SATURDAY, MARCH 16, 1895.

Timely Topics.

That proposed law relating to lawless persons may be good policy. It has the appearance, though, to a good many people, of being mighty poor politics.

The death of "Billy" Unger on the coast is a personal bereavement to many people in Honolulu. The man had noble and amiable qualities and was held in high esteem.

The conversion of Nordhoff places that gentleman in the position of making at a very late date an unwilling but honest and extremely humiliating confession. He must say to himself: "What an awful liar, fraud and rascal I have been in this affair."

The bad poet of the Sierras called on President Dole some time ago, asked a lot of leading questions and sent the interview to the Examiner. It was duly published with the piqued comment that while the President had talked willingly, he had been very reluctant to say anything.

One of the best of the New York Star's special writers uses the signature "An American Traveler." He sends letters on any topic he chooses from different European cities. The Traveler is now at Nice. He writes at length on the subject of an American cable to Hawaii, and advances the best of argument in its favor.

The Navy Department at Washington has just completed a test of aluminum as a material for ship's boats, with object of determining its adaptability to naval uses. On account of its comparatively light weight its utility on shipboard would be almost incalculable if it were not for the fact that it has been now shown to be easily susceptible to the corrosive action of salt water.

In a letter dated Jan. 30, John F. Colburn writes to Hon. L. A. Thurston at Washington: "As you well know, the best thing that has happened for Hawaii is the foolish and ill-advised move that was made by some Royalists on the 6th of January. Revolutionary talk every now and again is over, and I think the main issue brought to a head, annexation or not." Mr. Colburn adds that he and Samuel Parker and others are now for annexation.

LA GRIPPE is epidemic in San Francisco and will soon appear in the Islands. Doctors on the coast say that the best thing to do to combat the visitor is to look out for the general health by prudence in diet and exercise. The liver and bowels should be kept in normal condition, and a good tonic like quinine ought to be taken under a physician's direction. All who have treated the disease thus far find it more readily handled than the old la grippe.

To ALL the priests in his domain Archbishop Corrigan, of New York, has sent a letter which says: "A recent decree of the Holy Office, confirmed by the Sovereign Pontiff, instructs the Bishops of the United States to advise the faithful committed to their charge against affiliation with the societies known as the Odd Fellows, Sons of Temperance, and Knights of Pythias, with the injunction that if Catholics, after such admonition, persist in their connection with any of these societies and will not give up membership therein, they cannot receive the sacraments."

Work of Improving the Efficiency of the Guard.

A meeting of the officers of the Citizens' Guard was held at the American League hall last evening. A suitable cap for the organization was discussed, and a committee of five was appointed to select one. The passage of the act relating to the wearing of police badges and uniforms was announced by Mr. Castle. The last business of the evening was the distribution of rules and regulations to govern the Citizens' Guard. It has now become apparent that the Citizens' Guard is one of the most perfectly organized military factors the country has ever had.

BY AUTHORITY.

WATER NOTICE. The water supply will be shut off on Nuuanu street from Judd hill to the waterfront, on Sunday next, March 17, from 6 a. m. to 8 p. m.

PARCEL POST. GENERAL POST OFFICE, LONDON, February, 23d, 1895.

With reference to your Excellency's letter of the 2nd of May last on the subject of a Parcel Post between the United Kingdom and Hawaii by way of Canada, I have the honor to inform you that the necessary arrangements having been made with the Canadian Post Office, steps are being taken to commence the new service in this country on the last of next month.

March 9, 1895.

The "fad," if it may be so called, of wearing dresses of a certain design will never become popular for the reason that, as a rule, a lady is very chary about getting the same kind of cloth that her neighbor wears. As an illustration it is only necessary to cite the case of a woman of fashion in Chicago whose dresses were frequently copied, and very much to her disgust. On one occasion when giving an order for a riding habit she remarked to her dressmaker "I want something that will not be copied by every woman who sees it, suppose you make the buttons of five dollar gold pieces." And her scheme worked. The ladies of Honolulu are not different in this respect from those of Chicago. If a few of them wish to wear stripes let those who object wear stars and there will be a combination that even the Government would not object to. With men it is different! Jones wears the same style hat that Brown does and there's no jealousy about it. And if Brown manages a plantation and finds an implement that suits his purpose he tells Jones and he gets one like it. Perhaps that is the way with the Avery Implements. Mr. Scott, manager of Waiwaku saw them and was satisfied with them. Directly he began using them the epidemic spread and now all Hawaii has the disease and were spreading it wherever there is an opening. The following testimonials show pretty well the high opinion in which these implements are held by the writers:

HUTCHINSON PLANTATION CO., NAAHEHU, HAWAII, March 1, 1895.

DEAR SIR:—In answer to your letter inquiring about the Avery Stubble Diggers and Fertilizer Distributors, I would say that the fact that we have just received the second Stubble Digger speaks for itself. We have dug over four hundred acres of ratoon stools and consider it will be a great benefit. The Fertilizer Distributor is a good thing and has effected a material saving of labor in the application of fertilizer and applies it better than can be done by hand.

OSOMEA SUGAR CO., PAPAHOE, Feb. 26th, 1895.

DEAR SIR:—The Osomea Sugar Co. has now in use three of the Stubble Diggers. I think these machines are indispensable for the proper cultivation of ratoon. We have never had an implement that would so thoroughly loosen the earth around the stools and put the soil in such condition that the air, moisture and fertilizer would so readily find access to the fine roots of the cane and the soil around them.

HAKAIAI, HAWAII, February 16, 1895.

Mr. E. R. HENDRY, President and Manager Hawaiian Hardware Co., Honolulu, Oahu. We use the Avery Stubble Digger, Fertilizer Distributor and Cane Cultivator. They save labor and do all the work claimed for them. The Stubble Digger I consider a particularly good implement.

THE HAWAIIAN HARDWARE COMPANY, 307 Fort street.

WHAT FLAGS SIGNIFY.

The Colors of a Regiment or Ship are something to be proud of. They are the colors of a soldier's or sailor's life. They represent to a soldier what is noblest in his country's history and institutions. Their loss under circumstances short of battle, is an acute disgrace to the regiment losing them. Only death can excuse the color guard from defending them, and when he has been shot or cut down others should be ready to stand by the flag. In the navy a vessel never strikes her colors except to acknowledge a defeat.

Next to our own flag, that of Great Britain interests us most. It is called the "Union" flag because it is three flags in one. The flag of England is a red cross on a white field; that of Scotland, a white saltire on a blue field; and that of Ireland, a red saltire on a white field. These three flags were combined when England and Scotland united in 1603, and on the union with Ireland the Irish flag, a red saltire on a white field, was added.

These three flags were combined when England and Scotland united in 1603, and on the union with Ireland the Irish flag, a red saltire on a white field, was added.

A New Business.

HENRY WATERHOUSE. REAL ESTATE, INSURANCE, COMMISSIONS, COLLECTIONS. I am now prepared to do all kinds of business which may be intrusted to me. Collections made, Buildings Insured from loss by fire or water, Real Estate property cared for. I shall be pleased to carry out the instructions of anyone unable to come to Honolulu to do their business.

He has had his leg pulled, Have You?

Those who are afflicted with skin eruptions, especially with the red blotches and hard little lumps known as eczema, will find relief by persevering in the following simple and inexpensive cure. Do not bathe the affected parts in water. This aggravates cutaneous affections. Each night before retiring heat about a pint of fresh, sweet milk. Do not let it boil, but let it rise just to the boiling point. Boiled milk loses its healing virtue. Then, with an old linen handkerchief, sop the hot fluid generously on the affected parts. Do not wipe the milk off, but let it dry into the skin.

Snake Cures.

As a curative agent the snake, dead or alive, is thought highly of. In fact they hold that gopher may be cured in the following manner:—Take a second person hold the common snake by its head and tail and draw it slowly three times across the diseased neck, but after every third time the creature must be allowed to crawl about awhile. It must afterward be put alive into a bottle, which should be tightly corked and buried—the swelling will waste with the snake. Some say the snake should be killed and its skin worn around the neck.

White Handled Razors.

There are many barbers who will not own a white handled razor because of an old superstition that bad luck goes with it. A razor is to the barber what a locomotive is to the engineer, and there are more things to learn about it than one would suppose. For instance, there are razors that will cut certain qualities of hair better at certain seasons than at others. Climate and weather have a great deal to do with razors. Some will cut better in cold weather and some in hot. These are only a few of the causes that affect razors, and they and many more all tend to make the barber who does much work keep accumulating razors until he has all sorts to pick from.

Both the method and result when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels...

CALIFORNIA FIG SYRUP CO. SAN FRANCISCO, CAL. HOBRON DRUG CO. Wholesale Agents.

A lamp was lit, and by its light the two men continued to tighten screws, check rivets and make the last preparations for their experiment.

Pericord said nothing, but his face glowed with pride and expectation. "We must have something to eat," Brown remarked...

The morning was bright and spring-like. A pale blue sky arched over London with a few gauzy white clouds drifting lazily across it.

Pericord watched it with a white, drawn face, and then, after a moment, he turned towards the wires.

"All right!" he asked. Brown pointed in answer to his bag. "I have the motor and the grille already packed away in the guard's van.

Pericord had thrown open the shutters, and the mellow evening light streamed in through the discolored window.

Hood's Pills cure constipation by restoring the normal action of the alimentary canal.

Hobron Drug Company Wholesale Agents. "I have a suggestion to offer," said Brown. "My brother has a place in Sussex on the highland near Beverly head...

Pericord stepped forward, his long, yellow face beaming with excitement. His white, nervous hands darted here and there among the wires.

The two men stood for awhile in silence. Then Pericord threw his long arms up into the air. "It acts!" he cried. "The Brown-Pericord motor acts!"

Other Way Round. "She—cannot think what induced Jack to marry again after his first unfortunate experience. Once bitten, twice shy, you know."
