When the Unit ed States Congress provided a govern ment for these Islands it was intended that Hawaii should have an American system of government, and when the Legislature was empowered to provide a county system of government is is but reasonable to suppose that I was intended to give us an American system of county government; no such abaurd idea as the appointment by the Governor of county boards was contemplated. They don't do things that way in the States."

Chairman Cooper—"I am sure that we all agree with you, Mr. Turrill, that we want the people to elect the boards, but that is hardly the question before us. The proposition is, can we safely proceed to draw up a system of county government providing for the election of these boards and run the risk of having the act declared vold by the Su preme Court?"

#### ROOSEVELT'S ACCEPTANCE.

President Roosevelt's sueech of acceptance as a key note utterance is a strong supplement to the Republican platform. If sharp comparisons were drawn the remarks of the President might well be put down as superior to the somewhat ponderous declamations of the formal declaration of principles.

Koosevelt has a way of putting things that is snappy. His words appeal to the people. They require no political dictionary to determine whether he is standing pat or straddling, After recording his endeavor to carry out the policy so ably inaugurated by the late President McKinley, Roosevelt strikes out on a statement of what gives confidence in government, the secret of government success in the nation and every subdivision, the corner, stone of Republican success. He says: "Effective government comes only as

the result of the loyal co-operation of many different persons. The members of a legislative majority, the officers in the various departments of the administration, and the legislative and executive branches, as toward each other must work together with subordination of self to the common end of successful government. We who have been in trusted with power as public servants during the past seven years of administration and legislation now come be-fore the people content to be judged by our record of achievement. In the years that have gone by we have made the deed square with the word, and if we are continued in power we shall unswervingly follow out the great lines of public policy which the Republican party has already laid down-a public policy to which we are giving and shall give a united and therefore efficient

This assertion tallies with the facts of our national history. It is not a platitude covering a possibility or what ought to be. And for this reason the Republican party is safe in going before the people on its record. Says the President: "We are not constrained to keep silent on any vital question; we are divided on no vital question; our policy is continuous, and is the same for all sections and localities. Roosevelt tells the people that the trust laws have been enforced, the gold standard is a reality, protection will be upheld and reciprocity for the extension of foreign markets has been and will be carried out when it repre

Dealing with the vital labor and cap ital problem, the President says: "We have already shown in actual fact that our policy is to do fair and equal justice to all men, paying no heed to whether a man is rich or poor; paying no heed to his race, his creed or his birthplace. We recognize the organization of capital and the organization of labor as natural outcomes of ou industrial system. Each kind of or-ganization is to be favored so long as It acts in a spirit of justice and regard for the rights of others. Each is to be granted the full protection of the law and each in turn is to be held to a strict observance of the law; for no an is above it and no man below it. The humblest individual is to have his rights safeguarded as scrupulously as those of the strongest organization for each is to receive justice, no more and no less. The problems with which we have to deal in our modern indus trial and social life are manifold, but the spirit in which it is necessary to approach their solution is simply the spirit of honesty, of courage and of common sense."
