10 FORT STREET

Here are a few
 Timely Sayings
 Suitable for the
 Season . . .

A bargain in time is doubly a bargain.
 A man's wardrobe is never too full of lies.
 Don't take our word for it. Come and see.
 The Kash—that name stands for progress.
 Everything man or boy wears from hose to hats.
 Keep your eye on our windows. You'll not go astray.
 You need not go any farther than right here for the best.
 We're taking other folk's valuation and quoting our price for it.
 Just as natural for us to lead in variety and value as it is for others to follow.
 Some clothing is made to sell; some to wear. Some clothing is made for both. That is our kind.
 Don't imagine that Kash shirts will never wear out. They will, but they will last longer and fit better than other makes.

Our Neckwear
 For the Holidays

IS UNSURPASSED IN
 QUANTITY, QUALITY
 AND PRICE.

BOXING COMPASS A NEW

HYDROGRAPHIC OFFICE PROPOSES NEW SYSTEM.
Would Do Away With "Points" and Describe Courses by Degrees Only. The New System Described.

The United States Hydrographic office has decided that a simplified compass is a necessity of the new century. It considers the "points" superfluous and suggests a much simpler contrivance, which it claims will give better results. In order to obtain the opinion of shipmasters the world over it has issued a circular accompanied by a diagram of the new compass and a copy of each has been furnished or will be furnished to every ship captain in United States ports. Every captain will be asked to forward his opinion on the proposed change, and if the majority are favorable to it, then Uncle Sam will adopt the new compass for use on all American vessels.

The circumference of the card is divided into the usual 360 degrees and marked continuously to the right, from 0° at north to 360° at east, 180° at south, 270° at west, and 360° at north. The card is subdivided as follows:
(a) Into divisions of 10 degrees, accentuated by heavy lines on the graduated rim, and by suitable geometric figures on the card, each 10-degree division of the card being indicated in figures by its appropriate number from 0° or north.
(b) Each 10-degree division of the card is further subdivided into half and quarter divisions and appropriately marked.
(c) Every fifth-degree line of the graduated circle between the 10-degree divisions is marked in figures, indicating its appropriate number from 0° or north.
(d) The cardinal and intercardinal directions are emphasized on the card in geometric figures.

The present card contains points and degrees. The conversion of one into the other is a natural result of the presence of both, but is not a necessity, as would speedily be recognized were the points omitted. Accuracy requires expression in degrees for courses, bearings and compass errors, and not in points, the use of which is but a duplication of work. A comparison of a few leading features of the present system with that proposed is given below:

PRESENT CARD.
360=32 points.
1 point=11.25°.
1/2 point=5.625°.
1/4 point=2.8125°.
Graduated circle is marked in degrees in each quadrant, from 0° at north and south to 90° at east and west.
The fifth point is NE. by E. or N. 56 1/4 E.
The thirteenth point is SE. by S. or 33 1/2 E.
The course is S. 18° E. or S. by E. 1/2 E.
Easterly deviation is additive in the NE. and SW. quadrants; subtractive in the SE. and NW. quadrants, to compass course to get magnetic.
Westerly deviation is subtractive in NE. and SW. quadrants; additive in SE. and NW. quadrants, to compass course to get magnetic.

PROPOSED CARD.
360=36 divisions.
1 division=10°.
1/2 division=5°.
1/4 division=2.5°.
Graduated circle is marked in degrees continuously to the right from 0° at north to 360° at north again.
The fifth division is 50°, a multiple of 10°.
The thirteenth division is 130°, a multiple of 10°.
The course is 162°.
Easterly deviation is always additive to compass course to get magnetic.
Westerly deviation is always subtractive from compass course to get magnetic.

In line with the proposed card, the compass rose on the chart should be marked from 0° at north continuously to the right to 360°, omitting the present system of points. The sailing directions should give courses and bearings in degrees, and not in points. The azimuth tables would require only a few changes in the rules.
It is believed that the proposed markings of the compass card would result in greater accuracy in navigation in its relation to the compass. Courses would be laid in degrees and more accurately noted, as the approximate course of SW. by W. 1/4 W. "a little westerly," for example, would be replaced by the exact course of 210°. Chances of error in the application of the deviation to compass courses would be lessened. Conversion of points into degrees and the reverse would be eliminated from the problem. Boxing the compass would be a matter of a few minutes' instruction to the layman of average intelligence. Sailing directions would be simplified. All work in relation to the compass would be facilitated.

Note Heads, Bill Heads, Statements and Fine Commercial Printing at the Star Office.

FRANCIS MURPHY'S FIRST
HIS LECTURE IN CENTRAL UNION LAST EVENING.
A powerful Address in the Cause of Temperance Meets with a Generous and General Response.
Francis Murphy delivered his first temperance lecture in Central Union church last evening. The church was very well filled, there being about 400 present in spite of the heavy and continuous rain.
The lecturer spoke in a simple, friendly way for a half hour. It was a humane appeal striking everyone; the audience followed the address with intense interest, and it could be seen at all times that it was being swayed by the wisdom and honesty and earnestness of the speaker. Mr. Murphy did not upbraid; he said no word that cut or could offend. His appeal was softened into a gentle talk that went home to the hearts of all.
Chairs and small tables were provided for the signing of the pledge. There is a part of the lecturer's responsibility. He has found after years of experience that the signing of a pledge perpetuates about one hundred signed the pledge and donned the blue ribbon. Among those who signed the pledge are said to be a number who have not been total abstainers in the past.
During the service, excellent music was furnished by the regular choir and Prof. Ingalls. "Come Unto Me" was sung by H. F. Wichman.
Another meeting will be held this evening and each evening of the week. The lectures will continue in the same way, and there will be special music. On Saturday evening it is proposed to have a specially great meeting.

AGGRAVATION DEFEATS BROOK.
In the race at Kapiolani park track Saturday Aggravation won after a spirited and exciting contest. It was a three-eighths mile dash. Brook took the pole but could not hold it and was beaten by a length and a half. Time, 28.

DIED.
BIRT—in this city, January 12, 1901, Isabel Irvine, daughter of Mr. and Mrs. J. W. Birt, age two years, 1 1/2 months.

DELINQUENT STOCK SOLD.
Jas. F. Morgan sold 507 shares of delinquent McIlroy stock Saturday noon. There was 65 per cent paid and the price ranged from \$2 to \$7.50, the average being about \$7.50. This is about the same that the stock brings on the exchange. The sale of the one year lease of the property on Nuuanu, near corner of King and Kaulaiki streets was postponed until next Thursday. An auction sale of unfinished cargoes, an unfinished dump cart and a finished lumber cart to satisfy attachment proceedings by Gus Schuman against Quong Fook Tai a Chinese carpenter, netted \$112 at noon on Saturday. The claim was for \$283.95.

Fine Job Printing, Star Office.

IMPORTANT EXPERIMENTS.

Two interesting and important labor experiments are in progress on the island of Maui, one being with the much-advertised Porto Ricans and the other with the negroes that have just arrived from Tennessee. In both cases the experiment is to be repeated on a larger scale, for already there are about 500 men, women and children on the way from Porto Rico, and it is said that Waituku plantation will take a thousand more negroes, if terms can be arranged with Colonel Bean, who brought those now here.

The negroes want better living than the other classes of labor. They will not sleep on floors and they want some chairs and other furniture in their rooms. They also expect to eat more meat. It is calculated that the Hawaiian money wage rate is about equal to what they receive in the South, where \$30 a month is about an average, for the class of people coming here, and where the workmen have to pay for rooms, fuel, etc. In the south they do not work all the year round, while in Hawaii they will be able to keep employed constantly.

The twenty-one negroes are working at Waituku but their wage rate has not been decided yet. They were not engaged at any definite rate, but were brought here by Colonel Bean as an experiment. Manager Wells speaks well of them, and has been negotiating for more.

Colonel Bean, like other investigators who have been here lately, thinks that the territory of Hawaii is a splendid place for workmen of the class now being brought here. "It is the best labor proposition that I know of for such people," he said.

Colonel Bean expects to leave for home on the China, next Friday. He will probably take with him an order from the Planters' Association for two or three thousand negroes, for various plantations.

The advent of the negro adds another race to an already large number of races at work on Maui and makes Lahaina and Waituku the homes of a population of much diversity. Pioneer plantation has Japanese, Chinese, natives, Portuguese, Porto Ricans, Italians, negroes and South Sea Islanders at work, besides white men of various nationalities. The Japs are in a majority numbering about two-thirds of the total force, but this condition is slowly changing, and the change is a very welcome one. There is no doubt that many planters regret the large influx of Japanese, who have proved very troublesome lately and anything but industrious.

The millennium must certainly be on its way hither, coming by way of Maui, and not as some have believed with yawning graves and general cataclysm. But gently, as a soothing spirit. Listen! It is the flute-like note of the Maui News and not the blast of Gabriel's trumpet:

"With the impulse of material development which has come to Waituku, it is gratifying in the extreme that there has also come a revival of social intercourse. Old differences, real or imaginary, have been relegated to the nineteenth century. Eyes that looked askance now look into eyes and meet an encouraging smile. Hands formerly withheld now grasp hands in friendly greeting, and the people of Waituku, forgetting old differences, are uniting to form a delightful and enjoyable society, worthy of our growing town. This is quite as it should be, and any merit which the News may claim for having directly or indirectly helped to accomplish this should be its proudest boast."

A MICROCOSM.

Another steamer line added to those we already have, is proof of the progress and development of the territory. What with the new steamers of the Oceanic Company, the monster freighters of the Hawaiian-American line and the steamers of the new Seattle line, it is probable that we have seen pretty nearly the last of the round the Horn sailing fleet. Though for a time there may continue to be some cargoes of sugar go around the Horn by sailing vessel, more and more of the crop will go by steam either to the coast or through the Straits of Magellan. The completion of the Nicaragua canal will completely end the round the Horn voyages.

Hawaii has seen many changes in the course of Ocean traffic. In the very early days there was a considerable direct trade by sailing vessels with Manila and Mexico. This trade gave way in time to the growing trade with San Francisco and the steamship route from Hongkong to San Francisco.

In the heyday of the whale fishery, these islands were the rendezvous of the whale fleet, and a commerce peculiar to this trade grew up that made many rich, though it has left its effects and some of them not altogether happy ones, on the islands.

Before the first trans-continental railway was built, much of the passen-

...or principal means, is within the memory of many. The round the horn sugar fleet with its princely cargoes was a part of the development of the sugar industry. Now a still further development of that industry kills it. Such is one of the apparent paradoxes of commerce.

Hawaii is truly a microcosm, wherein, almost as in a laboratory the earnest and careful student may see the working of the various factors which make up commerce. They can be seen here, as they can almost nowhere else. And hence in this as in many other respects, Hawaii offers a peculiarly inviting field to the student of economics.

Silver is likely to have an evil effect upon Mexico. Bryan went to Mexico to study the silver question but no one ever heard of the results of his investigation. At the present moment Mexico is on the verge of national bankruptcy through its silver standard. Had Bryan got the vote in the United States, it would only have taken a year or two to bring about like conditions there.

Yesterday's rain continuous but gentle, without rioting in cloudbursts or foaming away in torrents, did an incalculable amount of good. It will go far to filling up the underground reservoirs, the source of our artesian supply, and itself one of the foundations of our industrial system. Up to 9 o'clock this morning 1.71 inches fell at Punahou and 2.10 inches at Luakaha. Heavy rains fell all over the west end of Oahu. Ewa and Oahu plantations received their share.

President Pritchell of the Massachusetts Institute of Technology has been making a calculation as to the future population of the United States at its present rate of increase. Given that in 1900, the population is 77,472,000 ten years advance would put it at 94,673,000. Fifty years advance will reach 190,749,000, one hundred years would see the population 385,860,000, and in 2,000, when the calculator stops he has reached 40,852,273,000. Fortunately for the world, disease and war tend to keep down the population. Some of our most terrible disasters may therefore be really blessings in disguise for the human race at large.

The investigations which The Star has made regarding the Porto Ricans, shows very clearly that in coming to Hawaii the Porto Ricans have vastly bettered themselves. In a strange country and exposed to the homesickness which comes to all, they yet express themselves as satisfied with their life. Taking the most rosy views of the wages received in their native land, which any of them express, it is clear that they will now receive as their minimum pay as much as their maximum was in Porto Rico. In other words, they are beginning here with large opportunities for improvement, where they left off in their own country having reached the end of their opportunities there.

It is to be hoped that in the balancing of advantages the territory will gain as much from them, as they will from the territory.

The Research Club is to be congratulated on taking up the subject of the readjustment of taxes and taxation. This is one of the most important subjects to come before the legislature. This is a peculiarly opportune time for Hawaii to thoroughly consider the whole subject of revenue and taxation. No class of legislation can do as much harm or as much good to a country or a community as legislation in regard to taxation. The subject of taxation is engaging public and legislative attention in probably half the states of the union. A number of states have lately appointed commissions to investigate and report on this subject, among them Colorado. It seems probable that much of value to Hawaii could be gained from the reports of these commissions.

The heavens seem to approve Francis Murphy's cold water gospel.

With snow on Mauna Kea and Haleakala the bibulous citizen may feel some justification for getting a "skate" on.

There are queer days in life when everything we touch seems to fall over or tumble to pieces.

Truth has abandoned the contract of trying to be stranger than modern fiction.

Years reconcile man to gray hairs; and gray hairs reconcile him to his years.

The man who marries a school teacher loses his old-time privilege of calling somersaults "somersets."

The Kahn bill may not pass at this session of Congress, almost certainly will not. But that is only a reason why Hawaii should gird her loins to prevent its passage at the next or any session of congress.

CANE FIRE.
 WAILUKU, January 12—On Wednesday a cane fire occurred at Spreckelsville, some 20 acres being burned over. It was ripe cane and is being cut and milled at once so that the loss will be minimal. The fire was supposed to have originated from flying sparks from a passing engine.

Like the flight of the swiftest bird is the progress of a hacking cough into consumption. First a cold, then a settled cough, then slow fever, night sweats, and hemorrhages. Don't neglect your cough. Stop it at once and drive away all thought of consumption. Begin as early as possible—the sooner the better—to take

Ayer's Cherry Pectoral

the most effective remedy for coughs of every kind and in every stage. One of the most annoying coughs is a throat cough, where you have that constant tickling in your throat. It comes on worse at night, keeps you awake, and makes you have that smothered feeling in the chest. It hardly seems possible what one dose of Cherry Pectoral will do for this kind of a cough, it brings such marked relief.

Put up in large and small bottles. When the cough gets down deep in the chest and the lungs are painful, put one of Ayer's Cherry Pectoral Plasters directly over the tender lung. It will draw out all the soreness.

Prepared by Dr. J. C. Ayer Co., Lowell, Mass., U. S. A.

SEATTLE ASKED TO DIG UP

IF IT WANTS TO BUILD BATTLESHIP.

Moran Brothers Will Have to Be Aided By Public Subscriptions to the Extent of \$100,000.

SEATTLE December 21.—The people of Seattle must decide whether or not a battleship is to be built on Puget sound. Moran Brothers Company by sealing their bid \$116,000 brought it down below the offers of their competitors. Their bid of \$2,827,000 is the lowest of the four that will be considered in awarding the contracts for the construction of the three sheathed battleships.

All of these bids are, however, above the limit of cost fixed by congress and before the contracts can be let it will be necessary for the three successful bidders to scale their figures. The Eastern concern must cut down to \$2,500,000. The Pacific coast bidders are allowed a margin of 1 per cent because of the expense of hauling freight across the continent. This margin gives the Morans an advantage over their competitors of \$14,000, but their present bid must be cut to \$2,744,000 before they can receive the work.

The contract for the great battleship is there to be had for the asking, but before it can be secured a second auction, this time of substantially \$190,000, must be made in the bid. Moran Brothers Company have reduced to their limit. The original bid was figured on a close basis. It has already been cut \$16,000.

Moran Brothers Company ask no bonus. They feel that they cannot attempt the contract at the further reduction necessary. It is not desired however, to abandon so important a proposition without submitting it to the people of Seattle. If they decide that the immediate public benefits to be derived from the work in the shape of a pay roll of \$60,000 a month and the general benefits from the advertising the city will receive are worth \$100,000 to the city at large and that such is offered the contract will be accepted and the work will be done.

The raising of the battleship fund is not to be by cash contributions. The money is to be pledged in the shape of subsidy notes, without interest, payable when the ship is launched.

A special meeting of the Chamber of Commerce is to be held at 11 o'clock this morning to submit the proposition to the business men of the city.

SNOW IS ON HALEAKALA.

Paia's Adventurous Young Men Passed Night on Summit.

PAIA, Maui, January 12.—Snow has been seen quite thick several days this week on the summit of old Haleakala, and the weather has been quite chilly. A party of young men from Paia are to brave the elements and the cold tonight, and pass the night on the summit.

HILO, January 10.—Snow still caps the summit of Mauna Kea. The thermometer at the Barbour residence, Kailua, registered 56 degrees one morning last week.

MAUI HAS THE GRIP.

PAIA, Maui, January 12.—Maui is afflicted at present with quite an epidemic of colds and grip, the unsettled weather probably being responsible for it.

HONOLULU PEOPLE AT PAIA.

PAIA, Maui, January 12.—Dr. Raymond and F. M. Hatch paid the island a brief visit this week.

WANTS HONOLULU PREACHER.

PAIA, Maui, January 12.—A meeting of the Religious Society of the Makawao Foreign church was held last night and it was decided to secure if possible a minister from Honolulu, to supply the pulpit for a couple of months in order to allow Dr. Beckwith a rest in which to recuperate.

DEATH OF MRS. WALL.

HILO, January 11.—Mrs. Allan Wall, who has been for a long time a sufferer from an affection of the heart, passed away on Sunday night at her home, in Hilo. The funeral was held from the residence on Monday last, and was largely attended by the many friends of the deceased and of her bereaved husband.—The Tribune.

ADMITTED TO PRACTICE.

HILO, January 11.—G. F. Alfonso was admitted to practice law in the lower courts of the Territory last week.

RETURNS FROM EUROPE.

HILO, January 11.—Miss Ivy Richardson, who has spent something more than a year traveling in the United States, England and the continent of Europe, returned to Hilo by Wednesday's Claudine.—Hilo Tribune.

TO PREVENT POSTAL CHEATING.

"For more than a year past," says The Philadelphia Record, "the Treasury Department has been defrauded of thousands of dollars by the washing of cancelled revenue stamps. Those engaged in the business have secured cancelled stamps of all denominations, washed them clean, regummed them and sold them. Now, however, the Treasury chemists have found an olive gray ink for the stamp itself which will fade away if any attempt shall be made to wash out the cancellation mark. Unfortunately it has proved impossible to blend this fugitive ink with any chemical producing an agreeable color, and beauty has therefore been sacrificed to safety. The design of the battleship Maine will be retained."

A CAUTIOUS ANSWER.

A cautious answer—"Where is Josiah?" asked Mrs. Cornstossel, unceremoniously. "Well," answered her husband as he proceeded to fill his pipe; "I won't say for certain. If the ice is as strong as he thinks it is, he's gone skating, and if it ain't, he's gone swimming."—Washington Star.

GENEROUS.

The country editor—"You know the woman I hired to clean the press-room?" "The compositor—"The one you didn't pay?" "That's the one. She was in here today, and she said if she didn't get her money she'd come around and clean out the whole place. Isn't she generous?"—Yonkers Statesman.

HOW FORTUNATE!

Of course the duke of Manchester married for love, but being a bankrupt how exceedingly fortunate it was for him that he happened to fall in love with a girl worth a million dollars.—Chicago Record.

A PROMINENT CHICAGO WOMAN SPEAKS.

Prof. Roxa Tylor of Chicago, Vice-President Illinois Woman's Alliance, in speaking of Chamberlain's Cough Remedy, says: "I suffered with a severe cold this winter which threaten-

ed to run into pneumonia. I tried different remedies but I seemed to grow worse and the medicine upset my stomach. A friend advised me to try Chamberlain's Cough Remedy and I found it was pleasant to take and it relieved me at once. I am now entirely recovered, saved a doctor's bill, time and suffering, and I will never be without this splendid medicine again." For sale by all dealers, Benson, Smith & Company, general agents Hawaiian Islands.

Note Heads, Bill Heads, Letter Heads printing neatly and promptly executed and all kinds of Job and Commercial at the Star Office.
