

B (Health and San)
2 (Lepros.)

30 Sept 1947

Yap Dist.

- (a) No change since last report.
- (b) Eleven more lepers were diagnosed by biopsies which were sent to Bethesda. Housing is adequate for these additional patients and they have been moved to the leper colony on Pekel Island.
- (c) Water supply on the leprorsium and the food which the district bring in weekly is sufficient. The leper colony is entirely self supporting and is a project of the districts.
