Effective with this catalog, the University of Hawaii has revamped its course numbering system. The system is applicable to all campuses of the University, including its community colleges.

1. UNDERGRADUATE COURSES 1 through 499
   A. Courses not applicable towards a bachelor’s degree 1—99
      Offered by community colleges ......... 1—59
      Offered by Manoa or Hilo campuses .... 60—89
      Offered by educational television .... 90—99
   B. Courses applicable towards a bachelor’s degree 100—499
      Initial or introductory courses; normally open to freshmen 100—199
      Second-year courses in a sequence or development within a field of study 200—299
      Third-year courses in sequence, or first courses in professional curricula normally taken by juniors 300—399
      Most advanced undergraduate courses 400—499

2. POST-BACCALAUREATE COURSES 500 through 800
   A. Courses in continuing education not generally applicable toward degrees 500—599
   B. Courses applicable toward advanced degrees 600—800
      Courses typically taken in first year of graduate study, or first in sequence 600—699
      More advanced graduate courses 700—799
      Thesis research 800
A large proportion of the courses listed in this catalog are re-numbered, and many are substantially revised. The old numbers are shown in parentheses following the new numbers.

Courses are listed by college and department, arranged alphabetically, except for interdisciplinary courses, which are listed with the Selected Studies and Honors Program. Use the Table of Contents or Index to locate a given department or curriculum.

After each department and major division is its abbreviated IBM code (e.g., Anth for Anthropology). This code is also used in the course schedules issued prior to each semester and the summer session, showing the time and place of each class meeting.

Heading each course description are the number and title of the course, the number of credits, and the semester given. Thus (3) I signifies a 3-credit course offered the first semester; (4) II, a course carrying 4 credits offered the second semester; (3) I, II, a 3-credit course repeated in the second semester; (5–5) Yr., a year's sequence carrying 5 credits each semester; while (arr.) shows that the number of credits may vary, being arranged by the instructor in each instance.

Other abbreviations used in course descriptions are: Hr, hour; L, lecture(s); Lb, laboratory; L-Lb, combined lecture and laboratory; Alt. yrs., alternate years; Pre, prerequisite.

Alongside the title of each course is printed the name of the faculty member giving it, as best ascertained at the time this catalog was prepared in early spring of 1968. Rank, title and academic degrees of all faculty are given at the end of the catalog.

THE UNIVERSITY OF HAWAI'I, the state-supported system of public higher education in Hawaii, conducts diverse programs in education, research and service for the state, the nation and the world community. It operates teaching and research facilities at more than 50 locations throughout the Hawaiian Islands and participates in international service and research activities in the Pacific Basin and Asian countries.

Throughout its history, a distinctive geographical and cultural setting has helped the University achieve competence in certain areas of study. Geographical location has led to concentration in oceanography, marine biology and interdisciplinary studies of tropical environments, problems and resources. The physical characteristics of Hawaii have focused interest on natural phenomena in geophysics such as tsunami research, volcanology, astronomy and astrophysics. Hawaii's multi-racial culture and its ties with Asia have created a favorable environment for the study of various aspects of diverse cultural systems, including such subjects as linguistics, genetics, philosophy and inter-race relations.

The University offers course work leading to the bachelor's degree in 64 fields. The Graduate Division offers work leading toward the master's degree in 67 fields and the doctorate in 27.

In addition to its instructional program, the University conducts organized research in several fields. Special units initiate and conduct research in economics, education, biomedicine, Pacific and Asian linguistics, social sciences, water resources, marine biology, geosciences, astronomy, genetics and agriculture.

The main campus is located in the Manoa Valley section of Honolulu, the capital of the state. The University maintains a second campus at Hilo and there are three community college campuses on Oahu, one on Maui, and another on Kauai.

Space observatories and associated research facilities of the University are located on the islands of Maui and Hawaii. The Hawaii Institute of Marine Biology, operated by the University, is located on Coconut Island in Windward Oahu. The University conducts the largest Peace Corps training program in the nation and its facilities are located on the islands of Hawaii and Molokai. Branches of the Hawaii Agricultural Experiment Station are located on five of the major islands of the state.

History. The University of Hawaii was founded in 1907 as a federal land-grant institution specializing in agriculture and the mechanic arts. Referred to as the College of Hawaii, it was launched with five regular students and 12 faculty members on a temporary campus in downtown Honolulu. In 1912 the
campus was moved to its present location in Manoa where an initial ninety acres were set aside for buildings. With the addition of a College of Arts and Sciences in 1920, the institution became the University of Hawaii.

In the following two decades, the University began to develop a special interest in bridging the East and West. A period of physical and academic expansion followed World War II, and new responsibilities and opportunities for growth were presented to the University when Hawaii became a state in 1959.

In 1960 the federal government created the East-West Center on the Manoa campus. Officially called the Center for Cultural and Technical Interchange between East and West, it aims to promote mutual understanding among the nations of the world through its exchange and service programs.

The University accepted a new task in 1964 when the state legislature authorized it to operate a state-wide community college system. With four state-owned technical schools for a base, the system's fifth campus in Leeward Oahu will open in September, 1968. A college transfer program was initiated at the Maui campus in 1967. The community colleges ultimately will offer a variety of college transfer and general education curricula on all campuses.

**Colleges and Schools.** The academic work of the University is administered by seven colleges: Arts and Sciences, Business Administration, Education, Engineering, General Studies, Health Sciences and Social Welfare, and Tropical Agriculture. Included in the College of Tropical Agriculture are the Cooperative Extension Service and the Hawaii Agricultural Experiment Station. The School of Tourist Industry Management is part of the College of Business Administration. Four professional schools are included in the College of Health Sciences and Social Welfare: School of Medicine, School of Nursing, School of Public Health and School of Social Work. The School of Library Studies is an additional professional school.

An Honors Program embraces all colleges. The Graduate Division assumes the major role in the organization and development of graduate programs.

**Accreditation.** The University is accredited by the Western Association of Schools and Colleges. Professional programs in the curriculum are individually accredited by appropriate agencies. Students may transfer credits to other American or foreign universities on the same basis as course credits are transferred by other accredited American universities.

**Academic Year.** The academic year is divided into two 18-week semesters and a 12-week summer session which offers two 6-week terms (see "University Calendar").

**Administrative Organization.** Governance of the University of Hawaii is vested in a board of regents appointed by the governor of the state.

The president of the University serves as executive officer of the board of regents and as such is responsible for educational leadership and is the administrative head of the University. He is assisted by five vice-presidents in the areas of academic affairs, business affairs, community colleges, continuing education
and community service, and student affairs. The president’s staff also includes the secretary of the University, two assistants to the president, and the director of University relations and development.

The council of deans advises the vice-president for academic affairs on matters of academic policy. The faculty senate is similarly advisory to the president and the board of regents.

Colors, Seal and Motto. The University of Hawaii colors are green and white. The rainbow, a frequent sight in Manoa Valley, is the popular campus symbol, and the University teams traditionally are nicknamed “The Rainbows.” The University seal contains a torch and book titled Malamalama (The Light of Knowledge) in the center of a circular map of the Pacific, surrounded by the state motto, Ua Mau Ke Ea o Ka Aina i Ka Pono (The Life of the Land Is Preserved in Righteousness). The University motto, inscribed in both the Hawaiian and English languages on Founders’ Gate at the entrance to the Manoa campus on University Avenue, is “Above all nations is humanity.”

Inquiries. Prospective students should address inquiries to the following offices. Undergraduates: Office of Admissions and Records, Bachman Hall 125, 2444 Dole Street, Honolulu, Hawaii 96822. Graduate students: Graduate Division Office, 2540 Maile Way, Honolulu, Hawaii 96822. General Studies: College of General Studies, 2500 Campus Road, Honolulu, Hawaii 96822. Summer session: Dean of Summer Session, Crawford Hall 208, 2550 Campus Road, Honolulu, Hawaii 96822. Hilo Campus: Provost, Hilo Campus, University of Hawaii, Hilo, Hawaii 96720.

Research and Service Operations

In addition to the instructional program, the University conducts organized research in several fields and offers other forms of public service. The most important of these operations are described below. The Cooperative Extension Service and the Hawaii Agricultural Experiment Station are discussed under the College of Tropical Agriculture. The Center for Engineering Research is discussed under the College of Engineering.

The primary function of the Economic Research Center is to promote an understanding of the economy of the state of Hawaii. The center evaluates economic effects of legislation and performs basic and applied economic research relating to Hawaii. In cooperation with the resident academic departments of the University, the center offers research training to advanced students.

The Education Research and Development Center adopts an interdisciplinary approach to the conduct of basic and applied research, evaluation and development concerned with instructional and administrative problems. Activities are directed at obtaining factual evidence that may assist educators in
reaching decisions about educational practices. Major programs focus upon understanding of achievement motivation, of conditions influencing educational attainment of different ethnic and socio-economic groups, and of means of optimizing the cognitive learning of school children. Research and development to facilitate educational planning and practice in Hawaii and the Pacific Basin is a primary concern.

The division of Educational Television Broadcasting Service serves as the production and transmission agency for the Hawaii Educational Television Network, a cooperative service of the University and the State Department of Education. The ETV studios located on campus also serve as laboratories for students enrolled in speech and education communications courses and as a production center for closed-circuit television courses within the University.

The Graduate Research Library, located on the Mall, houses the main book and periodical collections of the University of Hawaii Library. Completed in mid-1968, its four stories provide space for approximately 800,000 volumes and 1,050 readers in a total floor space of 106,848 square feet. It houses all research collections except the Government Documents Collection and the Hawaiian and Pacific Collection, which will remain in Sinclair Library until phase II of the graduate research library is completed. Collections are arranged in open-stack fashion for maximum ease of access.

Gregg M. Sinclair Library, located at University Avenue and Campus Road, houses the Undergraduate Collection (50,000 volumes) in addition to its two research collections noted above and the East-West Center library's Oriental Collection. Sinclair Library is in process of being converted to an undergraduate library. This includes expansion of the seating capacity, development of book collections geared to the undergraduate curriculum, and creation of browsing and listening areas.

The Communications Service Center, a division of library activities, provides audio-visual aids for classroom instruction and research projects. Consultation services include selecting, locating and producing graphic and audio-visual materials designed to meet specific needs. Audio-Visual Services lends AV equipment, films and does tape duplication. Graphic Services provides drafting, illustrating, design, layout, lettering, photography and projectual production. Instructional Systems operates a closed-circuit television system, a large multi-media auditorium in Kuykendall Hall and media instruction laboratory.

The Harold L. Lyon Arboretum occupies 123 acres in upper Manoa Valley, about 4 miles from the Manoa campus. It was developed by the Hawaiian Sugar Planters' Association and presented to the University in 1957. Several hundred species of exotic trees and shrubs are established, inventoried and well maintained, providing the University and the scientific community with an unrivaled facility for research on living tropical and subtropical woody plants.
The Hawaii Cooperative Fishery Unit promotes graduate training and research in fishery biology by providing students with support, counseling and facilities. The unit is headquartered in Edmondson Hall and functions academically as part of the department of zoology. Research program centers on the fishery biology and ecology of inshore marine and inland waters. The unit operates under joint sponsorship of the University, the Hawaii Department of Land and Natural Resources—Division of Fish and Game, and the U.S. Bureau of Sport Fisheries and Wildlife—Division of Fishery Services.

The Hawaii Institute of Geophysics was organized to take advantage of the unique position of Hawaii as a national laboratory for conducting geophysical research in the broad field of the earth sciences. In cooperation with academic departments devoted to the physical sciences, the institute conducts research programs and provides advanced training in geodesy, aeronomy, meteorology, oceanography, solid earth geophysics, geology, soils and geochemistry. The main laboratory of the institute is located at 2525 Correa Road on the campus. The institute also maintains a cloud physics observatory at Hilo, Hawaii, a ship operations facility at Pier 18, Honolulu, and a seismographic observatory in upper Manoa Valley.

The Hawaii Institute of Marine Biology, established in 1950, is located on Coconut Island in Kaneohe Bay. It encourages research in the marine biological sciences, including fisheries, by providing facilities and services for faculty members, graduate students and visiting scientists. Its research programs include studies in the ecology, physiology, behavior and systematics of marine animals and plants, pollution studies, biology, chemistry and pharmacology of toxic marine organisms, fundamental research in the interrelationship of organisms and their environment, and a summer graduate research program in marine biology initiated in 1967.

The Industrial Relations Center promotes understanding of personnel and industrial relations. Its library contains information on the basic services in the field, as well as current publications. The center provides reference service, and assists in conducting conferences, lectures and group discussions, and in training of advanced students. The center publishes research studies in basic industrial relations problems, as well as a monthly Newsletter, a bimonthly Selected Acquisitions List, reprints, reading materials and bibliographies.

The Labor-Management Education Program, instituted in 1965, is under the general supervision of the Industrial Relations Center in cooperation with the College of General Studies. Its objectives are to provide basic leadership training for those associated with management and labor, to promote (1) understanding by both groups of the fundamental problems of mutual interest with which they deal; (2) knowledge of the factors which are essential to productive relations between them; and (3) appreciation of the public's interest in the satisfactory solution of their common problems. In addition to its schedule
of general courses, the program conducts special courses, one-day and week-end institutes, conferences and staff training programs.

The Institute for Astronomy was founded on July 1, 1967, to assume responsibility for the development of the University's research programs in astronomy. In cooperation with the department of physics and astronomy, with whom certain of its staff share appointments, the institute provides graduate training on the Manoa campus and at its observing facilities. The institute maintains observatories on Mount Haleakala, Maui, for studies of the sun (especially the corona), the zodiacal light and the airglow. On Mauna Kea, Hawaii, it has under construction an 88-inch reflecting telescope and a coudé spectrograph. This telescope is to be used for planetary and stellar studies. In its Manoa campus headquarters the institute has extensive facilities for data reduction and analysis and for instrument development.

The Institutional Research Office is responsible for conducting and coordinating research relating to the University of Hawaii. An advisory committee aids in selecting institutional studies which are necessary for the University to function effectively and to plan realistically for the future. The office also develops and analyzes data on students, faculty and academic programs.

The Laboratory of Sensory Sciences performs basic research on all the sensory capabilities of man and other animals. Vision, hearing, taste, smell and the senses of the body are studied as well as their associated nerve reactions. In the laboratory are included the scientists, students and equipment in the disciplines of biophysics, psychophysics, electrophysiology, neurology and behavior, all investigating in common, but from different viewpoints, the basic question of the nature of sensation. This interdisciplinary approach, plus the year-round availability of marine animals for study in Hawaii, makes the laboratory unique in the study of the sensory processes.

The Land Study Bureau is the center of land research both at the University and for the state of Hawaii. Through its interdisciplinary research program, the bureau assembles, coordinates and interprets data on the characteristics and utilization of land and develops additional information as needed to integrate economic and physical data to achieve the highest and best use of the lands of Hawaii. The bureau provides the governor, the legislature, state departments and other public agencies, and private organizations and individuals with data and impartial advice on land use. Recently, the bureau has taken on the new role of advising and participating in the technological and economic development of other areas throughout the Pacific.

The Legislative Reference Bureau, created by the legislature in 1943 to aid in legislative and governmental problems, is situated on the campus, where it maintains a reference library. It provides the legislature, governor, departments, institutions and agencies of the state with bill-drafting services, information and reports. During sessions of the legislature the bureau maintains an office on grounds adjacent to Iolani Palace.
The Office of University Relations and Development is responsible for the production of all official University publications, for publicity and public relations activities, and for the coordination of efforts to raise funds for the University from private sources.

The Pacific Biomedical Research Center encourages investigations in the areas of subcellular biology, microbiology, cell structure and function, regulatory biology, genetics, behavioral sciences, epidemiology and other areas of medical research. Its building provides space; research equipment, such as electron microscopes; and research facilities, such as an animal colony, to faculty members, graduate students and visiting scientists. The center contains research laboratories for human genetics, microbiology, physiology, biochemistry, biophysics, pharmacology and psychology, in which it fosters and facilitates research projects of biomedical interest.

The Pacific and Asian Linguistics Institute plans and conducts research in general linguistic theory and specific problems of lexicology, structural semantics and grammatical description. Through its Pacific Lexicography Center, the research institute collects and stores data on the languages of the Pacific and adjacent areas, developing and utilizing computer techniques for storage and retrieval.

The Planning and Public Policy Institute, established in 1967, is a multi-disciplinary endeavor concerned with planning processes and policy issues, particularly at the urban and regional levels. Its programs are designed to assist students, practitioners and researchers to participate more effectively in the areas where planning and public administration converge and overlap. The institute works in close conjunction with the relevant academic departments and professional schools and with public and voluntary agencies in providing and facilitating academic instruction, continuing education and research, focusing on the systematic formulation and evaluation of public policies in specific problem areas.

The Social Science Research Institute facilitates the initiation of faculty research and develops and conducts programs primarily of an interdisciplinary nature in the social sciences and related fields. Particular emphasis is given to the study of modernization, socio-economic development and cultural change. The institute is developing new programs in survey research, contemporary Korea, and Hawaii’s people. A long-term study of culture and mental health in Asia and the Pacific will provide an opportunity for Asian and American scholars to participate in cooperative research.

The Social Welfare Development and Research Center (formerly the Youth Development Center), operated by the School of Social Work, is involved in social welfare planning efforts, particularly in the fields of juvenile delinquency and youth development. It offers consultation and training to agency and interagency programs through workshops, seminars, special University courses and other projects. The center operates Hawaii Upward Bound, a
program sponsored by the Office of Economic Opportunity designed to aid underachieving high school students preparing for college.

The Speech and Hearing Clinic is operated by the division of speech pathology and audiology in the School of Medicine. Diagnostic and therapeutic services in speech and hearing are provided for children, University students, and other adults by staff members and supervised student clinicians. A fee of $5.00 per semester or part thereof is charged for non-University registrants.

The Speech Communication Center provides instruction for those students who are discovered at entrance to need special attention to intelligibility and acceptability of utterance. Students appearing to need special instruction may also be referred by their instructors at any time. Within the space available, the center accepts (on a fee basis) persons not enrolled in the University. The center also engages in basic and applied research and training of researchers in speech communication.

The Statistical and Computing Center operates an IBM 7040-1401 system and an IBM 360 '50 system, along with a supporting line of peripheral punched card equipment. It provides services with respect to statistical consultation, system design, data processing, computing, and educational and reference advice to all the divisions and departments of the University.

The University of Hawaii Press publishes scholarly books and monographs, particularly those dealing with Hawaii, the Pacific and the Orient; regional books; and three scholarly journals, Pacific Science, Philosophy East and West and Oceanic Linguistics.

The Press is a member of the Association of American University Presses and the American Book Publishers Council. It was established in 1947 as a division of the University operating with the guidance of an advisory committee of seven faculty members appointed by the President. Book manuscripts should be sent to the director, journal papers to the respective editors-in-chief.

The Waikiki Aquarium is a state-owned museum specializing in Hawaiian aquatic exhibits. It is located in Waikiki and is operated by the University of Hawaii's Division of Continuing Education and Community Service as a place of education, recreation and inspiration for Hawaii's residents and tourists.

The Water Resources Research Center, established in 1964, plans and conducts research of both basic and practical nature related to Hawaii's water resources, and provides for the training of engineers and scientists through such research. Research is interdisciplinary with a broad base of physical sciences, technology and social sciences. It involves hydrology and hydraulic engineering, geology, geophysics and geochemistry, sanitary engineering and public health, climatology and soil physics, agricultural engineering and forestry, and socio-economic and legal aspects. The center promotes interdisciplinary programs in water resources research among various units of the University.
The University conducts a Peace Corps training program, including this rural village area at Waipio Valley, Hawaii. Volunteers are trained for assignments in Asia and the Pacific.

**International Training**

The **Office of International Programs** provides general administrative and program direction and guidance to the University's training centers; coordinates all business, administrative and training aspects of the University's contracts with the Peace Corps and the Agency for International Development; assists in devising and developing plans for new training programs; promotes and encourages the most effective use of the University's resources on international activities; provides on-campus assistance to foreign visitors as needed, particularly those engaged in related international programs.

The training centers of the University of Hawaii include two Peace Corps training centers, one located on the island of Hawaii and the other on the island of Molokai. The Asia Training Center, located on the island of Oahu, trains A.I.D. personnel for assignments in Vietnam, Laos and other countries of Southeast Asia.

Late in 1967 the Tropical Rice Production Center on the island of Kauai was established. This center is administered jointly by the College of Tropical Agriculture and the Office of International Programs and is used to train both Americans and Asians in the latest methods of rice production.

**Cooperating Institutions**

Through cooperative agreements with institutions listed below, the University has increased its research facilities and expanded its services to the state. The Bishop Museum, the Pacific and Asian Affairs Council, and the Academy of Arts offer student membership rates.
The Bernice P. Bishop Museum, a world-famous storehouse of information, contains an outstanding reference library as well as important biological and anthropological collections relating to Hawaii and other Pacific islands. In addition, this institution holds the combined herbaria of the University and the museum, the most complete collection of Hawaiian plants in existence. The museum's research facilities are available to University students on a reciprocal basis.

The Fruit Fly Laboratory is maintained on the campus by the U.S. Department of Agriculture, Entomology Research Division, for the study of fruit fly pests. This division also cooperates with the University in the use of a multipurpose radiation facility, installed on campus in 1965 to study the disinfestation of agricultural produce.

The Hawaiian Sugar Planters' Association provided the funds for a building on the campus to house the Agricultural Engineering Institute, with shop facilities for instruction and research.

The Honolulu Academy of Arts, built and endowed by Mrs. Charles M. Cooke, contains valuable collections of both Eastern and Western art. These are available for use by students and instructors.

The Pacific and Asian Affairs Council sponsors lectures, seminars and meetings on international affairs, particularly on Asia and the Pacific. Its library offers research materials on world affairs.

The Pineapple Research Institute of Hawaii, supported by the pineapple industry, is affiliated with the University. Some offices and laboratories are in institute buildings in the campus area. Field studies are carried on at a 150-acre experimental farm in Wahiawa, Oahu.

The Biological Laboratory, Honolulu, of the U.S. Bureau of Commercial Fisheries is located adjacent to the campus. Several of its senior staff members hold appointments on the Affiliate Graduate Faculty. The laboratory's mission is to conduct research on the oceanography and the fishery resources of the central Pacific Ocean. Its library, a comprehensive collection of works in the marine sciences, is available for use by students and faculty of the University. Requests for information should be addressed to the Director, Bureau of Commercial Fisheries, P. O. Box 3830, Honolulu, Hawaii 96812.

The universities of Michigan and Hawaii jointly use astronomical observatory facilities on the summit of Haleakala, island of Maui.

The U.S. Geological Survey Volcano Observatory, located at Kilauea Crater on the island of Hawaii, conducts research relating to the Hawaiian volcanoes. Research facilities are made available on occasion to faculty and students of the University.
Student Affairs

Student Activities

Student activities are recognized as an important part of a university education. The Bureau of Student Activities is responsible for developing and maintaining a well-balanced program in which student participation and leadership are encouraged.

Students registered for 12 or more credits are eligible to participate and hold positions in the approximately 90 student scholastic, honorary, professional, religious, social, departmental, special interest and residence organizations, and in all student government and college union activities.

The two major organizations, of which every student who pays a student activities fee is automatically a member, are the Associated Students of the University of Hawaii (ASUH) and the Hemenway Union Board (HUB).

The ASUH through its elected senate serves as the administrative and legislative body of the students and works with the University administration in matters affecting the general welfare of undergraduate students. The ASUH also supports and provides funds for student publications—Ka Leo o Hawaii (campus newspaper), Ka Palapala (student annual) and Kapa (literary magazine); drama and theatre; and the University band and chorus. Other activities include a symposium program on national issues, homecoming, Model United Nations and Model United States Senate.

Tickets to major productions of the University Theatre are free to ASUH members and East-West Center grantees. All students of the University and the Center may participate in dramatic and musical productions. Productions are presented in Kennedy Theatre.

Hemenway Hall is the center of campus activities and serves many campus organizations through its facilities and services. The Hemenway Union Board, composed of students, faculty and alumni, promotes and sponsors a broad program of social, cultural and recreational activities and administers the building through the establishment of policies for use of Hemenway facilities. Hemenway Union is affiliated with the National Association of College Unions International.

Besides ASUH and HUB activities, several departments conduct activities related to their educational programs. The music department sponsors concerts and recitals in Mae Zenke Orvis Auditorium, a hall of unique acoustical design. The speech department sponsors a series of reading hours throughout the academic year. Lectures, panels, broadcasts and films are sponsored by departments and campus clubs.
ORIENTATION FOR FRESHMEN AND NEW STUDENTS

Entering freshmen and transfer students are expected to be on the campus for the orientation program, the dates of which are stated in the University calendar (p. 3). This program is conducted by the Bureau of Student Activities and sponsored by the Associated Students of the University of Hawaii. It tries to reach as many new students as possible to help them get acquainted with the University.

INTRAMURAL ATHLETICS AND SPORTS

ASUH members are admitted free to varsity athletic events and are encouraged to participate in intramural sports. Athletic facilities, situated in the lower part of the campus, make possible a wide variety of indoor and outdoor sports.

The University offers instruction in health and physical education and conducts a program of recreation and sports. Individual colleges within the University require specified courses in the field, as stated in succeeding portions of this catalog.

Intramurals supplement regular physical education courses, and students are encouraged to participate in these sports.

University teams compete in the following varsity sports: baseball, basketball, football, golf, swimming, tennis, track, volleyball and wrestling.

Although the University takes reasonable precautions, it assumes no responsibility for injuries students receive in sports or games. All students participating in varsity sports are insured against accidents.

Student Services

STUDENT HEALTH SERVICE

The Student Health Service is set up to assist all students in maintaining their health while attending the University of Hawaii. Every daytime registered student requires a medical examination performed by his personal physician and the results of this examination must be entered on a special health form provided by the University. Payment for this medical examination is the personal responsibility of the student.

Health services will be denied to any student not providing this completed health form. In addition, students should be forewarned that medical clearances permitting them to enroll in physical education courses, intramural sports programs, etc., will be denied students not meeting this medical requirement.

The service offers a medical care program similar to that of the general office practice of medicine. A dispensary provides out-patient physician and nursing care 8:00 a.m. to 4:30 p.m. Monday through Friday and from 9 a.m. to
STUDENT AFFAIRS

11 a.m. on Saturdays. The infirmary can provide beds for medical care for minor illnesses and injury on a 24-hour basis seven days a week during regular sessions of the University. A nurse is on continuous duty for the dispensary and infirmary services, and a physician is there at regular hours and on call during evenings. A student may be referred to a private physician for medical problems beyond the scope of the Student Health Service, for which he must bear the financial responsibility. Each student is advised to join a medical insurance program to gain supplemental medical and hospital care. The medical insurance plan sponsored by the ASUH is tailored to students’ special needs and is specifically recommended.

Once enrolled, an annual tuberculin test or chest X-ray examination is required of each student. In view of the much higher incidence of tuberculosis in foreign students, semi-annual chest X-ray examinations are required of them. Failure to comply with these requirements may preclude registration for the following semester.

COUNSELING AND TESTING CENTER

The Counseling and Testing Center’s staff consists of professionally trained psychologists, psychiatrists, counseling psychiatric social workers, psychometrists and interns, who, as a team, function on the campus in the areas of student service, graduate training and academic research. Educational, vocational and personal counseling is available to students. Various aptitude, interest and other psychological tests are often used as aids in the counseling process. The Center also maintains an educational and vocational library and administers a reading improvement program.

UNIVERSITY PLACEMENT AND CAREER PLANNING

The Office of University Placement and Career Planning assists students and alumni in the selection and pursuit of an optimum career. Services are provided in areas of self-analysis, vocational information, specific job opportunities, job campaigns, evaluation of offers, and graduate studies. The office cultivates the interest of prospective island, mainland and overseas employers and provides them with facilities to contact students and former students available for employment. Recruiting literature, annual statements, graduate and professional school bulletins, copies of the College Placement Annual and other career references are provided. Credential files are established for students interested in an academic career.

Campus interviews are scheduled with recruiting representatives of mainland and Hawaii organizations that offer career opportunities in business and industry, education and government. A number of recruiting firms are interested in hiring foreign students for employment in their home countries. In addition several hundred employment opportunities are listed with the office by employers who find it impractical to make campus visits.

Early registration with the office is encouraged during the final year of study.
INTERNATIONAL STUDENT OFFICE

The International Student Office serves both foreign and American students. It helps those from other countries with immigration requirements, financial problems, living arrangements and other University and community matters. Special orientation programs are held at the beginning of each semester; foreign students admitted to the University are notified in advance and urged to arrive in time to attend them.

The office, located in Webster Hall 101, advises American students who seek opportunities for overseas study, service and travel, and who wish to engage in international student activities while at the University of Hawaii.

Non-U.S. students who are graduates of a university and are applying for admission to the University of Hawaii should write to: Foreign Student Adviser, International Student Office, 2528 The Mall, University of Hawaii, Honolulu, Hawaii 96822.

LOCKERS

Steel book lockers for students are available in Wist Hall. Use of a locker for the first and second semesters may be obtained by calling campus local 8961 with the number of the locker desired. The Facilities Management office will advise the student about pickup of the key and payment of charges. All keys must be returned before Commencement.

The campus draws together students from over 60 countries, including every continent, but particularly from Asia and the Pacific.
Studio work is a major part of the art curriculum.

**Student Regulations**

**STUDENT CONDUCT**

Students are expected to observe accepted University and community standards of conduct. Disciplinary authority is exercised by the Committee on Student Conduct, composed of the deans of several colleges, faculty members and students appointed by the president of the University, and the vice-president for student affairs.

**Financial Obligations to the University.** Students who have not adjusted their financial obligations (traffic violations, library fines, locker fees, laboratory breakage charges, transcript fees, loans past due, etc.) to the satisfaction of the business office may be denied graduation and further registration.

**Intoxicating Beverages.** Intoxicating beverages are prohibited on the campus and in affiliated buildings, including dormitories and facilities for all fraternities, sororities and other organizations.

**Lethal Weapons.** Firearms and spear guns are prohibited in dormitories and environs.

**PARKING AND TRAFFIC**

Students are expected to familiarize themselves with the University’s parking and traffic rules and regulations established by the board of regents. These regulations and special instructions may be obtained at several locations on campus including the student mail room, the business office in Bachman Hall and the traffic desk in the Auxiliary Services building. Ignorance of these rules and regulations will not excuse a student from the payment of fines for violations.

Parking permits are sold in a designated place near the swimming pool during registration periods, and at the traffic desk in the Auxiliary Services building throughout the year.
Living Accommodations

CAMPUS HOUSING

Acceptance to the University of Hawaii does not assure one of housing, and in all probability a student will have a difficult time searching out and arranging for housing. The University has only a limited number of campus dormitory spaces for which priority of assignment is given to Hawaii students. By policy of the board of regents, priority is given to freshmen who come from rural Oahu or the neighbor islands. Requests for residence hall accommodations on campus should be made directly with the Student Housing Office.

The contract is for the entire academic year or remainder thereof and is for room and board (10 meals per week—breakfast and dinner, Monday through Friday). Dining facilities for all residence hall students except Hale Kahawai and Hale Laulima are located in Gateway House. Dining facilities for Hale Kahawai and Hale Laulima are located in Jefferson Hall.

Residents must obtain medical clearance from the Student Health Service prior to occupancy. Each resident accepts responsibility for the regulations outlined in the student housing brochure.

There are no facilities on campus for temporary housing or for married students. There is no place on campus to which luggage or mail may be forwarded ahead of a student's arrival.

Undergraduate Women

Mary Dillingham Frear Hall has double accommodations for 144 students. Room and board fee is $365 per semester.

Hale Kahawai has double accommodations for 140 students. Room and board fee is $365 per semester.

Hale Laulima has double accommodations for 140 students with room and board fee at $365 per semester. Also, there are 14 single accommodations with room and board fee at $415 per semester.

Undergraduate Men

John A. Johnson Hall has double accommodations for 192 men. Room and board fee is $365 per semester.

Graduate Students

Gateway House has double-room accommodations for 104 women and 104 men in two separate towers. Both men and women students share common lounge, dining and recreational facilities on the first floor. If space permits, selected upper-division undergraduate students will be accepted. Room and board fee is $390 per semester.

Application-contracts must be accompanied by a $25 deposit before consideration for space reservation can be made. Contract periods do not include official vacation periods during the academic year. Room costs for these periods are approximately $85 plus meal expense.
OFF-CAMPUS HOUSING

The Student Housing Office offers a free central listing service and maintains listings of rooms in private homes, a few apartments, and room and board jobs. These listings are not inspected or approved by the University. Negotiations with off-campus landlords must be handled directly by the student. Because of the rapid turnover the names of landlords cannot be sent through the mail. Names of students as possible roommates are not available although available space shared with other students can be listed. The rush for housing usually starts about three weeks prior to beginning of classes. Students arriving in Honolulu are encouraged to arrange for temporary lodging and are invited to come to the housing office for general information on current listings of available accommodations (Monday–Friday, 7:45-11:45 a.m. and 12:30-4:30 p.m.). The general housing picture is one of extreme shortage and this means expense and difficulty in the location of suitable housing.

For information on campus or off-campus housing write to: Student Housing Office, Johnson Hall A, University of Hawaii, 2555 Dole Street, Honolulu, Hawaii 96822.

FOOD SERVICES

In addition to the Gateway House cafeteria, dining facilities on campus include:

Hemenway Hall Cafeteria. Meals a la carte are served.
East-West Center Cafeteria. A complete food service in Jefferson Hall, including a cafeteria, a snack bar and private dining rooms.
A snack bar in the northeast section of the campus.

EXPENSES

Minimum expenses are estimated at approximately $2,100 per year for board, room, tuition, registration, course fees, class and student body fees, and books. Off-campus housing may be higher. These estimates do not include the cost of medical or dental expenses, additional dependents or transportation. Students from outside the state should add the cost of transportation to and from Hawaii and additional items for adjustment in a new community.

Financial Aids

The Office of Financial Aids is concerned primarily with assisting students who have financial need to continue or complete their education at the University of Hawaii. This assistance may be in the form of scholarships, grants, loans and/or student employment. Correspondence should be addressed to: Director, Office of Financial Aids, Bachman Hall 124, University of Hawaii, 2444 Dole Street, Honolulu, Hawaii 96822. Prospective graduate students who need finan-
cial assistance should write to: Dean of the Graduate Division, 2540 Maile Way, Honolulu, Hawaii 96822.

Grants range from $200 to $800 a year and can be no more than one-half of the total assistance given to the student.
LOANS

Through the generosity of various organizations and individuals, certain funds have been provided from which students may borrow—either in small amounts to meet emergencies or in larger sums to defer part of tuition costs. These loans are to be paid before the end of the semester or summer session during which they were borrowed. First year students (freshmen and transfers) are not eligible for these loans if their permanent residence is other than Hawaii. A student wishing to make use of these funds should consult one of the financial aid counselors. Loan funds include the following:

Alumni Fund—Molokai Chapter; Andrew J. Salz Fund; Carey D. Miller Fund; Chinese Students' Alliance Fund; Commerce Club Fund; Edgar Wood Memorial Fund; Future Farmers of America, Uniwai Chapter Fund; George H. Lamy Fund; Gruscidada Fund; Hawaiian University Association Fund; Helen Strong Carter Dental Fund; Honolulu Civic Association Fund; Inez Wheeler Westgate Fund; Japanese Students' Alliance Fund; Louise S. Kawahara Memorial Fund; Wahiawa-Waialua Rotary Fund.

Federal Loan Programs. The National Defense Student Loan, Nursing Student Loan, and Medical Student Loan Programs are available to qualified students attending the University of Hawaii. Students are not required to repay any of the principal or interest until nine months after leaving their studies. For the borrowers who enter the teaching or nursing professions, it is possible for them to cancel part or, in the case of some teachers, all of their loans if certain conditions are met. Applications for these loans are available in the Office of Financial Aids.

Students wanting to borrow through the Federal Guaranteed Loan Program must process their applications through the agency designated in the state where they maintain permanent residence. Hawaiian students are required to go through the State Department of Budget and Finance. (In Hawaii this is the same as the United Student Aid Fund Loan. Application forms are available from the Department of Budget and Finance, commercial lending institutions, or Financial Aids Office, University of Hawaii.)

STUDENT EMPLOYMENT

The University of Hawaii participates in the Federal College Work-Study Program and also employs students to work part-time in offices, laboratories, libraries, in maintenance work and other jobs on campus.

Students who plan to work their way through college are advised to have funds for all major expenses (tuition, books, room, board, clothing and travel) for the first year. Keen competition for jobs as well as the problems of adjusting to university life make it difficult for first year students to earn more than limited spending money.

Applications for student employment are obtained from the Financial Aids Office. Preference is given to students with greatest need for financial assistance in order to continue their education.

Tuition and Fees*

Regular Session Fees

Fees are charged according to the number of semester hours carried by the student; auditors (those enrolled in a course for no credit) pay the same fees as students enrolled for credit. Out-of-state students pay the same fees as resident students.

*The tuition and fee schedule set forth here may be changed during 1968-69.

†At the request of the Associated Students of the University of Hawaii (ASUH) and the governors of the Hemenway Activities Council (HAC), and the department of athletics as authorized by the regents, the treasury office collects certain student activity and athletics fees at registration time. These fees total $13.25 each semester, of which approximately $8.25 is used to cover membership in the ASUH and HAC for undergraduates taking 12 or more credit hours (if more than 6 are in the regular day program), class dues, the use of services and facilities in Hemenway Hall, and participation in the social, cultural and recreational programs provided. The remaining $5.00 is used by the department of athletics for the promotion and support of varsity athletics.

For students taking fewer than 12 credit hours, the fees are optional and the benefits limited. These fees are not collected for the summer session. Complete details are available at the Bureau of Student Activities.

Academic Regulations

Student Classification

Persons attending classes at the University of Hawaii enroll as students or auditors. Undergraduate and graduate students enroll for credit. Auditors are permitted to attend classes but receive no credit for the course. Students may be designated as classified or unclassified, full-time or part-time.

Classified Students

Undergraduates are designated classified or unclassified students. Classified students follow prescribed programs of study leading to the bachelor's degree. Undergraduates are divided as follows: freshmen, 1-24 credit hours completed; sophomores, 25-54; juniors, 55-88; seniors, 89 or more. Freshmen and sophomores are lower-division students; juniors and seniors are upper-division students.

Graduate students (graduates of this University or other institutions of approved standing) are designated classified, five-year diploma candidates or unclassified.

Those admitted to the University's Graduate Division are termed classified students, in one of three categories: regular, probational and special. These students work toward advanced degrees or in special non-degree training or certificate programs.

Five-year diploma candidates are graduate students in the College of Education following a curriculum leading to that diploma.

Unclassified Students

Undergraduate and graduate students who are not candidates for a degree are termed unclassified students in their respective divisions. Both enroll in the College of General Studies. Some unclassified graduate students work toward the professional certificate of the State Department of Education, and others later seek admission to the Graduate Division. The unclassified status may not be used to evade technical or scholastic requirements of the college, school or Graduate Division.

Full-time and Part-time Students

Undergraduates, graduates and unclassified students may be either part-time or full-time students. Such terms are for registration purposes only and
have no further significance. Ordinarily a full-time student carries a minimum of 12 credits. Graduate students are considered full-time or part-time according to Graduate Division regulations.

Auditors

Auditors are those students who are permitted to attend certain classes with the consent of the instructor. No credit is given for a course which is audited. In general, auditors are not allowed in laboratory science, mathematics, elementary and intermediate modern languages, English composition, speech or studio art courses, or in classes limited in size where credit students might thereby be excluded. Auditors do not take course examinations. The extent of their classroom participation is at the option of the instructor.

Admission Information for Entering Students

ADMISSION OF UNDERGRADUATES

Candidates for undergraduate admission to the University of Hawaii must present satisfactory evidence of ability to do university work. Usually this is done in terms of previous academic records, scores on the Scholastic Aptitude Test and recommendations.

Applications and correspondence should be directed to:
Director, Office of Admissions and Records
Bachman Hall 125
University of Hawaii
2444 Dole Street
Honolulu, Hawaii 96822

Applications must be received by July 1 for admission in the fall semester and by December 1 for the spring semester.

The University of Hawaii uses social security numbers as student numbers. Students are required to give their social security number on their application forms. Students should also acquaint themselves with zip codes of their permanent and local addresses for correspondence purposes.

Admission of Residents as Freshmen

Residents of the state of Hawaii applying for admission as freshmen must submit scores on the Scholastic Aptitude Test of the College Entrance Examination Board, high school transcripts and recommendations from qualified persons. A high rating in one factor will not insure admission, nor will poor performance in another area exclude an applicant if other evidence indicates that he might be successful in university work. Ordinarily a student should achieve a B or better average in high school. The quality of work done during the last two years in secondary school receives special consideration.
Candidates for fall admission should take the Scholastic Aptitude Test before or during December of the senior year in high school. Candidates for spring admission should plan to take the test before or during July. For information on the SAT test, consult a high school counselor or write to the nearest CEEB center:

College Entrance Examination Board
c/o Educational Testing Service
Box 1025
Berkeley, California 94701

or Box 592
Princeton, New Jersey 08540

Every applicant must take the SAT and submit evidence that he has satisfactorily completed at least 15 units of work in a four-year high school or at least 12 units of work in a three-year high school.

Any other subjects (except physical education and ROTC) credited by the high school toward its diploma (no less than \( \frac{1}{2} \) nor more than 2 units in any one subject) provided that these subjects have been pursued in accordance with regular classroom procedure involving a reasonable amount of preparation in addition to the time spent in class.
The word *unit* as employed here signifies the satisfactory completion of a full school year's course of study, which includes five class sessions a week of not less than 45 minutes each, or the equivalent for laboratory and shop exercises. For an acceptable distribution of units required of entering students, see the accompanying table.

**Admission of Out-of-State Students as Freshmen**

Candidates applying for admission as freshmen to the University of Hawaii from outside the state should meet all the requirements noted for Hawaii applicants (see above). *Out-of-state candidates should await notice of acceptance before coming to Hawaii. No special consideration can be given to students who arrive at the last minute and whose credentials are not in order.*

Admissions decisions are made without regard to the availability of housing. It is the student's responsibility to arrange for housing.

**Admission of Transfer Students**

Candidates for admission currently enrolled in other universities, colleges or institutions of higher learning must file their applications and credentials with the office of admissions and records by July 1 for admission in the fall semester and by December 1 for admission in the spring semester.

Students who transfer from other accredited universities and colleges may be granted advanced standing. Official transcripts from all institutions attended must be sent to the director of admissions and records. Each transcript must include a listing of courses taken, the grade received in each and a note of honorable discharge from the institution. These transcripts become a permanent part of University files. A supplementary transcript of courses in progress must also be sent to the admissions and records office at the end of the semester. If a supplementary transcript is not submitted, it will be assumed that the student has decided not to enter the University. Candidates who have not completed 24 acceptable academic credits must also submit high school transcripts and scores on the Scholastic Aptitude Test of the College Entrance Examination Board.

Credit accepted toward graduation is given only in subjects substantially equivalent to University of Hawaii offerings, and grades earned in these courses must be *C* or better to be recorded. No more than 60 semester hours are accepted in transfer from a junior college.

Students transferring from unaccredited institutions must meet University of Hawaii standards of admission. Upon the completion of a minimum of 30 semester hours with an average of *C* or better, credit may be given for courses at the previous institution. Such credit, however, will not exceed 60 semester hours, and will be granted only for courses usually considered lower division and substantially equivalent to University offerings.

**Admission of Mature Persons**

Mature persons may register as special students when their backgrounds qualify them for credit work. Such students, however, will not be admitted to
a degree-granting college or allowed to become a degree candidate unless all admission requirements have been satisfied.

Admission as a special student in no case serves as a means of avoiding compliance with requirements laid down for regular students.

Admission of Veterans and Other Individuals

Veterans and other individuals may take examinations covering preparatory school subjects as a means of fulfilling unit requirements. Successful performance on these and the Scholastic Aptitude Test will admit these candidates to the University. Such individuals, however, must meet all special requirements for admission to such curricula as engineering, agriculture and nursing. It is understood that persons in this category will become degree candidates.

ADMISSION TO CERTAIN UNDERGRADUATE PROGRAMS

Candidates for admission to certain programs must meet special requirements. Each applicant should study the conditions set by the college he intends to enter and for the program he intends to pursue in that college. Special attention is directed to the following requirements.

Arts & Sciences

All prospective students of the College of Arts and Sciences are strongly advised to offer at least two years of college preparatory mathematics and three years of a foreign language.

Students who expect to select as their major areas of study mathematics, the natural, biological or physical sciences, and most social sciences, must have had plane geometry, two years of algebra, and trigonometry, or their equivalents. Solid geometry is also strongly recommended.

Engineering

Prospective engineering students must have had plane geometry, two years of algebra, and plane trigonometry. It is strongly recommended that they also have mechanical drawing, physics and solid geometry. Engineering students who have not completed trigonometry or mechanical drawing in high school should arrange to take these subjects during the summer session preceding their freshman year.

Medical Arts

Applicants for admission to the dental hygiene program are required to take the American Dental Hygienists' Association Aptitude Test. Information about the test and the application may be obtained from the department of dental hygiene or the American Dental Hygienists' Association, 304 East 45th Street, New York, New York 10017.

Prospective students of medical technology should have completed at least two years of algebra, a unit of plane geometry and one of trigonometry. A course in pre-calculus is recommended. A year of chemistry and a year of physics are strongly advised.
Business Administration

Prospective students of the College of Business Administration should have completed two years of algebra and plane geometry or their equivalent. Trigonometry is strongly recommended.

Early Admission

Qualified high school juniors and seniors may enroll in University courses. Juniors may be admitted to the summer session before their senior year, and seniors may carry one or two University courses during their last year of high school. Students desiring to take advantage of this program should ask their high schools to recommend them, arrange to have high school transcripts sent to the office of admissions and records, and take the Scholastic Aptitude Test of the College Entrance Examination Board. The continuance of these students in the early admission program is reviewable at the end of each term.

Selected Studies and Honors Program

Admission to the Selected Studies Program is by invitation to freshmen and sophomores whose high school records and aptitude test scores, or whose recommendations from the University faculty, indicate that they have the qualities needed to profit from the opportunity.

Juniors and seniors who wish to graduate with honors degrees may join the Honors Program. Application for admission to the program may be made by any regularly registered undergraduate at the end of his sophomore year or during his junior year.

ADMISSION OF GRADUATE STUDENTS

Graduates of accredited colleges and universities who wish to undertake graduate study in the University of Hawaii Graduate Division should apply to:

Dean, Graduate Division
c/o Student Services
Spalding Hall 354
2540 Maile Way
University of Hawaii
Honolulu, Hawaii 96822

Each application should be accompanied by two official transcripts of work completed at all institutions of higher learning including the University of Hawaii. Admission to graduate study is provisional until such records are on file. These transcripts become a permanent part of University files.

Applications must be received by April 30 for the fall semester, October 30 for the spring semester, and March 30 for the summer session.

Consult the Graduate Bulletin for advanced degree programs and requirements. The bulletin may be obtained by writing to: University Bookstore, 1760 Donagho Road, University of Hawaii, Honolulu, Hawaii 96822. The price is 25 cents.
Registration for Courses; Withdrawals and Other Changes

REGULAR REGISTRATION

Registration for courses is usually held one week prior to the opening of the semester. Early registration is usually held a month earlier than this for regularly enrolled students on campus. The dates for registration are given in the University Calendar (p. 3). Entering students receive circulars with instructions for registering. Courses are described in this catalog under the various college sections. A schedule stating the time and place of meetings for each course is issued by the records and admissions office prior to registration.

Regular attendance at class and laboratory sessions is expected for all courses in which a student enrolls. Unavoidable absence should be explained to the instructor concerned.

Undergraduates. Each undergraduate is assisted by a faculty adviser assigned by his college to help him prepare an academic program which meets the goals he sets for himself. Tuition and fees are payable at the time of registration. A student is not officially registered until he has paid his tuition and fees.

Graduates. Graduates follow the same procedure in registration as do undergraduates. Consult the Graduate Division for special instructions.

Auditors and Unclassified Students. Auditors and unclassified students register after the period assigned for the registration of classified undergraduate and graduate students. Instructions for auditors and unclassified students are issued at the beginning of each semester.

LATE REGISTRATION

Registration for credit (initial or as a result of program changes) after the announced registration days is permitted only in exceptional cases and for valid reasons. The following rules govern such late registration: (1) during the first eight days following the last official day of registration, written approval must be secured from the dean concerned; (2) subsequent to the eighth day, students may register only as auditors and must have the written approval of the dean and the instructor concerned. Corresponding restrictions apply to summer session registration and are stated in the Summer Session Bulletin.

Auditors need not comply with these regulations, except that they cannot change to credit status after the above late registration periods.

OTHER PROVISIONS

Maximum Registration. Students may not register for courses in the College of General Studies, for credit or audit, in excess of the maximum registra-
tion allowed by the college in which they are enrolled. Students must carry a minimum of 12 credits to be considered full-time. Graduate students should consult the Graduate Bulletin.

Variable Credit Courses. The number of credits obtainable in most courses is stated in this catalog and in the schedule of courses available shortly before registration. However, certain courses, designated by "hours arranged," offer variable credit. Students in these courses usually carry on individual work. The number of credits for which a student enrolls and will earn in such a course must be approved by the instructor at the time of registration. Students register for a definite number of credits and may earn no more or less than the stated number without the college dean's approval.

Course Changes. Students wishing to change a course or courses must follow the procedures given for withdrawing from a course (see below) and for late registration (see above). Forms are available at the college dean's office.

WITHDRAWAL FROM COURSES OR FROM THE UNIVERSITY

To withdraw from a course, a student must have the written consent of the dean of his college on a form available at the dean's office. Complete withdrawal from the University must be applied for on a form available only at the admissions and records office. Signatures as indicated on the forms must be obtained, and the completed forms turned in to the business office.

During the first three weeks of a semester, formal withdrawal from courses is not indicated on a student's record. After the first three weeks a formal withdrawal is marked W-F if the work was failing; otherwise, it is marked simply W (not failing). Withdrawals are normally not permitted during the last four weeks of instruction in a semester. A dean may approve a withdrawal for legitimate reasons. A student who ceases to attend a course without complying with the official procedure for withdrawal receives an F for the course. The effective date of withdrawal is the date recorded by the business office.

Refunds for withdrawals from courses and from the University are noted under "Tuition and Fees—Refunds."

TRANSFERS WITHIN THE UNIVERSITY

A student may apply for transfer from one college to another during either semester. Application for transfer must be made on a form supplied by one of the deans concerned. The application must be approved by the deans of the two colleges and returned to the admissions and records office as soon as possible. Changes of college, curriculum or major are not permitted during registration periods.
Credits, Grades and Examinations

Work accomplished by students is usually recognized in terms of credits, grades, grade points and grade-point ratios. Grade reports are given out at the end of each term.

Credits. A credit (also called a semester hour or a credit hour) is given to a student for work satisfactorily accomplished during three hours a week spent in the preparation and recitation of assignments in a course, or in the field or laboratory. The normal division of time in non-laboratory courses is one hour in the classroom and two hours in preparatory work. Thus, a three-credit course signifies that the class usually meets three hours a week and that the student is expected to spend six hours in preparation of assignments.

Grades. Grades given in all courses are A, B, C, D, F and I, except for 800 (thesis research) in which the grade of S (satisfactory) is given upon acceptance of the thesis. The lowest passing grade is D.

An I is given to a student who has failed to complete a small but important part of a semester's work before the semester grades are determined, if the instructor believes that failure was caused by conditions beyond the student's control and not by carelessness or procrastination. Instructors will send a report of "Incomplete" to each student receiving an I, indicating the steps to be taken to receive a passing grade. To receive credit for a course in which an I has been reported, the student must make up the incomplete work before the Thanksgiving or Easter recess of the next semester. If the work is not thus completed, the I will be changed to F. If the work is completed, the instructor will report a semester grade, taking the completed work into consideration.

When a student fails to appear for a final examination, the procedure is different. In this case, the instructor computes the course grade using F for the final examination. If, within one week after the final examination, the student obtains a note from his dean certifying that the absence was caused by valid circumstances (normally only medical ones), the instructor will enter a change of grade to an I.

For undergraduate students, credit in a course for which an F is given may be obtained only by passing the course, or its equivalent, either at the University of Hawaii or at some other accredited institution of higher learning.

Grade points are given for all courses in which grades are reported. They are computed as follows: for each credit received in a course, 4 grade points are granted if the grade is A, 3 if B, 2 if C, 1 if D, 0 if F.

Students entering as undergraduates with advanced standing are not given grade points for work done elsewhere. But on work done at the University of Hawaii, such students must gain grade points in the same proportion to credit hours required for graduation as that demanded of other students.
Grade-point ratios are determined by dividing the total number of grade points by the total number of credits for which a student has been registered. Courses for which grades of W or I have been recorded are not included in the computation of ratios. For undergraduate students, grades of F or W-F are included until credit is subsequently obtained in the course in which failures have been reported.

Grade Reports. Grade reports are sent to students through campus mail at the end of each semester and summer session. Those desiring the report forwarded should leave a stamped self-addressed envelope at the campus mail office. Students in evening classes should leave stamped self-addressed envelopes at the office of the dean of the College of General Studies.

Copies of the grade reports of all classified undergraduate students are sent to parents or guardians at the end of each semester. In addition, copies of mid-semester deficiency notices are sent to the parents or guardians of freshmen and sophomores.

Pass-Fail. Undergraduate students may, with approval of their adviser, choose to take up to two courses a semester on a “pass” or “fail” basis, provided they are not on academic probation and that the course is not required by the college in the student’s “major requirement.” To qualify for a pass grade, the work of the student must be at least at the C- level. Departments may, at their option and upon the approval of the appropriate curriculum committee of the college, designate certain lower division introductory courses in the 100–199 series on a compulsory pass-fail basis, but these courses are exempt from the two pass-fail course maximum the student is permitted to take in any one semester. No more than forty (40) credit hours taken on a pass-fail basis may be counted toward the degree. A grade of “P” (pass) is not computed in the grade-point average; however, a grade of “F” (fail) is.

EXAMINATIONS

Course Examinations. Final examinations are required in all undergraduate courses except directed reading, research and seminar courses. No examinations (other than short quizzes) are allowed during the two weeks prior to the final examination period. The schedule of final examinations is issued by the office of admissions and records prior to the testing period.

Foreign Language Placement Examinations. All students who have had previous study of foreign language courses and intend to continue their study of that language at the University of Hawaii must, prior to enrollment in a course, take a placement test which will assist in determining in which course they should enroll. Registration for foreign language courses will not be permitted until proper placement has been determined. For further information, contact the offices of the European languages department (Webster 301) or the Asian and Pacific languages department (Webster 311).
Credit for Previous Foreign Language Study. Credit towards graduation for learning of foreign languages which has been accomplished outside the University of Hawaii may be granted in one of five ways: by transfer from another institution, by placement, by regular credit by examination, by special credit by examination, or through the Advanced Placement Program.

For students who have taken the placement test (see above), completion with a grade not lower than C or its equivalent, of the course in which a student has been placed, will result in his automatically receiving credit not only for the course he has passed but also for all lower division courses which are prerequisite to that course, up to a maximum of 14 credits.

Students who do not wish to enroll in a foreign language course (e.g., because they have completed their requirement or because they are enrolled in a college which has no such requirement) may receive credit for lower-division foreign language study completed outside the University of Hawaii (up to a maximum of 14 hours) by passing a special credit examination administered by the appropriate foreign language department. Apply to department offices for further details. Credit for other language work may be achieved by the regular credit by examination procedure (see below).

Credit towards graduation may also be obtained by means of attaining a score of 3 or better on the Advanced Placement Examination (available in French, German, Latin and Spanish). The Advanced Placement Examinations are administered in high schools by the Educational Testing Service for the College Entrance Examination Board on a nationwide basis for students who have completed specific college level course in high school. Further information may be obtained in most high schools, or directly from the Educational Testing Service, Princeton, New Jersey.

Credit by Examination. Any student who feels that he already possesses sufficient knowledge in one of the areas of the general education core (see below) to fulfill part of his degree requirements may apply to the Counseling and Testing Center to take a standard examination in any of the following fields: English composition, mathematics, humanities, natural sciences and social sciences—history. The student pays the fee charged by the College Entrance Examination Board, currently $5.00. Students scoring at high levels will be given credit which will count toward graduation and toward fulfilling of the appropriate portion of the general education degree requirements; those making unsatisfactory scores benefit only from the experience. Norms for granting of credit in this manner are set by the College of Arts and Sciences.

Students who can show reasonable cause to believe that they have mastered the basic courses in economics, calculus, general chemistry or sociology and who wish to get credit by examination for any of these subjects, should state their case to the department chairman. If he is convinced, he will so inform the Counseling and Testing Center. The student applies to the center, pays the fee and takes the examination. A satisfactory score on these subject examinations, as determined by the appropriate department, yields course credit.
For other courses the examinations have to be specially prepared by University faculty members, and so the requirements are more stringent. An enrolled student who has been in attendance for the semester with a grade-point average of 2.4 or better and presents evidence to his college dean that he has had the equivalent of a course through experience or training but has not received college credit for the course, may apply for credit by examination. (See preceding section for foreign languages.) Application must be made within the first six-week period of a semester. Graduate students may also obtain credit in this manner for certain undergraduate courses. A fee is charged for each examination.

In each case the examination must be prepared or approved by the course instructor, must be more comprehensive than the usual "final examination" and must be designed to serve as the scholastic equivalent of the course. Courses passed by examination do not carry grade points.

**Requirements for Continuation at the University by Undergraduates**

Scholastic accomplishment is determined by the grade-point ratio (see above). If students fail to meet the minimum scholastic requirements of the University, they are put on probation, suspended or dismissed.

Undergraduates denied further registration include:

1. Those who, after taking 24 credits, have failed to achieve a cumulative grade-point average of at least 1.7.
2. Those on academic probation either by reason of work at this University or at another institution of higher learning, who have not established nor maintained a grade-point ratio of 2.0 in the work of the semester.

**Probation.** A student may be placed on academic probation at the end of any semester if he fails to maintain a 2.0 grade-point ratio on a cumulative basis. He may continue work at the University, but must achieve a grade point of at least 2.0 in order to continue beyond that semester.

**Suspension and Dismissal.** A student who has been denied further registration for the first time is placed on academic suspension. After one semester, a student on academic suspension may be readmitted to the University. However, he is then placed on probation and must achieve at least a 2.0 grade-point ratio to continue.

**Rules Governing Probation, Suspension and Dismissal**

1. Regulations governing academic probation may be applied at the end of any semester. Regulations governing academic suspension or dismissal are applied at the end of the spring semester, on the basis of both semesters' work.
2. Students who fail to meet the established grade-point ratio the first time are academically suspended and are eligible to return to the University not earlier than the succeeding spring semester. Such students, however, may attend the summer session immediately following their suspension. If they bring their cumulative grade-point average up to 2.0 or better, the Committee on Admissions and Academic Standing may set aside the suspension period and permit them to attend the fall semester.

3. Students who have been previously suspended, or students admitted on scholastic probation who fail to meet scholastic requirements are academically dismissed. Such students will be readmitted only in unusual circumstances.

4. Application for return from dismissal should be filed by July 1 for the fall semester, by December 1 for the spring semester and by May 1 for the summer session. The same deadlines apply for filing notification of returning after suspension.

Other Provisions. Warnings of low scholarship are given by instructors and deans usually at mid-semester, but the student should not assume that his work is of passing grade merely because he has not been warned. The University is not responsible if a warning mailed to a student fails to reach him.

Ordinarily failure in the first semester of a year course bars a student from registering for the second semester of that course.

Upon finding that a student is suffering from a physical or mental condition detrimental to the best interest of the student or the University, the vice-president for student affairs will, on medical advice, recommend proper action to the appropriate college dean. The dean may then require that the student be officially withdrawn, without academic penalty. Readmission will be contingent on review and recommendation by the college dean and the vice-president.
Degree Programs

Programs Leading to Advanced Degrees

At the graduate level, the University currently offers curricula leading to the Master's degree in 67 areas (including Arts, Science, Fine Arts, Business Administration, Education, Public Health, Library Studies and Social Work). Doctoral programs leading to the Ph.D. are presented in 27 fields. Post-graduate studies have been established in some of the sciences and medical arts. For information on these programs, and the five-year diploma curriculum in education, see "College of Education," and the annual Bulletin of the Graduate Division.

Programs Leading to the Bachelor's Degree

PURPOSES OF UNDERGRADUATE INSTRUCTION

Students come to American universities with many interests and motivations, both cultural and vocational. The University of Hawaii attempts to respond to as many of these interests as seem appropriate to an institution of higher education. Thus, it currently provides six different undergraduate degrees (bachelors of Arts, Fine Arts, Science, Business Administration, Education, Music) in a total of 64 academic fields.

The primary purpose of each undergraduate curriculum is intellectual—to educate students to think for themselves: to analyze, to apply appropriate standards, to arrive at their own judgments. In the process, students should gain knowledge and sharpen their ability to communicate, both in standard prose and in the symbolism of mathematics, logic and the arts.

Generations of students have discovered, though sometimes only after graduation, that there is no real conflict between the goals of liberal or general education set forth by a university and their individual career goals. There is no surer preparation for professional life than an education which enhances the ability of the individual to keep learning all his life and to communicate effectively with his fellow men, and such are the overall purposes of general education at the University of Hawaii.

Secondly, each undergraduate curriculum tries to lead the student to sufficient depth in a field of learning so that he can understand its central concepts, some of its methodology in examining problems, the standards of truth, value and relevance which it employs. Seldom in the contemporary world does the
bachelor's degree signify that the student is ready to practice the art or science which he has been studying (there are a few exceptions, such as nursing). Usually the baccalaureate shows that the student is ready for specialized training in a field, either by graduate study or by work on the job, and that he has attained a general education illuminated by some beginning work in a particular field.

**Undergraduate degrees awarded:**

1. By the College of Arts and Sciences: bachelor of arts (B.A.), of fine arts (B.F.A.), of music (B.Mus.), and bachelor of science (B.S.).
2. By the colleges of Tropical Agriculture, Engineering, or Health Sciences: bachelor of science (B.S.); the diploma designates the particular program of study completed.
3. By the College of Education: bachelor of education (B.Ed.), except in the recreation leadership program, where a bachelor of science (B.S.) is granted. Holders of bachelor's degrees who complete the five-year program in education receive a diploma certifying that.
4. By the College of Business Administration: bachelor of business administration (B.B.A.).
5. By the School of Nursing (in addition to baccalaureate program): Associate of Science (A.S.) for completion of two-year program in practical nursing.

**UNIVERSITY REQUIREMENTS FOR BACHELOR'S DEGREES**

The liberal education objectives of undergraduate learning include an understanding of the fundamentals of major fields of knowledge which should be the common possession of educated men and women, whatever their specialized interest. This objective is not likely to be attained from a random arrangement of courses. Consequently, a program of liberal or general education is required of all students seeking a baccalaureate from the University. The general education "core," as it is frequently called, amounts to about a third of a four-year curriculum. It tries to assure for each student reasonable competence in organizing his thoughts in written and spoken English—and in understanding the expressions of others—in mathematics, in the humanities, natural sciences and social sciences.

The "core" need not be completed during the first two years, though general education courses are frequently concentrated in the freshman and sophomore terms. General education requirements can be met either by completing appropriate courses—listed below—or by passing comprehensive examinations. (See "Credit by Examination.")

To qualify for any baccalaureate degree from the University of Hawaii a student must satisfactorily complete: (1) the general education requirements of the University outlined immediately below; (2) at least 60 additional credit hours of non-introductory courses (i.e., those numbered 200 and above); and (3) the requirements of his college (which may overlap these University requirements).
Curricular Requirements. A program of study to accomplish the purposes of undergraduate instruction is worked out with each student within the college in which he registers. Curriculum requirements vary considerably from college to college. However, all students intending to receive a baccalaureate from the University are required to take courses, or by examination demonstrate their competence, in the following fields. (The courses indicated are intended to provide liberal education, rather than specialized training; the number of courses from which a choice is made by the students to satisfy core requirements is increased from year to year.)

Communications: Each student must have competence in expository writing and oral communication appropriate for study at an institution of higher learning. The usual means of fulfilling this requirement is to pass English 101–102 (or 105, an accelerated course) and Speech 145. Students who have this competence when entering the University may demonstrate it—and receive credit for the equivalent courses—by passing an examination.

Quantitative Reasoning: Ability to apply, understand or appreciate the uses of mathematics, or its philosophical base, is demonstrated by passing any mathematics course at the university level or Philosophy 200, symbolic logic.

World Civilizations: Adequate comprehension of the broad sweep of cultural development is usually demonstrated by passing History 151–152 World Civilization (or its counterpart in the Honors Program, 161–162, or its upper-division equivalent, 251–252). However, with the concurrence of their academic advisers, students with an adequate understanding of Western civilizations may complete the requirement by passing courses in the history of Asia, such as History 341–342, or in Asian Studies, such as 301–302. Conversely, students with a satisfactory comprehension of Eastern civilizations may fulfill the requirement by taking one or more courses in European or American history, such as 181–182, 401–402, 405–406, or American Studies 485–486.

Humanities: The educational objective sought here is to develop standards of value and beauty, to sharpen critical judgment by the study of literature and the other creative arts, of philosophy and religion. To fulfill this requirement, students must pass at least 3 semester courses, distributed among 2 or more of the following 3 groups:

I: English 251–252, 253–254, 255–256; Drama 160.
II: Philosophy 100, 200; Religion 150, 151.
III: Art 101; Interdisciplinary Studies 131, 132; Music 160, 170, 265–266.

Natural Sciences: Sought here is a critical understanding of natural phenomena and of the methods of science used in their study. The requirement may be fulfilled by passing at least 3 semester courses, chosen from the following, and preferably including both the biological and physical sciences.

Chemistry 113 and 115, 114 and 116, 117 and 118; Geography 101; Geosciences 101–102.
Oceanography 201; Physics 100, 110-111, 160-161, 170, 272, 274.
Botany 101; Genetics 451-452; Microbiology 351; Zoology 101.
General Science 121-122; Biology 220.

Social Sciences: The purposes of this requirement are (1) to seek an understanding of the extent to which scientific method can be used in studying human behavior and institutions and (2) to assist students in assessing their own behavior in society. The requirement may be fulfilled by passing at least 3 semester courses, including at least one semester course from each of the following groups:

I: Anthropology 150, 200; Psychology 100, 110, 111-112, 320, 321, 322; Sociology 151, 201, 360; Social Sciences 301-302.
II: Economics 120, 150, 151; Geography 102, 151; Political Science 110.

These general education requirements were adopted in 1966 and are required of undergraduate students entering the University, or becoming classified undergraduates, after June 1, 1966. Students who registered as classified undergraduates before that date may elect to complete their baccalaureate programs either under the newer requirements or those in effect before 1966.

Credit and Grade-Point Requirements. Minimum credit requirements for baccalaureate degrees are set by each college offering them. In addition, the student must have earned at least twice as many grade points as his total registered credits, i.e., have a C average.

Residence Requirements. Baccalaureate degrees are granted only those students who earn a minimum of 30 semester hours in residence (that is, in class or laboratory work) at the University of Hawaii.

Degree candidates must be registered and in attendance during the semester or summer session in which the degree is to be granted. A college dean may modify this requirement, in exceptional cases, by granting a leave of absence.

Time Within Which Work Must Be Completed. The normal expectation is that students will complete their academic work in a ten-year period. Credits earned more than ten years before graduation in courses which have materially changed content or standards will be denied.
Special Instructional Programs

Honors Programs

Selected Studies (lower division). The Selected Studies Program provides a group of academically promising freshmen and sophomores with an opportunity to use the University's facilities and resources more fully than usual. Each student has a faculty adviser to assist him to plan his curriculum and within certain limits to tailor it to his special interests and abilities. Special courses are available in history, in the physical and the social sciences, in the humanities, etc.; moreover, there are special sections reserved in basic freshman and sophomore courses in economics, English, languages, mathematics, music, philosophy, political science and many others.

Admission to the program is by invitation to freshmen and sophomores whose high school records and aptitude test scores, or whose recommendations from University faculty, indicate they have the qualities needed to profit from the opportunity.

Honors (upper division). Honors degrees may be granted only to participants in the University Honors Program. Successful completion of a program of honors work in the upperclass years entitles the student to a bachelor's degree with "honors," "high honors" or "highest honors." Application for admission to the program may be made by any regularly registered undergraduate at the end of his sophomore year or during his junior year.

During the junior year the nature of honors work is determined chiefly by the University department or curriculum in which the student is enrolled as a major. In the second half of his junior year and the first half of his senior year he participates in an interdisciplinary colloquium. In his senior year, with the guidance of a specialist in his field, he pursues a program of independent research that culminates in a senior thesis.

Full information about both programs may be obtained from the Coordinator of Undergraduate Honors Programs in Sinclair Library.

Academic Commendation. Seniors who have a grade-point ratio of 3.4 or above but who have not completed the Honors Program will receive their degree "with academic commendation." At least 60 semester hours of this undergraduate work must have been taken at the University of Hawaii within six years prior to graduation.

English Language Institute

For ELI course descriptions see "College of Arts and Sciences."

The University of Hawaii has established the English Language Institute (ELI) as its agency for assuring that the English proficiency of its foreign students is adequate for University coursework. ELI responsibilities include testing and evaluating the English of all new foreign students, and providing suitable instruction for those students whose English fails to meet standards determined by the University to be sufficient for the pursuit of full-time studies.

Testing and Evaluation. Upon arrival at the University, all foreign students are referred to ELI for evaluation of their English proficiency. Registration for University coursework is not permitted until this evaluation has been made.

Exemption from ELI. Following ELI's evaluation of their English proficiency, the following foreign students are exempted from ELI training: (a) those whose native language is English; (b) those who hold a degree from an American college or university; (c) those whose English meets the University's standards for full-time study.

Assignment to ELI Courses. All foreign students not exempted on the basis of their entrance proficiency testing are assigned to an appropriate program of ELI instruction. Because of their special purpose, ELI courses take precedence over all other coursework. They may not be postponed to a subsequent semester, nor may they be dropped or taken with auditor status. Students who fail to comply with ELI assignments may be denied further registration at the University.

Relationship of ELI Assignments to Other Coursework. Students assigned to ELI training take a reduced academic load, in order to devote sufficient attention to gaining satisfactory English competence. Students required to take relatively large amounts of ELI work during their first and second semesters must expect to make proportionately slower progress in their regular University studies. This is an especially important factor in some graduate programs, and should be carefully considered by all foreign students whose time or financial support is limited.

Eligibility for Registration in ELI. Registration for ELI courses is limited to students who have been officially admitted to the University. Students who apply to the University for the sole purpose of entering ELI in order to improve their English will not be accepted.

Reserve Officers Training Corps

For course descriptions see "College of Arts and Sciences" where "Aerospace Studies" and "Military Science" are listed in alphabetical order.

Army and Air Force ROTC units at the University offer programs leading to regular or reserve commissions in the U.S. Army and Air Force upon completion of the baccalaureate degree requirements.

Military Science

The four-year Military Science program consists of on-campus training during the four semesters of the freshman (MS I) and the sophomore (MS II) years and is referred to as the basic course. Students who have participated in Junior Division ROTC or who have had active military service of more than four months may be exempt from a portion or all of the basic course. The advanced course consists of on-campus training throughout the junior (MS III) and senior (MS IV) years, plus a six-week summer camp between the junior and senior years at a mainland military installation. Subsistence pay of $50.00 per month is paid to students in the advanced course during the school year, and pay for the summer camp is at the rate of $160.50 per month. Training in the advanced course is selective, and successful completion of the training leads to a regular or reserve commission as a second lieutenant in the U.S. Army. To be eligible for the advanced training under the four-year program a student must: (1) Be a citizen of the United States. (2) Be selected for the advanced course under procedures prescribed by the professor of military science. (3) Successfully complete the first two years (basic course) of a Senior Reserve Officers Training Corps course or the equivalent, as explained above.

The two-year program is essentially the same as above except that credit for the two-year basic course is gained by attendance and successful completion of a six-week summer camp at a mainland military installation prior to entry into the advanced course. Students interested in this program must have four semesters of college work remaining after completion of the summer camp and must apply for selection early in the spring semester of the year in which they plan to attend the basic summer camp. Pay for the summer camp is at the rate of $95.70 per month.

The Army Flight Training program is offered to qualified students in their senior year of the ROTC program.

Financial assistance scholarships are available on both a four-year and a two-year basis. The scholarships provide payment for tuition fees, cost of books, laboratory expenses and $50.00 per month subsistence pay for the period of the scholarship. Applicants for the four-year scholarship normally apply during their senior year in high school. Applicants for the two-year scholarships apply during the second semester of their sophomore year at the University. Completion of the basic course is a prerequisite for the receipt of the two-year scholarship. For further information, inquire at the Department of Military Science.
Aerospace Studies

The Air Force ROTC prepares selected college students for duty as professional Air Force officers. Upon successful completion of the program and receipt of a degree, the student must accept a commission and serve on active duty for at least four years. If he completes pilot or navigator training, he must serve five years.

Under the two-year program the student receives general military training during a six-week course at an Air Force base prior to his junior year. He must apply for this program by January 1 of his sophomore year.

All cadets accepted for the professional officers course receive $50.00 per month retainer pay. In addition they are paid while attending either the field training course or the summer training unit. A limited number of financial assistance scholarships are available for those in the four-year program, covering tuition, fees, books, plus $50.00 per month for the full four years. Competitive examinations will be used to select these students.
Residential Learning Project

Freshmen students may apply for participation in a co-educational program of instruction conducted in Johnson Residence Hall. The program includes some of the courses offered in the University's general education core, plus academic advising and co-curricular activities. Approximately 200 students plus six faculty members, who have offices in the project, form the community. Persons interested in learning more about the project should inquire at the College of Arts and Sciences, Office of the Associate Dean for Student Services.

Russian Area Studies Certificate

A certificate in Russian Studies, signifying the completion of certain requirements in addition to a regular major, is offered by the Committee on Russian Studies of the University.

The certificate is awarded upon graduation to a student who completes advanced reading and conversation courses in the Russian language equivalent to at least third-level work and 9 credits of non-introductory course work, exclusive of courses taken as part of the major, chosen from the offerings listed below.

Tutoring

A tutoring service, called KOKUA, is maintained by the University to assist undergraduate students who need special, but temporary, assistance in a particular subject. Normally, students are referred to KOKUA by an academic adviser or by an instructor. Self-referrals are also accepted.

Services to Handicapped Students

Students who will need special assistance because of physical handicaps should apply, as early as possible, to the KOKUA office. KOKUA provides student aides, help with registration, readers for the blind and other help to students who need special assistance in order to attend classes.
THE PROGRAMS OF THE COLLEGE OF ARTS AND SCIENCES are designed in the conviction that liberally educated persons must have a comprehensive knowledge of the major fields of learning—a general education—and an intensive knowledge of a particular field of the humanities, the social sciences, or the natural sciences.

In general education the College seeks to develop in students:

- an appreciation of our diverse cultural heritage and its relation to everyday life,
- criteria for the assessment of values in different kinds of society and the world community,
- aesthetic standards and a sense of the self-transcending power of beauty,
- a knowledge of themselves and their environment from a humanistic and scientific point of view,
- the ability to make sound judgments on disputed matters,
- an understanding of the interdependence of general and specialized education,
- a desire for continuing intellectual growth.

After a year or two of general education, a student undertakes a program of study offered by the College in a major field of concentration in the humanities, the social sciences, or the natural sciences; or he transfers to a program of another college of the University—e.g., Health Sciences, Education, or Business.

Because of its geographical position midway between continental America and Asia, the College is unusually conscious of the importance of the Far East; unique opportunities are provided for the study of the history, languages, literature, art, institutions and philosophies of the countries and peoples of this area.

Admission and Degree Requirements

Admission requirements for the College are the same as those for the University (pp. 36-40). However, candidates for admission are strongly advised, although not required, to offer a minimum of two years of college preparatory mathematics and three years of a foreign language.
To be entitled to a bachelor's degree offered by the College, a student must:

1. Complete certain basic subjects specified by his degree program.
2. Fulfill the prescribed requirements of a major field of concentration.
3. Offer at least 60 semester hours of credit in other than introductory courses.
4. Acquire an aggregate of 124 semester hours of credit, of which no more than 20 hours is acceptable in subjects not offered within the College.
5. Earn at least a 2.0 grade-point ratio (C average) for all registered credits, and in the major field.
6. Submit an application for graduation to the Office of Admissions and Records during the semester preceding the award of the degree.

No course will satisfy more than one kind of requirement (basic or area).

Exemption by examination is possible in expository writing, speech, and foreign language by applying to the appropriate departments. The speech requirement is waived for students who have a one year course in high school in extemporaneous public speaking or debate with a grade of B or better. Credit by examination can be obtained in any course offered in the College which is required in a student's curriculum; it carries a corresponding reduction in the 124 hours required for graduation.

The dean of the College may exercise his discretion in modifying some of these requirements in exceptional cases after consultation with the graduation committee.

Curricula

Each program leading to the bachelor's degree is built around a major field of concentration—the major—which consists of a specific number of credits (not to exceed 40 in any one subject) and required courses in a particular field or discipline, together with related courses (usually upper division) in other subjects which are associated with and contribute to that discipline.

The major must be indicated by the beginning of the third year. For certain preprofessional programs, such as prearchitecture, predentistry, pre-medicine, and prepharmacy; and for the bachelor of fine arts, bachelor of music, and bachelor of science degree programs, it should be indicated at the beginning of the first year.

Students seeking baccalaureate degrees in medical technology, professional nursing, or education must complete the entrance requirements of the program they wish to enter and transfer, ordinarily as juniors, to the College of Health Sciences and Social Welfare, or the College of Education. To be eligible for admission to any of these programs, a student must have completed a minimum of 60 credit hours of study, including the general education requirements of the University (pp. 49–51) and certain specified courses.
Academic Advising

Assistance in planning academic goals and curricula, and help and advice on a wide range of general or personal problems are available at the Student Services office of the College. Advisers are faculty members specially trained and oriented to assist students in selecting and achieving their academic goals.

The service mentioned above applies to freshmen and sophomores. When the student has completed 55 credits (junior standing), he is required to select a major field, at which time his records are transferred to his major department and he is assigned an adviser from that department's faculty. In addition to their departmental adviser, juniors and seniors may still call on the Student Services office for any special assistance.

If the student does not have a high school course equivalent to Math 134 (Pre-Calculus), he may take this course at the University during a prior summer session. Otherwise Math 134 must be taken in an alternative first year schedule. He should obtain the recommendations for such a program from the appropriate departmental adviser before registering.

Preprofessional Programs

By careful planning, students in the College can prepare themselves adequately for admission to professional and graduate schools. This is especially true in view of the increasing emphasis placed upon a liberal arts background by most of the professions.

In planning a program, the recommendations of the appropriate national professional organizations should be followed. In addition, when the student

* May be replaced by Physics 160-161, by recommendation of instructor and with departmental approval, by those students who are transferring to a physics major program.
has selected the professional school he desires to enter, he should elect courses to fulfill the specific requirements of that school.

The College maintains a Pre-Medical Sciences Committee prepared to give specific aid to students preparing for schools of dentistry, medicine, veterinary medicine, pharmacy, or public health.

Information regarding the scholastic requirements of the other professions, such as law, is available at the office of the dean of the College and at the Counseling and Testing Center.

**Premedical Curriculum**

The following is based upon the general admission requirements of medical schools. The majority of schools, however, require the entering student to have a bachelor's degree, as well.

- **Biology**: Biology 220, Zoology 202 (general), 320 (vertebrate), and 420 (embryology).
- **Chemistry**: Chemistry 113, 115, 114, 116 (general), 243, 245, 244, and 246 (organic), 133 and 134 (quantitative).
- **Physics**: Physics 160 and 161 (general).
- **Mathematics**: Mathematics 205 and 206 (calculus).
- **Desirable electives**: Physical chemistry, statistics and genetics.

It is recommended that premedical students obtain the book entitled *Admission Requirements of American Medical Colleges* ($4.00; address: AAMC, Dept. 3B, 2530 Ridge Ave., Evanston, Illinois 60201) for detailed information on individual medical schools and their admission policies.

Requirements of dental schools are similar to those of medical schools, with the exception that more do not require a bachelor's degree. For details see *Admissions Requirements of American Dental Schools* ($2.00; address: AADS, 211 East Chicago Avenue, Chicago, Illinois 60611).

Schools of pharmacy usually require for admission one year of college study. This must include courses in English, chemistry, zoology, botany, trigonometry, and algebra.

Catalogues of individual schools of medicine, dentistry, veterinary medicine, and pharmacy with more specific admission requirements and information may be found in Sinclair Library. Interviews with the premedical adviser throughout the program are recommended.

A School of Travel Industry Management and three academic departments comprise the College of Business Administration, located in Hawaii Hall. The departments are accounting and finance, business economics and statistics, and management, marketing and industrial relations.
THE COLLEGE OF BUSINESS ADMINISTRATION was founded in 1949 and accredited by the American Association of College Schools of Business in 1967. The function of the College is to prepare students for business leadership in Hawaii and the Pacific area. Students are provided with a solid foundation, both theoretical and practical, in the structures, functions and objectives of business enterprise. The four-year program leads to the Bachelor of Business Administration degree.

As part of the Business Administration program, the student will complete a broad foundation of courses in liberal arts, humanities, and physical and social sciences which serves as a base for an economics minor, a core of basic business subjects, and a specialized field of business activity selected by the individual student.

Juniors and seniors in the College of Business Administration will complete additional general requirements. Each student will select one of the following specializations: accounting, finance, business economics and statistics, foreign trade, insurance, management, marketing, personnel and industrial relations, and real estate. The School of Travel Industry Management offers a special program; students entering the University as freshmen should indicate their wish to enter this program.

Academic advising and career counseling in business are available in the College to all students interested in these services. This includes students presently enrolled in the College and students in other colleges. All faculty members are available for career counseling during office hours or by appointment. Academic advising and career counseling are available in the office of the assistant dean of the College except for students in the School of Travel Industry Management, who receive these services in the office of the assistant dean of the School of TIM.

Admission and Degree Requirements

Students may enter the College of Business Administration as freshmen in accordance with the University of Hawaii requirements, or may transfer into the College of Business Administration at any time in their college career from another college in the University of Hawaii, or as transfer students from another institution if they have a 2.0 grade-point average.

SCHOOL OF TRAVEL INDUSTRY MANAGEMENT

Created by action of the board of regents in May 1967, the School of Travel Industry Management in the College of Business Administration of the University of Hawaii is unique throughout the entire world. Administratively, the specific requirements for a student who wishes to graduate from the School of Travel Industry Management are: (a) Internship—direct paid-work-experience each year for four years (200 hours each, or a total of 800 hours) to orient the student to a succession of increasingly sophisticated exposures that will make the more theoretical approaches of the classroom take on greater relevance; (b) the General University Requirements plus the lower-division business requirements; (c) the College of Business core requirements (Group I, Group II); 12 credit hours of upper division courses including 6 credit hours outside the College, except that food service administration courses indicated may be substitutes for 9 of the required 12 credit hours of upper division courses including the 6 credit hours outside of the College; Group III courses are the special "major" requirements for TIM, and represent a total of 23 credit hours which apply to each student regardless of which of the three "areas of emphasis" is selected. Total minimum credit hours in this program are: 2 in Internship; 48–49 in the general University core; 6 in special lower-division business requirements; 39–42 depending on number of food service administration courses in the selected area of emphasis; and 23 credit hours in each area.
The hotel management, food service management, and tourism administration areas are the three from which the student may choose. The composition of each of these areas is indicated in the chart below, while any one of them assures that the student has some exposure to each of the others. The nature of the industry will demand knowledge in all of these areas, although our programs provide opportunities for extra attention to one or another for those who have a preference.

University elementary and high schools provide practical experience for students in the College of Education. The College's upper division program leads to a bachelor's degree and then a five-year certificate.
College of Education

The College of Education was established as the Teachers College of the University of Hawaii in September 1931, by Act of the 1931 Legislature of the Territory of Hawaii. The Act merged the Territorial Normal School, then preparing elementary school teachers, with the School of Education in the University, then charged with preparing secondary school teachers, into a single teachers college.

Today the College of Education is an upper-division college and graduate professional school. The major role of the College is the preservice preparation of teachers. A five-year program is available for both elementary and secondary school teacher candidates. Upon completion of two years of study as pre-education majors in the College of Arts and Sciences, candidates are admitted as either elementary education or secondary education majors to pursue three more years of planned course work and student teaching. A Bachelor of Education (B.Ed.) degree is conferred at the end of four years of work, and the state Department of Education (DOE) grants the Provisional Teacher's Certificate. The fifth year may be pursued in full-time study or part-time in conjunction with teaching. At the completion of the full five-year program, a Five-Year Diploma or a Master of Education degree for those who qualify and enter that program is conferred, and the state Department of Education grants the Professional Teacher's Certificate. Holders of baccalaureate degrees in fields other than Education may earn a state of Hawaii Department of Education Professional Teacher's Certificate through one year (usually more time is needed to make up deficiencies) of work in the Classified Professional Certificate Program (CPC).

Undergraduate work leading to a Bachelor of Science degree in recreation is also offered in the College, and substantive service courses are provided in the areas of health, physical education, business education, and industrial arts.

The College currently offers Master of Education degrees in educational administration, educational communications, educational foundations, elementary education, secondary education, and the M.Ed. and Ph.D. in educational psychology. Information concerning these programs can be obtained from the Graduate Division of the University and from the departments offering the various programs.

Research and development and community service are two other very important aspects of the College's functions. The College provides professional leadership and service to projects in the Pacific islands and Southeast Asia. As the only state-supported teacher education institution in Hawaii, the College,
particularly its research and development centers, has responsibility for leading
the advance of education in the state through research studies on the learning
process and curriculum development of new materials and methods for teaching.

**Admission Requirements**

The College of Education admits students who have junior standing or
higher. Applicants pursuing all programs except those leading to the M.Ed. and
the Ph.D. degrees must arrange a personal interview with the staff of the Col­
lege of Education division of student services. Additional interviews will be
arranged with the department of health and physical education for prospective
candidates for the B.S. degree in recreation, and with the department of cur­
riculum and instruction for students intending to complete the five-year pre­
service teacher education program with its B.Ed. degree and Five-Year Diploma
or the one-year Classified Professional Certificate program. Specific program
requirements are available from the respective departments.

In addition to the University requirements listed on pages 36-40, students
entering the College are required:

College of Engineering

PROFESSIONAL EDUCATION IN ENGINEERING has been a function of the University of Hawaii since its beginning in 1907. For the first fifty years of the institution civil engineering was the only engineering program offered. But in recent years other disciplines have been added. The curriculum in civil engineering was fully accredited by the Engineers' Council for Professional Development in 1951, electrical engineering in 1962, and mechanical engineering in 1967.

The program of study leading to an engineering degree provides a well-rounded university education designed to develop the general qualities of leadership and human understanding inherent to an educated person. In addition, it equips the engineering graduate with a sound theoretical background to meet the new and demanding problems of a rapidly expanding technology. Career opportunities in engineering, both in Hawaii and throughout the world, have never been brighter. The graduate of the engineering programs offered at the University of Hawaii is well-prepared to meet the challenges of our technology-oriented society.

Admission and Degree Requirements

General admission requirements of the University and recommended courses for prospective engineering students are listed on pp. 36–40. Additional screening of aptitude tests and high school records may be made for acceptance into the College of Engineering.

The average engineering student, both at the University of Hawaii and nationally, requires more than eight semesters to receive an accredited engineering degree, even though all engineering curricula are listed in this catalog for completion on an eight-semester basis. Engineering students are encouraged to investigate the possibility of summer course work, particularly after the freshman and sophomore years, both for required courses and to satisfy the general education elective requirements.

In determining a student's draft status, the normal length of time for the completion of an engineering degree, established by the University and acceptable to the Selective Service System of the State of Hawaii, is four and one-half years. Therefore, an engineering student is eligible to qualify for a II-S deferment for the entire four and a half-year period, if he is satisfactorily pursuing a full-time course of study.

To receive the bachelor of science degree in engineering a student must:

1. Complete the course work for one of the engineering curricula, which also satisfies all University requirements;
2. have a 2.0 grade-point ratio for all registered credits;
3. have a 2.0 grade-point ratio for all upper division courses in the major department.
Curricula

The College of Engineering offers accredited undergraduate programs in civil, electrical, and mechanical engineering, as well as a business-oriented curriculum in general engineering. The course work in each of these programs provides a fundamental science-oriented university education with adequate coverage of communications, the humanities and social sciences; the basic physical sciences of mathematics, physics and chemistry; the engineering sciences common to all engineering disciplines, such as thermodynamics and electricity; and engineering elective courses which introduce the student to the engineering method of design.

The first year is common to all four curricula and includes the following courses:

At the beginning, or during, the sophomore year the engineering student selects the field of study in which he wishes to receive his degree, and pursues one of the curricula listed on the following four pages. The course work for each of these programs of study satisfies the general educational requirements of the University.

Those engineering students who are unusually well qualified academically are encouraged to participate in the Selected Studies and Honors Program. (See "Special Programs.") There is an honors coordinator for the College of Engineering, who works with the faculty adviser of the honor student to assure that a challenging program of study is established. Upon recommendation of the coordinator, the honor student is allowed some flexibility in course selection from the curricula that follow.

* Math 134 may be required if math preparation is inadequate.
† If prerequisite for Chem 117 has not been met, 113-115 (103) and 114-116 (104) will be substituted.
‡ GE 61 is required of students who have not had one year of high school mechanical drawing.

Ocean Engineering

The University of Hawaii is one of the first schools in the United States to offer a degree in ocean engineering, which is defined as the application of engineering principles and techniques to the ocean environment. The current program is an interdisciplinary one at the Master of Science level, and involves the departments of oceanography as well as civil, electrical, and mechanical engineering. Graduate students in this program must have received a B.S. degree in engineering, or in a related science with engineering prerequisites. Specific information regarding ocean engineering and additional graduate activity to the doctoral level in other engineering disciplines may be found in the University of Hawaii Graduate Division Bulletin.

Center for Engineering Research

The purpose of the Center for Engineering Research is to promote and coordinate research activity within the College of Engineering. Current areas of research interests are in structural engineering, water resources, coastal engineering, waste-water treatment and disposal, theoretical mechanics, heat transfer, information theory, microwaves and atmosphere ionization. The center cooperates with other University agencies such as the Hawaii Institute of Geophysics, the Water Resources Research Center and the Pacific Biomedical Research Center, to bring the full resources of the University to bear on multidisciplinary research projects.

The James Look Laboratory of Oceanographic Engineering is one of the major research facilities of the Center for Engineering Research. This facility is the first structure of the Kewalo Oceanographic Research Center, and permits research activity that has direct bearing on many ocean-related problems occurring throughout the state of Hawaii. A partial list of current and planned research with this facility includes the following: tsunami wave action on harbor installations; undersea structures; harbor pollution studies; beach erosion; small-craft harbor design.

Evening classes on the Manoa campus, at military bases, and in rural areas form part of the University’s continuing education program. Both credit and non-credit courses are offered throughout the year.
The College of General Studies, established in 1956, is primarily concerned with meeting the continuing education needs of individuals and groups in the state. Programs designed for this purpose include conferences, institutes, informal courses, lyceums, lectures, and educational experiences designed for particular purposes or groups. These continuing education programs are available to all interested adults.

The College also provides educational opportunities for students who cannot because of time or distance attend courses regularly scheduled on campus. Degree credit courses for these persons are scheduled in the evening on campus and at various other places and times on Oahu and the other islands. Such courses are open to all students who have been regularly admitted to the University.

In addition the College administers the academic affairs of students who have been admitted to the University, but are not candidates for a degree at this institution. These students may attend full or part time in the day or evening. Inasmuch as they have no required program of study, such students have great latitude in the selection of their courses. They must, however, comply with other requirements and regulations of the University and must have completed any prerequisites required for the courses they choose.

Credit Courses. A group of basic courses, including the general education courses required by all degree curricula, are offered both on and off campus. Advanced courses are offered when needed by a substantial number of evening students. Admission is governed by general University requirements, and regular residence credit is given, including graduate credit where applicable.

On-campus accelerated evening courses are scheduled four times a year. Off-campus accelerated programs are also offered four times a year at Fort Shafter, Hickam Air Force Base, Kaneohe MCAS, Pearl Harbor, Schofield Centers, Tripler Army Hospital, Waipahu, Wheeler Air Force Base, and other off-campus locations. Courses are also taught on Hawaii, Maui, Kauai, Molokai, and Lanai, either by faculty members commuting from the Manoa campus or by other qualified personnel. Schedules for off-campus courses are arranged to fit the needs of students when such adjustments are academically acceptable.

In addition to its program within the state, the College operates overseas centers at Kwajalein and Midway. Selected courses for credit are given in an effort to meet the needs of personnel, both military and civilian, stationed in these areas.
Non-Credit Courses. Short courses covering selected college-level material in art, business, English, engineering, foreign languages, mathematics, general culture and other subjects are offered on and off campus. These and other special courses are offered when needed to provide training in specific professional or vocational areas, to prepare candidates for professional licensing examinations or to assist with special local problems. Non-credit courses are generally scheduled in the evening.

Sessions begin in January, April, July, and October. Any person with the equivalent of a high school education who can profit from these courses may enroll. Students who regularly attend receive certificates upon completion of their course of study.

Program for Afloat College Education. The PACE Program is currently offering Polaris submarine personnel the opportunity to further their formal education while serving aboard submarines. The program consists of lower division University courses taught by regular faculty. The program is unique in that the courses are conducted both in a classroom setting at Pearl Harbor and on submarines at sea.

Special and Professional Programs was organized in 1967 to integrate a wide range of non-credit university level continuing education programs. These include the Conference Center, Civil Defense Training, Labor-Management Education, and sequential programs for professional in-service education. Also included are experimental programs in Women’s Continuing Education, Public Issues Discussions, and Education for Aging.

The Conference Center was established in the College in 1961. Its program serves the College itself as well as community groups and University departments by providing planning and administrative services for conference, institute, and workshop programs. The staff works closely with University departments and with both public and private organizations on all levels of continuing education activity in the state. In coordinating University resources with community needs, reliance is placed particularly on the advice and working cooperation of interested departments and divisions.

Institutes, workshops, and conferences are also initiated and presented where need is evident and resources are available. Such programs are developed with the advice and assistance of individuals and groups in the University and the community.

Services include assistance in planning; preparation and administration of budgets; procurement of resource persons; arrangement of travel, living accommodations and facilities, including related services; preparation of final financial and proceedings reports. Flexible scheduling of activities makes it possible to accommodate requests as they arise.

Civil Defense Training Program. Under contract with the Department of Defense, the College offers courses to train Shelter Management and Radiological Monitor instructors. Additional courses offered are Radiological Defense
Officer, Civil Defense Management, Shelter Management, and Emergency Operating Center Simulation Workshops. The program is also responsible for conducting conferences in civil defense for business and industry. Courses and conferences are offered on Oahu, Hawaii, Kauai, and Maui.

Labor-Management Education Program. The objectives of this program are to provide basic leadership training for those associated with management and labor, to the end that there shall be (1) understanding by both groups of the fundamental problems of mutual interest with which they must deal; (2) knowledge of the factors which are essential to productive relations between them; and (3) appreciation of the public's interest in the satisfactory solution of their common problems.

The program offers a number of general courses primarily designed for persons who are engaged in a leadership capacity in the unions, and in a supervisory capacity for management. Special courses are conducted for union and management personnel separately. These are planned with participating organizations and limited to the persons designated by those organizations.

The program also conducts or participates in staff training programs, conferences, and weekend institutes dealing with industrial relations and labor problems.

Lyceum and Speakers' Bureau. The Lyceum program of the College presents an annual series of lectures, dance, drama, literary and musical events using both local and imported talent. This series is presented throughout the state.

The Speakers' Bureau provides single lecturers and plans lecture series for both civilian and military organizations. A $10 fee is charged for this service. A file of available lecturers is compiled yearly.

Television broadcasts are sponsored by the College as part of its on-going education responsibility to the community.

Manuscript Criticism Service. Writers of fiction, non-fiction, poetry, and drama may submit manuscripts for professional opinion and advice of qualified faculty members. Reading fees are available on request.

Announcements and other information concerning these varied programs will be made available by the College of General Studies upon request.
An international program in medical technology, the Newborn Psychology Research Laboratory, and facilities in public health illustrate some of the programs of the College of Health Sciences and Social Welfare.
The College of Health Sciences and Social Welfare provides educational programs and fosters research in the health fields of medicine, public health, nursing, and social work.

The School of Medicine carries students through the first two years in medicine, after which two further years in a mainland school lead to the M.D. degree; or, alternately, may lead to an advanced degree in a basic medical science, or in public health.

The School of Public Health offers programs leading to the M.P.H. or M.S. degrees.

The School of Nursing prepares students in professional nursing, technical nursing, and dental hygiene. The programs in dental hygiene and in technical nursing are lower division programs; that in professional nursing includes an upper division program leading to the B.S. degree, and a graduate program for specialization in mental health–psychiatric nursing, community health nursing, and administration of organized nursing services leading to the M.S. degree.

The School of Social Work offers a two-year graduate program leading to the M.S.W. degree. The School also offers courses on the undergraduate and preprofessional levels for juniors and seniors.

SCHOOL OF MEDICINE

The School of Medicine was created in 1965 as increased interest developed in health education and research in Hawaii and the Pacific area. Provisional accreditation was granted in 1965 and the first class of 27 students was admitted in September, 1967.

Admission and Degree Requirements

A. Medical Students

"Medicine has 1,000 doors," some for skillful clinicians, some for teachers and researchers; some for those who wish to work with people, some for those who wish to work with figures, chemicals, or animals; some for those who wish to work at home and some for those who want to work in the international scene. The School seeks students with various talents and interests, and a serious attempt is made to recognize and foster these special qualities.
Applicants to the School of Medicine for the curriculum in medicine must have completed at least three years (about 90 semester units) of college work. Preference will be given those who possess a bachelor's degree. Students at the University of Hawaii will commonly have a bachelor's degree in biological sciences, but the degree may be in any field. An effort toward breadth of learning, both in the humanities and in the sciences, should be made.

The following specific work is required for entry into the Medical School:

**Special Requirements for Admission to the School of Medicine**

**Biology:** at least 10 units; work through comparative anatomy, embryology, and the fundamentals of genetics is desirable.

**Chemistry:** at least 16 units, including quantitative analysis and organic chemistry. Organic chemistry laboratory and physical chemistry are desirable.

**Physics:** at least 8 units.

**Mathematics:** work through one year of calculus, and elementary statistics.

**Medical College Admission Test (MCAT):** required of all medical applicants.

The first year class is limited to 25 students. Preliminary applications are due October 1 and formal applications and supporting papers must be received before December 1 for consideration for admission the following September.

Correspondence regarding admission should be directed to: Admissions Office, University of Hawaii School of Medicine, 3675 Kilauea Avenue, Honolulu, Hawaii 96816.

**B. Non-medical students**

Applicants to the School of Medicine for B.S., M.S., or Ph.D. degrees should fulfill the requirements as noted for the specific disciplines, for instance, biochemical technology.

Application for admission to any of the departments of the School of Medicine as a candidate for a master's degree or doctor's degree in a specific discipline should be directed to the Dean of the Graduate Division; for a bachelor's degree it should be directed to the admissions office noted above.

**Curriculum for Medical Students**

Medical students will follow a two-year curriculum designed to make transfer possible at the end of the second year to the junior class of any mainland medical school. Elective time is provided in both years to allow development of special interests.

Provision is made for a limited number of students who wish to take the work spread over a three-year period, or longer. For further information, see *Bulletin of the School of Medicine.*

Medical Technology Division

Assistant Professor BHAGAVAN; Instructors KAGAWA, SONODA, TAYLOR, WULFF

Two programs leading to a B.S. degree in medical technology are presently offered. Option I, open to students who enrolled prior to September 1967, consists of three years of a prescribed course on campus, plus one calendar year of internship in an affiliated hospital laboratory for which 28 credits is given, with the degree granted following completion of the interning year. Option II, required of students who enrolled as freshmen in September 1967 or after, offers four academic years on campus with the degree granted before internship. Internship, necessary for registration with the National Registry of Medical Technologists, follows the fourth year in Option II and may be taken in any approved school of medical technology but carries no University of Hawaii credit. Completion of either the 3 + 1 or the 4 + 1 program allows the student to take the examination for certification as a Registered Medical Technologist given by the National Registry of the American Society of Clinical Pathologists.

The first two years of either option are spent in the College of Arts and Sciences but since scheduling of science courses in sequence is most important, a prospective student should designate his major as Med Tech as soon as possible. The School of Medicine administers the last two years and grants the degree.

Students who registered as freshmen before Fall '67 have a choice of either Option I or Option II.
Admission and Degree Requirements

Application for admission to the Medical Technology program in the School of Medicine should be made during the early part of the second semester of the sophomore year. The student should have completed 63 to 66 credits including the following courses:

1. Complete the course of subjects specified in the curriculum of Medical Technology, including 31 hours of the major in Option II and 39 in Option I;
2. offer at least 60 hours of credit in other than introductory courses, meeting the University core requirement;
3. acquire an aggregate of 130 semester hours of credit;
4. earn at least a 2.0 grade point ratio (C average) for all registered courses and a grade of C or higher in each major course;
5. submit an application for graduation to the office of admissions and records during the semester preceding the awarding of the degree.

SCHOOL OF NURSING

The School of Nursing offers programs to prepare students for professional nursing, technical nursing, and dental hygiene. The baccalaureate program in nursing began in September 1952 and the technical nursing program was founded in September 1964. The present two-year program in dental hygiene was inaugurated under the School of Nursing in 1961. The nursing programs are accredited by the Hawaii State Board of Nursing and the National League for Nursing. The dental hygiene program has been granted full approval by the Council on Dental Education of the American Dental Association. A bachelor of science degree is granted for completion of the undergraduate program in professional nursing. An associate of science degree is granted for work completed in the technical nurse program and a certificate is granted for the two-year program in dental hygiene.

A program leading to the master of science in nursing prepares graduates of accredited baccalaureate nursing programs for specialization in mental health-psychiatric nursing, community health nursing, and administration of organized nursing services. (See Graduate Bulletin for further information.)

Admission and Degree Requirements

Applicants for all programs must meet University admission requirements. Further selection is made on the basis of scores on selected tests, quality of high school and/or previous college work and references. Specific requirements for the bachelor of science degree in nursing, associate of science degree in nursing and certificate in dental hygiene are listed below.

Bachelor of Science Degree in Nursing. Complete curriculum requirements and earn at least 140 credits with a grade-point average of at least 2.0 (C) and a grade of C or higher in each major course.

Associate of Science Degree in Nursing. Complete curriculum requirements and earn at least 64 credits with a grade-point ratio of at least 2.0 and C or higher in each major course.

Certificate in Dental Hygiene. Complete curriculum requirements and earn at least 70 credits with a grade-point ratio of 2.0.

Academic Advising

The instructional staff of the School of Nursing and the personnel in the office of student services, Webster 415, are readily available for students to talk about any matter impinging on educational progress.

Although faculty in each of the departments have the primary responsibility for advising students, the actual system varies with each department. In the department of technical nursing each faculty advises those students assigned to her laboratory section at least twice yearly, or as necessary. Dental hygiene freshmen are advised at least twice yearly and sophomores have at least six advisory
conferences yearly with faculty. Each faculty member in the department of professional nursing is assigned four to eight students for the entire period that the student is in the program. As the student progresses from one course to another, faculty responsible for teaching the course also provide advising in conjunction with specific course requirements. Should a student not be able to contact her departmental adviser or because of the specific nature of her problem, she may go to the office of student services, Webster 415.

Professional Nursing Curriculum
Leading to Bachelor of Science in Nursing

The baccalaureate program in nursing offers a foundation in the liberal arts with a major in professional nursing. Its aims are to prepare students for beginning positions in all fields of nursing and to provide a sound basis for graduate study in nursing.

Pre-nursing students enroll in the College of Arts and Sciences and are admitted to the professional nursing curriculum at the end of the sophomore year upon completion of a minimum of 60 credits in the liberal arts, including the following:

Program for Registered Nurses

Registered nurses who have completed the general and pre-nursing requirements listed above with a grade-point average of 2.0 or better may enroll in the professional nurse program. No advanced standing credit will be granted for nursing courses completed in a diploma or associate degree program. However, the University of Hawaii, in common with many other universities, allows students to take the regular University department examinations in courses in which it is deemed the student has had equivalent training. If successful, credit is granted for the course. (See "Credit by Examination.")
Technical Nursing Program
Leading to an Associate of Science Degree in Nursing

This program prepares nurses for staff positions in hospitals, clinics, doctors' offices, and private duty where supervision is provided. Completion of the curriculum requires four academic semesters. The graduate is granted an associate of science degree in nursing by the University and is eligible to take the state examination for licensure as a registered nurse.

SCHOOL OF PUBLIC HEALTH

The School of Public Health, one of 15 accredited schools of public health in the United States, received its accreditation in October 1965. It was established in July 1962 as a department of public health within the Graduate School (now Graduate Division). The School of Public Health is concerned primarily with maintaining and improving the general health of the community, and accordingly, offers graduate programs designed to prepare individuals who will (1) contribute to knowledge in the sciences pertinent to public health, or (2) actually perform public health services in the community, or (3) do both. Courses which give the student an appreciation of the broad field of public health are required, but each student's program may be tailored to emphasize an aspect of public health. Areas of emphasis include biostatistics, comprehensive health planning, environmental sanitation, epidemiology, health services administration, international health, maternal and child health, mental health, mental retardation, population and family planning studies, public health administration, public health education, public health engineering, public health laboratory and public health nutrition. All programs leading to degrees require the following courses: 600 Public Health Organization and Administration I, (Ie) 600 Public Health Organization and Administration II, 655 Public Health Statistics, 681 Environmental Health I, and 663 Principles of Epidemiology.

Admission and Degree Requirements
Leading to the Master of Public Health (M.P.H.) Degree

The M.P.H. degree program is designed to train persons for a variety of careers in the broad field of public health at local, state, national and international levels. In addition to meeting the admission requirements of the Graduate Division, candidates must have earned at least a bachelor's degree in a discipline appropriate to his chosen area of public health in which he plans to be employed. Depending on the candidate's background and interest, an appropriate course of study is prescribed, including courses in related fields, and incorporating the student's selected area of emphasis. Candidates must complete 30 or more semester hours, an essay or report, and suitable field training approved by his program committee. A student must pass a general diagnostic examination on public health before formal admission to candidacy and must pass a final seminar appearance near the completion of his program.

Traditionally, M.P.H. candidates have been largely physicians, dentists, veterinarians or other personnel in the health or related professions with at least three years of experience; for these, the program may be completed in 12 months. The M.P.H. program at the University of Hawaii's School of Public Health is open not only to such experienced personnel but also to students who hold at least a bachelor's degree with a minimum of 18 credit hours in the natural, social and behavioral sciences and who meet the academic requirements of the Graduate Division; for these, the program usually requires up to two years for completion. For further information, see the Bulletin of the School of Public Health.
Admission and Degree Requirements
Leading to the Master of Science (M.S.) Degree

The M.S. program (Plan A and Plan B) is open to persons who meet the admission requirements of the Graduate Division, present at least a minimum of 18 credit hours in the natural, social and behavioral sciences in their undergraduate work, and desire research training in some specific aspect of public health (see above for areas of emphasis in public health). The Plan A program requires 30 or more semester hours including thesis research and, if appropriate, some form of appropriate short-term field work. Plan B requires 30 or more semester hours, an essay or report and field training approved by the program committee and a final seminar appearance. Both programs usually require two years to complete. For complete information, see the Bulletin of the School of Public Health.

College of Tropical Agriculture

The College of Tropical Agriculture prepares students for professional work in the fields of agriculture and home economics. There are three curricula in agriculture: agricultural technology, agricultural economics, and agricultural science. Agricultural technology has two options—general and tropical crop production. Agricultural science has four options—entomology, animal sciences, soil science, and tropical horticulture. Agricultural economics has two options—agricultural economics and agricultural business.

Six curricula are offered in home economics: fashion design and merchandising, general home economics, home economics education, food and nutritional sciences, food service administration, and human development.

All curricula lead to the bachelor of science degree.

The establishment of the College of Agriculture was approved in principle by the board of regents on December 7, 1944. Its name was changed to the College of Tropical Agriculture in February 1960.

The College also includes the Hawaii Agricultural Experiment Station and the Cooperative Extension Service in Agriculture and Home Economics.

Curricula in Home Economics

The home economics program is designed to provide, through the facilities of the department and the University, a liberal education integrating the social and natural sciences, the humanities and the arts, and to provide specialized instruction based upon these disciplines as preparation for professional careers in which the interest and well-being of the individual, the family, and the community are paramount.

As the functions of the family are being shifted increasingly to the larger community, there are expanded opportunities for home economics careers in educational and social agencies, government, business and industry, research laboratories, public and private institutions and services.

In addition, the department offers interdisciplinary courses designed to serve other professional schools and as electives for the general student body.

Admission and Degree Requirements

Admission requirements are the same as those for the University. To be entitled to a bachelor's degree in home economics, a student must:

1. Complete the University's general education requirements;
2. complete, in addition to the general education requirements, 60 hours or more of non-introductory courses;
3. offer the prescribed requirement for home economics courses and courses from related fields under one of the specialized home economics major sequences (may overlap 1 and 2);
4. earn at least a 2.0 grade-point ratio (C average) for all registered credits.

Students may not register in the junior year as a major in Home Economics Education with a grade-point ratio under 2.5.

Graduate work leading to the master's degree is offered in the field of nutrition. Intended candidates must present the following undergraduate preparation: general chemistry, qualitative analysis, quantitative analysis, organic chemistry, biology, general physics, college algebra, trigonometry and an adequate undergraduate preparation in nutrition.

FOOD AND NUTRITIONAL SCIENCES (FN) and FOOD SERVICE ADMINISTRATION (FSA)

The curricula in foods and nutrition and in food service administration lead to careers in teaching, nutrition research, public health, industry, dietetics, institutional management and business. Curricula have been designed to satisfy the requirements of a liberal education along with a core of specialized subjects that provide students with professional knowledge and competence. Liberal subjects enable the individual to understand himself, his environment and the society within which he functions. Specialized subjects provide the tools and measures to improve and create standards and to pursue a meaningful career in the field of his choice.

HOME ECONOMICS EDUCATION (HE)

Students who select an option in this major may choose one of several educational approaches in which a knowledge of family life in our society prepares them for teaching persons of various age levels in different organizations and agencies.

Option I. Preparation to meet certification requirements for teaching home economics in the secondary school.

Option II. Preparation for home economics positions with the cooperative extension service.
Option III. Preparation for positions in consumer services in equipment and foods. Such positions are available in a wide variety of companies. Home economists are employed as representatives for consumer relations and promotion of utilities and manufacturer's products in both foods and home equipment.

Option IV. Preparation for positions in community service organizations.

HUMAN DEVELOPMENT (HD)

Human development is the study of human behavior over the life span in existing life situations. The focus is upon three interrelated types of phenomena: the physical and psychological changes of the human organism, the interpersonal roles and relationships within the family and the operation of the family within the larger social structure. The processes and consequences of the interaction among these components make up the major foci of the field. Students may satisfy degree requirements in human development with emphasis on Child Development and Family and Community Service. The child development option orients the students toward work with preschool children and their parents in group centers. Family and community service orients the students toward adult education, college student personnel, business, and work in various types of community agencies.

Hawaii Agricultural Experiment Station

The facilities of the station, including the research staff, the field laboratory, and the Agricultural Engineering Institute, are available in part for undergraduate and graduate instruction. Students are able to study the latest methods and results of agricultural research. Close collaboration is maintained with the stations of the Hawaiian Sugar Planters' Association and the Pineapple Research Institute of Hawaii.

The function of the station is "to promote scientific investigation and experiments respecting the principles and applications of agricultural science" (Hatch Act of 1887). Investigations cover the physiology of plants and animals;
diseases, insects, and parasites; agronomy, soils, food science, food processing, agricultural engineering, biochemistry, human and animal nutrition; breeding and genetics; as well as other research in culture, production, and marketing.

Facilities for carrying on this work are provided by the headquarters offices and laboratories located on the University campus; by research farms at Paomoho and Waimanalo, Oahu; and by branch stations on the neighbor islands with attached laboratories and experimental farms. These include the Kona Branch Station; the East Hawaii Branch Station with farms at Malama-Ki, Waiakea, Volcano, and Hamakua and Waimea; the Maui Branch Station with the Haleakala Station; the Kauai Branch Station. Modern research facilities for poultry and animals are available at the Animal Research Center at Waialee, Oahu.

Cooperative Extension Service in Agriculture and Home Economics

This program, conducted jointly by the College and the United States Department of Agriculture, is devoted to the advancement of agriculture in Hawaii and to the improvement of family living.

The Cooperative Extension Service maintains personal contacts with the rural population through its field staff of county extension agents and county home economists, with the help of the specialists at the state headquarters on the University campus. The county staff operates out of offices located as follows:

Improved farm and home practices are taught by means of practical demonstrations before University extension clubs of men and women, commodity groups, special interest groups, and 4-H clubs of boys and girls. This group instruction is supplemented by farm and home visits and mass media communications. Each year various extension short courses and 4-H events are held on the University campus.

An important phase of extension work is to demonstrate in a practical manner the results of scientific experiments conducted by the Hawaii Agricultural Experiment Station, by state stations, and by the USDA.
THE GRADUATE DIVISION provides opportunities for further study, research, and professional training to students who have earned a bachelor's degree from an accredited institution of higher learning. The graduate program is not, however, merely an extension of work at the undergraduate level. More rigorous academic standards are applied and a greater degree of independence in the pursuit of knowledge is required. Special emphasis is placed on the cultivation of scholarly attitudes and methods of research.

The University offers graduate work leading to:

School of Library Studies

The Graduate School of Library Studies exists to prepare professional personnel for academic, public, school and special libraries, and to promote library service in general through research and field study. The School was established in 1965 and was accredited by the American Library Association in 1967.

Academic and placement advising is available in the office of the Associate Dean.

Requirements for Admission*

1. Graduation from an approved institution of higher learning with a bachelor's degree representing a broad cultural background plus a field of specialization.

2. Evidence in the college record of above-average scholastic ability and promise for successful graduate study, usually shown by graduation with a B average, or by a Graduate Record Examination Aptitude Test score of 500 in both parts of the test.

3. Ability to read at least one modern foreign language.

4. Evidence of professional promise as shown by reference reports and/or personal interviews.

Students may be admitted to the Graduate School of Library Studies as Regular Students, Probational Students, or Special Students, depending on qualifications, background, and purpose.

Requirements for the Degree. 30 to 36 credit hours of approved graduate study, depending upon previous education and library service, are required for the M.L.S. degree. The maximum course load is 15 credit hours per term, and 36 hours would therefore require two terms and a summer on a full-time basis. The program may be undertaken on a part-time schedule with the expectation that it will normally be completed within a two- to three-year period.

Master of Library Studies Program. The program leading to the degree of Master of Library Studies consists of a core curriculum to provide the basic professional equipment for all types of library work and enough electives to enable each student to explore one area of specialization.

* For application forms or for more information write to: The Graduate School of Library Studies, University of Hawaii, Honolulu, Hawaii 96822.
The normal basic curriculum includes the following courses, to be taken generally in the order given: 610, 601, 605, 678, 647, 602, 650, 615. School librarians, in addition, will take 681, 682, and 683.

Hilo Campus

The University of Hawaii's Hilo Campus is located on Hawaii, "The Big Island," 200 miles southeast of Honolulu. Within a five-minute drive of downtown Hilo, the campus is away from traffic on spacious grounds surrounded by state lands, an atmosphere encouraging quiet and relaxed study. There are magnificent views of Hilo Bay and of the two highest peaks in the Hawaiian Islands—Mauna Loa and Mauna Kea.

Established in 1947 as an Extension Division in Hilo with 46 students, renamed Hilo Branch in 1951, the institution acquired its present campus in 1953 and became the Hilo Campus of the University of Hawaii. Current enrollment is over 700 students.

Academic Program. Courses are grouped into three divisions: Humanities, Sciences, and Social Sciences. The instructional program offers a wide range of freshman and sophomore courses in the College of Arts and Sciences, permitting the student to complete the courses necessary for junior standing upon transfer to the Manoa campus or to the upper division of another university. A few lower division courses in engineering and in tropical agriculture are also offered.

English Language Institute (ELI) courses are offered at Hilo Campus for foreign students as required according to the testing and placement of the institute at Manoa Campus.

The academic year is divided into two 18-week semesters and a 6-week summer session.

Campus buildings and facilities are designed for maximum and varied uses by students, faculty, and community. Recent construction includes the library and a physical science building which houses laboratories, offices, and research facilities for chemistry and physics. The laboratories and offices of the East Hawaii Branch of the Agricultural Experiment Station are on campus; other offices of the Cooperative Extension Service in Hawaii County are at Naalehu, Kealakekua, Honokaa, and Kohala. The Cloud Physics Observatory of the Hawaii Institute of Geophysics was established at the Hilo Campus in 1965.

The library serves students, faculty, and persons in the community with professional research or reference interests. It contains over 40,000 bound volumes, and currently receives 550 serial titles. The library is also a partial depository for United States Government documents. Other library services throughout the state are readily available to students.
A dormitory, completed in 1962, houses 28 women and 24 men students in separate wings off a large central lounge. A new theatre-auditorium is planned for construction.

Center of athletic activity, the gymnasium has folding bleachers which permit a variety of daytime and evening functions. Next to it, the ten-acre athletic field provides for baseball, softball, and tennis courts. A municipal golf course and a swimming pool are available for use by students. Bus service is provided for classes using these facilities. The Hilo Civic Auditorium and Hoolulu Park are also used for some athletic contests.

East-West Center Students. An undergraduate program for East-West Center grantees was initiated in the fall of 1965 with ten students from Laos, Western and American Samoa, Tonga, and Saipan. This program has been expanded to include additional students from Vietnam, Fiji, and Cook Islands.

Other Foreign and Mainland Students. Additionally, there are students from other foreign countries including Japan, Korea, the Philippines, and Norway.

A greater number of mainland students have also enrolled at the Hilo Campus in the past three years.

Community and Professional Services. The Hilo Campus sponsors a number of public lectures and discussions by visiting scholars and officials from the international to the county levels, and a radio program "Hilo Campus Speaks." Faculty members give occasional public lectures and participate in various educational workshops. Students are active in community and educational affairs and have sponsored political forums and a film series.

Hilo Campus works closely with the Historical and Archeological Society, the Department of Education, the Friends and Alumni of Hilo Campus, the American Association of University Women, the American Association of University Professors, the Bernice P. Bishop Museum, and other professional organizations.

Communications. Address all inquiries to: Provost, University of Hawaii Hilo Campus, Hilo, Hawaii 96720.

For revised listing of courses offered at Hilo, see Hilo Campus Catalog for 1968-69, or request semester's class schedule from Provost's office.

Community College System

A STATEWIDE SYSTEM OF COMMUNITY COLLEGES is administered by the University of Hawaii. Authorized by the state legislature in 1964 and commencing operation in 1965, the community college system is comprised of five public community colleges:

Honolulu Community College, originally established in 1920 as the Territorial Trade School, located at 874 Dillingham Boulevard, Honolulu, Hawaii 96817.

Kapiolani Community College, established in 1957 as Kapiolani Technical School, located at 602 Pensacola Street, Honolulu, Hawaii 96814.

Leeward Oahu Community College, scheduled to open in September 1968, occupying a newly developed campus at 96-050 Farrington Highway, Pearl City, Hawaii 96782.

Maui Community College, established in 1931 as Maui Vocational School, located at 310 Kaahumanu Avenue, Kahului, Maui, Hawaii 96732.

Kauai Community College, established in 1943 as the Kauai Vocational School, occupying a temporary campus at Lihue, Kauai, Hawaii 96766.

The several colleges provide occupational, transfer liberal arts and general education. Admission is granted to all high school graduates and other individuals able to profit from the college offerings. Each institution offers a well-developed guidance and counseling program. The associate in arts and the associate in science degrees are granted as are certificates of achievement. Each college has a financial aids program, provisions for student activities, and a student body government. In 1967 the colleges enrolled 3,606 day and 1,799 evening students.

The programs available at the various colleges are listed below. Inquiries should be directed to the registrars of the colleges.

KAPIOLANI COMMUNITY COLLEGE: Accounting, Business Data Processing, Dental Assisting, General Clerical, General Education, Hotel and Food Services, Practical Nursing, Sales and Management, Secretarial, Transfer.

LEEWARD OAHU COMMUNITY COLLEGE: Accounting, General Education, Management, Secretarial, Transfer.

KAUAI COMMUNITY COLLEGE: Accounting, Architectural Drafting, Auto Body Repair and Painting, Auto Mechanics, Carpentry, General Education, Secretarial, Transfer.

THE EAST-WEST CENTER—The Center for Cultural and Technical Interchange between East and West—was established by the U.S. Congress in 1960. The goal of the Center is to further mutual understanding among the peoples of Asia, the Pacific area, and the United States. This goal is the guideline for the operation of the Center's four main divisions: the Institute for Student Interchange, the Institute for Technical Interchange, the Institute of Advanced Projects, and Central Programs.

Institute for Student Interchange

Scholarships. Young men and women possessing a high degree of leadership potential and scholastic ability and giving evidence of real interest in the goals of the Center may qualify for scholarships which provide transportation to and from Honolulu, tuition and books, housing and meals, accident and health insurance, and a monthly incidental allowance. The scholarships may include a field study grant to the mainland United States or Asia. Scholarships are for 9 or 12 months with provisions for extensions for those who qualify.

Scholarships for American and Asia/Pacific students are primarily for graduate study at the University of Hawaii. There are some undergraduate scholarships for those students who come from countries where there are only a limited number of higher educational institutions.

Field Study Grants. The field study grant provides opportunity to study in Asia or the Pacific islands for those American students in good standing who demonstrate their seriousness, maturity, and ability. Generally, students seeking advanced degrees request up to one semester for research purposes or course work in a university. Certain students whose primary goal is language study may be permitted to spend a longer period overseas in recognized full-time Asian language programs.

The U.S. mainland field study grant, for the student in good standing from Asia or the Pacific, provides an opportunity for special study on the mainland United States. This study is usually planned to take place during the summer or fall semester, after two semesters have been spent at the University of Hawaii.

Students on scholarship are expected to participate in intercultural activities as their academic requirements may allow.
Language Requirements. Because the medium of instruction at the University of Hawaii is English, Asian and Pacific student grantees are tested for English proficiency by the University's English Language Institute. Those requiring extra help are assigned to full-time or part-time training in English until they are ready for a full academic program.

American students are required to complete at least two years of Asian language study before the end of their grants.

Asia-America Program. Seminars conducted for East-West Center students by the faculty of the University and staff of the Center are designed as a bridge that will enable Asians and Americans to develop the intercultural understanding recognized as one of the basic functions of the Center. Both groups of students play a vital role in the seminars by providing sources of information and guidance and by their critical and constructive comparisons of the various Asian societies with the variations in culture found in American society. Attendance at the seminars is required as a partial fulfillment of the Center scholarship grant.

The Asia-America Program also offers a film series, a lecture and visual arts program, and other non-academic activities for grantees. A browsing room and library of paperback books are also available.

Institute for Technical Interchange

The Institute for Technical Interchange administers training projects for technical participants from Asia, the Pacific, and the United States. Training, planned on a long and a short term, group or individual basis, is designed to further understanding among nations at the same time technical knowledge is interchanged. Projects may last from 3 to 12 months and subject matter is chosen to fill needs of developing areas. Stress is now being given to training for those Pacific islands which are under the American flag. Current training projects include: medical-nursing education for Pacific medical workers; agricultural and economic development in the Pacific and Asia; educational communications; techniques in teaching English to non-English speaking students; and programs designed to develop skills and to improve the status of women in developing areas. The institute also administers training and job observation in Hawaii for Agency for International Development participants and participants from other private or government agencies.

Institute of Advanced Projects

The Institute of Advanced Projects offers a unique program at the advanced professional level. Aimed at improving understanding and establishing better relations between East and West, the institute serves the Center's purpose in two ways: through exchange of persons and exchange and dissemination of information and scholarly materials.

The Senior Specialists program brings together distinguished persons from Asia, the Pacific area, and the United States for informal seminars, research, and writing.
Research Publications and Translations not only translates scholarly materials from and into Asian languages, but also compiles teaching and research aids, such as bilingual dictionaries and annotated bibliographies. Its programs include the Occasional Papers, IAP Reprints, and IAP Mimeographs.

The institute also administers the Jefferson Fellowships program, a non-degree program of 17 weeks designed for mature journalists and others in the several communications media to pursue, not studies in journalism, but projects of their own choosing available to them from the wide resources of the University of Hawaii and the East-West Center.

Panels of advisers and consultants on substantive matters have been established to aid the program directors in selection of candidates and subject-matter emphases.

Central Programs

Central Programs, which service the entire East-West Center, include Central Administration, East-West Center Library, East-West Center Press, Public Affairs, Conference Program, Community Relations, and the Evaluation and Alumni Liaison office. The East-West Center Library is building an outstanding collection of Asian materials, including books, periodicals, and microfilm, emphasizing national development and cross-cultural relations. The East-West Center Press publishes new books originating within the Center as well as from other institutions throughout the world. It exports American books to Asia and imports Asian books in English. The Public Affairs Office prepares and distributes mass media publicity, exhibits, and other information materials about the Center and its multiple programs. The Community Relations Office coordinates activities of the Center and its grantees with Hawaii’s residents, working with the Friends of the East-West Center (an organization of volunteers). The Conferences and Seminars Program initiates and organizes Center conferences, which invariably are interdisciplinary and multinational, dealing with socio-economic and political problems in Asia and the Pacific. It also funds and sponsors or hosts on a regular basis important international meetings at all levels. It publishes a calendar of meetings and occasional conference proceedings. It also administers the East-West Center Gallery and the Distinguished Speaker series. The Evaluation and Alumni Liaison Office maintains records on participants in East-West Center programs and coordinates studies dealing with program objectives.

GENERAL INFORMATION

The East-West Center complex includes Thomas Jefferson Hall, the administration building which houses 50 offices, a food center, conference rooms, and the Gallery; Hale Manoa, men’s residence; Hale Kuahine, women’s residence; John F. Kennedy Hall, theatre-auditorium; Abraham Lincoln Hall, which houses the Institute of Advanced Projects, the Library and Press. A Japanese garden
is adjacent to the administration building and a traditionally-styled Thai pavilion, dedicated by King Bhumibol Adulyadej in 1967, lies between Jefferson and Lincoln halls.

The East-West Center has an advisory board called the International Panel of Advisers. There is also a National Review Board which advises the U.S. Department of State regarding the East-West Center.
