WHAT IS THIS DISEASE THAT IS COMING UPON US?

Like a thief at night it steals in upon us unawares. Many persons have pains about the chest and sides, and sometimes in the back. They feel dull and sleepy; the mouth has a bad taste, especially in the morning. A sort of sticky slime collects about the teeth. The appetite is poor. There is a feeling like a heavy load on the stomach; sometimes a faint all-gone sensation at the pit of the stomach which food does not satisfy. The eyes are sunken, the hands and feet become cold and clammy. After a while a cough sets in at first dry, but after a few months it is attended with a greenish coloured expectoration. The afflicted one feels tired all the while, and sleep does not seem to afford any rest. After a time he becomes nervous, irritable, and gloomy, and has evil forebodings. There is a giddiness, a sort of whirling sensation in the head when rising up suddenly. The bowels become constive; the skin is dry and hot at times; the blood becomes thick and stagnant; the whites of the eyes become tinged with yellow, the urine is scanty and high-coloured, depositing a sediment after standing. There is frequently a spitting up of the food, sometimes with a sour taste, and sometimes with a sweetish taste; this is frequently attended with palpitation of the heart; the vision becomes impaired with spots before the eyes; there is a feeling of great prostration and weakness. All of these symptoms are in turn present. It is thought that nearly one-third of our population has this disease in some of its varied forms. It has been found that medical men have mistaken the nature of this disease. Some have treated it for a liver complaint, others for kidney disease, etc., but none of the various kinds of treatment have been attended with success, because the remedy should be such as to act harmoniously upon each one of these organs, and upon the stomach as well; for in Dyspepsia (for this is really what the disease is) all of these organs partake of this disease and require a remedy that will act upon all at the same time. Seigel's Curative Syrup acts like a charm in this class of complaints, giving almost immediate relief. The following letters from chemists of standing in the community where they live show in what estimation the article is held.

John Archer, Hartill, near Sheffield:—I can confidently recommend it to all who may be suffering from liver or stomach complaints, having the testimony of my customers, who have derived great benefit from the Syrup and Pills. The sale is increasing wonderfully.

Geo. A. Webb, 141, York Street, Belfast:—I have sold a large quantity, and the parties have testified to its being what you represent it.

J. S. Metcalfe, 55, Highgate, Kendal:—I have always great pleasure in recommending the Curative Syrup, for I have never known a case in which it has not relieved or cured, and I have sold many grosses.

Robt. G. Gould, 27, High Street, Andover:—I have always take a great interest in your medicines and I have recommended them, as I have found numerous cases of cure from their use.

Thomas Chapman, West Auckland:—I find that the trade steadily increases. I sell more of your medicines than any other kind.

N. Darroll, Clun, Salop:—All who buy it are pleased, and recommend it.

Jos. Balkwill, A. P. S., Kingsbridge:—The public seem to appreciate their great value.

A. Armstrong, Market Street, Dalton-in-Furness:—It is needless for me to say that your valuable medicines have great sale in this district—greater than any other I know of, giving great satisfaction.

Robt. Laine, Melksham:—I can well recommend the Curative Syrup from having proved its efficacy for indigestion myself.

Frickheim, Arbroath, Forfarshire, Sept. 23, 1882. Dear Sir,—Last year I sent you a letter recommending Mother Seigel's Syrup. I have very much pleasure in still bearing testimony to the very satisfactory results of the famed Syrup and Pills. Most patent medicines die out with me, but Mother Seigel has had a steady sale ever since I commenced, and is still in great demand as when I first began to sell the medicine. The cures which have come under my notice are chiefly those of liver complaint and general debility.

A certain minister in my neighbourhood says it is the only thing which has benefited him and restored him to his normal condition of health after being unable to preach for a considerable length of time. I could mention also a great many other cases, but space would not allow. A near friend of mine, who is very much addicted to costiveness, or constipation, finds that Mother Seigel's Pills are the only pills which suit his complaint. All other pills cause a reaction which is very annoying. Mother Seigel's Pills do not leave a bad after-effect. I have much pleasure in recommending again to suffering humanity Mother Seigel's medicines, which are no sham. If this letter is of any service you can publish it.

Yours very truly,
William S. Glass, Chemist.
A. J. White, Esq.

15th August, 1883.

Dear Sir,—I write to tell you that Mr. Henry Hillier, of Yatesbury, Wilts, informs me that he suffered from a severe form of indigestion for upwards of four years, and took no end of doctor's medicine without the slightest benefit, and declares Mother Seigel's Syrup which he got from me has saved his life.

Yours truly,
N. Webb,
Chemist, Calne.

HOPE FOR THE SUFFERER.

Our Government bears upon its shoulders a responsibility, which, if not altogether peculiar to this country, is not common to most other countries. What constitutes this special responsibility is the presence of a contagious disease, generally believed to be incurable. The difficulty of dealing with this evil is commensurate with the responsibility it imposes. This latter fact is too frequently ignored by critics. The law of the land demands segregation, and, so long as the dogma of positive and absolute incurability passes as an axiom, this will probably be accepted as the only method of stopping the spread and extinguishing the existence of this pitiless enemy. As a corollary of the dogma just now referred to, there is a disposition on the part of the intelligent public to regard the rigid enforcement of the law to segregate as the first and last duty of the Board of Health. Although fully and unreservedly endorsing a policy of strict and uncompromising segregation, we venture the opinion that the incurability theory has been too hastily adopted. It should be said, however, in justice to the present administration, that the possibility of cure has been practically admitted by securing the services of a competent scientist, to investigate and experiment, with the view of discovering a remedy.

In an article on this subject, the BULLETIN of Feb. 8th, 1883, expressed the following opinion:—"We have always considered it one of the first duties of the Hawaiian Government to do everything possible for the absolute obliteration of this loathsome disease, not merely by isolating the afflicted ones and thereby causing it in time to run itself out for want of fresh material on which to subsist, but by using every means to discover a positive cure for the malady. We do not subscribe to the popular notion, that because nobody has hitherto discovered a remedy nobody ever will discover one, or that because all past attempts to cure have been ineffectual all future attempts must necessarily share a like fate. As the world grows older, knowledge increases and new discoveries are being made daily. Many things that were considered impossibilities a few years ago are now accepted facts. We do not assert that leprosy is curable, but we do say that its absolute incurability is not mathematically proven; and until such incontrovertible evidence is forthcoming it is the duty of the Government, as conservator of the public good, to seek industriously and perseveringly for an antidote to the great evil. We do not see how this duty can be better performed than by engaging a gentleman of a scientific cast of mind and scientific attainments, and withal an enthusiast in his profession, to devote his entire time and attention to this one matter. If remedy there be, we look for its discovery, not to blind empiricism,

but to scientific research. Experiments aiming at cure, based on microscopical and chemical investigation, are more likely to succeed than any conducted without an exact knowledge of the nature of the disease."

Since the foregoing expression of opinion was first published, the "gentleman of scientific attainments," therein referred to, Dr. Arning, has arrived and has been patiently pursuing his investigations at Kakaako. In his report to the President of the Board of Health, which is incorporated in the President's report to the Legislature, he gives a virtual endorsement of the BULLETIN's opinion, in the following language:—"We ought never, for a moment, to accept the saying of the incurability of leprosy as true; but ought to go on fighting against it. Perhaps we have been on the wrong track of treatment, and there is yet a solution of the problem to be found. The recent experiences concerning the germ nature of disease may be the means of showing us the path of rational treatment; and they must and do give a new impulse and new encouragement to us to persevere in trying and experimenting."

Thus Dr. Arning enters a most positive protest against the acceptance, as true, of the idea of hopeless incurability, and urges to persistent efforts in quest of remedies. Encouragement from such a source should certainly inspire hope and strengthen endeavor. We are unwilling to believe that any disease is without its antidote, although the antidote may not be known.

EDITORIAL NOTES.

We hope our suggestion to have a Celebration Committee appointed without delay, to prepare for the King's Birthday, will not be neglected. To have proper arrangements made in advance would enhance the enjoyment of the day to everybody.

The insistence by the *Advertiser* that the location of a fire should be immediately indicated on the Tower bell is timely. The authorities should not have to be told such a thing, and with a complete telephone system there is no excuse for such a delay as occurred yesterday in getting on water.

The jolly editor of the *Advertiser* fortifies himself for a trip to the Coast by the Mariposa, in a leading article giving advice to seafarers. He will, however, likely find an inconvenient vacuum in his resolution reservoir, which will beat all his philosophy to overcome till he meets the aroma of California soil.

A correspondent writes to enquire if the trustees of a certain church expect the pew-holders to do the dusting. We should answer him by enquiring if he does not think it would be better to prefer the complaint directly to the trustees than through a newspaper. It seems to us inexpedient to single out one church for a neglect chargeable to the keepers of other churches as well.

Our brave firemen will pardon us for the opinion that they would do more effective work by playing lower than they do in fighting fire. When water is thrown on the top of a fire, most of its efficacy flies upward in steam, but when it is thrown into the lowest area of combustion the rising steam does as much in putting out the flames above as the water does beneath. The most experienced firemen in cities abroad invariably fight a fire from the bottom upward.

Some of our retail merchants claim to have a grievance in wholesale men selling small parcels of goods to consumers at lower prices, even, than the retailers can afford to sell the same merchandise for. Such a practice is certainly not legitimate trade, and, unless the Chamber of Commerce can find means to put an end to it, some day there may be combinations of retailers to do their own importing, which would entail serious consequences to the wholesale guild.

As regards the circulation of the foreign silver coin called in, referred to by a correspondent, we believe it

would all disappear in good time if the merchants would only cease paying it out to their customers for change. If they persist in keeping it aloft, customers will either have to decline taking the condemned currency or take the trouble of carrying all the odd dollars, halves and quarters they get of it to the Treasury for exchange. The merchants will, however, probably solve the question by doing what appears to be the reasonable and right thing on their part.

It is suspected that a good deal of illicit liquor distilling is prevalent in the out districts. The only remedy we can support is the unconditional suppression of the offence. It has not its origin in the necessities of the people, but in the cupidity of the lawless operators. Contrary to the apparent view of our correspondent, which we know many share with him, we should prefer grog-selling in spite of law than by the sanction of law. If the law of 1882 is good so far as it goes, then its mere passage was so much gained for the right, its even partial enforcement is so much better and its thorough enforcement is what is due from the authorities.

CORRESPONDENCE.

Correspondence is solicited on the topics of the day, or what may become so. We reserve the right to excise purely personal matter.

We do not hold ourselves responsible for the opinions expressed by our correspondents.—E.

THE REGATTA.

EDITOR BULLETIN:—His Majesty's birthday will soon be at hand, and I suppose the usual regatta will take place on that day as in previous years. Therefore it may not be too late to make a suggestion that the starting-point of the races should be changed to some spot where all the spectators could have a good view of the races from start to finish. Of course our harbor having such an irregular shore-line, this will be somewhat difficult, but I opine that those well acquainted with the harbor could suggest such a spot. I am sure that the spectators on the occasion will be thankful if the suggestion is carried out, for one of the most aggravating things to a spectator of a race is to be blocked out of the view at any exciting point in the race, and this has been frequently felt in past years. Hoping to see the matter taken up, I am, sir,

A WOULD-BE SPECTATOR.

ILLICIT STILLS.

EDITOR BULLETIN:—When the liquor law of 1882 was passed one of the chief arguments used in its favor was that it would prevent the illicit distillation of liquor, previously carried on to an enormous extent in the country districts. For a time my experience made me believe that this was the case, but during the last few months I am led to believe that more liquor has been secretly manufactured in the country districts than during any corresponding period under the old law. If this is actually the case, then the law of 1882 does not effect all that was claimed for it, or else its execution is not as fully and thoroughly attended to as it ought to be. It is of no use having laws or sections of laws on our statute books that are not properly enforced. It only encourages a growth of criminal sentiment among the population, for they know that by breaking the law they are criminals, and they also know that the law will not be enforced by the proper officials. Perhaps if licensed houses were established in the country districts, as may be done, I believe, by the King in Privy Council, this and the evil of sly grog-selling might be restrained if not altogether suppressed.

ANTI-LIQUOR LAW.

THE CURRENCY.

EDITOR BULLETIN:—When the Kalakaua dollars were first brought down a great howl was raised that the country was ruined and that we had too much silver. In consequence the Legislature passed an enactment to enable all other silver coins, but American and Hawaiian, to be removed from circulation and replaced with gold. I see from a contemporary of yours that, although half of the specified time for the redemption of these coins has passed, many of them are still in circulation. Either, then, the original cry that we had

too much silver was not true, or else people have not been sufficiently apprised of their duty in the matter. A word of warning from all the newspapers—Hawaiian and English—might have the effect of causing all these coins to be sent in.

EXCHANGE.

A Paris despatch of August 20th announces that Captain Renard, inventor of the navigable balloon, claims that the problem of aerial navigation has been completely solved and is now only a question of time and money. He claims that he could insure a balloon postal system as easily as by railroad, and could construct balloons, each one of which could carry over a hundred soldiers.

A great fire occurred at Fonda, New York, starting in a newspaper office. The newspaper had an article against roughs and corner loungers, and some of those gentry were heard to declare it would not repeat the remarks the next week. In a few hours after the paper came out the fire started.

ROBT. DONNOLLY, manufacturer of Soda Water, Ginger Beer, Root Beer and Spice Beer, will offer to the public on Saturday, cooling drinks superior to any in the Hawaiian Islands. The drinks mentioned above are manufactured at my Soda Works, back of Rose Cottage. One trial of my Arctic Soda will pronounce it the best in the city. My syrups are imported from London, comprise the choicest of English fruits, namely—Gooseberry, Cherry, Pear, Raspberry, Strawberry, Lemon, Red Currant, Black Currant and Pine Apple, Sarsaparilla, Ginger, Orange and Vanilla. Any of these fruits at

5 cts per Glass.

My motto is, to give a superior article even if it cost more, and thereby ensure speedy sales.

With my **GINGER BEER, ROOT BEER and SPRUCE BEER**, I have been at a heavy expense experimenting on them, so as to give the public drinks that will be both strengthening and refreshing in this climate. I guarantee them strictly **VEGETABLE**, no **MINE-RALS** employed. I use some of the finest medicinal herbs that grow in the States. The public wants a drink with some nutriment in it, this you find in my beers that strengthen the body as well as dilute the blood for purposes of a more easy flow through the system. They can be taken by any one as they are absolutely pure. They are the most enjoyable thirst quenchers ever introduced. I will sell them at prices to suit one and all.

SIMPLE Simon went down the street to buy himself a paper. He got for naught the Sunset sheet, and didn't he cut a caper! But when he found the news was scarce, on'ts back as well as front side, he heaved a sigh as he said, "O curse, I have been badly grieved."
