ESTABLISHED 1904. VOL. 15. NO. 29.

LIHUE, KAUAI, TERRITORY OF HAWAII, TUESDAY, JULY 22, 1919

SUBSCRIPTION RATES, \$2.50 PER YEAR 5 CENTS PER COPY

## FARM LOAN BOARD READY FOR WORK

W. C. Avery, Secretary of the Farm Loan Board has been on Kanai for the past week for the purpose of conferring with the agents of the Board, and meeting those who are interested in the matter fo farm loans.

In company with Mr. G. W Sahr, of the Land Department, Mr. Avery has visited the homestead lands and has had the opportunity of meeting many of the landholders personally and discussing their problems with them.

On Sunday afternoon a meeting of the Kapaa Homesteaders was held in the Court House at Kapaa. About thirty were there and heard the details of the Farm Loan Act presented by the Secretary. Questions were asked and every effort made to make clear the opportunities and requirements of the law.

A number of people have expressed a desire to file applica-tions and others have already done so. The Act promises to be of real service and helpfulness to the small landholder, and once its benefits are understood and the proper business arrangements made for establishing credit, there will be no difficulty in placing the entire fund provided for by the Legislature.

Mr. Avery has expressed himself as pleased with the assur ances of cooperation expressed on all sides, and the intelligent interest manifested by the homesteaders.

### All off Again

Of the changes and uncertainties of the Waiakea contract there seems to be no end. Over and over we have been told "a satisfactory settlement has been armatter up in our minds, only to residence avenue. learn from the next paper that the settlement was all off.

Now again the arrangement by which Waiakea mill was to take care of the 1920 crop, and pay the homesteaders a net five per cent of the sugar value, is all off, Some of the homesteaders think they can do better, and once more everything is in the air. Pretty soon we wont believe anything we hear from or about that crowd up there!

#### Will Seek Farther Education

Rev. A. Akana, who has been spending a few days in Lihue,returned to Town on Saturday. He finds the pastorate of the Kawaiahao church a very arduous and trying burden, with many perplexing problems of keeping the peace, reconciling hostile factions, etc.

Mr. Akana has arranged for a years leave of absence which he will spend in the East at Hartford, Conn., pursuing post graduate studies, and better fitting himself for the responsible duties of his church work.

Kanikela Hui, Alapai Hui and Joe Halemann charged with Malicious Burning in the region of the Alakoko fish pond, Niumalu, came up in the Lihue District Court today. The charge was re-duced to Malicious Injury and the trio was speedily convicted after telling a long string of lies, that evidently did not count much to with the Court, and sentenced to 90 days in jail each, and to pay costs of court amounting to three dollars.

The Koloa plantation is putting in a fine childrens athletic of the children and others of firm. their community. It is the standard equipment that is furnishland. It will be installed in a this morning and will spend some little park near the plantation time visiting the Island. store which is a most central and convenient location, and where it the most good.

### **Adventurous Outing** on Napali Coast

of Mr. and Mrs. E. F. Wood, Mr. Chas, H. Wilcox, Lee Waterhouse, Patty and Eliza Waterhouse, and Geo. Kaeo, the guide and his son.

They made the trip over from Haena, by way of the old dismantled trail, in five hours of actual travelling, through the most thrilling and exciting experiences, such as none of them had ever known before and probably never will again.

They camped under the cliff, on the sand beach at the far side of the valley, and remained there Saturday and Sunday and returned to Libue Monday.

While there they received an unexpected visit from the Mott Smith party in yacht. They had been up the coast after sup plies, and learning that this party was at Kalalau, they dropped in on them out of the open sea, and through a barricade of foaming breakers, that did credit to wonderful scaman-ship. When they landed on the beach they proved to be a veritable band of Robinson Crusoes, stalwart, bronzed and bearded, as though they had been in the wilderness

for a decade. They report plenty of fish and goats, and no end of a good time. And the Kalalau party confirm the same as far as they were concerned. It was an experience never to be forgotten.

### An Attractive Street

One of the most attractive res idence sections on the Island is the mauka avenue at Koloa.

Little by little under the magic touch of the progressive management, it has been transformed rived at," and we have breathed from a lonesome and deserted bit a sigh of relief and closed the of country road, into a choice

The commanding outlook toward the sea, the artistic and comfortable cottage homes and dainty attractive little gardens, all taken together make you wish that you belonged to Koloa and lived somewhere there on that street.

#### Bridgewater Heard From

The Hilo Herald of which E B. Bridgewater was editor at one time reports that he has recently been heard from. He is now located near Camp Dodge, Iowa, where he is editing a Labor Union newspaper.

He was severely injured while in France, and both of his arms were broken. He was in a hospital for a long time in France, and again after his return to America he was again confined for a long time. One arm had to be rebroken and set again, but even so it gives him much trouble, so that his physician now recommends amputation but Bridgy will not hear of that.

Our sympathies are with him.

Among the many guests of the Lihue Hotel in the past week were F. Schaperkotter representing the John Bollman Co. of San Francisco; G. B. Grant of the H. S. P. A.; E. Lindner of the Hoffschlager Co.; H. H. Jones with the Standard Oil Co., and A .H. Hanna of the James Lynch Co., of Honolulu.

Miss Josephine Isreal of the from a short visit in Town.

Mrs. W. H. Battersby representing the Sachs Dry Goods Co. games equipment for the benefit is on Kauai in the interest of her

the Kinau this morning.

### The Cherniavsky Concert

In the absence of our Musical editor, we cannot do justice to the Cherniavsky concert at the An enterprising outing party Tip Top on Friday evening. has just returned from a very Those who are best fitted to judge strenuous and adventurous trip are exceedingly enthusiastic in Lihue. Mrs. Lang is a cousin of to Kalalau. The party consisted regard to it, and declare that it Mrs. Moler. was a musical event, and a musical treat, seldom if ever equalled on Kauai.

were not more there to take advantage of the rare opportunity; many people are away from home just now, and others were detained; and many alas! prefer a a high class concert.

It is significant of the high ideals of the Cherniavskys, and of their desire to give their best, even to a country audience, and of their friends to help them, that they brought the Knudsen piano all the way over from Kekaha for the occasion.

### Y NOTES

The summer term of the night school is progressing satisfactorily at Lihue, Puhi, Koloa, Eleele and Makaweli. The total enrollment in these classes is 5 teachers and 80 students.

The Sunday Evening Club issued a special invitation to returned soldiers last Sunday night at their regular meeting. About 90 young men in all were present to enjoy the program. Under the leadership of Watada, himself a soldier, the soldiers led off in some of the singing while the others joined in choruses. The alternate singing and whistling of the songs produced a lively and harmonious effect. The music leadership of William Hookano month or more. met with great favor. Mr. Clinton S. Childs, welfare expert, of ily are back from Town where New York city, gave a brief but they spent a couple of weeks vieffective address on "Things we have in Common." The lessons he pointed out were (1) the necessity for complete and accurate observation before passing judgment on men and things about day. us; (2) the value of independent thinking; (3) the moral obligation of thinking the thoughts of other people.

Ice cream and cake in liberal portions constituted the refreshments. At the close of the meeting the soldiers were asked to form in line while every one else present passed by extending the brotherly hand as a token of their cordial welcome home.

#### Lihue School Site Assured

At length, after a long strung out delay, the exchange securing a suitable site for the Lihue public school is being consummated. The Land Board has approved the exchange which gives the so called trash field together with the present school site some 14 acres in all to the government in return 39.75 acres of cane land in Wailua-kai.

As this school site is of the nature of Town Lots, this is a fair exchange in which the government gets much better value than would appear on the face.

We trust that now there will be no farther difficulty or delay and that actual construction will proceed as soon as possible.

### Old Timer Back Again

H. S. Padget writes that he will be on Kauai about the end of the Waipouli homesteads is back week to remain a couple of weeks or so in the interest of the Honolulu Iron Works. He will be prepared to supply anything in his line from the bottom of the furrow to the top of the smoke stack. Everything in the line of agricultural or mill engineering supplies Mrs. A. Davidson and son of will be furnished. Padgett is a ed by the Medart Co. of the Main- Honolulu arrived by the Kinau former resident of Kauai, of long standing, and a thoroughly well versed plantation man whose foot will be on his native heath W. A. Wall, civil engineer and in every way when he comes awill get the largest use, and do surveyor of Honolulu, arrived by round among the plantations of Kanai.

Father Hubert of Kealia returned from Town this morning, miller and Brother Henry.

### Old Kamaaina Passes Away

An old kamaaina, and one of the few remaining links with the old missionary days, Henry Johnson, of Hanalei, died a little while ago in San Diego, Cal. He was born at Hanalei in 1849 where his father was for many years missionary pastor of the Waioli church,

The Johnson's and the Wilcox's were the two missionary families for many years at Hanalei and lived in close proximity, a lot of girls in one family, and a lot of the invitation of the Planters boys in the other. And those were the days of social interest and activity in Hanalei, such as have never been known there since, especially when the young folks came back from school in the and to report the same to the assummer.

The Johnson's lived in a two story house up in the mission tract, which was afterwards sold to Judge Lota, and moved down onto a kuleana on the beach, and tion, but he expects to visit all became the Deverill hotel. It is substantially the same as in the old missionary days. It must be upwards of 75 years old.

Henry Johnson moved away to the Coast along in the 60's, devoted himself to the fruit farm-

He married Bella Holden who was one of the most attractive arrived by the Kinau on Friday and dashing belles of those old

### Ice and Soda For Kapaa

Progressive Kapaa is to have an up-to-date power soda works and ice plant. A commodious building has been erected with concrete floor throughout, and the necessary machinery is now being installed. The ice machines will be of the Remington make with a capacity of a ton and public. a half a day. The Kapaa water is noted as unexcelled on the Island, so they promise to supply the very best of arctic ice, real blue ice with no snow about it.

The Taketani brothers are re ported to be the main promoters of the enterprise, but the stock is largely held all over the Island, especially by store keepers who will naturally be interested ev-

They expect to begin manufac lelena back of the Half-way a very timely season for ice and

#### Concert and Dance

On Saturday evening at o'clock, a concert and dance at Waimea Hall, Waimea, Kauai, will be staged by the pupils of the Kamehameha Girls School who are home on vacation, especially those living in Waimea. to raise money for the maintenance of a Belgian godson and a French orphan who were adopted by the school last year. The young ladies who are to take part are working hard to make the af-Holnoulu are Kauai visitors, Mr. fair a success and so a pleasant McCreevy is connected with the and enjoyable evening is in store

for Honolulu Saturday last.

Mr. C. S. Childs has been spending some time in our midst in the study of plantation conditions, with a view to possible welfare work in the interest of the employes on the sugar estates throughout the territory.

He is a trained welfare expert, who has come to the Islands on 'Association, to make a careful and intelligent investigation of the conditions and needs of the sugar industry in this respect, sociation, together with suggestions and plans for practical and valuable help along these lines.

Libue and its immediate vicinity, is his first field of investigathe other Islands, and most of the other plantations, and thus become familiar with the varying conditions all over the Is-

He is spending more time, and making a more careful study here than will be necessary elsewhere, in order that he may familiarize himself at the strat, with the general system which must necessarily prevail more or less throughout.

He impresses one as being a very fair minded, and open-minded, man of intelligence and good judgment; a man who thinks before he speaks, and a man who may be trusted to report things fairly, and to advise wisely.

The Planters Association are to be congratulated in securing the services of such a man, and we beg to command his findings to their favorable consideration as of much probable significance to the best interests of the sugar business, as well as to the general

### Memorial Service

The two churches, the Libue Union and the Libue Hawaiian, united in a joint memorial service in honor of the late A. S. Wilcox, who had been a firm friend and a large benefactor of both of these institutions.

The service was held on Sunday in the Union church, which was most elaborately and beautifully decorated for the occasion with a profusion of palms and choice flowers.

Rev. J. M. Lydgate delivered the address of the occasion, in which he tendered a very sincere tribute of appreciation and regard for the deceased founded on long years of personal acquaintance. He specially emphasized Mr. Wilcox's sterling integrity and fearless independence; his loyalty to old friends and early associations; his large sense of responsibility in the administration of his stewardship; and his unassuming modesty and absolute distaste for notority in his benefactions. Many shall rise up and call his name blessed.

#### House Guests at Kalapaki

We congratulate accompanied by Father Troph- man was a departing passenger the Jacobs-Koloa will miss I them.

### Items of Interest to Our Homesteaders

By G. W. SAHR

### Rabbits

It is a remarkable fact indeed that although rabbits have been raised and kept by individuals on these islands for a long period, that they have never become wild to any extent. This may be largely due to the laws of the Territory which provide that rabbits if kept at all be enclosed to prevent these troublesome rodents from becoming a pest. The law is a good one in that it shows foresight on the part of our law makers who wish well for the future of this land, but there is a chance to better the law by having it state more specifically just how rabbits should be housed to prevent their escape. In spite of this law as it stands today it still remains a remarkable fact that the rabbit has never established itself in the wild state. The opportunities offered the breed by natural conditions of this country would indeed impress one that the rabbit if once allowed to become a pest, would reign supreme, in spite of anything that could be done to hinder it.

The damage that could be wrought by these harmless ap- handy coolers are becoming very reached by sunlight during as pearing pets might be alarming gerator should be a great thing in much of the day as possible. # Wherever Cane is Grown

A recent magazine article on Napier Grass, or Elephant grass, was misleading, because it failed to indicate the portion of the country to which it is adapted. As a consequence the United States Dept. of Agriculture has received many letters from nearly every part of the country. The grass will survive the winters, as a rule, south of a line drawn from Charleston, S. C., to Shreveport. La., and in California and the Southern part of Arizona. New Mexico and Texas. Farther northward it can be grown only as a summer annual, and as it is The primary functions of food expensive to keep the canes over bit cannot thrive in Hawaii as in are to repair the waste of the winter and to plant each spring Australia, and there is no doubt body, to promote growth in im. it is hardly possible for it to com-

# Child Labor and the Schools

By VAUGHAN MAC CAUGHEY

My attention has been called to a very interesting Government document, issued by the United States Department of Labor, and entitled "The States and Child Labor." This book, of 15 pages, gives concise tabulated data showing the present status of child labor in every State in the Union. Much of the evidence shows that Hawaii compares favorably with Maintand regions.

The pamphlet will enable each State to discover just how many States are ahead of it in certain provisions for the protection of working children. Ohio, which ranks fourth among the States in the value of its manufactures, prohibits the employment of girls under 16 and boys under 15, without any exception. It forbids girls under 18 and boys under 16 to work in most occupations more than 8 hours a day and 48 hours a week, or between 6 in the evening and 7 in the morning.

Minimum Age Requirements

Forty-three States recognize the principle that children should be at least 14 years old before they start wage earning, and of these, six place the minimum age at 15 or 16. The laws in most of these States, however, fail to apply this principle to all children without exceptions. In two States the age fixed by law is lower than 14, and in three there is no minimum age except for work in certain dangerous or injurious occupations.

Limitation of Hours

An 8-hour day and a 48-hour week for children under 16 is the standard in 28 States and in the District of Columbia. One of these States limits the hours of girls until they are 16 but of boys only until they are 14 years old. Some States regulate the hours of labor of children until they are 18 years old or of woment at any age. Such an extension is highly desirable but no attempt is made in this leaflet to include restrictions for children over 16. In contrast to this protection there are seven States where the law names 60 hours a week as the most a child may work. One State places no limitations whatever on hours of work for children.

Prohibition of Night Work All except 6 States have night work prohibitions. 'A number of these prohibit night work by women and girls irrespective of age. With the exception of Georgia, where night work is prohibited only to children who are under 14 years and 6 months of age, all the States which have laws designed to keep children from working at night include children up to at least 16 years of age in their prohibition. Unfortunately in most of these States the prohibition of night work is subject to numerous exemptions.

Mines and Quarries

The legislation of the various States recognexes the see ial need for protection of children who work in mines and quarries. Only 9 States are without specific child labor prohibitions for mines. In some of these States there are no mines, and in few is mining an industry of any importance. In two States boys under 18 are forbidden to work in mines, in one, the minimum age is 17. Twenty-two States place the minimum age at 16. The chief mining States have prohibition affecting the work of women in mines, but women bave not, as a rule, worked in mines in the United States.

Compulsory School Attendance

What provision is made for the child who is forbidden to work? Between what ages is he required to go to school? Every State names certain ages between which children must attend school. Two States require the attendance at school of children between the ages of 7 and 17. The lowest range of ages is from 8 to 12 years. The most usual requirement is that children between 7 tnd 16 or between 8 and 16 shall attend. In three States the laws are not State-wide, and leave to local option decision as to whether the State education law shall apply within the county or district.

Exemptions from School Attendance

In every State exemptions are permitted to the compulsory attendance law. The fact that the child has completed the grammar grades excuses him from school attendance in 17 States. In one State the law specifies that a child who can read and write simple English sentences need not continue to attend school. In many States any child who has reached the age when he may legally work and is lawfully employed is excused from school. This means that although the compulsory school attendance law appears to demand the child's presence in school, he is actually allowed to stop his education and go to work before completing the compulsory education period.

Fourteen States will excuse a child from school solely for "satisfactory," "sufficient," or "urgent" reasons, for "domestic necessity," or for "cause." Of the 14, two specify that the "urgent reason" shall be "strictly construed." Poverty, the need to support a widowed mother, or "other member of family dependent on child," under the laws of 11 States, excuses a child of any age from school attendance. In 8 States the law specifies that children shall be excused because of the parents' inability to provide suitable clothing. Another significant commentary on the unequal opportunity for an elementary education available for American children is the fact the 26 States specify in their laws that a child who lives two, two and a half, or three miles or more than a reasonable distance from the nearest school need not attend. One of these States says that a child shall be excused if he "lives at such a distance as to render attendance impracticable or unsafe." This difficulty is sometimes overcome by a provision for free transportation. Length of School Term and Number of Days

As the U. S. Bureau of Education has pointed out, there is a great variation in the amount of schooling obtained by children in different States. The average length of the school year in 1915-1916 varied from 194-,3 days in Rhode Island to 108.5 days in South Carolina. Moreover, even in States where a long school term was provided, children did not take advantage of the opportunity offered. Illinois shows the highest average attendance, and its school children utalized only 89.9 per cent of the school session. In Delaware only 54.8 per cent of the school term was utilized.

Attended

In considering the extent to which child labor interferes with a child's chance of securing an adequate education the significance of these facts is plain. As Florence Kelley has said, the best child labor law is a compulsory school attendance law. A State which fails to provide adequate school facilities for the child whom it forbids to work not only deprives the child of his chance to learn; it also deprives itself of an effective means of enforcing its child labor taw, and subjects the child to all the hazards of idleness.

### Ratify the Treaty

The Outlook has an impressive and convincing editorial article in a recent number under this titile, and enforcing this injunc-

The Outlook is a republican journal and cannot consistently commend the accomplishment of President Wilson in all respects but it has the wisdom and the honesty to plead for the prompt ratification of the treaty. part this plea is as follows:

We hope that the Senate will approve the treaty, and we believe that the people of the country will approve it.

What, stated in the simplest terms, will this treaty do if ratified by the nations which were United in defending civilization against the Huns?

It is the confimation of the overthrow by the war of the autocracies of Germany, Austria and

With the peace which it inaugurates, it will probably put an end to the dominion over subjugated peoples of the unspeakable

It secures against foreign despotism the peoples of Czechoslovakia, Jugoslavia, and Poland.

It secures a considerable reparation to Belgium and France from the injury inflicted on them by the crimes of Germany. It so weakens Germany that no immediate attempt to repeat her crimes is possible.

It provides a protectorate for the colonies which have been wrested from Germany during the period of their self-develop-

And it unites the civilized nations in a pledge to protect each other and the people under their guardianship from future aggressions and to compel Germany to fulfill her promises to make reparation for the wrongs she has committed.

What is the alternative? we refuse this Treaty and refuse to enter the League of Nations, what would be the consequences?

We should be left at war with carry on an unscrupulous propaganda in Mexico to the south of us, in Japan to the west of us, and among the discontented and restless elements in our own borders. It would leave us in the midst of that propaganda withcivilized nations, perhaps with duction. their secret, if not avowed, satisfaction at all which, our proud isolation would be bringing to us.

. If, on the other hand, we made a separate peace with Germany, we could not expect to compel Germany to make better reparation or afford to her neighbors better protection than could be secured from her by the united action of all the civilized nations, including America.

If, as is highly improbable, we could secure another conference of the Powers for the purpose of agreeing upon a revised Treaty, we should be represented in that conference by the President whose action at the previous conference we had disavowed, unless the new conference was not convened until March 4, 1921, in which case the world would be left in its chaotic condition for

nearly two years longer, a peril

not to be lightly bazarded. So much for the immediate effect on America's interest. What would be the effect of America's rejection of the Treaty on the world's interests and on America's reputation abroad?

The absence of America from the League would deprive the League of one of the richest and most powerful of the civilized nations, and would perhaps lead to the disruption of the League altogether and the indefinite postponment of all hope of realizing that international brotherhood which has been the dream of poets and prophets from the days of Isaiah to those of Alfred Ten

However we might justify our action to ourselves, it would not be and could not be understood abroad. A Government-directed press in Germany would exult in our refusal to join with her enemies, which it would interpret as a victory for pro-German senti-ment in America. The people in England, France, and Italy would be discouraged, if not dismayed. The people of outh America, a people of noble if sometimes dangerous idealism, would be alien-ated. Our policy would be attri-buted to National pride and National selfishness in the thoughts of other nations. We should have resigned our position as leaders in the world movement for Just' e, Liberty, and Peace.

### Gasoline Shortage in View

Today much thought is given to the gasoline problem. Automobile manufacturers, as well as oil producers and refiners realize that a shortage of gasoline will come unless new fields are discovered. In the mean time they recommend that the strictest economy be practiced in the use of gasoline and other petroleum pro-

The automotive engineers, as well as the oil producers and refiners, realize the seriousness of the gasoline problem and they are constantly bending every effort Germany. She would be free to to devise automobile engines and methods of carburization which will secure the operation of automobiles on grades of gasoline that will permit the maximum production of this motor fuel from each barrel of crude oil, and which, at the same time, will give out allies; without co-operation the greatest power and mileage from the fleet of Great Britain, from each unit of gasoline conwhich has done so much to pro- sumed. All this attention to the tect our merchant marine and problem is helping to a marked our coast in this war; without degree, yet consumption is inaid or sympathy from the other creasing much faster than pro-

The gasoline of today is not as highly volatile as the gasoline of some years ago, yet it is more powerful and gives greater mileage. It would also result in decreasing the production of gaso-

#### IN THE INTERESTS OF LABOR

At the last annual meeting of ponsible and intelligent welfare ally. committee was appointed, with power to act, to make the necessary investigations and report plans for some adequate, comprehensive, organized welfare work among the plantations belonging

We are glad to know that this did us good. important matter has not been pitee has taken intelligent action, make up for lost time. and that they have the promise of a very comprehensive and thorough going report, with suggestions and plans for the next and spend lavishly nual meeting,-out of which assuredly, some very valuable results will come.

It would be utopian and unreasonable to expect that even the work will solve all our labor problems, or usher in an econotions of labor, and to increase the contentment and efficiency of labor.

Looking at the matter from this strictly utilitarian point of view, it must prove a very commendable thing, to say nothing of the humanitarian point of view.

Anyway, we have got to get into line with the current of things in these days of social and economic amelioration, and if we attempt anything in the line of reactionary blockade some eco-nomic disaster is sure to overtake

So here's to effective welfare work in our midst; may it meet with general favor, and be wisely conducted.

#### MAKE HASTE SLOWLY

Reforms are apt to be impatient things. The reformer makes one quick and easy jump from the conditions as they are to the SAVE FOR BETTER THINGS conditions as they ought to be. To accomplish that distance in actual fact is often a long, weary and expensive journey.

The plantation manager knows that the housing conditions are very unsatisfactory.

on the place that ought to be rebuilt. He knows it,-he admits it,-and he is ready to do it. But there are a hundred and one other things that must be done at the same time and only limited resources with which to do them.

If he turns all hands loose on those fifty houses, everything else, more or less, is going to come to a stand-still, with results more calamitous than the continuance a little longer of those unfit houses.

It is the part of wise manage ment to carry along all the good work at once, and in line, which means that things must move

So long as things do move, and that when a job is done, it is done ing, painting and repairing. well, we may be reasonably sat-

Farther-more, the outsider, who sees only his particular point of interest, doesn't know the de public school classes are now and machinery which have grown mands, more insistent it may be, held in Japanese language-school up during the centuries. It would at other points along the line. He must trust something to the waii. Oahu and Kauai. to the wisdom and the broader outlook of the general in command of the whole situation.

#### THE EXTRAVAGANCE OF VANITY

An article in a recent issue of The Outlook makes this charge against the American people, "Our trouble is not so much that our wants have multiplied, as that our vanity leads us to try and satisfy then in unusual and expensive ways." And the article goes on to point out how people have become intoxicated with large ideas and extravagant practices, which they cannot afford, and which they must give up, and if they don't, they are headed for

financial disaster and shipwreck. We live luxuriously to make a show,-without really being any more comfortable; we entertain extravagantly to keep up with the swim,-and no one particulary enjoys it, not even our friends; we pay exorbitant prices for style, and feel uncomfortable

all the time we are enduring it. It is all a foolish and senseless

sacrifice on the altar of our vanity,-a sacrifice that we ought to call a halt on. Let us be independent and live our own lives in the Planters Association, a resour own way, simply and ration-

#### THE NECESSITY FOR ECONOMY

During the war, from motives of necessity and patriotism, we to the clientelle of the associa- tried to live simply and carefully, and it didn't hurt us,-probably

Now, unfortunately, a reaction geon-hold, but that the commit- has set in, and we are trying to

> The war is over, good times are on, there will be a period of great

Perhaps so! But there will also be a period of high prices and heavy financial burdens. We must remember that we are heavily loaded up,-mortgaged up,-with wisest and most effective welfare debt. This debt must be paid off, and these mortgages met. And taxes will be high until they are mic millenium, but unquestion-ably wise efforts in this direction up with debt should live simply will go far to improve the condi- and carefully, wastefulness and

#### THE COST OF LIVING COUNSELS ECONOMY

The cost of living, on the basis of the simplest kind of comfort and enjoyment, has increased so alarmingly, that there must be very little left out of most moderate incomes, for the unnecessary things, the luxuries and extravagances.

Where a few years ago we might have had a very comfortable margin for luxury and extravagance, and might have safely indulged in a measure of that sort of thing, we must now sail very close to the wind to make ends meet.

Just be sure of where you are going to come out with the present prices of living, before you begin to splurge into the luxuries amil the extravagance!

There is a vast deal of penury, poverty and suffering in the world. With thousands or even millions of innocent and helpless people in distress for the lack of the barest necessities of life, it all the workers of a certain facis bad taste, to say the least, for tory would have their own sovus to flaunt our extravagance in their faces. Let us check the hilarity of our extravagance that we listen and catch the beseeching cry of suffering humanity. Let us live simply and quietly that we may be able to help our fellow men out of our careful

efforts on the part of the teacher or principal.

Inadequate water supplies characterize many public schools. The water for school use, for drinking, for the teachers' cottages, and for the toilets, is so penuriously supplied that the schools suffer from chronic short-

Obsolete, unsanitary, and wholly inadequate toilets are also still dominant in many of the schools, village as well as rural. These conditions are as insult to education and an affront to community pride.

Teachers' cottages that are scarcely fit for human habitation are also not uncommon. Many are ancient, leaky, vermin-ridden, worm-eaten, and in the last stages

of senile decay.

These conditions are not uncommon. Only a well-organized campaign of building and repairs by the county authorities, will enable Hawaii to overmore the

present acute congestion. The Commissioners and Department are anxious to cooperate in every feasible way with the County Board of Supervisors. The Department is confident that the supervisors,-representing as they do, the sentiment of the local communities,—will respond loyally and whole-heartedly iu the present emergency. During the summer months the public school building program should and can "GO OVER THE TOP."

### Soviets and Soviet Government

What are Soviets, and what is the Soviet government of Russia? 🕈 The Youths Companion tells us in a recent issue,—substantially as follows:

Most countries are run on the basis of a geographical represetation. It is the town, or the city, or the county, or the state that exerts its influence in local or national affairs.

In Russia, at present, the basis is economic or occupational. The Soviet is the executive committee of a labor union. The soviets may rest either on the trade or the industry. In the former type the members of each separate trade, such as the carpenters, the plumbers, the farmers, the school teachers or the doctors would have their soviet in a city which would run the community inter- Wholesale and Retail Groceries ests of that trade or guild,-and these individual soviets would send representatives to these general soviet which would handle the municipal affairs of the whole

In the industrial type of soviet sentatives in the governing soviet of the city. The city in turn would send representatives to a nationtl soviet.

Now this of course is democracy in another form,-but it works out somewhat differently from that to which we are used

It gives a larger representation to the trades and industries as such, and the central soviet will not consist, as our congress does, of a great many lawyers and a few farmers or tradesmen, but mainly of farmers, and artisans, with a small sprinkling of busi-The summer months, July and ness and professional men.

Soviet government does not nenecessarily mean injustice, cruelty and the red hand of anarchy and destruction, such as are now prevalent in Russia, but it does mean a change of the political In many regions the schools are center of gravity, and a departorganization that is founded on Unless new rooms are added private property, and would rethis summer, the Federal School sult in the merging of all classes, Survey will find Hawaii's public and would perhaps all nations, school classes holding their ses- into a single socialistic state. sions, through governmental let- Whatever the distant future may hargy, in Japanese school build have in store for us, we are not ready for that sort of thing yet, In many schools the overcrowd- and we do not even regard the

Allan Wilcox Interview (Continued from last week) Roads in France

Owing to the scarcity of men they could not be kept up. They are mostly bordered by lines of poplar trees so all you've got to do is to stay in between the rows of trees and you are allright. Oh yes, we had to drive at night, that was the safest time, and of course we weren't allowed to have any light—that would have been fatal. We weren't even allowed to have a lighted cigarbut we generally did have one as a means of safety to prevent collisions on the road. We just had to creep along in the darkness avoiding the shell holes and other obstructions as best we could. "For God's Sake Go Easy!"

Of course it was pretty rough tween groans of agony "for God's sake can't you go a little easy!" Sometimes I would get hold of Sometimes I would get hold of one that was uncommon manner all sides to "soak" the Americans. ly who would ask me if I couldn't please go a little slower over the rough places-but for every one of that kind I would have half a hearted wretch because it was so rough, and then if you went slow they would cry out. "when in us there?" Of course I was very sorry for them, and did the best I could.

How the Fares were Stowed

These ambulance cars are fit ted up with reversable seats that fold down in such a way that they make a sort of floor or deck they are able to sit up you can carry eight or nine.

Two men were assigned to each car, and they generally took turns on a twenty-four hour shift basis. I would go on at ternoon, when my mate would come on and I would lay off. Of course we weren't always going to say a daily bath was also out steady for the whole twenty-four of the question. I believe I wrote hours, but but we had to be on to the folks that I had had eight tap, and ready for service, and baths in 9 months. Perhaps it occasionally we would have to wasn't as bad as that, but that drive all night long.

cars. I'm always afraid of running into something.

say so. To take one of those long night rides facing a biting wind blowing in off the North Sea,-it was all the cold I ever want to see. And there was lots of snow too, along about Christmas our first snow came and from that on we had plenty of it. We had stoves in our quarters so that when we weren't on the road we were comfortable enough.

Although we had our own commissariat department, with our own cook, we generally panned in with the hospital with which we were connected. Our fare was passable, mostly out of tins of course. Not much in the way of fresh vegetables, bread we got in generous allowance, but were generally mighty short on sugar and milk. The coffee was poor stuff for anyone who had been bred up on Kona.

Didn't Bring Home Much French

No I didn't learn much French,-didn't have to. Between what they know of English and what I could hand out to well enough-I could always get nirs.

it to them when I wanted anything. Of course I got so that I could understand what they said pretty well when they didn't hand it out to me too swift, or in too long a screed without a let up.

In regard to furloughs, we were entitled to ten days exery six months, and I availed myself of this privilege to go down to the South of France, and along the Mediterranean. Went to Nice, Monte Carlo and other places of interest. One could travel only on a pass, which had to be stamped at every place, so that when you got back it was a complete record of your travels.

We were paid promptly in French money, mostly in bills. My wages was \$39 a month, which doesn't seem very much in dollars, but when you put it into francs-it was a whole lot.

The Americans are looked upriding sometimes and often my on by the French as marvels of passengers would cry out be- prodigality, and as too easy for anything, and they were always lying in wait to jar them loose from their easy money. There

If, in the early stages, the Americans were looked on as heroes, benefactors, and saviours of France, there was a marked reaction toward the end, and dozen that would damn me to they became the objects of more the lower regions for a hard or less suspicion and aversion because of their free and easy manners and their aggressive ways. In the hour of extreme need any and every American that God's name are you going to get could fight was welcome, whatever his manners or his make-up; but when this emergency had passed by, they began to notice the defects of their guests, and to feel the burden of them.

Yes, all along, anywhere near the front, there was a constant roar of artillery fire; one got used to it, however, and didn't mind it much -at least I didn't. It afwhich takes two stretchers, and fects different people differently. then overhead like upper berths I had lots of shell-shock passentwo more can be put. That is gers-of all kinds and in all your load—four patients, or if stages. Some of them were raving maniacs, while some were only nervously unstrung. Some of them I fancy would never get over it, while others only needed

Two others were lost, never came at all. I never had much trouble with the censor,-we knew Cold in France well I should pretty well what would pass and

wrote accordingly.

At the end there was a great rush for souvenirs, and the French, with characteristic, thrift, did their best to meet this demand, and I picked up a number some of which I have here.

He then showed a number of very interesting as well as artistic articles which make very fine souvernirs. Among them the German Iron Cross, which is of the Maltese pattern about an inch and a quarter square, a black enamel surface, on what seems to be white metal,-another was a miniature French canteen, with the distinctive feature of two openings-one for the ingoing air, and the other for the outgoing water,—a very sensible, practical improvement on the clumsy, old-fashioned kind.

The most interesting and most attractive however were the miniature replicas of the French official medals, the croix de guerre, the medaille militaire, and the legion of honor. The first, which is the most common, is made of bronze, the others of silver, and the latter set with jewels, with the rich, colored ribbons to which they are attached they form decorations which anyone might be proud to wear, and glad to keep them in a Patois lingo I got along as interesting and artistic souve-

Registrar. July 8, 15, 22 and 29 Thompson and Catheart, Attorneys for Applicant.

### Coming to Kauai

"The Heart of Humanity" will be shown at the Tip Top Theatre 80.0 feet along Friday, August 8th and throughout the Island, lins on the gray back-ground of the last days of the conflict, a tender and appealing romance of loyal love and unswerving devotion. The whole 30' 178.0 feet along production, from beginning to end, is fraught with the spirit of 28.0 feet along those great days when an anxious word from the seething battle when the forces of humanity came to final grip with the ruthless might of autocracy, and it echoes the great cry of joy that sounded round the world when the Hun line crumbled before the Allied attack and fled backward toward the sheltering frontiers of Germany to sue for peace.

Into the midst of these stirring scenes of immeasurable portent, there makes its way the gentle romance of Nanette, an American war is begun, as war progresses again when the giant guns thunder their challenge on the fields of France. Thither John goes as an officer in the Royal Flying Corps and there Nanette, hearkening to the cries of the homeless and motherless children, follows in the garb of the Red Cross.

There comes the last great Hun attack-the last terrifying drive toward Paris-when Chateau Thierry became another Verdun and the might of America, thrown into the balance, stayed the enemy, halted him and finally drove him back, until his retreat be came a rout and he cried aloud for peace. Graphically, all the hopes, the prayers, the fears, the faith that stirred the heart of humanity in those days of vast import are reflected in the Allen Holubar romance of the war.

In the confusion and chaos of attack and counter-attack, John and Nanette, servants of the great cause, drawn by their love. are once more brought together and the scenes shift from the fields of Flanders back to the Canadian lands of the whispering pines where the benediction of the world peace finds them reunited in their love.

The role of Nanette is played Stowell is seen as John Patricia and others in the large cast include such well-known players as Walt Whitman, Robert Anderson, Frank Braidwood, George Hackathorn, little Gloria Joy Margaret Mann and Lloyd Hughes.

### A Health Crusade

There is a modern health crus ade on among the schools of the are eleven planned to promote cleanliness and health. Some of the hands before meals, keeping neck, ears, and fingernails clean, brushing the teeth, getting plenty of sleep and fresh air, etc.

The school children are being enrolled in a campaign for the accomplishment of these things, and trophies, prizes and certificates are being awarded to those who fulfil the requirements. There are now over three million children who have qualified as crusaders, and are more or less faithfully endeavoring to carry out the program.

Strange to say Texas leads with the largest contingent of this great army, with 310,000 recruits.

### Child Welfare

#### SUPERVISION AND REGISTRATION

A very significant conference was held in April last at Cannes. in the South of France, which has not received the publicity which it deserves. It was the medical conference of the Inter-Allied committee of Red Cross societies.

There were six sections of the conference as follows:-Nursing, Malaria, Tuberculosis, Child Wel fare, Venereal Disease, and Preventive Medicine. The leading authorities on the various subjects, in the countries represented, were present and participated in the conference, and in the discussions which followed.

The Venereal disease section seems to have secured the fullest world hung breathlessly upon and most thorough treatment, with many far-reaching conclufront in Flanders. It reflects the sions of a practical nature, and 30' 86.0 feet along hush that fell upon civilization consequent measures of amelioration and reform.

Child welfare, perhaps came next in importance, due largely to the fact that the child is father of the man, and that attention to the children will forestall and prevent many of the evils of maturity.

There is a new and growing realization of the importance of eugenic considerations affecting the parents, and of care during the pre-natal period. An unduly girl reared in the northwood of high mortality of infants is due Canada, and of her Canadian to the inadequate care of the mother during this period. This mother during this period. This is a matter that is apt to be overthey are separated—to meet looked among simple and ignorant people, who are apt to hold that "It's time enough to think of the baby when it comes"

There should be a register in every community of expectant mothers, and they should be more or less under supervision and instruction, in the interest of their children.

Following birth the most important matter is that of nutriion. The essential thing is that the child should be kept under continuous observation and supervision. Everything possible should be done to promote breast feeding, as by far the most important means of vigorous and healthy growth, and the very best guarantee against infantile disease and mortality. The "bottle baby" is hopelessly handicapped in the race.

The conference presupposes, as the basis of all child welfare work, a complete registration of children in the community, beginning at the pre-natal period; and a complete personal knowledge of them in order that their condition may be watched and kept track of. This is, of course, more, or less, necessary and important, according to the degree of intelligence of the community. by Dorothy Phillips. William Where the parents are themselves so intelligent and responsible, that they can, and will, care for the well-being of their children, this outside supervision will not be so necessary.

Where, however, this intelligence and sense of responsibility are lacking, it must be supplied by child welfare interests,-and both parents and children must be educated along these lines.

It will readily be understood how important this intelligent supervision may be. A child shows a pre-disposition to tuber-Mainland. It is on the basis of culosis; unrecognized and un-"Health Chores" of which there checked, this tendency runs on into-a confirmed condition of disease, from which there may be them are as follows: Washing no chance of recovery. When recognized by the mother it is too late. Intelligent supervision on the part of child welfare interests might easily have forestalled the disease, and saved the child.

> This emphasizes the significance and importance of the school welfare committee, and the school nurse.

> The school is the one natural clearing house, where the children may be kept more or less fully under daily supervision from six to fourteen. Nothing in the way of child registration for those years can beat that. -:0:-

No session of Congress that was ever held was better worth watch-As a result of this campaign ing than the present session will there has been a run on tooth be. Most of us have learned brushes such as has never been during the war not to regard the been absolutely cleaned out-not have learned that the world is have stocked up with tooth-brush- ner in our thoughts; let us follow Companion.

The latest thing in summer outing is the aeroplane trip or the bidden areas. flying tour. And it promises to be not only perfectly feasible, but popular.

The aerial league of America, of which Admiral Peary is president, are going into the thing on a large scale, are securing planes and aeronauts, in large numbers, making reasonable rates and planning attractive tours which promise to make a strong appeal, especially to the live man, in search of something novel in the way of vacation outing.

The flying tours planned are of four kinds. One day tours for comparatively short runs; weekend tours from Friday to Sunday or Monday; vacation week tours for those who can take a week at a stretch for aerial touring; and finally 3000 mile tours, o fthe company. There will be a which will last say ten days.

The average travel for each rest rooms, reading rooms etc. day in these flying fours will be other things-meals, games, a cost of some \$175,000. sight-seeing etc.

Thus far we have not seen the schedule of rates, so that one hardly likes to book or order a long the rates will be published.

It would be kind of nice to close the office Saturday at noon and be at the Volcano in time for dinner and an evening trip into the crater, and return to Kanai the next afternoon refreshed and rested and ready for work, Monday morning-who knows but that may be possible before long.

Air Flight Problems . . . . . . . . . . . Not long ago, says the Youths Companion, an American lieutenant came sailing through the air

bought in Canada. lems which command of the air pret as very hot. The death rate will be likely to raise. There are claims to be only about half that elaborate provisions of ports of of San Francisco, New York or entry, all along the boundary Chicago; which may be so, or it between countries, to prevent may mean that many deaths fail smuggling, and the entry of con- to find a place in the records. traband. But when smuggling may go on, and contraband goods may enter through the vast Strawberry Plants for Sale stretches of the open sky, the facilities for smuggling take on a new aspect. Does it mean that the people of Kauai to raise their the whole boundary line between own fruit in their own gardens. the United States and British America must be steadily and flavor. faithfully patrolled to keep out dutiable goods?

And if so will the goods thus kept out ever pay for the cost of keeping them out?

Another problem is the capture and control of criminals. An evil-doer, with an aeroplane at his command, in a few hours may of his crime, and leave no trace diseases. of his going, on the way
