provided as intellioutly, and selved the difficulty socircly that others desire the benefit of

Now, why cannot each State make
rovisions for its own, taking lessons
from and profiting by, if necessary, the

own responsibilities and duties.
I'nder the wise and humane course pursued in these Islands leprosy is disappearing, and there is cause to hope that in time it will be wholly eradicated. The task has been surrounded with the greatest difficulties, and has taxed the powers of the Government and the skill of the physicians. To have new and additional complications and burdens added at this stage in the manner indicated would be a grievous wrong,

Territorial Meteorologist Describes Weather Phenomena Peculiar To Hawaii.

The storm which has prevailed for the past few days throughout the entire group of Islands, is the chief topic of discussion. The causes and effect, atmospheric and otherwise, have been advanced by the knowing ones. The individual who is unable to tell the difference between a ship's compass and a barometer, or a trade wind and a kona is always heard in the fand. It is a fact worthy of note, however, that the Island group has been visually to the hearders form experience. ited by the heaviest storm experienced for years, while the barometer has reg-istered exceedingly low and the end is

During an interview yesterday afternoon with Professor Lyons, who has been con-nected with the Government survey for nected with the Government survey for the past twenty-eight years, and who for the past nineteen years has kept the weather records, the Advertiser obtained much information. He states that the storms that have raged for the past few days is what has always been termed a "Kona" by the natives, meaning of course a strong wind from the southwest, called Kona in the native language, which indicates the southwest corner of the

indicates the southwest corner of the compass.

"The white population have adopted the word and use it to express this kind of a storm where the wind is from the southwest or varying to the west and north," said Professor liyons. "There is no degree of regularity in the coming of the Kona but they appear in the winter season and mostly in November, though occasionally in other winter months, one having occurred as late as April.

"In point of fact it is simply a temperate zone revolving storm, while the movement itself is from the northwest as near as known. These revolving storms pass across the Northern Pacific Ocean from east to west, generally as far north as latitude 40 or 50. We frequently catch one of the southwest side of the circumference of the circle, that gives us northerly winds for a few days which pass off. When the path of the storm is well to the southward, then we catch the center and the southeastern side, which gives us southwest winds, shifting to the north after it has passed over. It seems likely that the recent storm is the one encountered by the Dorle on her recent passage from Yokohama. She probably salled out of it, possibly traveling more rapidly than the center of the storm did. Honolulu is very much sheltered from the Kona storms by the mountains, which set the winds back and break their force. We sometimes hear of a Kona prevailing on Maul, which is barely perceptible here; of course vessels at sea get the full force of it. vessels at sea get the full force

of it.
"The heavy surf on the reef and th very low barometer indicates that thi very low barometer indicates that this was an extensive storm and quite violent at sea. As to the damage done by these storms in the past, it can be stated that houses have frequently been blown down at Koolau, on this island, and also at Kohalic and other places on Hawaii. A point to be taken into consideration and from which the Kona storms have gained such an undesirable name is the fact that the native houses and consting schooners. the native houses and coasting schooners are fitted out for trade winds, and are not ready for winds coming in the opposite direction. The Island shipping have often frection. The island shipping have often had occasion to run around to rainy lino for shelter during the prevalence of these storms, which generally last for two or three days, although they have been known to last a week, especially when the wind backs around again from west to

southwest.
"The last heavy storm occurred in December 1895, there being no special features of it recorded and lasting but a couple of days. Not having heard from the other Islands of the group as yet, I can give no results. There is no doubt, however, but that a heavy fall of snow has occurred on Mauna Kea and Mouna Loa. During the present storm the barometer registered 25.58, being the lowest recorded for a number of years. In January, 1891, the barometer registered 29.44, this being the lowest with two exceptions. It is a fact worthy of note, and of interthis being the lowest with two exceptions. It is a fact worthy of note, and of interest to some, that the harometer does not register us I we here as in the typhoon and hurricare regions, where it falls to as low as 2%. It would be well to state that in Honolulu ye are so accustomed to mild weather, that any marked disturbance is made much of, It looks very doubtful us to whether the present storm is over yet, as the lower clouds are still coming from the southwest with baffling Up to Friday at noon four inches o rain had fallen during the storm.

The Valet Wins.

NEW YORK, Nov. 10 .- The jury in the suit brought by Frank Mowbray, a valet against Howard Gould, a son of the late Jay Gould, for \$25,000 damages, for breach of contract, brought in a verdict today awarding \$5,000 to the plaintiff. Mowbray awarding \$5,000 to the blaintiff. Moworay alleges that Mr. Gould engaged him as valet for life at \$50 per month after he had lost the sight of one eye and sustained other injuries as a result of setting off a damp sky-rocket on Mr. Gould's yacht July 4, 1893, and that he was discharged immediately after the statute of limitations barred a suit for damages on account of the injuries he had received.

Rubber air cushions are to be provided, as well as automatic electrical devices for opening the doors. A loggia in the second story with arched windows is one of the pleasing architectural features.

TOO EARLY TO MAKE A FINANCIAL FORECAST.

A prominent banker stated yesterday that although the tax returns for Hono-hub had made a good showing yet the real condition of the market would not be known until the returns from the other islands were known, which would not be in for a week or ten days. There was no radical change in the money market at present. The general tone of the market, however, was good, inasmuch as in-creased dividends were promised for next month from plantations and general bus-iness concerns. Still the best forecasts were often shattered. From these returns the banks make their advance figures for the coming year's plan of dinancial cam-mium. A prominent banker stated yesterday that although the tax returns for Hono

PACIFIC HEIGHTS HOTEL PROJECT IN GOOD HANDS.

The recent inauguration of the electric railway system on Pacific Heights has stimulated activity in the hotel project of C. S. Desky, proposed for the picturesque City addition. The plans for a magnificent hotel were prepared for Mr. Desky a year ago, the site for which was to be one of the most commanding on the summit of the heights. The delay in the construction of the electric road prevented any-headway being made in the matter of bringing the matter before investors. Now that the cars have begun daily trips up and down the zig-zagged road, there is assurance that capital will be forthcoming.

Mr. Huribut, potentate of Islam Temple, who came to Honolulu with the Mystic Shriners on the Zealandia a month ago, has taken hold of the matter and promised to interest California capitalists. Ed Pollitz and Mr. St. Goar of San Francisco, well known in connection with the monied interests of the Hawaiian Islands, are interested and propose to invest quite a large amount in the scheme. Mr. Huribut is a builder and has under his superintendency at present the construction of the University buildings. While in Honolulu he expressed himself as pleased with the commercial and business outlook of Honolulu. The plans of the hotel were taken by him to San Francisco and there is a strong probability that sufficient capital will be raised to make the scheme a certainty. Mr. Huribut will be here in March with the pilgrimage of Mystle Shriners, which will be hended by the Imperial Potentate and proposes at that time to lay the results of his work before the representatives of the Pacific Heights project. He made one request before leaving. This was to the effect that Honolulu should subscribe enough capital to the hotel scheme to give it local coloring and show Mainland capitalists that Honolulans believed in it. It is stated that \$0.00 has already been promised by local parties without the formality of a prospectus being issued. Had it not been that the enormous expense which Mr. D

Sometime ago the contractor discovered that he was 4,000 bricks short of the number which he should have received according to the manifest. The coast firm supplying the brick was notified of the shortage, but instead of rending on the required 4,000 they wrote saying there must have been a mistake in the count in this end. An urgent request was then sent asking for the brick, and all but about 1,500 have arrived. The cornices cannot be completed without these and the roof cannot be table over until that work is finished. The concrete floors are being put in. These consist of layers of steel wire netting over which is spread concrete mixture.

BEET SUGAR RAISING IN JAPAN A FAILURE.

REET SUGAR RAISING IN JAPAN A FAILURE.

A Berlin commercial and industrial journal, writing on the production, consumption, and import of sugar to Japan, states that the efforts of the Japanese Government to promote the production of beet sugar in the Island of Yeze had not been successful. A factory built in Moubetsu with public money, but equipped with antiquated French machinery, was abandoned in 1896. A larger factory built at Sappere, and provided with the newest German machinery, in 1896, has ceased working for some years. The production of raw sugar in the country decreased from 7½ million pounds in 1893 to 2¾ millions in 1897, while official statistics give a consumption of 2½ million pounds in 1899 and 582 millions in 1898. The imports of refliced sugar more than quadrupled between 1896 and 1898, this trade being almost wholly in the hands of Hongkong refliners until 1895, when German firms began sending refined beet sugar to Japan. In that year they sent 10 million pounds, while in 1898 they sent 105½ millions. The Hongkong exports to Japan also increased. In 1899 a syndicate of Austrian manufacturers resolved to send their sugar to Japan, an enterprise in which they are favored by the low freights of the Austrian Isloyds. Only one quality of German sugar is sent, the coarse grained and wholly refined, while Austria-Hungary sends one kind wholly refined and a second which is half retined. Unrefined beet sugar is sent to Japan chiefly from the Philippines, Java. China, and Formosa, most of it being used in its raw state; but its re are two refinedes, one in Osaka, the other in Tokio, the former having British, the latter German, meaninery. The native refined sugar is not coarse grained and costs more than the German imported sugar.

STOCK MARKET FIRM AND RISING.

Sugar shareholders are anxiously awaiting the arrival of today's steamer and the expected news of McKinley's electio will undoubtedly give securities a firmer hold and loosen up the money market.

The week just closing has been one of the most active in stocks for several months. A great many thousands of dollars which have accumulated in dividends, savings of salaried men and bank balances of conservative capitalists have gone into the market in quest of sound sugar securities. Considerable foreign money has already been invested, not only from San Francisco, but recent comers to Honolulu who have securities in the far east which net them only 4 to 5 per cent, have added a cash surplus which has had a tendency to force stocks up.

Waislua closed on 'Change yesterday strong at 120 a share, there being good sized orders for the stock at this figure, but none offered under 121. The most popular stock at this time is Oahu Sugar Company, large orders being in the hands of the brokers at 165, there appearing to be no stock of any amount offered under 170, although a few shares sold yesterday at 16c.

Claa still continues to hold firm, an advance of 14, of a point being made for assessable, making that stock firm at 45c and 5 asked. The paid-up has had sules at 145c, with orders still to be filled at that figure.

The most active stock in the market in the last two days is McBryde assessable, which advanced steadily from 5 to a sale on yesterday's 'Change at 5%. The stock declined to 85c afterward, it being thought that the broker selling the stock had a large buying order and was endeavoring to establish the price at 85c or thereabouts.

Oahu Railway stock, which was selling a couple of weeks ago at 155 has come out at 195 a share and there are orders set to be filled at that figure. The cheapest railroad shares offered are at 200.

out at 190 a share and there are orders yet to be filled at that figure. The cheapest railroad shares offered are at 200.

Great activity was shown in Kihei this week. The stock rose to sale at 11 on 32½ paid in. Many shares were sold at that figure and a few offered at 15. On Thursday another assessment of 2½ was levied, making the stock paid in at 45, and the stock dropped down immediately from what was then an equivalent of 17½ to 13½. A few shares of the paid-up stock were sold at 15 per share. There are some prospective buyers in Kihei who are walling the outcome of the meeting scheduled for November 39, at which time the proposition of putting 1500,000 of the paid-up capital stock into the treasury, is to be considered.

While the stock sheets of the Honolulu Stock Exchange show a great many shares sold, the great hulk of the stock transfers have been made by the brokers between boards which they have not seen fit to record. The heaviest transfers between hoards were in Walalua and Oghu.

The bond market seems to be quiet there being but little demand for the bonds and those that are selling are being held at par or a very slight premium. This is on account of there being so many gilt-edged stocks in view and investors fgeling more justified in making investments in stocks rather than in bonds.

The sudden awakening in the financia market and the rise in stocks has caused everybody to ask what has forced stocks up. There are some who believe that the boom will burst, but the more conservative and knowing ones are of the firm belief that this is not to be the case. They attribute the awakening in stocks to the general fraction and to the anticipation of news by today's steamer of the election of McKinley. Honolulans are not held the account of McKinley, but the Zealandia is expected to bring large buying orders from the Riates.

The general tone of the entire stock market, sugar and commercial, is firm.

majority ever given an American candidate for President, shows that sobriety and common sense still rule the pubalso settles several important ques-

(I). The principle is vindicated that the American dollar must be maintained on a parity with one hundred cents. We do not believe that any party will, so long as there is enough gold in the country for business purposes, again attack the present basis of American currency. The money issue has been, for this generation at least, effectually

(II). The majority for McKinley, the great protectionist, gives a long lease to the present tariff policy. Democratic platform-makers will hereafter fight shy of any reference to a subject which brings up the alluring vision of Republican prosperity.

(III). The American people have decided that expansion must have a fair trial. They knew that we did not go out of our way to seek distant territory and that we took what we got at the bidding of destiny. Try as Bryan might he could not make the people associate the growth of the national domain with treachery to any principle of loyalty or thrift nor the work of planting our institutions in distant seas with any spirit of departure from the genius of the organic law or from the customs of our forefathers.

The only unsettled issue is that of trusts and this the Republican party is now in a better position to deal with than ever before. We look for a renewal of the attempt made in the present Congress and defeated by the Deniocrats, to deal with oppressive combinations of capital through a Constitutional amendment.

The fact which gives the people the most encouragement is that the country is going to have four years more of settled financial and commercial conditions-four years more of the full dinner pail. That means much to every man, weman and child in the Union and as much to the people of Hawaii as to those of any part of our common

THE BOOK CONTRACTS.

In his effort to get another five year contract for the Book Trust, Mr. Gunn has shown a finesse worthy of a better cause. We must congratulate him on his handsome dinners to gentlemen to whom he looks for a renewal of his einch and to all the other signs of his fitness for commercial diplomacy. At the same time we feel in duty bound to demur at his plan to tie the education of Hawaiian youth to sets of text books which are no better in many ways, not a good in some and worse in others than sets which are offered at the same or a lower price by competing pub-

We know of cases where teachers have asked for books which their classes required but which the Trust refused to let them have because of the imprint, sending instead some worthless substitute bearing its own trademark A case where a Hawaiian history was invaded with a chapter of mendacious political narrative has already been told of in these columns. Under the contract now terminating the Book Trust is able to dictate, practically speaking, the education of our youth; and it has acted in the matter not with the view of keeping the youth abreast of the best thinking and the most competent research, but to coin money for itself. These are facts which cannot be obscured by the smoke of perfectos rising at a Book Trust banquet.

What the taxpayers want is the purchase of text books in the open market, getting the best no matter by whom published and always keeping in view the mental and moral needs of the school-going youth. For this purpose blanket contracts are not necessary. We are aware of the plea that a renewal of the Book Trust agreement might save a little money but as this saving would in the long run be a charge against the quality of public instruction, no judicious man can recommend it. There are some savings that are dearer than extravagance and among these the saving proposed by the Book Trust stands out in bold relief.

Bill That China Must Settle.

Another German Expedition Going North-- Drastic Policy of M n sters Causes Some Alarm.

LONDON, Nov. 12 .- Dr. Morrison, wiring to the Times from Peking Sunday, says:

"Pressed by the common desire for a speedy termination of present conditions, the foreign envoys have finally agreed to the following terms, to be presented in a joint note which, subject to the approval of the governments. will be pressed upon China as the basis

of a preliminary treaty: "China shall erect a monument to Baron von Ketteler on the site where he was murdered and send an imperial Prince to Germany to convey an apology. She shall inflict the death penalty upon eleven princes and officials already named and suspend provincial examinations for five years where the outrages occurred. In future all officials failing to prevent anti-foreign outrages within their jurisdiction shall be dismissed and punished. (This is a modification of Mr. Conger's proposal).

"Indemnity shall be paid to the states, corporations and individuals. The Tsung-li Yamen shall be abol shed and it functions vested in a Foreign Minister. Rational intercourse shall be permitted with the Emperor as in civilized countries.

"The forts at Taku and other forts on the coast of Chi-li shall be razed, and the importation of arms and war material prohibited. Permanent legation guards shall be maintained and also guards of communication between Peking and the sea.

"Imperial proclamations shall be posted for two years throughout the empire suppressing Boxers.

The indemnity is to include compensation for Chinese who suffered through being employed by foreigners, but not compensation for native Christians. The words 'missionary' and 'Christians' do not occur in the note."

Secretary Hay is much irrial door eports from Peking showing that the Ministers are determined to punish very influential Chinaman who they hink is responsible for the recent outages and showing also that the intemnity to be demanded will reach t600,000,000,000. The Secretary is anxious that the powers shall submit demands that can be accepted by China.

Officials at Washington hold that examples should be made only those conspicuously guilty and that the amount of indemnity should certainly be not more than \$200,000,000. It is pointed out that if all the leading men are sentenced to death they will in self-defense organize a resistance, which will necessitate further military operations, the end of which no one can foresee.

SCENES OF HORROR.

LONDON, Nov. 13 .- The Globe this afternoon publishes a letter from a Belgian gertleman who has been traveling to Peking via the Trans-Sberian railroad. He describes under date of September, 6th what he saw in the Amur river. His accounts surpass in horror those previously published.

"The scene I have witnessed during the three days since the steamer left Blagovetchensk," he says, "are horrible beyond the powers of description. It is the closing tableau of a fearful human tragedy. Two thousand were deliberately drowned at Morxo, 2,000 at Rabe and 8,000 around Blagovetchensk, a total of 12,000 corpses encumbering the river, among which there were thousands of women and children Navigation was all but impossible. Last week a boat had to plough her way through a tangled and mangled mass of corpses lashed together by their long hair. The banks were literally covered with corpses. In the curves of the stream were dark, putrid smelling masses of human flesh and bones, surging and swaying in the steamer's wake. The captain valuly ordered full speed ahead. The sight and smell will be ever with us.

"From Blagovetchensk to Aguin, 45 k'lometers, numerous villages studded he banks with a thriving industry Population of over 100,000. That of Aguin was 20,000. No one will ever cnow the number of those who perished by shot, sword and stream. A village is left. The s'lence of death was around us, the smoking ruins of Aguin, on the right, with broken-down, crumbling walls and shattered, roofless houses."

The Commander's Views on the Philippine Situation -- A Filipino Leader Also Speaks.

NEW YORK, Nov. 10.-Major General MacArthur, says a Washington special busi to the Herald, will personally direct the vigorous military operations to be directed against the Filip no insurgents. Major General J. C. Bates will probably be assigned to duty in Manila as the executive head of the military government in the & Co. Philippines during the absence in the field of General MacArthur.

In Army circles the suggestion is made reward for the apprehension of Aguinaldo. Officers are convinced that his capture would have an important effect in bringing about an end to the insurrection. Aguinaldo would, if allve, be a burden upon the hands of the administration and while the authorities do not wish his denth, it is conceded that if he should be killed during the forthcoming operation.

tary of War to ask Congress to increase the regular Army. If, in the Philippines, General MacArthur can suppress the rebellion before the volunteers come home and restore order in the archipelage, there will be no need for a large increase. Before the Congressional session is very far advanced the campaign should be far enough along to shed some light on this question. If an army of nearly 70,000 men prosecuting the most vigorous campaign cannot overcome the Filipinos, the administration will have a strong case when it asks Congress for an increase of the Army. It will be able to put the request

on the ground of absolute necessity.

WASHINGTON, Nov. 10.—Major General Arthur MacArthur, commanding out
Army in the Philippines and Military Gov-Army in the Philippines and Military Governor of the Islands since May 5, 1900, has submitted his report to the War Department. A considerable portion of the report relates to events which took place previous to the date when he assumed command and he publishes some of the correspondence and proclamations of the Filippines obtained before that time. He refers to the change in Aguinaldo's plans in abandoning his army organization and starting a guerrilla warfare. The conditions of the country have afforded advantages for such a policy, he says, as they tions of the country have afforded advan-tages for such a policy, he says, as they are stantial injury it is the pump nearest the after are within the lines in the attitude of peacethle natives. A widely scattered formation of Filipinos quickly followed the guerrilla warfare, which led to a corresponding dissemination of American troops, there being fifty-three military stations in the archipelago November 1 1839, and 415. stations in the archipelago November 1, 1899, and 413 stations September 1, 1990. This resulted in a large number of miner affairs, many of which did not assume the dignity of a regular combat, though the casualties between the dates stated were 208 Americans killed, 750 wounded and 55 captured, the Filipino losses during the same time being 3.27 killed, 65t wounded and 2.80 captured. General MacArthur says the extrusive distribution of troops has strained the seldlers of the Army to more of discipline and as much of valor as was required during the period of regular operations against concentrated field forces of insurrectionists. NEW YORK, Nov. 9 .- A dispatch to the Herald from Guayaquil, Ecuador, says:

Important news indicating that the Liberal rebellion in Colombia will result in the overthrow of the Government, has been received from Panama by the steamer Loa. The responsible backers made no rack claims, although their dispatches told of gains at many points and breathed it spirit of victory near at hand.

At midnight Caston was in a frenzy of enthusiasm which knew no bounds. The crowds which had been burning red fire down town marched to the McKinley residence with bands playing, rockets **ding lurid streaks across the midnight sky and tumultuous cheers, mingled with the din of horns and steam whishes. The crowd was stilled for a time with some of the cheering news received. This included dispatches from Kansas, claiming that State by 40,600; from Secretary Heath of the National Committee, saying Indiana gave McKinley 25,000 plurality from the Iowa Chairman, saying lowa's plurality was 10,600, and from the Union League Club, Chicago, giving the President glowing congratulations. But the crowd clamored for the President, and he appeared, waving his acknowledgment of the deafening cheers. He said:

"Fellow-citizens: I thank you for the very great compliment of this call on this inclement night and at this late hou. Of the gratifying reports from all parts of the country none has given me more sincere gratitude than those from my own city and my own county of Stark, and I appear now only to do as I have done on so many former occasions, to thank you once more for the warm and hearty independent which you have today given my public acts."

HOW BRYAN TOOK IT.

LINCOLN, Neb., Nov. 6.—William J. Bryan retired for the night at a few minutes after 11 o'clock. He declined to make any statement, even of a conjectural fisture, until tomorrow.

"Conjectural statements may be all right before election," he remarked laugh-

ingly; "but they serve little purpose after election is over."

With Mrs. Bryan by his side and with the familiar look of courageous, indemitable good nature in his eye, he bade each of the newspaper men who had spent the evening at his home a cordial good-night, promising to see them again at 3 or 19 o'clock tomorrow morning.
"Better make it 10," suggested Mrs. Bryan, with an eye single to the longest possible rest for her husband after his herculean and nerve-wrecking labor of the

past four months.

He smillingly assented and a dozen disappointed but admiring correspondents shook their hands and departed.

Four years ago Mr. Bryan went to bed and slept soundly an hour after the returns began to come in. Tonight he did likewise. Before 8 o'clock, after scanning the unfavorable early returns from New York, he sought his bed and slept most of the time until a few minutes before 11, coming down then only to oblige the correspondents, who were anxious to see him before retiring for the night.

Not a word or resture or facial correspond of the great leader of the Dame.

Not a word or gesture or facial expression of the great leader of the Democratic hosts indicated aught of discouragement or weakness as he stood smiling and good-natured by Mrs. Bryan's side, with the newspaper men about him. Mr. Bryan brought downstairs with him a bulletin just received, which told of his having gained 90,000 votes in Greater New York, as compared with four years ago, and an increased vote in New York State. One of the correspondents read the bulletin. There was silence for a moment; then the reader commented: "Well, it is not as had after all, but it is no, as good as it should have been."

It is not as bad after all, but it is not as good as it should have been."
"No," responded Mr. Bryan, with a gentle smile on his face; "no, it is not
quite what we expected."
That was all. Not a word or look of disappointment, discouragement or ill-

and the correspondents who were present, with never an outward tremor or sign indicative of disappointment.

LINCOLN, Neb., Nov. 8.—Mr. Bryan today gave out a statement explaining his views on last Tuesday's election. The statement is as follows:

"The result is a surprise to me, and the magnitude of the victory is a surprise to our opponents as well as to those who voted our ticket. I will not analyze the votes until they are more complete, but, speaking generally, we seem to have gained in the large cities and to have lost in the smaller cities and in the country. The Republicans were able to secure tickets or passes for all of their voters who were away from home, and this gave them a considerable advantage. We have no way of telling at this time how much money was spent in the purchase of votes and in colonization, but while these would account for some of the Republican gains, they could not account for the widespread increase in the Republican vote. The prosperity argument was probably the most potent one used by the Republicans. They compared present conditions with the panic times of 1833 to 1896, and this argument had weight with those who did not stop to consider reasons for the change. The appeal, 'Siand by the President while the war is on,' had a great deal of influence among those who did not realize that a war against the doctrine of self-government in the Philippines must react upon us in this country. We have made an honest fight on an honest platform, and having done our duty as we saw it, we have nothing to regret. We are defeated but not discouraged. The fight must go on. I am sure that Republican policies will be repudiated by the public when the tyranny of their policy is fully understood. The contest between plutocracy and democracy cannot end until one or the other is completely triumphant."

In answer to inquiries concerning himself, he said:

"I have come out of the

A REVOLT OF DEMOCRACY. NEW YORK, Nov. 7.—To W. R. There are no factions, except those that are made by separations arising from differences in

cally than ever before in our history.

When the Democracy of the nation surrenders to a man who twice loses New York, New Jersey, Connecticut and Indiana—our old battle-grounds—by majorities unprecedented in the history of our country, it is evident that rigorous measures in the way of repudiating false going and false principles are required. It is not a matter of the coming together of factions. It is a matter of adopting principles that are for the good of the country and that represent the old Democracy. (Signed) WILLIAM C. WHITNHY.

"The reorganization of the Democratic party is a thing to be desired by both elements of the Democratic party—the sliver and gold men. It was only through Bryan's defeat that the desired reorganization could be brought about. Hence it was that this year the gold men gave their strength to McKinley instead of setting up a candidate of their own. Now that they have unleaded Bryan they will bid added to their temp rary alles—the Republican party—and don sword and buckler of the old-fashioned Democratic type."

JAMES K. MAGUIRE.

NEW Yorkis, Nov. 7.-James K. McGuire, Chairman of the Democratic State Committee, said:

"First of all, drop the 16 to 1 plank, for that declaration will never be understood or approved by the business men of the majority of the wage-carners of the country. Secondly, instead of being a mere party of negation and conflicting yiews, a party of protest, let us stand for some real genuine reforms and strive for predicable aims to benefit humanity.

"I believe we should make an out and out fight for direct legislation and direct nominations. This would place the Covernment directly in the hands of the people."

SENATOR COCKRELL WARRENTON, Mo., Nov. 7.—United States Senator Cockrell said:
"The Democratic party has survived a century of our constitutional existence by adhering to its imperishable principles as proclaimed by Jefferson, and will survive coming centuries by continuing such adherence. No reconstruction is necessary. Our party is simply defeated, but not dismayed or disorganized."

EX-SECRETALY CARLISLS.

ATLANTA, Ga, Nov. &-John G. Carlisle, in response to a request for his views, says:

"In my opinion the Democratic par y should at once reorganize on the Democratic basis. The immediate return to the conservative, patriotic position occupied by the party before it was demoral sed by Populiem and free silver Republicans in 1898, will invite all true Democrats in an active opposition to the objectionable policies of the Administration, insure the success of our Northern friends in State and local contests and prepare the way for a great national victory in 1894. The Democratic votes cast for McKinley were not independent of his party or his administration, but protests against what was considered the dangerous purposes and tendencies of the opposing candidate."

GROVER CLEVELAND.

PRINCETON, N. J., Nov. 8.—When asked his opinion of the proposed call to be sent out to Democratic leaders on a reorganization of the party, Grover Cleveland

"I know nothing of any plan that has been set on foot for the betterment of the Democratic party, though I hope something will be done in that direction. I am not prepared to make a statement now."

SENATOR MORGAN.

MOBILE, Ala. Nov. 8.—Senator John M. Morgan says:

"The Democratic party needs no reconstruction. It needs fidelity to its creed, which has stood for one hundred years. At present it demands the payment of the national debt and a return to the 'specie basis' for banking. It demands the restoration to the States of the exclusive right to determine the qualification of votors. It demands that all Federal taxation shall be equal and uniform in places within the limits of the United States. It demands the suppression of trusts and especially the corporations, in respect of all articles of commerce, that are subjects of inter-State and foreign commerce. If Democracy adheres to these demands, our present defeat will be only temporary."

GREAT REVIVAL OF BUSINESS.

NEW YORK, Nov. 12.—One of the largest day's business in the history of the Stock Exchange followed the election o Wednesday and has continued with only slight abatement during the rest of the week. The offerings of large sums of money on call, which had been withheld over election, helped to stimulate the furious activity of the speculation. Sub-tantial buying of an investment or semi-hivestment character both in stocks and bonds was a sustaining influence and afforded a solid medium for speculative operations. The digestion of attractive profits has caused slight checks to the advance at intervals, but the rise has been continually remewed before the all-embracing and eager demand for stocks coming from all quarters of the country. Foreigners have been steady sellers of stocks.

AT THE FRONT: WITH THE BOER

Life has its amenities even in war time and in the midst of a hot campaign. The following sketches of incidents which actually took place during the Boer-British in were out beyond Tafal Kop, between war in the Transvaal were written for the Bloemfontein and Brandfort one day ADVERTISER by Francis J. Turner, a last April, when they came across some sixteen to twenty mounted Britishers, mining man from South Africa, who Enslin ordered his men to make for cov-

to him to come in. On entering the room he found a young woman weeping over a baby she had in her arms. He asked her reason for weeping. "My poor husband has been kifled at Pardeburg," she replied, "and I only received news this morning."

So forcibly did this strike the scout that he could not keep back his tears. He told her he wished the war would stop. He remained for some time trying to conwole the poor woman, forgetting for the time the war, and his safety. Suddenly looking towards the door he beheld two Boer scouts watching him. They had wlipped quietly from their horses and had heard and seen all.

HALL TO FACE THE MUSIC HAD TO FACE THE MUSIC.

Captain Theron's scouts were noted for their abilities, both as scouts and marksmining man from South Africa, who fought all through the servest of the war on the side of the Boer. Mr. Turner came to the Islands about a month ago from South Africa and is at present employed as an engineer at Oahu plantation:

One of the Remington scouts while out scouting one day alone in the Orange Free State came to a small farm; over the house a white flag was flying. Being thirsty he rode up to the door and seeing a young girl asked for a drink of water. The child ran in to her mother, who at once invited the scout indoors, cauming out to him to come in. On entering the room

Enslin ordered his men to make for cover, but before they reached it they had to turn around and face the music. The enemy, having better horses, had quickly lessened the distance and began peppering at Enslin and his men. Enslin on twishing to be shot running, gave the word to turn and let them have it. This was a terrible blow to Captain Laracy, to be made a common soldier just because he forgot to come back a little sooner. However, the Colonel complained that Laracy since his degradation was striving to stir up trouble in the camp, etc., and the Colonel wanted him punished.

WHAT THE IRISH DID.

The famous battle of Modderspruit which took place on the 30th of October, 1823, was won solely by the Johannesburg pelice and the little Irish Brigade. The average country Boer was so knorant of artillery that they were actually afraid to be a corresponding to the country.

"Impossible or not." they replied, "Impossible or not." they replied, "that's the General all right."

Not until the General assured him would be believe it. Returning to the lines, the young officer said to his escort, "You should come into Ladysmith and some thin Ladysmith and see the difference between our General and yours."

"We should like well enough to see him, but then you forget there are no trains counting."

A Common Case of Piles-It may Lead to Serious Results. (From the Sydney Herald.)

When people generally understand that all such fatal diseases as fistula, ulcer of the rectum, fissure, etc., almost invariably begin in a simple case of piles, they will learn the wisdom of taking prompt treatment for the first appearance of trouble in this quarter. Doan's Ointment will certainly cure every form of piles — itching, bleeding, protruding, or blind piles and hundreds of lives have been saved using this cheap, effective remedy right at the start, because at such a time a single pot will effect a cure. while in the old chronic, deep-seated cases, several pots are sometimes necessary before a lasting cure is effected. Here is a case:

Mr. William Gilliver, of the wellknown firm of Gilliver & Curtis, railway and general contractors, and whose private address is "Avoca," Bankstown, has written the following unsolicited letter, which we herewith publish in full:

Messrs. Foster-McClellan Co., 76 Pitt St., Sydney, N. S. W., February 14,

Dear Sirs:—In justice to you and suffering humanity I write to say that I suffered from itching piles for 22 years. I tried many doctors and pretty well all kinds of patent medicines but got relief for a short time only. Seeing your Ointment advertised I bought a pot and did not use more than one-half of it, not six months ago, and I am perfectly cured. You may use this as you wish.

Yours gratefully, WILLIAM GILLIVER.

It cannot be repeated too often that Doan's Ointment will cure itching piles. IT WILL CURE THEM ABSO-LUTELY. But do not take the manufacturer's word for this; ask or write Mr. Gilliver; he knows, for it cured him, and he lives in Bankstown, a su-burb 12 miles from Sydney. Is not that the best possible kind of proof? Could there be better?

Doan's Cintment is sold by all dealers at 50 cents per box or will be mailed on receipt of price by the Hollister Drug Co., Honolulu, agents for the Hawalian Islands.

We are Sole Agents for

Willcox & Gibbs NEW AUTOMATIC Sewing Ma chines.

The manufacturers of this machine have sold their goods to no one in the islands

excepting our firm. Parties representing that they have the Wilcox & Gibbs machine for sale are trying to palm off on an unsuspecting a public very inferior article which resembles the Automatic in every way but in being Automatic in action. The Wilcox & Gibbs is the only Automatic Sewing Machine in the world. So called Automatics sold by parties other than us or our agents are frauds. Do not let yourself be talked into buying a machine that is just the same as the Wilcox & Gibbs New Automatic, because it is cheaper.
