STEAMSHIP INSPECTORS FOR HAWAII

ONE MILLION IN CASH FOR PEARL HARBOR

OF \$2,100,000 THE SECRETARY OF THE NAVY IS AUTHORIZED TO MAKE CONTRACTS AGAINST \$2,000,000 IS FOR DRY DOCK—THE TOTAL VOTE IS THE LARGEST EVER MADE FOR BEGINNING OF A NEW NAVAL STATION.

Washington, D. C., May 12, 1908. EDITOR HAWAIIAN STAR.—The Naval Appropriation bill passed Congress yesterday carrying \$3,100,000 for Pearl Harbor, the House conferees finally accepting all the items of increase made in the Senate.

The provision made for Pearl Harbor is exceptional in two respects. In the first place it is many times the largest sum ever voted by Congress for the beginning of a new naval station; for example only \$2,862,272 were given the Puget sound Navy Yard during the first twelve years of its existence up to and including the year 1904.

In the second place this is the first time that Congress has ever authorized a complete new naval base without the Navy Department having submitted complete official estimates for all the items required. In our case the Secretary of the Navy submitted no official estimates whatever except for the single item of the dry dock.

The items for which the Secretary of the Navy is immediately authorized to contract are:

Channel Improvement	\$ 400,000
Store houses	300,000
Dry Dock	2,000,000
Machine Shops	300,000
General yard development	100,000

One million dollars of the above is appropriated in cash and the remainder will be provided for as of course in sundry civil bills as rapidly as it can be expended.

It is gratifying to know that the Bureau of Yards and Docks will move

promptly for a beginning on the Pearl Harbor construction. Admiral Holyday, the head of that Bureau, told us last evening that he expects to send a group of men to Pearl Harbor next month to begin the preliminary surveys and borings. Admiral Holyday will himself come to Honolulu in August to personally look over the ground. There is therefore good reason to expect that the work will be inaugurated and carried forward with the least possible delay.

Congress also passed yesterday the bill authorizing a \$10,000 light-house to be located on either the northern or western coast of Kauai, on a site to be selected by the Light-House Board.

On Thursday last Senator Piles shipping bill for Hawaii, a duplicate of my bill as reported in the House, was considered by the Senate Committee on Commerce.

Mr. McClellan made the argument for the bill, being opposed by Maxwell Everts, general counsel of all the Hawaiian systems. Mr. Everts represented the Pacific Mail Company and Judge Payson of Washington appeared for other shipping interests.

The Senate Committee were apparently in favor of reporting the bill, but at the request of one senator the hearing was adjourned one week to secure further information. I have invited Gov. Frear to be present and make a statement at the adjourned hearing.

Very truly yours,
J. KALANIANA'OLE,
Delegate to Congress.

the next eight weeks he will not have to go to the Boys' Industrial school. L. Lathrop, one of the gang of marines who tried to break up the Anchor Saloon the other day, was sent over for eight days and fined \$3. Ah Poon, charged with larceny, had his case postponed until tomorrow. David Rice and Annie Kila arrested for disturbing the quiet of the night, had sentence suspended for 13 months. Henry Mersberg was found guilty of the same charge and was fined \$4. W. R. Sims, charged with "drunkenness, was fined \$4. The charge of having concealed weapons on his person was continued until tomorrow morning. Six other drunks netted the Territory \$28.

YOU HAVE RHEUMATISM?

If so, apply Chamberlain's Pain Balm. It has cured others and there is no reason why it should not cure you. One application relieves the pain. For sale at all dealers. Benson, Smith & Co., agents for Hawaii.

Fine Job Printing, Star Office.

M'CANDLESS OR M'CLANAHAN FOR GOVERNOR?

"If Bryan is elected President," said a prominent Democrat this morning, "Link McCandless will be the next governor of Hawaii."

It appears that this statement has been going round a bit among the Democrats. McCandless is expected to run for delegate to congress and to make a very vigorous campaign, whether elected or not. The Democrats are wide awake in all districts, and though admitting that they have a hard fight ahead, many think they can elect the former senator who recently joined their party.

Anyhow, as a reward for the warm campaign he will undoubtedly make, many Democrats think that "Link" will get the governorship if Bryan succeeds Roosevelt.

A different idea was held by another Democrat, however. "If Bryan is president," he said, "the next governor of Hawaii will be Attorney E. B. McClanahan, who ran for delegate last time. McClanahan is an old-time personal friend of Bryan, and he will come back here to be governor if Bryan gets in."

However, McClanahan is away from the islands and will soon lose his standing as a citizen of the Territory.

L. L. McCANDLESS, WHO MAY BE NEXT GOVERNOR OF HAWAII.

JUG-HANDLED PROSPERITY

THE KAUAI EDITOR REGARDS THE PRESENT SUGAR BOOM IN MELANCHOLY MANNER.

Under the heading "All the Difference," the Garden Island says editorially:

Several of the large sugar concerns have of late either increased the dividends paid to their stockholders or have entered the ranks of the dividend paying corporations. This fact has repeatedly been pointed out as a sign of the great prosperity which we enjoy, but the assurance does not seem to assure, if one listens to the opinion of the large majority of the residents.

It is the men of wealth, in most instances of large wealth, who hold the stock in the corporations that pay fancy dividends. The man of small means, if he owns any stock at all, as a rule possesses the lithographic certificate of having paid one hundred per cent for what he now can sell at twenty per cent.

The rich men of the Territory receive their 12, 18 or 36 per cent as the case may be and find themselves able to indulge in such luxuries as automobiles and being able to pay their bills. After they have satisfied themselves in this respect, they send the balance away for investment. One or two exceptions from the rule only goes to prove it.

All this time the average man, the mechanic, the man on a salary, teachers and the like are wondering what is behind the cry of prosperity. He knows that almost everything he buys is higher than usual, in fact some goods are higher than they have been in years. But his pay remains the same or is in many instances lower than it was years ago. To him it appears that the times are pretty hard.

It all depends on the point of view. If one's income is raised thirty to fifty per cent and the living expenses only ten to fifteen, things appear to be very bright and business prosperous. But if the income remains stationary while the cost of living soars up, one is apt to sigh and call the other man a prevaricator.

A Fifty Cent Tin of glucose will catch all the mice, rats and cockroaches in your house. Honolulu Candy Co.

PLANS TO GATHER A GREAT FLEET

THE PRESIDENT WILL REVIEW TWENTY-FOUR BATTLESHIPS IN HAMPTON ROADS

WASHINGTON, May 18.—Twenty-four battleships will be reviewed by President Roosevelt in Hampton Roads February 22nd next, the date of the return of the Atlantic battleship fleet from its world cruise. It has been determined that the new ships Wisconsin and Nebraska, constructed on the Pacific Coast, shall be assigned to the Atlantic fleet and will make the return cruise with that organization. The Maine and Alabama will return to their own stations together, arriving in October.

Secretary Metcalf, who has just returned from reviewing the fleet at San Francisco, expressed himself today as deeply impressed with the benefit the cruise has had on the ships' officers and men.

"It is remarkable," he said, "the long cruise should have benefited the ships, but this is a fact. The condition of the machinery is said to be improved instead of deteriorated by the voyage. This is hardly more striking than the effect the voyage has had on the officers and men. The officers have been impressed with the efficiency of their ships as never before, and what is more satisfactory has developed an understanding and friendly cordiality between the officers and enlisted men, which has not before existed, and even still more important an improved condition in the conduct and feeling of the men themselves."

MORGAN COMING HOME.

President James F. Morgan of the Chamber of Commerce will arrive home in the Alameda due Friday morning. A cable to that effect was received yesterday by H. P. Wood.

DOUGHERTY A LANDOWNER.

Jimmy Dougherty, the well-known singer and baseball critic, is starting in to acquire real estate. A deed was filed in the office of Registrar of Conveyances Merriam this morning by which he received title to 4,500 square feet of land on Kinau street near Keeaumoku street, from Mrs. Emily C. Judd. The consideration was \$2,000. A mortgage for \$1,500 to the Waterhouse Trust Company was placed on the property later.

A. Y. C. CAPE.

The new sodas at the Alexander Young Cafe are very popular. The favorites are the Summer Girl and Chop Suey.

WAIT ON SPALDING

GOVERNOR FREAR ADVISES HASTENING EFFORTS TO LOCATE HIM AND CLOSE DEAL.

No news from Manager Fairchild which amounts to anything seems to be the order of the day. The mail from Kauai brought a letter from the head of Makee Sugar Company's plantation but its chief news was to the effect that the writer had heard nothing from Colonel Spalding. He added that he had sent the following cable to Rihet, Spalding's agent in San Francisco:

"Government annoyed at our failure and inability to locate Spalding. Cable at once whether he has been located, that we may give some valid reason for our failure to answer."

That not much further time will be spent in dilatorily over the Kapaa land matters is certain. In the letter from Governor Frear received today the idea was expressed that while reasonable time should be given to locate Spalding, the matter could not be held open indefinitely. In speaking of this and referring to Col. Spalding, Governor Frear said:

"If he can be found it ought to be soon and we cannot hold the exchange proposition open indefinitely. Time is important."

From this it may be judged that unless some answer is soon forthcoming the Kapaa land matters will be dropped very suddenly. It is now over thirty days since the date when the efforts to locate Col. Spalding were supposed to commence.

JURYMEN MAY SPIT

Hereafter the Federal jurors will be able to spit in comfort. This result has been attained through the careful work of United States Marshal Hendry, who appreciates the trials and tribulations of the jurymen in the long drawn out trials which often occur in the Federal Court. Knowing that while smoking is not allowed in court, the solace of a quid of tobacco, carefully rolled under the tongue, can help to wear away the weary hours when the lawyers are wrangling, the Marshal, in his last requisition for supplies, ordered spitoons. They have arrived. Twelve large receptacles of paper mache, which will hold enough liquid to irrigate a good-sized sugar plantation, are on hand, and, as has been stated before, the jurymen will now be able to spit.

MRS. ROE'S WILL.

The will of Annie C. Roe was admitted to probate in the Circuit Court this morning and C. R. Roe was appointed administrator. The property is all left to the husband of the deceased during his life and will afterward revert to the three children. The estate amounts to about \$4,750, the largest item being real estate at Waikiki, valued at \$1,000.

OIL CARGOES DIVIDED.

S. S. Rosecrans this morning arrived off port from Gaviota with the barge Monterey in tow, both oil laden. The tug Intrepid towed the Monterey to the oil wharf at the Ewa end of the harbor and the Rosecrans at once proceeded to Kaanapali where she will discharge a portion of her liquid freight, returning to Honolulu to give up the balance and to hook on to the Monterey for return to the Coast for more oil.

VISITORS FROM PASADENA.

Prominent among the new comers to Honolulu are Mrs. Flora Goodall Bland, Miss Florence Bland and Miss Serena Bland of Pasadena, California, who contemplate spending several months in the islands before going on to the Orient. Mrs. Bland has closed her handsome home on the heights overlooking Pasadena and the family will spend the next year in travel. The family are prominent in musical circles, Miss Florence Bland being especially gifted, and possesses a contralto voice of rare charm. For the past year she has been contralto soloist in the West Side Congregational Church of Pasadena and is always prominent in the amateur work in light opera which is a feature of Pasadena's winter season.

LOCAL INSPECTORS HULLS AND BOILERS

(Associated Press Cable to The Star.)

WASHINGTON, D. C., May 25.—The House has agreed to the Conference Committee report on the Sundry Civil Appropriation bill and it has been passed. The bill contains a provision for inspectors of hulls and boilers to be stationed in Hawaii.

DYNAMITERS CONFESS

CLEVELAND, May 25.—Four carmen who have been on strike here, have confessed to being implicated in some of the recent dynamiting outrages.

BIG FLOOD IN TEXAS

DALLAS, May 25.—Floods in this region have taken the lives of several and have damaged a million dollars' worth of property.

NEW CHURCH HEADS

BALTIMORE, May 25.—William Quayle and Charles W. Smith have been ordained Bishops in the Methodist church.

LAND EXCHANGE.

Several papers were filed with the Registrar of Conveyances this morning by which an exchange of interests was made between L. L. McCandless and James Armstrong, on the one part, and the Kaneohe Rice Mill Company on the other. Property at Kaneohe belonging to McCandless and Armstrong is deeded to the rice company, and property in Ewa goes to the first named parties. In this manner disputes over titles have been settled and more satisfactory distribution of property arranged.

FINE WASH MATERIALS.

The very prettiest wash materials ever shown in Honolulu are on display this week at Sachs', at attractive prices.

AN ENTERPRISING MERCHANT

K. Yamamoto is the biggest importer of Japanese goods in Hawaii. Eve 7 steamer (from the Orient (tramp or passenger) brings him the largest shipment consigned to one firm. By getting his goods in large quantities the freight and other charges are greatly reduced which enables him to undersell all competitors.

NO GAMBLING CASES TODAY

Today was the first Monday in many months that the calendar at Police Court did not have gambling cases on it, and as one remarked in the hall at headquarters after court was over: "I guess the police are going to give them a chance to gamble a little while longer, and then take in a big load when they do decide to make a raid." However the calendar was made up of sixteen other cases which were disposed of with great alacrity, Judge Andrade not believing in taking all morning to finish court.

WEEKLY WEATHER BULLETIN

For the Week Ended May 16, 1908. Honolulu, May 18, 1908. GENERAL SUMMARY.

The mean temperatures were considerably higher than those of the preceding week at all stations on Kauai, and somewhat higher at the majority on Maui and Oahu, and at those in the Puna, Kau and Kona and the northern portion of the Hilo and the south-central portion of the Kohala districts of Hawaii.

The rainfall was above the average for the week at all stations having a record of ten or more years in the Kohala and Hilo districts of Hawaii, and below the average at all other such stations in the section, excepting Koloa, Kauai.

The excesses were .04 to .12 inch in the Kohala, and .77 inch to 1.52 inches in the Hilo districts of Hawaii. The deficiencies were: Hawaii, .39 to .44 inch in the Kau and Hamakua, .87 inch in the Puna, and .19 inch in the Kona; Oahu, .15 to .54 inch, and Kauai, .22 to .60 inch, excepting an excess of .44 at Koloa.

The greatest amounts of rainfall occurred in the Hilo district of Hawaii, and ranged from 2.83 to 5.94 inches. The amounts, in inches, in the other districts were: Hawaii—Kohala .84 to 1.05, Hamakua .38, Puna 1.26 to 3.00, Kac .06 to 1.13—excepting .00 at Pahala, and Kona 1.27 to 1.39; Maui—Koolau 1.26 to 2.25, Hamakua .54, Hamakua-

THE LOG-BOOK

Chief Steward Johnson of the Pacific Mail liner Siberia, who was left at Hongkong by that ship suffering with typhoid fever, died at that port a few days ago.

The race between the barkentine Irmgard, Captain Christensen, and the bark Amy Turner, Captain Warland, is attracting much interest. Both vessels left San Francisco on the same day for Honolulu.

Estimates have been prepared at Mare Island for the thorough overhauling of the army transport Sherman. Specifications have also been received covering requests for estimates on overhauling the army transport Logan and the army tug Slocum. It will be necessary for representatives to visit the Logan at San Francisco to make intelligent estimates of the work required.

The bark Amy Turner, from San Francisco for Honolulu has cargo valued at \$5,915. The following are the principal shipments: 100 cs canned goods, 2 bbls salt fish, 25 bbls plaster, 50 tons molding sand, 5,178 lbs copper wire, 300 telephone poles, 50 pigs electrical goods, 4 bars steel, 3 bbls asphaltum, 40,000 lbs fertilizer, 25 bbls lubricating oil, 159 cs gasoline, 50 cs naphtha 1,859 ftuber, 4,384 lbs solder, 1 cs automobile tires.

The Toyo Kisen Kaisha America Maru, Captain W. E. Filmer, docked at the Hackfeld wharf at 5 o'clock this morning from San Francisco with 534 sacks of mail, representing the accumulation of ten days. She sails for the Orient at 6 p. m. today. There are but two stopover passengers for Honolulu, John Matthews and W. J. Conroy, the former bound for Yokohama and the latter for Hongkong. Both are business men and the latter is quite a wit. Among the through passengers is Count A. D. Walderode of Austria, touring the world.

The barkentine Irmgard from San Francisco for Honolulu has an assorted merchandise cargo valued at \$10,490 and including the following: 996 bales hay, 7,549 lbs. beans, 10,000 lbs mill feed, 8,250 lbs bran, 41 cts oats, 2,437 lbs middlings, 1,541 cts barley, 30,000 lbs salt, 4,750 lbs lard, 50 cs pickles, 15 cs syrup, 30 cs canner goods, 11 cs cider, 250 cs soap 324 pigs tank material, 13 pigs wagon and carriage material, 43 cs sewing machines, 30 bales paper bags, 50 cs and 1 bbl oil, 25 cs matches, 5 bbls dynamite, 190 kegs and 70 cs powder, 784 cs brooms, 3 cs blasting caps, 140 coils rope, 50 drums sheep dip.

Announcement was made in San Francisco on May 15 that, possibly, the name of the Occidental and Oriental Steamship Company will soon disappear from shipping on the Pacific. The Occidental and Oriental Steamship Company has been in process of liquidation for nearly a year, and if it does go out of existence it will mean that the Pacific Mail Steamship Company will take over its business and the two steamships which it is now operating, so that sailings out of San Francisco will in no-wise be affected.

For years past since both companies are owned by the same interests, there has been no real competition. Both companies are controlled jointly by the Southern Pacific and the Union Pacific Railroad Companies. The Pacific Mail owns its own vessels but the Occidental and Oriental has always operated its ships under leases, the Gaelic, the Coptic and the Doric being the three ships which it had on the run to China for many years.

LOOKED THAT WAY.

"Come, Willie," said his mother, "don't be so selfish. Let your little brother play with your marbles a while."

"But," protested Willie, "he means to keep them always."

"Oh, I guess not."

"I guess yes! 'Cause he's swallowed two o' them already."—Philadelphia Press.

poko .41 to 1.04, and .00 in the remaining districts; Oahu—Koolau-poko .40 to .96, and .00 to .07 at the remaining stations; Kauai—Koolau .67, Puna .00 to .36 and Kona .02 to 1.48, and Molokai .17. Moderately heavy rains occurred generally over the Hilo district of Hawaii on the 10th and 11th.

There was more rainfall than during the previous week at the majority of stations on Hawaii, and less on the other islands, but the differences were not large—the greatest excess being 3.14, and the largest deficiency 1.10.

Earthquake shocks were felt at 9.20 p. m. on the 10th at Kealakekua (Wallace), and 9.45 p. m. of the same date at Kealakekua (Davis). The following table shows the weekly averages of temperature and rainfall for the principal Islands and for the Group:

	Temperature.	Rainfall.
Hawaii	70.5 deg.	2.08 inches.
Maui	73.8 deg.	0.55 inch.
Oahu	75.0 deg.	0.25 inch.
Kauai	74.0 deg.	0.46 inch.
Molokai	74.2 deg.	0.17 inch.

Entire Group ... 72.08 deg. 1.20 inches.

At the local office of the U. S. Weather Bureau in Honolulu partly cloudy weather obtained, with measurable rainfall on the 10th, amounting to .02 inch, .54 below the normal for the week, and .06 less than during the preceding week. The maximum temperature was 81 deg., minimum 68 deg., and mean 74.9 deg., which is 2 deg. above the normal and 3 deg. lower than last week's. The average daily relative humidity varied from 65 per cent to 70 per cent, with a mean of 68.7 per cent for the week. The prevailing wind direction was E, on the 12th and 13th, and N.E. on the remaining dates, and for the week, with an average hourly velocity of 7.4 miles. The mean daily barometer was normal on the 14th, and above normal .01 to .07 inch on the remaining dates.

J. S. DEPARTMENT OF AGRICULTURE, WEATHER BUREAU.

The following data, covering a period of 33 years, have been compiled from the McKibbin and Weather Bureau records at Honolulu, T. H. They are issued to show the conditions that have prevailed, during the month in question, for the above period of years, but must not be construed as a forecast of the weather conditions for the coming month.

Month, May for 33 years.

TEMPERATURE. (18 years 1890-1907.) Mean or normal temperature, 75 deg. The warmest month was that of 1893, with an average of 76 deg. The coldest month was that of 1905, with an average of 73 deg. The highest temperature was 87 deg. on the 28th, 1907. The lowest temperature was 60 deg. on the 6th, 1902.

PRECIPITATION. (Rain 21 years, 1877-94, 1905-7.) Average for the month, 2.14 inches. Average number of days with .01 of an inch or more, 13. The greatest monthly precipitation was 11.29 inches in 1885. The least monthly precipitation was 0.18 inches in 1880. The greatest amount of precipitation recorded in any 24 consecutive hours was 9.68 inches on the 10th, 1885.

RELATIVE HUMIDITY.* Average 9 a. m., 67 per cent; average 9 p. m., 74 per cent (1893-1904.) Average 8 a. m., 66 per cent; average 8 p. m., 71 per cent (1905-7.)

CLOUDS AND WEATHER. (18 years, 1890-1907.) Average number of clear days, 10; partly cloudy days, 17; cloudy days, 4.

WIND. (Direction, 23 years; velocity, 3 years.) The prevailing winds are from the NE, (1875-94, 1905-7.) The average hourly velocity of the wind is 8.5 miles (1905-7.) The highest velocity of the wind was 28 miles from the NE., on the 13th, 1905, (1905-7.)

Station: Honolulu, T. H. Date of Issue: April 30, 1908.

*9 o'clock averages from records of Territorial Meteorologist; 8 o'clock averages from Weather Bureau records.

WM. B. STOCKMAN, Section Director, Weather Bureau.

TIME FOR CHANGE, ROOSEVELT SAYS

President Warns Governors of Fearful Destruction of Natural Resources.

DOMINANT FIGURE IS ROOSEVELT

"Worse Than Anarchists," Says Expert of Our Amazing Waste of Coal.

WASHINGTON, May 13.—with virility and breeziness that paralyzed the power of resistance President Roosevelt took complete control of the conference of governors today. There was not a struggle until it was too late. He put the governors in good humor, first by shaking the big stick at congress. Most of them had read of this performance, but few had seen it. They enjoyed it very much.

While they were yet laughing the president walked to the front of the platform and said, in a conversational tone: "I would suggest that you name a committee on resolutions to put in shape the conclusions of your deliberations." This was received with nods and murmurs of approval.

The president glanced at a slip of paper that he held, looked around the room and took a step forward. "And I would suggest the following as members of that committee. They are names that have been suggested to me." Roosevelt then read the list.

There was deep silence. It had extended to the straining point, when Governor Johnson of Minnesota arose and moved that governors named by the president be made committee on resolutions. This being seconded the president put the motion. There were few eyes, but no noses, and the motion was declared carried.

This insures Roosevelt's domination of the conference. It matters not what may be said in the line of pure talk, the committee on resolutions is the keystone, and the president named it all by himself. This insures favorable action in the Roosevelt policy concerning public lands, interstate streams and preservation of forest reserves.

Two ideas destined to mark material progress in America's future resulted from the first of the three days' conference at the White House today, in which President Roosevelt, the governors of 44 states, cabinet officers, supreme court judges, senators, representatives and experts are participating in efforts to reach conclusions on the best methods of conserving the natural resources of the United States.

The first is that a permanent organization by the states and the nation is necessary and probably will result from the present conference to accomplish the end sought.

The second suggested by Secretary Root—is that there is no limitation by the constitution to the agreements which may be made between the states, subject to the approval of congress. The two ideas, fully developed, it is predicted, would result in the conservation of the energies and resources of the nation through uniform and unconflicting laws both national and state.

The idea that the conference should be perpetuated developed in the form of resolutions offered for later consideration by Governor Glenn of North Carolina and Governor Folk of Missouri. To save time they were sent to a committee.

The industries were represented by Andrew Carnegie, the iron master; James J. Hill, the genius of railway expansion; John Mitchell, the labor leader, and Dr. I. C. White state geologist of West Virginia, and perhaps the leading expert on coal in the United States.

ORIGIN OF CONFERENCE.

The special invited guests included three democratic presidential candidates—William Jennings Bryan, Judge George Gray of Delaware and Governor John A. Johnson of Minnesota. The subjects to be considered include the use and conservation of mineral resources, resources of the land and resources of the waters.

The conference is the outgrowth of the recommendation of the international waterways commission to the president.

The morning session was opened by the president with an address on "Conservation as a National Duty." The program for the day included addresses by Andrew Carnegie, on "Ores and Related Minerals," and by Dr. White, on "Mineral Fuels."

Former President John Mitchell of the united mine workers of America led the general discussion on coal mining.

President Roosevelt opened the afternoon's session. He called Governor Noel of Mississippi to the chair to preside. The president expressed the belief that the convention would be glad to hear Mr. Bryan. He will speak Friday.

The president also requested Governor Johnson of Minnesota to preside at the meeting tomorrow, and he accepted. Both suggestions were greeted with tremendous applause.

At the afternoon session the real work of the conference began and the session, which opened at 2:45 and lasted until 5:05 o'clock, proceeded at a rate that broke all speed regulations. The president finds it impossible to devote his entire time to the conference meetings. He will, as he did today, call to order each session and then designate a governor to preside.

ROOSEVELT'S STRIKING WORDS.

The first striking paragraph in the address of President Roosevelt was this:

"This conference on the conservation of national resources is in effect a meeting of the representatives of all the people of the United States called to consider the weightiest problem now before the nation; and the occasion for the meeting lies in the fact that the natural resources of our country are in danger of exhaustion if we permit the old wasteful methods of exploiting them longer to continue."

Again he said: "Since revolutionary times our knowledge and use of the resources of the present territory of the United States have increased a hundredfold. Indeed, the growth of this nation by leaps and bounds makes one of the most striking and important chapters in the history of the world. Its growth has been due to the rapid development, and alas! that it should be said, to the rapid destruction, of our natural resources."

"The prosperity of our people depends directly on the energy and intelligence with which our natural resources are used. It is equally clear that these resources are the final basis of national power and perpetuity. Finally, it is ominously evident that these resources are in the course of rapid exhaustion."

"We began with coal fields more extensive than those of any other nation and with iron ores regarded as inexhaustible, and many experts now declare that the end of both iron and coal is in sight."

"We are coming to recognize as never before the right of the nation to guard its own future in the essential matter of natural resources. In the past we have admitted the right of the individual to injure the future of the republic for his own present profit. The time has come for a change."

Dr. White, the coal expert, said: "A great geologist once said: 'The nation that has the coal and iron rules the world.' Bountiful nature has endowed the American people with a heritage of both coal and iron richer by far than that of any other political division of the earth."

"What accounts can we, as a nation, give of our stewardship of such vast fuel treasures? Have we carefully conserved them and transmitted the remainder unimpaired to succeeding generations? Or have we greatly depleted this priceless heritage of power and comfort and source of well-being by criminal waste and wanton destruction?"

"The answer should bring a blush of shame to every patriotic American."

WORSE THAN ANARCHISTS. "The wildest anarchists determined to destroy and overturn the foundations of government could not act in a more irrational and thoughtless manner than have our people in permitting such fearful destruction of the very sources of our power and greatness."

"The answer should bring a blush of shame to every patriotic American."

WORSE THAN ANARCHISTS. "The wildest anarchists determined to destroy and overturn the foundations of government could not act in a more irrational and thoughtless manner than have our people in permitting such fearful destruction of the very sources of our power and greatness."

ROOSEVELT'S STRIKING WORDS. The first striking paragraph in the address of President Roosevelt was this:

It is equally clear that these resources are the final basis of national power and perpetuity. Finally, it is ominously evident that these resources are in the course of rapid exhaustion."

SIGNS POINT TO GREAT DEFICIT

WASHINGTON, May 18.—The Sixtieth Congress will have earned the title of a "billion dollar Congress" at its first session before adjournment is taken at the end of this week. It is estimated that the total appropriations will reach the enormous sum of \$1,025,000,000, which is said to be the largest amount ever appropriated at a single session.

These appropriations are for the fiscal year which begins July 1, 1908. It is too early to give any figure like an accurate estimate of the revenues of the Government during that period of twelve months, but members of the Appropriation Committees think they will read somewhere between \$850,000,000 and \$900,000,000. This would mean a deficit of between \$125,000,000 and \$175,000,000. Chairman Tawney of the House Committee warned the

House last week that the deficit would reach \$150,000,000, and if this prediction is fulfilled the surplus now in the Treasury will be wiped out by June 30, 1909, inasmuch as at the end of the fiscal year there will be a deficit of between \$60,000,000 and \$65,000,000.

Why "VUDOR" PORCH SHADES Are Needed

You need Vudor Porch Shades to get the most out of your porch.

To make it a spot where you can rest or work on the hottest days—outdoors, yet free from the sun's glare and heat.

You can do this with Vudor Porch Shades; you can add to the house another room, cool and shady, where you may enjoy every refreshing breeze, in secluded comfort.

Vudor Porch Shades are very durable, and will last many seasons.

Another good feature about them is the peculiar fact that those sitting on the porch can see out, but passersby cannot see in. In other words, you have complete privacy, and can use the porch or veranda the same as an inside room, with infinitely more comfort on hot days.

Vudor Porch Shades are just the thing for "boxing in" porches or balconies that are to be used as outdoor sleeping or living apartments.

Vudor Porch Shades are made of thin, flat strips of Linden Wood, closely bound by strong Seine Twine, in a lock-stitch weave.

They are artistically stained in soft, pleasing colors. These colors are

"She can look out, but you can't look in"

WEST POINT EXILE BECOMES ARMY OFFICER.

"Yes, you know they call me 'Mule Jackson' all over Montana," and the old man chuckled, "because I raised and handled so many mules there. After they got to mining so much copper in Montana they needed lots of mules about the mines, and I took to supplying 'em. Don't you know there's now there's hundreds of my mules working a thousand feet under ground in those mines—I mean mules I raised, for I have about quit business now."

Mr. and Mrs. Jackson have two grown sons in Butte, Montana, and they make their home not a great distance from that city. Mr. Jackson was much impressed with the business outlook for the islands, and declared his intention of returning and investing in some of the propositions into which he had been looking.

Both Mr. and Mrs. Jackson visited the volcano and saw it when it was quite active. They were, of course, duly impressed.

BACKACHE.

Delicate women who are subject to nervous spells, backache, bearing-down and periodical pains, take Dr. Miles' Anti-Pain Pills and find in them a pleasant and sure relief. They cure by their soothing influence upon the nervous system. They do not affect the bowels in the slightest degree, and are perfectly harmless. 25 doses, 25c. Never sold in bulk.

Before following the advice of a man who tells you how you ought to run your business take a look at the way he is running his own.

GEORGE F. HENSHALL.....MANAGER

MONDAY.....MAY 25, 1908

A REPUBLICAN STRATEGIC OPPORTUNITY.

Why not Albert P. Taylor for Republican candidate for sheriff of Oahu? The suggestion was first broached in the news columns of The Star some time ago, when it was met by a statement from Taylor that Laukaea was expected to run again, a contingency which seems now to have disappeared.

As Chief of Detectives, Taylor's record, beyond all question, is a very excellent one. He has shown much ability, unbounded zeal and activity and his record remains clean. No one can doubt the value of his services in helping Laukaea to make the general good record he has made. Under these circumstances, why should the Republican party look elsewhere for a candidate? If Taylor wants a nomination he is entitled to it on the principle of promotion in office and reward for good service. On the record, with his party behind him, he should easily be elected.

A GREAT REPUBLICAN YEAR.

It would seem to be about time that real Republicans busied themselves a bit with plans and candidates for the coming campaign. The Democratic activity is very great, it is intelligently directed and its management is in the hands of men who command respect. Therefore it is not to be ignored. So far the most prominently named aspirants for Republican legislative honors are not specially inviting, to say the least, and one of the announcements of candidacy is not less than a scandal.

There is no need to fear general results if the Republican party goes into the fight well led. Never before has the party had so much good campaign thunder as it has today. In the session just ended, a Republican Congress has given Hawaii far more in proportion to size that it gave any other section of the United States. Something like four million dollars are made available for expenditure on the island of Oahu alone, and the Republican leaders plan much more. Did ever a representative in Congress, from any section, go before his constituents with more campaign material than this? It may and of course will be urged that Kubio didn't do it all, but that is neither a fair nor a popular argument, and will not appeal to voters. Add to this that the hope for continuance of the policy of protection lies with the Republicans and on the general issue, the argument is stronger now than it ever was. In the policy of protection lies our hope for help to the coffee industry, for aid to our tropical fruit industries of all sorts as they may seem to need it; and a ship subsidy also is a part of the general theory of protection, to which Democrats are unalterably opposed.

The mail reports from Washington today confirm The Star's statement that the Bates Pearl Harbor bill was killed in the Senate and that the appropriation was passed as a part of the general Naval Appropriations bill, carrying \$3,100,000 immediately available for Pearl Harbor, the largest sum with which an American naval station was ever started.

SPLENDID RECORD OF SAILORS.

Once again, we are pleased to be able to call attention to the splendid conduct of the American sailors of the battleship fleet on their world tour. It has been one of the great distinguishing features of the trip. We may reiterate, that never before in the history of the world has an equal number of men made a similar trip with as good a record for behavior ashore, as this American fleet has made. On the departure of the fleet from San Francisco for a cruise north, the San Francisco Chronicle said:

Too much cannot be said for the enlisted men of the fleet. They bear no resemblance at all to the man-of-war-men of tradition. In fact, the traditional sailor would be of very little use on a modern battleship. It is a service in which befuddled brains are of no use. The modern battleship must have a crew of clean, bright, self-respecting men. And it gets them. One could not ask for a better type of American citizens than is found in the enlisted men of the Navy. We should have discovered it before, for the Pacific fleet is often with us and its men are of the same stripe. Doubtless many of us did realize it, but it was never so impressed upon the whole community as it has been during the visit of the two fleets.

The same Chronicle editorial as that quoted above concludes with the following expression, which all Hawaii will earnestly endorse: The visit has served to impress upon our people the vital necessity of such a battleship fleet permanently stationed in the Pacific. We do not doubt that it has also been impressed upon Congress just as it evidently has upon the President. The Pacific fleet from now on should be stronger than the Atlantic fleet. And we suppose that before many years it will be.

A STREET CLEANING AUTOMOBILE.

A Berlin correspondent of Municipal Engineering Magazine describes a street cleaning electromobile, which is an electrically propelled combined sprinkling and cleaning cart, rinsing and sprinkling the pavement while removing any dirt and dust. The main sanitary advantage of the new system of street cleaning is that no dust is raised, while the combination of so many functions in a single machine gives an advantage from the economical point of view, sprinkling cars, street sweepers and scrubbers being done away with. The water consumption of this combined machine is considerably lower than in the case of the ordinary method, the water being fully utilized by the machine, so as to allow no drop to go to waste.

This sprinkling and cleaning cart has been found to adapt itself even to the most crowded thoroughfares. The machine is about 10 feet shorter than those designed for horse-traction. Its steering capacities are said to be specially remarkable, the cart being readily turned round an almost immovable rear-wheel as soon as the slightest pressure is brought to bear on the steering lever, which is an invaluable advantage in dense traffic. The electric brake will act instantaneously even

in the case of the highest speeds, the iron-tire wheels being stopped immediately without skidding or shaking. Owing to its uniformity of working, and the considerable volume of the water kettle, as well as to the far higher speeds on no-load runs, it is expected to accomplish a performance about twice as much as by horse-driven carts.

THE BEST FORM OF CITY GOVERNMENT.

Alfred D. Chandler discusses the forms of city government in an article published in a recent number of Municipal Engineering and he reaches a conclusion applicable here were there enough steady public spirit to carry it into effect:

"It has been said that the New England town meeting system of local self-government, admittedly the best, separating as it does the local legislative from the local executive departments, can not be successfully adapted to large municipalities. Modern legislation and experience refute that error. Municipalities whether large in population or large in fiscal operations are now well governed under the town meeting system, which permits of indefinite extension, both to towns and to cities.

"In the larger towns of New England the town meetings are of necessity restricted in attendance for deliberations because no ordinary hall would hold all the voters. But experience proves that town meetings limited in size are adequate as a rule. Yet to maintain the system wisely, limited meetings of a fixed number of elected members should be substituted for possibly unwieldy or 'packed' meetings. An elective town meeting or 'Representative Council' of 195 members, is what the city of Newport has adopted. In this way the system is preserved, simplified, dignified and strengthened, and it may be applied to any municipality. It is immaterial saving for sentiment, whether the chief executive municipal board is called 'Selectmen' or 'Mayor and Aldermen.' The best number for an elective town meeting may be a polemical rather than a practical question, varying with local conditions. The average attendance at the Brooklyn town meetings for purposes of deliberation, is between 100 and 300. This number, if not the best, has been adequate.

"There can be no better form of local government; none more in harmony with the true spirit of American representative democracy. It secures six essentials for local self-government:

1. The abolition of politics.
2. The separation of the appropriating and spending powers.
3. Complete publicity.
4. A referendum.
5. Popular control under wise leadership.
6. An alert and sustained civic spirit. A convenience in the town meeting system over the usual city council method appears in the very few town meetings during the year, as compared with the frequency of city council meetings. The ratio is about 1 to 10 in favor of town meetings."

CONFUSION WORSE CONFOUNDED.

The last Legislature passed no law whatever upon the subject, except as the new liquor law affects club applications for licenses to serve intoxicants. As far as the law is concerned, there is no more difficulty in forming clubs now than there was before the Legislature met.—Star.

Hosh! Let one of those ex-Clubs go before the License Commissioners and see! Or a new club of the kind "so easy to form."—Advertiser writer.

The License Commissioners have to more to do with the forming of clubs than had the late lamented Ak-hoon of Swat. It seems that all that is necessary by way of reply to the comment made on the quotation from The Star is to suggest reading the quotation after reading the putative answer.

HABIT.

I'd really like to settle down
And work in just one place.
I've had a dozen in this town
Within a twelvemonth's space,
And of those places that I've had
There's some was good and some was bad.

Some families was extra small
And sent their washing out,
And them kind was what you would
call

The best of them, no doubt,
I liked the place and liked the pay,
But all the same I couldn't stay.

Some women treated me first rate,
I'm willing to admit;
And when they are like that you hate
Like anything to quit.
But I'd hung on two months and so
I naturally had to go.

I do not like this shifting round

From places where I've hired,
If I'd my choice and wasn't bound,
I'd stay till I was fired.
But custom's strong and woman's weak,
And no girl likes to be a freak.
—Chicago Daily News.

BODY IN ICE TWENTY-ONE YEARS
BERNE, April 30.—While exploring the Monte Rosa glacier this afternoon a party of guides discovered on an ice crevasse a body, which they cut out of the ice and brought to town. Later the body was identified as that of a guide named Naghi, who fell into a crevasse in the summer of 1887.

Speaking of close friends, those who will not lend you a dollar head the list. Lots of men would rather hold a political job than earn an honest living.

ACKNOWLEDGMENT OF RESOLUTIONS
The following letters were received in today's mail by the Chinese committee:
Speaker's Room,
House of Representatives,
Washington, D. C., May 8, 1908.
Dear Sir:—Your favor of 21st inst., addressed to the Speaker, inclosing copy of resolutions adopted by Chinese mass meeting held in Honolulu on April 20th, and also inclosing copy of article entitled "The Chinese in Hawaii," has been received, and will be brought to the attention of the Speaker.
Very truly yours,
L. W. BEESBERRY,
Secretary to the Speaker.
Washington, May 8, 1908.
Sir:—Your letter of the 21st instant, addressed to the Secretary, transmitting a copy of certain resolutions which were adopted at a Chinese mass meeting on the 20th ultimo, has been referred to this Bureau and the receipt thereof is hereby acknowledged.
Respectfully,
W. P. SARGENT,
Commissioner General

MORTGAGE RECORDED.
Practically the entire real estate of J. L. Holt, former tax assessor of this island, was placed under a mortgage recorded this morning. The money was loaned by W. R. Castle on all the property belonging to James and Lena Holt, with the exception of certain parcels under lease to the Waiaina Agricultural Company. The mortgage, which will run for fifteen years, was in the name of W. R. Castle, John Colburn acting as trustee for the Holts.
Fine Job Printing, Star Office.

CONSULS ARE TAKING INTEREST IN HAWAII

The work done by Governor Frear and the Chamber of Commerce, to get in closer touch with the consuls on the Pacific, is having its effect as is shown by the following letter, transmitted to the local government through the Department of State:
AMERICAN CONSULATE.
Tamsui (Daitotai), Formosa, March 12, 1908.
Acknowledging receipt of the Department's instructions relative to visiting Hawaii and suggestions in regard thereto.
To the Honorable The Assistant Secretary of State, Washington.
Sir:—I have to acknowledge the receipt of the Department's unnumbered instructions of January 20th in regard to the suggestions of the Governor of Hawaii and the Honolulu Chamber of Commerce that consular officers disembark at Honolulu whenever their visits to and from the United States will permit for the purpose of keeping in touch with commercial affairs.
I agree fully with the above suggestion, furthermore I believe it would be to the interests of the Hawaiian business public should the governor and the Honolulu Chamber of Commerce furnish this office with the recent literature pertaining to the commercial affairs of the islands. Formosa and Hawaii have much in common and I do not doubt but that the commercial interests in each would profit by a better understanding of the conditions obtaining in the other. That this office may better serve the commercial interests in Hawaii, I ask that the governor and the Honolulu Chamber of Commerce be requested to supply it with the Hawaiian current commercial literature.
I have the honor to be, Sir,
Your obedient servant,
JULIAN H. ARNOLD,
American Consul.

WIRELESS PROGRESS

ENGINE FOR POWER TO ARRIVE ON FRIDAY AND INSTRUMENTS NEXT MONTH.
The engine for the wireless power plant at Kahuku will be here in the Alameda on Friday and a month later all instruments will have arrived, so that the Wireless Telegraph Company's long distance plant will probably be in effective operation by July 1, before the fleet gets here. Expert Isbel is superintending the operations at Kahuku. The great mast is already in position.

LAUGH THAT WILL LINGER

Immediately upon the arrival of the big fleet in Honolulu on July 16, Lieutenant Commander J. F. Carter whose position is commander of the S. S. Iroquois here, will be transferred to the battleship Georgia, probably as executive officer, the executive officer of the Georgia taking command of the Iroquois here.
The approaching change in the service this morning on the waterfront recalled an entertaining incident which has never before been immortalized in print.
When the P. M. S. S. Manchuria was being towed into this harbor by the cable ship Restorer, the Iroquois, with Carter in command, was supposed to be assisting in handling her, but in some way the commander became rattled and the line the Iroquois had on the Manchuria behaved in so queer a manner that the Iroquois was swung about and towed into the harbor stern first by the restorer's power. There is likely to be no more such fun when Carter goes.

THE SAKE DECISION

A suit involving the payment of more than \$500,000 was decided yesterday by the United States circuit court of appeals in favor of the United States government.
A few years ago the Japanese importing firm of K. Komada & Co. brought suit against the government to recover \$500,000 paid as a duty on sake under protest. The question as to what the classification of sake should be was the point at issue. The customs officials taxed sake as a wine, but the Japanese importers claimed that it should have been classified as beer and taxed as such.
The opinion of the court was written by Judge de Haven. The court said that the evidence showed that there was a great similarity between sake and still wine, alcohol being the principal ingredient in both sake and still wine. The court was of the opinion that the evidence showed that both sake and still wine were drunk for exhilaration and that both were capable of producing intoxication, but that intoxication from sake passes off more quickly than that produced by still wine.
The decision of the lower court was reversed, the matter having been brought into the appellate court by the government.—S. F. Call, May 19.

KANEHOE LANDS

GOVERNOR FREAR BY LETTER ADVISES AGAINST SETTLEMENT ASSOCIATION PLAN.
Acting-Governor Mott-Smith received a long letter from Governor Frear this morning. It was dated Washington, May 14, and about five days after the Executive reached the capital. Governor Frear stopped over for a few days at Denver, Kansas City and St. Louis and expected to leave for New York on May 17, going to the Lake Mohonk conference for several days and then returning to New York and Boston. On his way back he expected to stop at Ithaca and Chicago, sailing from San Francisco on June 9.
In speaking of the Kanehoe lands Governor Frear states that on account of there being so many applications he does not believe that it would be best to give them to a settlement association, as it would look too much like favoritism, and he does not see how the conditions which have been made for sales could be fitted in with a settlement agreement.

WILL BUY THE PUMP

BIDS TO BE CALLED AT ONCE FOR PLANT TO RAISE ARTESIAN WATER.
An advertisement will be inserted in the newspapers within the next twenty-four hours, calling for bids for a gasoline engine, which will be used to pump water from the Makiki well for the general supply of the city. As was told exclusively in the Star on Saturday, the supply from this source, amounting to about 1,000,000 gallons daily, has not been available as there was no engine with which to run the pump. The need of this water has become such that, after a talk on the subject with Acting-Governor Mott-Smith, it has been decided to buy a pump, and rely on an appropriation from the legislature to supply the deficiency.
The department expects to have a deficiency which will be in the neighborhood of \$10,000, but every cent of the money has been carefully expended and the appropriations have never been overruled except where a great saving could be made to the Territory or a situation of emergency existed.

GETTING GUNS OUT

Hoogs and Foster, constituting the Hawaiian Construction & Draying Co. today hauled another eight-ton piece of ordnance from the railway depot to the Diamond Head fort, a steam roller towing the drag-load all the way.
HALEIWA AND WAHAWA.
The most delightful ride in this section of the Territory is that between Honolulu and Haleiwa with a side trip to Wahaiwa where the pineapples are now ripening. You can make this in an automobile without tiring and get to Haleiwa in ample time for lunch or, if you make an afternoon trip of it, in time for a splendid dinner for which Manager Bidgood is famed. There is much to see on the run and the trip is growing more popular every day. The number of public automobiles in Honolulu make the journey possible. If you are going in a party and want special dishes for your meal, telephone Mr. Bidgood before you leave town.
Fine Job Printing, Star Office.

GREAT DOCK FOR PEARL HARBOR

Engineers Ordered to Hawaii to Begin Work on That Station.
WASHINGTON, May 16.—Civil Engineer C. W. Parks and Assistant Civil Engineer C. S. Burrell, United States Navy, will leave San Francisco May 25th for Hawaii, the former officer being detached from the Portsmouth navy yard and the latter from the navy yard at Boston in order to superintend the work of establishing a naval dock yard and repair shop at Pearl Harbor. The civil engineers will conduct a survey and make borings to determine the site for the new dock.
Orders have been issued to Civil Engineer Parks to report to the board of naval officers, of which the president will be Captain Seaton Schroeder and which will convene at Honolulu on the arrival of the Atlantic fleet in Hawaiian waters. The Schroeder board will make recommendations to the Navy Department regarding the location of shops and dock and submit a plan of construction and development of the proposed station, for which Congress at the present session has made provision by appropriating \$1,000,000 and establishing limits of cost of \$2,000,000 for the dock, \$2,000,000 for the dredging, \$300,000 for the shop, \$300,000 for a storehouse and \$100,000 for miscellaneous items.
The important question for the consideration of the Schroeder board will be the location and dimensions of the dock. The latter feature will undoubtedly contemplate a structure of the concrete granite type, of a size which will accommodate the largest of the battleships, also taking into consideration the possibility of increased displacement.

DISTINGUISHED HAWAIIANS COME TO HUNT BEAR

Colonel Sam Parker, his son in law, Prince David of Hawaii, and John Baker were passengers on the Siberia, which arrived yesterday from Honolulu. The distinguished visitors have come to the States for the purpose of hunting bear in Washington and Oregon and have brought with them enough guns and ammunition to wipe out every brule in both states. No business is to be transacted while the party is here; the visit is exclusively a pleasure trip and will last for several months.
In the party, attended by two maids, is the little Princess Kaploani, 5 years of age, exceedingly pretty and, according to the passengers on the Siberia, the brightest child on board the ship. When the photographer asked for permission to take her picture she was most obliging and even offered to take off her hat so he would be sure to get a good one. The passengers on the ship were not aware that they had a princess on board until the ship was near this city.—S. F. Call.

CORNWELL ESTATE

The matter of the final accounts of the Waterhouse Trust Company, administrator for the estate of W. H. Cornwell, deceased, came up before Judge Lindsay this afternoon. R. W. Shingle was placed on the stand and testified that, from conversations which he had with Cornwell before his death and with John Bowler he believed that the note signed by J. S. Walker for \$5,000, which was allowed to outlaw, had been paid. He also explained other matters in connection with the estate to which attention had been called by the master in his report. J. S. Walker was the next witness called.

THEY TRIPPED HIM.

Perhaps the Wide-Awakers know that at some of the New England summer-resorts young men from various schools and colleges serve as dining-room waiters during vacation, thus to help on their ability to pay for their education. They tell a good story of a western man's experience at one of these hotels. He took up the bill of fare and turning to the scholarly-looking young man behind his chair, said:
"Do you think I can get a good dinner from this bill?"
"No, sir, you cannot," answered the scholarly waiter.
"I cannot!" cried the guest. "Be good enough to call the head waiter."
The head waiter came.
"This gentleman behind me says that I cannot get a good dinner from this bill of fare."
"Well, sir," interrupted the head waiter, "he is right; you cannot."
The western man stared; then he asked:
"What do you mean, anyway?"
"Why, sir, you can get a good dinner from the kitchen, but not from the bill!"
The Westerner thought he would be a little more comfortable in a less scholarly atmosphere, and he changed his hotel within an hour.—Chicago Daily News.

MURDER TRIAL SET

The case of Miamura and Maida, the two Japanese accused of murder, whose trial has been delayed for some time, was set for June 13, in Judge Robinson's court this morning. There is a strange coincidence in the date. Had the case been set for one day before it would have fallen on the second anniversary of the day on which the crime was committed.

BERNARD IN PULPIT

Bernard Kelekolio, the "Boy Orator," accompanied by a friend, went over the Pali to Koolau on Saturday on a little stumping tour, for Bernard aspires to be a candidate for the legislature.
They attended divine services at a little country church whose parson preached on "The Christian at the Ballot Box," civic purity and the like.
His reckless reverence called on Bernard to give a little Sunday talk, afterward, and the "Boy Orator," seizing time by the forelock, took the pulpit and delivered a red-hot political speech to an admiring throng which cheered and stamped most enthusiastically.
Bernard's trip was very pleasant.
AT AUCTION.
Thursday, 10 a. m., on Alakea St., near Old Fishmarket—cars pass the place:
1 stylish park phaeton, almost new carries 2 or 4 persons, 1 strong canopy top rumaboot, buckboard wagon, in good order, about 10 tons damaged flour good for feed etc., also 1 flour mill complete, iron shafting etc.

WASHINGTON IS FOR BRYAN

SPOKANE (Wash.), May 18.—After as stormy a session as was ever seen in a convention hall in this State, the Democratic State Convention tonight, just before midnight, adopted a plank declaring for the submission to the voters of a constitutional amendment forbidding the sale and manufacture of spirituous liquors. Whether by oversight or design, nothing is said about malt and vinous drinks. The plank was adopted by a two-to-one vote, following a night of fiery oratory for and against. A double defeat of twenty, each with half a vote, was elected to the National Convention and instructed to vote for Bryan "first, last and all the time."

TRANS-PACIFIC YACHT RACE ASSURED

LOS ANGELES, May 13.—Despite the fact that the biennial yacht race between San Pedro and Honolulu was once abandoned this season it is now probable that the event will be revived in the form of the greatest contest ever sailed on the Pacific ocean. At a meeting of the chamber of commerce held today it was reported that over \$3,500 had been raised to defray necessary expenses and provide a suitable trophy. Local yacht owners who had made other plans for the summer have canceled their engagements and entered their boats and the date tentatively selected for the start from San Pedro is July 4. A cabled message from Honolulu received today states that the yacht Hawaii, recently completed for entry in the race, will participate. At present it is practically assured that at least six yachts will compete.

HONOLULU BLUE LAWS PUT CURB ON SAILORS

Brazilian and Chilean Ship Officers Say They Will Not Return.
HONOLULU, May 8.—The merchants of this place are getting a foretaste of the benefits of a visit of the fleet by the experience they are having with the cadets and officers of the Brazilian training ship Benjamin Constant and the Chilean training ship General Bandenau.
The cadets, who appear to have plenty of money, have been scattering British sovereigns from one end of the town to the other and very little for nonsense. In the clothing shops they have bought the best of everything and plenty. They have been good patrons of the music dealers, and talking machines have been in demand. The combined number on the two vessels is 37—all bought in Honolulu. It is estimated that \$100,000 has been spent here in a few days, but there has been absolutely no disorder and no drunkenness.
The officers say they will not return, as the strict blue laws make Honolulu an undesirable place for sailors.—S. F. Call.
The bark Emily F. Whitney on Saturday last sailed from Kahului for San Francisco with sugar.
Eben Low proposes to give a wild west show during the visit of the fleet.

MRS. VANDERBILT
(Continued from Page One.)

reconciliation with his wife, has failed in her mission. As a result the long delayed divorce proceedings will be taken up again today.
After taking the testimony of Mrs. Elsie French Vanderbilt and half a dozen other witnesses Referee David McClure permitted the case to drag at the suggestion of the attorneys for both sides. The elder Mrs. Vanderbilt held a number of conferences with her daughter in law a few weeks ago and insisted that if she could have but one more talk with her son she was sure that the differences between the couple could be settled.
The information that Mrs. Vanderbilt had failed in her efforts to induce the young man to see things in the light she did was contained in a cablegram to Mrs. Albert Gwynne Vanderbilt three days ago. The cable message read substantially as follows: "The quicker the matter is settled the better it will be for all concerned. I regret my failure."

SURGEON IS SUE DFOR REFUSING TO OPERATE

PARIS, May 5.—A delicate point concerning the responsibilities of surgeons has just been decided by the civil tribunal of the Department of the Seine.
In 1905, says the Temps, Mme. Linder, a teacher living in the suburbs of Paris, asked Professor Berger to perform an operation on the nose of her little daughter. The professor performed a preliminary operation, the removal of a cartilage. He then saw that any further operation might make the child run serious danger and he refused to continue.
Mme. Linder thereupon summoned him before the civil tribunal, asking 100,000 francs damages for her daughter and 10,000 francs for herself. The court called Drs. Duplay, Atomod and Schwartz as experts, who declared that Professor Berger had acted rightly, as the operation was risky. Mme. Linder was accordingly nonsuited.
Professor Berger, on his side, asked for 1 franc damages against Mme. Linder. The court refused to grant the damages, "in view of the fact that the aim pursued by Mme. Linder is worthy of compassion and she had pushed to the extreme limits the expression of maternal affection."

District Attorney Brockton is advised that a draft is coming to him for about \$104,000 to pay the land damages for the Federal building site.

SPORTS

All shout "Amey!"
The Saints again
Have done
Old Pun
By run on run;
'Twas five to two
When the fight was through.

And eight large siams
Against the Kams,
To the latter's three
Was the pot pourri
On Saturday
At the Big League play.

FAN-ATIC.

A joke is a joke and a Pun is a Pun, but when a Saint makes a joke he does a Pun. Thus was it Saturday p. m. in the Big League games at the Park where the St. Louis team defeated the Punahou boys to the chorus of five to two. It was a great game and the congregation called on all the Saints in the calendar, or in the team, to congratulate them. But it may not always remain thus, for the Puns have vengeance in their eyes. Bushnell pitched a dandy game and Barney, Barney Joy, was there with the goods at the big stick.

Eight to three was the score of the Diamond Heads against the Kamehameha ballists, as witness the following:

The bogey golf tournament yesterday on the Country Club links drew out a large number of enthusiasts, who took advantage of the beautiful weather. A. Ewart took first honors, while J. D. Gaines carried off the second.

For the number of people on hand there was more hooping and huzzing at the baseball park yesterday afternoon than has previously been perpetrated.

The clashes between the Advertiser and Bulletin teams in the first event and the brush between the Mercantile Printers and the Angels of Paradise in the second attraction, were of the nature that makes enthusiasm and immense entertainment, although there were at least two errors between the boys of the four teams during the entire afternoon.

These were more accidents than errors and will not be permitted to occur again.

Nineteen to eight was the verdict in the first conflict and it is up to the public to guess which team got the nineteen. Address answers to this guessing contest to the sporting editor of the War Cry or the religious editor of the Police Gazette.

In the second misunderstanding the Mercantile Printers grove the Angels out of Eden and it was a sad case of Paradise lost, although the season is yet young enough to give the opportunity of there being such a thing as Paradise regained.

The latter was a good game and more like baseball than the preliminary.

In the initial occurrence Albright of the Bulls was much missed for half an hour and when he came in about the fifth inning things picked up a bit for the Coupon Contestants. He really rattled the Tiser pitcher somewhat after he got a chance. Moore was in the grandstand, not having practiced for a couple of weeks.

There was weeping and wailing and gnashing of teeth in the grandstand when the Paralyzers were outmerited.

Queen Nell wept copiously and all the Birds of Paradise in her train were real angry and today they are not doing a thing but threatening to slap the boys of their team on the ankles if they don't get in and "zip" the printers next time.

The Hawaii with a party of invited guests, under the command of Captain Harris and his professional crew, left the Alakea street wharf yesterday morning a little after ten for a trial cruise outside, returning about four o'clock.

Every one from the captain down voiced the cup aspirant a success in every way, her on-the-wind qualities being her best feature. Before the wind she did not do as well as expected, but Captain Harris hopes for better things on the trip down when she will be before the wind most of the time.

Every one who had the privilege of going out remarked on their return that they would not have missed it for anything.

The Hawaii will be made ready for the trip up this week and, if nothing happens to prevent, she will leave here a week from today for San Pedro.

The local cricketers had little trouble on Saturday afternoon in defeating the team composed of players from the British ships Holywood and Elvaston by 154 runs.

Bob Anderson easily took the honors for the home team, by having 99 runs credited to him. McGill was second with 39 runs. For the visitors Maee took the honors, making 23 not out.

E. H. Lewis, driving his "25" Franklin, defeated King in the "40" Tourist on Saturday afternoon at Kapiolani Park by a length in the five-mile race.

A large number of spectators were present and voiced the race a great success. It is probable that races will be held quite frequently now, as it was proved on Saturday that they could be held without danger, the changing at the turns of each lap making it very interesting. Each car carried its full seating capacity.

King is anxious to race Lewis again next Saturday each driver keeping his original position.

Willis, the crack jockey who recently arrived from the Coast, was able to ride two winners Saturday afternoon at the Park. In the first race he piloted Makaanala over the line three-quarters of a length ahead of Shamrock in 40½ seconds.

In the second race he had the mount on Walter Macfarlane's Sure Shot, beating Beckley's Duke Spencer Jr by a length in 39½ seconds.

After the races Saturday afternoon at Kapiolani Park, Charley Bellina and Dr. Wyman got together in a 50-yard dash, Wyman winning by four lengths in 8 seconds.

The baseball team from the U. S. S. Iroquois journeyed over to Quarantine Island yesterday to play with the team composed of players from the Station, the island boys winning the game by the one-sided score of 36-9. The game by detail was lost by the scorer as the runs came in so thick and fast that he did not have time to watch anything but the runs. A return game will be played some time in the near future.

The Japanese A. C. and the Palamas took the honors yesterday afternoon in the Riverside League games at Aala Park. The Kaalas were defeated by the Japanese in the first game by the

AVENGES INSULT AND IS KILLED

CHICAGO, May 19.—After fighting a mob to avenge an insult to a woman Frank Knight was murdered early today at Archer avenue and Halsted street by a member of a Greek band. His sweetheart watched his struggle for life and fainted as he fell dying. The murderer escaped and his identity is not known.

The murder resulted from an insult offered a young woman of Knight's party by one of a crowd of twenty Greeks. Knight knocked down the offender and with the members of his party ran under the viaduct to reach the street car. He was the last one to reach the car and as he leaped for the foot rail he was stabbed. As Knight fell, bleeding and dying, the crowd fled in every direction.

BARGE CRASHES INTO WAR SHIPS

VALLEJO, May 8.—Coal barge No. 142 of the Mare Island yard, which had some 500 tons of coal on board, broke loose from its moorings at 5:39 o'clock this morning, and as the tide was running out drifted down the two ships her cargo shifted, which stream and crashed into the gunboat Bennington and the cruiser Raleigh, which were moored together in mid-stream. When the barge struck the

caused it to turn turtle, and the whole cargo of coal, which was worth something like \$5600, was dumped into the bay. The barge then drifted several hundred yards further down the stream and brought up alongside one of the buoys.

The barge was badly damaged by the collision with the two ships, and it is feared that both of the vessels received considerable injuries, but the extent will not be known until they are docked. At the time of the accident nobody was on board the barge.

The score of 5-2, and the Palamas beat the C. A. C.'s to the tune of 3-2 in the second. A large crowd as usual was present, and good baseball was served to the standing multitude.

The baseball teams representing Punahou and Kamehameha will cross bats this afternoon in Punahou field in their scheduled game in the interscholastic league.

The Mills and Kaahumann teams will line up this afternoon at Makiki field in the third game in the Junior Interscholastic Baseball League.

The two boxers, Willis and Ah Sam, who will meet next Saturday night at the Orpheum are fast getting in shape, and the lovers of the boxing game will no doubt see some fast work. The odds so far seem to favor Willis, although a large number expect to see them change in favor of Ah Sam before the night of the fight.

Platt, Murphy, Bird and Oakley, who will box in the preliminaries, are also in fine condition and a pleasant evening is in store for all.

Manager Gleason of the Saint Louis team received a letter from the captain of the Santa Clara team this morning stating that twelve players would leave San Francisco on the Hiloian, due here on July 6.

The Twilights and the Reliance took the honors in the Kapiolani League games yesterday afternoon on the park grounds. The Reliances shut out the Leahis by the score of 5-0. While the Twilights won from the Tidal Waves to the tune of 7-3.

The Pacific team of the Seaside League defeated the Starlight team yesterday afternoon on the Oil tank grounds by the one-sided score of 25-14.

The luau given on Saturday night at the Nottley hall under the auspices of the Aala A. C., was the most successful ever given by any athletic club here in Honolulu. Over five hundred people sat down to a sumptuous luau, which was served in true Hawaiian style.

After the luau dancing was indulged in until after midnight. The silver cup which was presented by Dr. Li to the league and won by the Aalas was on exhibition, and was very much admired by every one. The hall was tastefully decorated with the colors of the club.

PAIN IN THE STOMACH.
It is most annoying as well as disagreeable, to be troubled with pains in the stomach, and there is no need of it, for one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy will allay the pain. Try it once and be convinced. For sale at all dealers. Benson, Smith & Co., agents for Hawaii.

HOUSE REJECTS MAIL SUBSIDY

Disastrous Floods Throughout The State of Texas and Elsewhere.

BIG CHAPTER OF ACCIDENTS.

De Young Chairman of California Republican Delegation—Riot at Wedding.

WASHINGTON, May 24.—The House has again rejected the ship mail subsidy proposal, presented in the conference report on the Postoffice Appropriation bill. Incomplete figures indicate that the total appropriations at the session of Congress just closing will exceed a billion dollars, being an increase of many millions over the appropriations of any previous session of any other Congress.

DISASTROUS FLOODS.

GUTHRIE, Oklahoma, May 24.—Reports from throughout the State yesterday tell of disastrous floods and much consequent damage.

GUTHRIE, Oklahoma, May 25.—The streets of this city are flooded, the water having risen to a height of seven feet. Much damage has been done.

FORT WORTH, Texas, May 25.—There are seven known deaths and five thousand homeless people throughout this State as a result of the floods of Saturday and yesterday. The rivers rose suddenly, following a torrential downpour of rain. Thousands of dollars worth of stock have been lost on the ranges.

CHAPTER OF ACCIDENTS.

SAN FRANCISCO, May 25.—In a street car accident yesterday one passenger was killed and twenty others were injured.

PHILADELPHIA, May 25.—Three persons are dead as the result of a collision here yesterday between two trolley cars, while the number of injured amounts to fifty.

TIFLIS, Russia, May 25.—Thirteen soldiers were injured yesterday in a train wreck, the coach being derailed and shattered.

RIOT AT WEDDING.

FAIRMONT, California, May 25.—In a riot, which followed a Slavonic wedding feast here yesterday, one of the Slavs was killed and two policemen and twelve of the foreign wedding guests were injured.

PRIEST IS STABBED.

SALISBURY, Missouri, May 25.—Joseph Lubeley, the pastor of St.

CITY FUNDS IN BROKEN BANK

CITY OF PITTSBURG LEFT WITHOUT MONEY BY SUSPENSION OF LOOTED CONCERN.

PITTSBURG, (Pa.), May 18.—With more than a million and a half dollars of its funds tied up indefinitely as a result of the suspension of the Allegheny National Bank today, the city of Pittsburg finds itself confronted with the possibility of being forced to issue bonds to raise money and meet current expenses. The suspension of the bank leaves the city with practically no immediately available funds.

State funds to the amount of half a million dollars were, carried in the bank. The State funds, however, are secured by bonding companies. The closing of the Allegheny National Bank this morning by the Controller of the Currency was the direct cause of the failure this afternoon of Carothers & Co., brokers, according to the statement of the latter firm.

Following a meeting lasting all day Sunday, at which a thorough discussion of Cashier William Montgomery's pecuniations was held, the Allegheny National Bank suspended today. The following notice was posted on the door shortly after 9 o'clock by National Bank Examiner William L. Folds:

"Closed by order of the Controller of the Currency and placed in charge of William F. Folds."

While Montgomery's pecuniations are officially placed at \$594,000, it is said the bank's shortage is close to \$2,000,000. He waived examination today and was held for the Grand Jury.

Joseph's church (Roman Catholic), was stabbed with a pocket knife yesterday by Joseph Schuette. It is supposed that the assailant of the priest, who is a farmer, is insane.

PORT FREE OF PLAGUE.

CARACAS, Venezuela, May 25.—This city has been free of plague for eight days, and the port of La Guayra will be open for European trade today.

AMERICAN CAR AHEAD.

NIKOLSK, May 25.—The American car is leading in the New York-to-Paris race in the dash across Siberia. The reports from the contestants are that difficulty is being experienced through muddy roads.

CALIFORNIA REPUBLICANS.

SAN FRANCISCO, May 24.—M. H. De Young has been elected the chairman of the California delegation of the Republican National Convention. This signifies the defeat of the Roosevelt-Lincoln League, which has opposed Herrin and De Young.

CONVENTION TO INDORSE BRYAN

GOVERNMENT RAILROAD FROM MISSISSIPPI TO PACIFIC FAVOR-ED BY CALIFORNIA DEMOCRACY

FRESNO, May 18.—Among the declarations of principles to be submitted to the convention tomorrow by the platform committee will be one indorsing William J. Bryan's candidacy for the Presidency. Another plank will pledge the party in the State to a greater Navy and the retention of the battleship fleet as a unit on the Pacific Coast. This latter was introduced in the report of the committee as formulated tonight at the suggestion of Frank J. Symmes of San Francisco, who wired the convention asking its incorporation in the platform.

The platform as reported to the convention will declare in favor of a double-track railroad from the Mississippi to the Pacific owned and operated by the Government, and will also denounce the control of Legislatures by the present railroad interests and tariff in favor of a two-cent fare. Tariff revision of trust-made articles is favored, and the trusts are denounced in general terms as "a government within a government." The disappearance of the merchant marine is attributed to the tariff legislation and is denounced. A wise preservation of the timber, soil, water and other national resources is advocated.

The exclusion committee reported on a plank for the total exclusion of all Asiatic laborers. Other labor planks favor the eight-hour day, the abolition of child labor, and declare against the use of injunctions save to "prevent destruction, waste or entry upon real property."

WILL RETURN HERE

Mr. and Mrs. George Ira Adams, of Denver, Colorado, left in the Manchuria last week for home after spending several months here. Mr. Adams is a theatrical man and during the past several years has been proprietor of a very successful tent show. He intended to continue with this show this summer, but, having prolonged his stay longer than he had intended in the Paradise of the Pacific, he was not certain that he would not skip a year.

Mr. Adams has been an extensive traveler and knows the world pretty well, but he declared that he has never yet found a climate that could equal this. He and his wife have been living at the Young Hotel during their stay. They expect to go to Florida next winter, but anticipate returning here some time.

TEN NEW BISHOPS FOR METHODISTS

Committee's Report At Conference Will Furnish a Surprise.

AMUSEMENTS IN STATU QUO.

Recommendation That Present Rules Remain in The Discipline.

BALTIMORE, May 18.—It is reported tonight, on what seems excellent authority, that the report of the committee on episcopacy, which will be presented to the Methodist Episcopal General Conference tomorrow, will be in the nature of a surprise in that it will recommend the election of ten Bishops. Hitherto it has been generally believed that the number elected would be eight.

Second only in interest to the elections of the Bishops is the final action of that paragraph of the church discipline relating to amusements, touching which the address of the Bishops recommended the exclusion of dancing, card playing and certain other words from the paragraph. By a decisive vote the committee on the state of the church to which the matter was referred today, decided to recommend to the conference that the paragraph on amusements remain as it now stands, and thus negated the recommendation of the Bishops. The vote in committee was nearly three to one against making a change.

BALTIMORE, May 18.—Memorial services in honor of the Bishop and officers of the General Conference of the Methodist Episcopal church who have died during the past quadrennial occupied today's sitting of the General Conference. These were I. C. W. Joyce, Charles C. McCabe, James N. Fitzgerald, Edward G. Andrews, Samuel M. Merrill and Charles H. Fowler, and Rev. Dr. James M. King, secretary of the Board of Home Missions and Church Extension.

The time for reunion between the Methodist Episcopal church and the Methodist Episcopal Church South has not yet fully come, in the judgment of the committee on federation, set forth in a report today for submission to the General Conference. The committee, however, concurs in the recommendation of the joint commission for a practical method of putting federation into operation. This provides, in brief, that where there are two churches of the two branches of the Episcopal Methodists they may unite if a majority of the membership of both branches desire.

WHY WOMEN CHANGE MIND.

Mrs. John MacMahon Gives Several Reasons for Feminine Right. Why do women claim a special right to change their minds? It has always been "just because—" and then silence. Today, for the first time on record, a woman supplied the missing reason. Mrs. John MacMahon, 5112 Wabash avenue, in a paper she read at the Catholic Woman's league luncheon this afternoon at the Auditorium hotel, on the "Point of View," gave the long-desired explanations.

"A woman has a right to change her mind whenever she likes, she declared, because—
"Her point of view at first may be wrong.
"She doesn't know it all, and her first impression may be incorrect.
"Her learning days are not over until she closes her eyes in her last sleep.

"She should bring an open mind, willing to be shown, and as willing to learn as she is to live.
"Most things worth considering at all can arbitrarily be viewed from whatever viewpoint one wishes; so a first opinion may be mistaken.
"An opinion to have a right to stand must be arrived at by correct reasoning or steps.
"When a woman has reached a conclusion by careful steps she should stick to it, Mrs. MacMahon maintained.

"My idea of tolerance," she added, "is to be willing to place one's self in another's place and see from that vantage point. It is not my idea of tolerance to give up one's opinion through complaisance of an idle mind, a desire to please or be gracious, or to appear broad-minded."
—Chicago Daily News.

"This subservency to wealth is simply disgusting. Here Scribble, the society poet, has written verses to Miss Millyuns' 'fairy feet,' and they're as big as all outdoors. Can you imagine how he could get up any sentiment about them?"
"Certainly; such a subject should be all sole."

HEART TROUBLES.

Don't sleep with your troubles. If you have palpitation, short breath, pain in chest, side and shoulders, choking sensations, fainting spells, difficulty in sleeping on left side, and you feel anxious about it, don't sleep until you have procured a bottle of Dr. Miles' Heart Cure, and you can rest assured you have a never-failing remedy for your afflictions. If first bottle fails to benefit, money back.

YOU WANT The News First.....

You Want Your Ads Read

Here Is Some Advice---

Honolulu more than any other city in the World, is a place where the Evening Paper gets the news first. The clock here is over two hours behind the clock at San Francisco, four hours behind Chicago, five hours behind New York and ten to eleven hours behind the clocks in the European capitals.

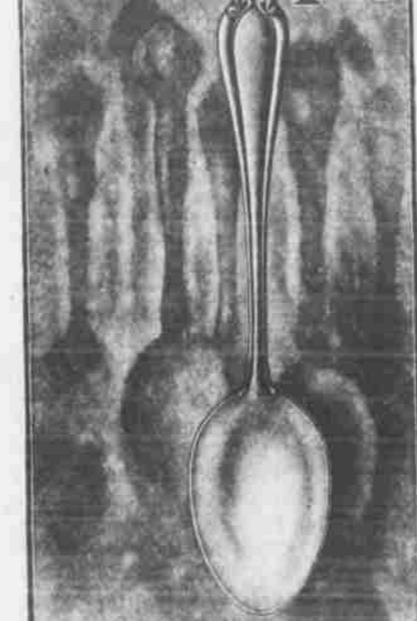

This means that when The Star is going to press THE DAY IS CLOSED in Washington, Chicago, New York and Europe and almost over in San Francisco. The news of the day is here for The Star.

Under modern conditions it takes practically no time to prepare and transmit news and THE STAR gets every evening the cable dispatches giving

The News Of All The World For The Day Just Ended---

Here are some of the features that go to make the evening paper the predominating factor in an advertising campaign:
It is delivered at the home each night when the whole family has plenty of time to read it.
It is carried home by the business man when his day's work is done and it stays there. A morning paper is usually carried down town by the head of the family and hurriedly read.
The evening paper is not read hurriedly, but thoroughly, so that all the advertisements receive their share of attention.
It presents the store news a little ahead, giving the prospective purchaser time to plan a shopping tour for the next morning.
The evening paper presents the news the day it happens. The morning paper the day after.
The evening paper presents the news first. The morning paper merely elaborates it.
The evening paper prints daylight news. The morning paper takes what is left.

Out of the Fog

COMMUNITY SILVER
Is out of the fog of uncertainty which surrounds the purchase of ordinary plated ware, because it is made in **Only One Grade—The Best.** Its quality is as fixed as Sterling. In buying it, every dollar spent becomes a sure investment.
Made only in a plate heavier than triple, Community Silver is sold at about the price of ordinary plate.

night at the regular time. Nothing but routine business is expected to come up at the meeting.

The second game in the Seaside League yesterday afternoon on the Ohi tank grounds resulted in a victory for the Sweet Violets over the Okumas by the score of 24-8. The Okumas were especially brilliant in making errors and failing to hit the ball.

The opening games of the New Japanese Baseball league were played yesterday afternoon before a large crowd on the Atkinson Park grounds, Kakaako. The first game between the Kadios and the Fusos resulted in a victory for the latter by the score of 23-22. The Tokkas defeated the Y. M. B. A.'s in the second game by the score of 17-14.

Visitors to warships should not attempt to tip the bluejackets who conduct them over the vessel. The Navy Department does not encourage the practice and the men do not like it.

Thomas Beyer, shipfitter, first-class, U. S. N., whose book "The American Battleship and Life in the Navy" has just been published, says:

"Members of the crew take great pride in showing visitors about the ship. Nothing offends a bluejacket more than to have a visitor he has been conducting about the ship insist on offering him money for his services. Some may accept a cigar as an act of courtesy, but nothing more. Should a bluejacket take any money, and his shipmates learn of the fact, he would get a strong rebuke."

The newspapers have had much to say recently about the speed cones. Beyer writes of these thus:

"When in fleet formation each ship has a speed cone displayed on the signal yard. When hauled up the way up it signifies 'engines are going full speed ahead;' when half way, 'half speed;' when quarter way, 'quarter speed.' Should the cone not be displayed the engines are stopped. Should the engines be reversing, the cone is reversed and hoisted as above. This system enables the admirals and captains of the fleet to keep posted regarding the movements of the ships."

Visitors going aboard warships naturally create a lot of dirt. It may be a matter of surprise to some people to learn, however, that dust accumulates aboard ship during a voyage just as it does on land. The decks have to be swept every day.

Every landlubber knows that aboard ship time is counted by bells. The ship's bell is struck every half hour. At 4, 8 and 12 o'clock eight bells are struck. Every half hour after these three periods the bell is struck, starting with one bell until eight bells are reached.

The poetically inclined are fond of referring to the battleships as the great white vessels. That is their peace color; in time of war they are painted either a dark green or slate, and it is very difficult to discern them from a distance.

It is possible to tell naval officers, from captain to midshipman, by the gold stripes on their sleeves. A captain has four stripes, a commander three, lieutenant-commander two and one-half, or in land language, two broad and one narrow; lieutenant senior grade, two stripes; lieutenant junior grade, one and one-half stripes; ensign, one stripe; midshipman, one-half or narrow stripe. The officers named also have distinguishing insignia on the collar thus: Captain, silver eagle and anchor; commander, silver leaf and anchor; lieutenant-commander, gold leaf and anchor; senior lieutenant, two bars and anchor; second lieutenant, silver bar and anchor; ensign, anchor; midshipman, gold anchor.

Rear Admirals wear two stars, with anchor on the collar, and one and one-half gold stripes on the sleeve.

On boarding a battleship the visitor finds the main deck extending from stem to stern. The forward end is the forecabin, the after end the quarter-deck. The main caliber guns are located on the center line of the main deck. The fighting tops are attached to the military masts, which are armored at the base. They are used mostly for observation and ranging.

The bridge is the long narrow structure built up from the superstructure deck. On its forward end are located the pilot-house, chartroom, steering wheel, speaking tubes, speed annunciator, compass and signaling apparatus. The conning tower is directly under the forward end of the bridge, is made of heavy armor and contains many peep-holes. Within is the necessary apparatus for navigating the ship in time of action.

The superstructure deck mentioned

above is built over the broad portion of the main deck. Hammock nettings, galley, and engine-room hatches, ventilators, cranes and the main portion of the secondary battery are located here.

The berth deck extends the entire length of the ship, and is used for living quarters. Here are many mess tables and hammock hooks. This deck is also known as the armored or protective deck. The wardroom is located aft, and is a spacious compartment where the senior officers dine. The admiral and captain have their quarters at the extreme after end of the berth deck.—Los Angeles Times.

FLEET COMMITTEE

The first of the daily afternoon meetings at one thirty, of the executive committee of the fleet entertainment committee, was held this afternoon in the Promotion Committee rooms, the meeting lasting a little over a half hour. Those present were George W. Smith, L. Tenney Peck, J. A. McCandless, Fred L. Waldron, George R. Carter and H. P. Wood.

Chairman Carter was authorized to write at once to the Secretary of the Navy to find out full data concerning the fleet. The information wanted is: When will the fleet arrive? Which ships will be in the fleet? How long will they remain?

The information at hand is not certain enough, so the committee are anxious to hear from the official head of the Navy.

L. Tenney Peck was not ready with his report on finance but will present a plan at tomorrow's meeting. The main question that will be taken up tomorrow afternoon will be on the entertainment of the officers and men, and the reports from the chairmen of the sub-committees.

COMPLAINT BY SOLDIER. Evidently soldiers passing through here do not get the very best of treatment, from a letter received this morning by Acting-Governor Mott-Smith. The letter came from a soldier who passed through here recently on a transport and who claims that he was not properly treated in one of the local saloons. The letter was referred to the Board of Liquor Commissioners for investigation.

CUT OFF SAILORS FROM CIGARETTES? OH, FURY!

Navy Department believes Them Injurious, But is Uncertain as to Action.

WASHINGTON, May 18.—What to do with the cigarette threatens to become as great a problem for the navy department to solve as the question how to get more big battleships.

Such little matters as the height of the armor belt, the character of the ammunition hoists and the height of the free board are picayunish alongside of the cigarette. For months there has been much agitation of this question in naval circles.

The surgeon general in his last report took the view that the enlisted men are injured by the use of cigarettes and recommended that measures be taken to stop the use of them.

Most of the medical officers agree with him. The experienced line officers are aware what a source of comfort to the men the cigarette is and they are further aware that if an order were given to abolish the use of cigarettes there would be a roar of disapproval from the bluejackets that would sound like a presidential salute with 12 inch guns.

It would be difficult to enforce a rule against cigarettes, and the prohibition would breed discontent that would, as some think, almost border on mutiny.
