

## 3 (Land Titles Investigating Commission)

3. Land Titles Investigating Commission - Field work continues apace in gathering and collecting data relative to Land Titles and descriptions. Considerable progress has been made during the quarter. Aur Atoll with thirty six islands is complete. Arno is fifty per cent finished with thirty eight of ninety six islands including all large islands. Maloelap is finished for all practical purposes with five small islands remaining of sixty eight. Mille Atoll is complete for inhabited areas but there remains many small islands, thirteen of seventy four islands are finished. Majuro Atoll is perhaps fifty per cent finished - Majuro Island itself having developed into a considerable problem because of its large size and large number of individual parcels needing names not only of Iroi, Iroi erik, and alap, but many jerables (workers). A program was inaugurated on Wotje Atoll on the September field trip - it being our first visit there. Similar projects will be outline for Namorik, Jaluit, and Ebon Atolls on field trip scheduled for October.

~~4. Claims - None reported, none pending.~~
