

A (Rehabilitation)

1 Jan 48 (Rep. 7)

Majuro Dist.

3 (Land Titles Investigation Commission)

The gathering of information and data in the field continues. The infrequency of field trips has made it somewhat difficult to keep a good follow-up on the procurement of material. However, good progress has been made and the total information on file now represents a majority of that required. The first reports were received from Wotje Atoll this quarter and cover a little better than a third of all the islands there. Programs for procurement of land title information were outlined at Jaluit and Ebon on our first visit there this quarter, to be picked up next trip. The balance of the information now outstanding should be pretty well completed and on file by the end of the coming quarter except for Namorik Atoll, which has not been contacted to date.
