Volume 19 Number 8 June 1940
These words and these pictures cannot tell you all that the University of Hawaii is and hopes to be. It can only suggest; it can only give you a glimpse of the teaching and the learning, a glance at the fun, a whiff of campus fragrance.

Here are strong white walls, vine-clad, palm-fringed; within them the student may discover for himself the learning of all peoples of the past. Here are flower-garlanded lawns; on them the scholar may glimpse the life of many peoples of today. Here in breeze-swept work-rooms youth examines the physical world. Here in the feathery shade of algaroba trees mingle young men and young women whose forebears represent the East and the West—here The Twain meet. And they work in harmony.
