Hawaiian Gazette Supplement, Dec. 29, 1880.

LATEST FOREIGN NEWS.

By the arrival of the brig John D. Sparckels, we have San Francisco dates to the morning of the 24th inst. We present our readers with the following summary:

San Francisco, November 28th.—An *Inter Ocean* special says: Intelligence is received from Florida to the effect that both seats for Congress will be contested by the Republicans on account of gross frauds at the election, by means of which Democrats were returned.

James Stephenson, in charge of the geological survey of New Mexico, returned to-day. He claims to have discovered another remarkable prehistoric city. It extends for miles, the houses being built in the face of a cliff along a canyon. It is forty miles from Santa Fe.

The President's message is completed, but has not been submitted to the Cabinet. It probably will be on Friday. It is understood that it contains nothing of any ordinary interest, and is barren of suggestions.

The most interesting portion of the President's message, it is said, will be where he elaborately sets forth our relations with England with reference to the fishery question. He shows that since the accession of the Gladstone Ministry the attitude of Great Britain has changed, and that the new Ministry recognizes the claims of American fishermen in Canadian waters. He recommends that the claim for damages, resulting from the Fortunate Bay affair, be referred to a Commission to determine the amount due to the American fishermen. The message shows that the Gladstone Government admits that Canadian legislation must be in accord with the treaty, whereby Americans were granted rights to fish under certain restrictions, on the payment of \$5,000,000, the sum at which the privilege was valued by the Commission under the treaty of Washington, and paid, but in return for which our citizens received nothing under the Disraeli Ministry. The President expresses such confidence in a satisfactory adjustment of the matter that he says there is no further need of pressing the bills pending re-imposing a duty on fish and fish oils. He elaborates the above points, making the subject the most prominent one of his message. In regard to our foreign affairs generally, the message alludes to the successful settlement of the controversy arising from the firing on an American schooner by a Spanish man-of-war last summer, the amicable relations with Mexico, the arrest and conviction by Turkey of the murderers of Doctor Parsons, the Chinese proclamation upon the question of duties, and the unhappy results attending the efforts at negotiation between Chile and Peru.

A fire broke out last night in the barber shop of the House of Representatives, and before it could be extinguished considerable injury was done to the walls and ceiling. The barber shop was located in one of the House cloak-rooms. To-day the architect put men to work repairing the damage. The origin of the fire is not ascertained.

New York, November 29th.—The *Telegram* says: Returns all in from every State show the total Presidential vote to be 3,122,506, divided as follows: Garfield, 4,439,415; Hancock, 4,439,014; Weaver, 505,728; Dow, 3,044; Scattering, 1,793. It will thus be seen that the Republican and Democratic parties are about as evenly divided as is possible to have two great parties. Garfield beats Hancock by only 3,401. Had there been no treachery in the Democratic ranks here, the story would have been quite different.

Wash. November 28th.—Jackson Ferguson, Surveyor of the Census for this State, has completed the returns, though the official figures have not yet been published. He states that the total population of Nevada is within a hundred or two of 60,000, showing a gain over the last census. Instead of a thirty county gain, its present population being between 16,000 and 17,000, an increase of 1,300.

Paragrapies are passing between the United States and the French and German Governments for exchanging opinions relative to the employment of the existing silver coins.

Of the contribution of \$100,000 to the Democratic campaign fund, promised by English, he only paid \$25,000. Lawler only contributed \$5,500 and his brother \$1,500 of \$40,000 pledged.

London, November 29th.—The *Times*' Paris special says: The promotion of the Panama Canal scheme has been assumed with extraordinary vigor. It is a universal, or universal, success as regards enterprise, and capital is certain, and abundant, coming from every quarter of the globe. Mr. De Lesseps told the *Times*' correspondent that news was arriving every moment which confirmed his conviction that the enterprise is insured. Every country in Europe is taking part in it; affairs being opened in Germany, Austria and Italy, and the approaches are flowing in. The English market is showing a decline on the Paris Bourse by several points, which cannot be executed except by paying a premium. The Founders' shares, which were 1,000 francs, have reached nearly 40,000 francs.

Dublin, November 28th.—The *Gazette* contains an offer of £1000 reward for the discovery of the murderers of Wheeler, at Oola.

Wash. November 28th.—A barbarous outrage has been committed near Trade on a bailiff who was in charge of a house from which the tenants had been evicted. A party of armed men broke into the house and slit the bailiff's ears. The bailiff fainted from loss of blood. The police hut has been erected at New Pallas without disturbance.

London, November 28th.—It has been decided that the Government, when Parliament meets, will introduce a Coercion Act at the same time with the new Land Bill Act, and this will provide for the immediate disarming of the people.

There is a movement in the west of Ireland, particularly in Tuam, Scineford and other considerable towns in County Galway, to bring about a reduction of twenty-five per cent in rents of shops and town houses.

Philip Callan, M. P., has been found guilty of libeling A. M. Sullivan, M. P. The verdict was that Mr. Callan published a libel, and that the libel in question was not a fair comment. Justice Hawkins deferred sentence, and bound over Callan to appear on December 15th. He said that the affidavits must be exchanged a week before then, but he hoped that they would meanwhile be rendered unnecessary.

Dublin, November 28th.—A circular has been issued from the office of the Chief Secretary for Ireland to the several Crown solicitors, directing them not to absent themselves more than twenty-four hours at a time from their respective counties without special leave, and to report to Foster all communications of the police in reference to outrages.

At a meeting of the Land League to-day it was stated that several Orangemen were members of the League, and that branches of the League had been established in every county in Ulster.

London, November 28th.—A dispatch from Portsmouth announces that 500 mariners are to go to Ireland.

A dispatch from Tipperary reports that the military detachment, which went to New Pallas, left their guns behind at Limerick. All the troops were withdrawn from New Pallas after the police of the garrison had been tried.

The Government has issued an order to recall the Sixty-fourth Regiment from its station in Ireland, and to meet new exigencies have arisen, it would be necessary the order was countermanded, and the troops will have to remain in Ireland until the end of the year. The Goldstream Guards have been ordered to proceed to Ireland without delay, and their immediate destination has not been ascertained. No other regiment will be sent to Ireland at present.

New York, December 1.—A London dispatch to the *World* says: The League's movements are sanctioned by hundreds of the priests. The attitude of Gladstone and Bright is a practical countenance, if not of the League's methods, at least of their objects. They are blind who do not recognize the Irish movement as a great revolutionary act, and the only one which ever stood any chance of success. Mr. Parnell knows that actual force in a military sense is absurd. He also knows that force of some kind is necessary to achieve the aims of Ireland. If the League is wise and able enough to exercise its power, without provoking a collision, it may, in the opinion of many, dictate its terms, even to England. It took an army to dig Captain Boycott's turnips, yet despite that army Boycott had to leave his home with his family forever. We read that the Goldstream guards are coming, yet 100,000 Saxon soldiers might occupy the country without affecting the situation in the slightest degree. Wholesale evictions might take place, but the soldiers could not stand guard over every evicted farmer, and the farms would be reoccupied as soon as the soldiers left. The armies of the world could not compel the payment of rent, or force men to work for obnoxious fellowmen, or keep shop-keepers from refusing to sell. Coercive acts, a few months ago, would have been effective, but now they will be useless. The people have learned their power too well to be cowed.

A *Herald* Dublin dispatch reads: The winter campaign of the Irish land war has not reached the end of its first stage. The State trials are fixed for December 28th, and the opening of Parliament for January 6th. The Boycott incident is over. Nothing particularly engages the attention of the Land League's power. This power has, within three months, become so overwhelming that I, without fear of contradiction, assert that the reins of Government in Ireland are practically in the hands of Mr. Parnell and his supporters. The Irish leaders have obtained and are extending their rule by means so unique and extraordinary that the most intelligent observer can hardly understand its direct power or comprehend its terrible significance. A general strike against the payment of rent, forcible resistance to those who attempt to force payment, combined opposition to every legal process and intimidation of all persons attempting to carry out the law, crowned by that new and extraordinary engine of force now called "Boycotting," are elements creating an open, armed revolution. The Boycott incident showed what was necessary to resist the Land League. Another incident at New Pallas, County of Limerick, is equally significant. Several days ago an iron hut was taken down to New Pallas for erection on Bourke's farm, but could not be removed on account of the resistance of the people there. It lay until to-day, surrounded night and day by police, who themselves were surrounded by hundreds of people, determined not to allow it to be taken away. The removal of this ridiculous hut became a national question, and a force of 500 troops, including infantry and hussars, and two guns of the royal artillery, were ordered to the scene, and removed the hut at day-break. The people were advised strongly not to come into collision with the overwhelming force, so the hut was quietly removed. The crowd that witnessed the unusual spectacle in the village was largely made up of women and young lads. Without wishing to be an alarmist, I feel certain that the revolution cannot end without bloodshed unless a capitulation be made to the Land League, which is out of the question. The rising may be small and ineffective, but it is considered inevitable by many who are familiar with the state of the country. It is beyond question that the new Land Bill, however extreme, will not satisfy the Land League, and the movement should be considered in all its significance. Without quoting the previous utterances of numerous members of the League Executive Committee, it is only necessary to refer to Mr. Davis' speech at a land meeting to-day that, "it is very important that their friends in the north of Ireland, who were now rapidly wheeling into line, should at once understand that the Land League movement was not a movement for the purpose of bringing rent down to Griffith's valuations. Its object was to remove Griffith's valuations and landlordism out of the country."

St. Petersburg, November 30.—The police at Charkoff have seized several printing presses, together with daggers, revolvers, copies of a revolutionary organ and forged passports, and have arrested two revolutionists.

Rome, November 29.—In the Chamber of Deputies this evening, after several orders of the day had been introduced, Signor Mancini proposed a resolution, signed by twenty members, declaring that the Chamber, desiring to pronounce upon the important reforms which the wants of the country require, passed to the order of the day. Signor Mancini then examined all the questions raised in regard to the policy of the Government, drawing conclusions which showed complete confidence in the Ministry. Premier Corbelli said that the Ministry accepted Signor Mancini's motion as an expression of full confidence, and, in view of the state of parties in the Chamber, it is considered as a remarkable victory for the Government.

St. Petersburg, November 30.—The ice on the Volga suddenly broke at Nijni-Novgorod, in consequence of the warm weather. Five steamers and thirty barges were destroyed, and large quantities of grain, naphtha and fish lost. The damage done is immense.

Accounts received by the *City of Tokio* describe the trial trip of the new steamer, *Meifoo*. She left Shanghai October 15th for Canton, sailing under the American flag, and made a rapid passage of three and a half days. She was expected to leave for San Francisco, via Honolulu about the 20th of October, and will probably put in her appearance here early in December. Whilst ordinarily the property of the China Merchants' Steam Navigation Company, it is asserted that she is in reality owned by the American firm of S. C. Farnham & Co., of Shanghai. The *Meifoo* was originally a British sailing vessel, and, although in process of conversion into a steamer she was cut in two and lengthened fifty-seven and a half feet, still the fact remains that she is foreign built. It has been the custom for a number of years to allow vessels purchased in Chinese waters by citizens of the United States to fly the stars and stripes provisionally; that is, they are at liberty to trade on the coast of China, Japan and the Eastern Seas, under a certificate granted by a United States Consul. The question now arises, if the *Meifoo* arrives in the port of San Francisco flying the American flag, whether she is not liable to seizure, as an Act of Congress especially forbids any vessel assuming our nationality if built outside of the United States.

BEST AMERICAN STEAM AND WATER PIPE.

We would call the attention of those requiring Piping to our large stock of

154,000 Feet On Hand!

Black Welded Steam Pipe 1/2 to 7 in. diameter.
Galvanized Water Pipe 1/2 to 3 in. diameter.

The above at Moderate Prices.

Hawaiian Gazette Supplement, Dec. 29, 1880.

LATEST FOREIGN NEWS.

By the arrival of the brig *John D. Spruce*, we have San Francisco dates to the morning of the 2nd inst. We present our readers with the following summary:

CHICAGO, November 30th.—An *Inter Ocean* Washington special says: Intelligence is received from Florida to the effect that both seats for Congress will be contested by the Republicans on account of gross frauds at the election, by means of which Democrats were returned.

James Stephenson, in charge of the geological survey of New Mexico, returned to-day. He claims to have discovered another remarkable prehistoric city. It extends for miles, the houses being built in the face of a cliff along a canyon. It is forty miles from Santa Fe.

The President's message is completed, but has not been submitted to the Cabinet. It probably will be on Friday. It is understood that it contains matters of only ordinary interest, and is barren of sensations.

The most interesting portion of the President's message, it is said, will be where he elaborately sets forth our relations with England with reference to the fishery question. He shows that since the accession of the Gladstone Ministry the attitude of Great Britain has changed, and that the new Ministry recognizes the claims of American fishermen in Canadian waters. He recommends that the claim for damages, resulting from the *Fortune* fishery, be referred to a Commission to determine the amount due to the American fishermen. The message shows that the Gladstone Government admits that Canadian legislation must be in accord with the treaty, whereby Americans were granted rights to fish under certain restrictions, on the payment of \$5,500,000, the sum at which the privilege was valued by the Commission under the treaty of Washington, and paid, but in return for which our citizens received nothing under the Disraeli Ministry. The President expresses such confidence of a satisfactory adjustment of the matter that he says there is no further need of pressing the bills pending reimposing a duty on fish and fish oils. He elaborates the above points, making the subject the most prominent one of his message. In regard to our foreign affairs generally, the message alludes to the successful settlement of the controversy arising from the firing on an American schooner by a Spanish man-of-war last summer, the amicable relations with Mexico, the arrest and conviction by Turkey of the murderers of Doctor Parsons, the Chinese proclamation upon the question of duties and the unhappy results attending the efforts at mediation between Chile and Peru.

A fire broke out last night in the barber shop of the House of Representatives, and before it could be extinguished considerable injury was done to the walls and ceiling. The barber shop was located in one of the House cloak-rooms. To-day the architect put men to work repairing the damage. The origin of the fire is not ascertained.

NEW YORK, November 29th.—The *Telegram* says: Returns all in from every State show the total Presidential vote to be 9,192,585, divided as follows: Garfield 4,430,415; Hancock, 4,438,014; Weaver, 335,729; Dow, 9,944; Scatterling, 1,735. It will thus be seen that the Republican and Democratic parties are about as evenly divided as is possible to have two great parties. Garfield beats Hancock by only 3,401. Had there been no treachery in the Democratic ranks here, the story would have been quite different.

RAVENS, November 30th.—Jackson Ferguson, Surveyor of the Census for this State, has completed the returns, though the official figures have not yet been published. He states that the total population of Nevada is within a hundred or two of 65,000, showing a gain over the last census. Instead of Storey county has gained, its present population being between 15,000 and 17,000, an increase 1,500.

Four powers are passing between the United States and the French and German Governments for exchanging opinions relative to the employment of the existing silver coins.

Of the contribution of \$100,000 to the Democratic campaign fund, promised by English, he only paid \$25,000. Landers only contributed \$3,500 and his brother \$1,500 of \$40,000 pledged.

LONDON, November 29th.—The *Times* Paris special says: The promotion of the Panama Canal scheme has been retained with extraordinary vigor. It is a movement so universal that success as regards enterprise and capital is certain, and adhesion is coming from every quarter of the globe. Mr. de Lesseps told the *Times* correspondent that news was arriving every moment which confirmed his conviction that the enterprise is insured. Every country in Europe is taking part in it; offices being opened in Germany, Austria and Italy, and subscriptions are flowing in. The English have secured the shares on the Paris Bourse by sending orders which cannot be executed except by paying a premium. The Founders' shares, which were 5,000 francs, have reached nearly 40,000 francs.

DUBLIN, November 30th.—The *Gazette* contains an offer of £1000 reward for the discovery of the murderers of Wheeler, at Oola.

COAK, November 30th.—A barbarous outrage has been committed near Tralee on a bailiff who was in charge of a house from which the tenants had been evicted. A party of armed men broke into the house and slit the bailiff's ears. The bailiff fainted from loss of blood. The police hut has been erected at New Pallas without disturbance.

LONDON, November 30th.—It has been decided that the Government, when Parliament meets, will introduce a Coercion Act at the same time with the new Land Bill Act, and this will provide for the immediate disarming of the people.

There is a movement in the west of Ireland, particularly in Tuam, Swinford and other considerable towns in County Galway, to bring about a reduction of twenty-five per cent in rents of shops and towns houses.

Philip Callan, M. P., has been found guilty of libeling A. M. Sullivan, M. P. The verdict was that Mr. Callan published a libel, and that the libel in question was not a fair comment. Justice Hawkins deferred sentence, and bound over Callan to appear by December 15th. He said that the affidavits must be exchanged a week before then, but he hoped that they would meanwhile be rendered unnecessary.

DUBLIN, November 30th.—A circular has been issued from the office of the Chief Secretary for Ireland to the sessional Crown solicitors, directing them not to absent themselves more than twenty-four hours at a time from their respective counties without special leave, and to report to Forster all communications of the police in reference to outrages.

At a meeting of the Land League to-day it was stated that several Orangemen were members of the League, and that branches of the League had been established in every county in Ulster.

LONDON, November 30th.—A dispatch from Portsmouth announces that 500 mariners are to go to Ireland.

A dispatch from Tipperary reports that the artillery detachment, which went to New Pallas, left their guns behind at Limerick. All the troops were withdrawn from New Pallas after the police of the garrison had been trebled.

The Government has issued an order to recall the Sixty-fourth Regiment from its station in Ireland, but new exigencies have arisen, it seems, for to-day the order was countermanded, and the regiment will have to remain in Ireland as long as the time longer. The Coldstream Guards have been ordered to proceed to Ireland without delay, but their immediate destination has not been made public. No other regiment will be sent here for the present.

NEW YORK, December 1.—A London dispatch to the *World* says: The League's movements are sanctioned by hundreds of the priests. The attitude of Gladstone and Bright is a practical countenance, if not of the League's methods, at least of their objects. They are blind who do not recognize the Irish movement as a great revolutionary act, and the only one which ever stood any chance of success. Mr. Parnell knows that actual force in a military sense is absurd. He also knows that force of some kind is necessary to achieve the aims of Ireland. If the League is wise and able enough to exercise its power, without provoking a collision, it may, in the opinion of many, dictate its terms, even to England. It took an army to dig Captain Boycott's turnips, yet despite that army Boycott had to leave his home with his family forever. We read that the Coldstream guards are coming, yet 10,000 Saxon soldiers might occupy the country without affecting the situation in the slightest degree. Wholesale evictions might take place, but the soldiers could not stand guard over every evicted farmer, and the farms would be reoccupied as soon as the soldiers left. The armies of the world could not compel the payment of rent, or force men to work for obnoxious fellowmen, or keep shop-keepers from refusing to sell. Coercive acts, a few months ago, would have been effective, but now they will be useless. The people have learned their power too well to be cowed.

A *Herald* Dublin dispatch reads: The winter campaign of the Irish land war has not reached the end of its first stage. The State trials are fixed for December 28th, and the opening of Parliament for January 6th. The Boycott incident is over. Nothing particularly engages the attention of the Land League's power. This power has, within three months, become so overwhelming that I, without fear of contradiction, assert that the reins of Government in Ireland are practically in the hands of Mr. Parnell and his supporters. The Irish leaders have obtained and are extending their rule by means so unique and extraordinary that the most intelligent observer can hardly understand its direct power or comprehend its terrible significance. A general strike against the payment of rent, forcible resistance to those who attempt to force payment, combined opposition to every legal process and intimidation of all persons attempting to carry out the law, crowned by that new and extraordinary engine of force now called "Boycotting," are elements creating an open, armed revolution. The Boycott incident showed what was necessary to resist the Land League. Another incident at New Pallas, County of Limerick, is equally significant. Several days ago an iron hut was taken down to New Pallas for erection on Bourke's farm, but could not be removed on account of the resistance of the people there. It lay until to-day, surrounded night and day by police, who themselves were surrounded by hundreds of people, determined not to allow it to be taken away. The removal of this ridiculous hut became a national question, and a force of 500 troops, including infantry and hussars, and two guns of the royal artillery, were ordered to the scene, and removed the hut at day-break. The people were advised strongly not to come into collision with the overwhelming force, so the hut was quietly removed. The crowd that witnessed the unusual spectacle in the village was largely made up of women and young lads. Without wishing to be an alarmist, I feel certain that the revolution cannot end without bloodshed unless a capitulation be made to the Land League, which is out of the question. The rising may be small and ineffective, but it is considered inevitable by many who are familiar with the state of the country. It is beyond question that the new Land bill, however extreme, will not satisfy the Land League, and the movement should be considered in all its significance. Without quoting the previous utterances of numerous members of the League Executive Committee, it is only necessary to refer to Mr. Davis' speech at a land meeting to-day that, "it is very important that their friends in the north of Ireland, who were now rapidly wheeling into line, should at once understand that the Land League movement was not a movement for the purpose of bringing rent down to Griffith's valuations. Its object was to remove Griffith's valuations and landlordism out of the country."

ST. PETERSBURG, November 30.—The police at Charkoff have seized several printing presses, together with daggers, revolvers, copies of a revolutionary organ and forged passports, and have arrested two revolutionists.

ROME, November 30.—In the Chamber of Deputies this evening, after several orders of the day had been introduced, Signor Mancini proposed a resolution, signed by twenty members, declaring that the Chamber, desiring to pronounce upon the important reforms which the wants of the country require, passed to the order of the day, Signor Mancini then examined all the questions raised in regard to the policy of the government, drawing conclusions which showed complete confidence in the Ministry. Premier Carot said that the Ministry accepted Signor Mancini's motion as an expression of full confidence, and, in view of the state of parties in the Chamber, it is considered as a remarkable victory for the Government.

ST. PETERSBURG, November 30.—The ice on the Volga suddenly broke at Nijni-Novgorod, in consequence of the wroth weather. Five steamers and thirty barges were destroyed, and large quantities of grain, naphtha and fish lost. The damage done is immense.

Accounts received by the *City of Tokio* describe the trial trip of the new steamer *Meifoo*. She left Shanghai October 15th for Canton, sailing under the American flag, and made a rapid passage of three and a half days. She was expected to leave for San Francisco, via Honolulu about the 23rd of October, and will probably put in her appearance here early in December. Whilst nominally the property of the China Merchants' Steam Navigation Company, it is asserted that she is in reality owned by the American firm of S. C. Farnham & Co., of Shanghai. The *Meifoo* was originally a British sailing vessel, and, although in process of conversion into a steamer she was cut in two and lengthened fifty-seven and a half feet, still the fact remains that she is foreign built. It has been the custom for a number of years to allow vessels purchased in Chinese waters by citizens of the United States to fly the stars and stripes provisionally; that is, they are at liberty to trade on the coast of China, Japan and the Eastern Seas, under a certificate granted by the United States Consul. The question now arises, if the *Meifoo* arrives in the port of San Francisco flying the American flag, whether she is not liable to seizure, as an Act of Congress especially forbids any vessel assuming our nationality if built outside of the United States.

BEST AMERICAN STEAM AND WATER PIPE.

We would call the attention of those requiring Piping to our large stock of

154,000 Feet On Hand!

Black Welding Steam Pipe 1/2 to 7 in. diameter.

Galvanized Water Pipe 1/2 to 3 in. diameter.

The above at Moderate Prices.

THE HONOLULU IRON WORKS COMPANY
