

B (Health and Sanitation) 31 Mar 47
3 (Sub-Dispensaries, First Aid Stations, Etc.)

Yap District

The suggestion of establishing first aid stations has been placed before the district chiefs for consideration. It was recommended that there be a first aid station established in the vicinity of each field representative, except the district which borders the Native dispensary. The location of the station in the district is at the discretion of the respective chiefs, taking into consideration the geography and concentration of the people. If possible, a spot near the district school should be kept in mind, for it could be used as a place for large congregations.
