DETAILED LAND CLASSIFICATION ISLAND OF OAHU

Note of 7/26/63 from
Nunn Ali

DETAILED LAND CLASSIFICATION - ISLAND OF OAHU

REPORT WRITTEN BY Larry A. Nelson, Assistant Specialist in Land Classification

FIELD CLASSIFICATION BY Edwin T. Murabayashi, Jr. Land Classification Specialist, and Larry A. Nelson

**CLASSIFICATION RATINGS AND
METHODOLOGY DEVELOPED BY** Tamotsu Sahara, Land Classification Specialist; Larry A. Nelson; Edwin T. Murabayashi; and Frederick K. Nunns, Researcher and Director

AGRONOMIC DATA COMPILED BY Tamotsu Sahara, Larry A. Nelson, and Edwin T. Murabayashi

**CLASSIFICATION
COORDINATED BY** Tamotsu Sahara

**ACREAGE MEASUREMENTS
SUPERVISED BY** Harold L. Baker, Land Economist

CARTOGRAPHY BY Faith N. Fujimura, Jr. Specialist in Cartography; Iwao Kuwahara, Jr. Specialist in Cartography; Charlotte A. Patterson, Assistant in Cartography; and Lani W. Komstohk

**LAND STUDY BUREAU
UNIVERSITY OF HAWAII**
Frederick K. Nunns, Director

UNIVERSITY OF HAWAII

HONOLULU 14, HAWAII

OFFICE OF THE PRESIDENT

January 1963

Dear Reader:

The primary purpose of this publication is to provide a ready source of objective information about the location, quality, and extent of Oahu's lands for agricultural usage. The data can be useful to public agencies, business firms, and individuals that have some form of interest in land use.

Readers will find that the land classification maps, overprinted on aerial photographs, are easily interpreted and that specific tracts can be located readily because numerous landmarks are recognizable on the photos. Supporting information in the text is brief and expressed in non-technical terms for the lay reader's convenience. A special section is provided for those who desire additional and more technical information.

All available information on soils, geology, climate, topography, and the crop sciences was used to prepare this report, together with field inspections and consultation with land operators and other informed sources. The publication is intended to meet a widespread need for practical, systematic land facts.

Respectfully submitted,

A handwritten signature in cursive script, reading "Thomas H. Hamilton".

Thomas H. Hamilton
President

CONTENTS

INTRODUCTION	<i>ix</i>
PART I. LAND CLASSIFICATION METHODOLOGY AND RESULTS	1
THE METHOD OF CLASSIFICATION	1
LAND TYPES AND CLASSIFICATION RATINGS	1
ACREAGES IN VARIOUS LAND CLASSES	8
ACREAGES IN VARIOUS LAND USES	10
PRACTICAL USES OF THE LAND CLASSIFICATION DATA	10
USE AND INTERPRETATION OF THE LAND CLASSIFICATION MAPS	11
INDEX MAP OF CLASSIFICATION SHEETS AND TAX KEY NUMBERS	13
LEGEND FOR LAND CLASSIFICATION SHEETS	14
LAND CLASSIFICATION SHEETS (Plates 1-100)	
PART II. TECHNICAL DISCUSSION AND SUPPORTING INFORMATION	115
FACTORS INFLUENCING THE CHARACTERISTICS OF OAHU LANDS	115
Geology	115
Climate	115
Vegetation	116
Time	116
Man-made Modifications	116
CHARACTERISTICS OF OAHU LANDS	116
DESCRIPTION OF THE LAND TYPES	119
CONSIDERATIONS IN DEVELOPING PRODUCTIVITY RATINGS	127
METHOD OF DEVELOPING THE PRODUCTIVITY RATINGS	127
Master Ratings	128
Use of Modified Storie Index Method	128
Importance of the Factors Considered in the Modified Storie Index Method	132
Single Use Ratings	133

PREVAILING CULTURAL PRACTICES BY LAND USES	133
Introductory Discussion	133
Sugar Cane Production	134
Pineapple Production	135
Vegetable Production	135
Orchard Production	136
Grazing (Pasture Production)	137
Forage Crop Production	137
Alfalfa	137
Napiergrass	138
REVIEW OF LITERATURE	138
PART III: REFERENCE MATERIAL	139
GLOSSARY OF TERMS	139
LIST OF REFERENCES	141

TABLES

1. Agricultural ratings of land types by selected uses and over-all suitability—Oahu	3
2. Land class ratings defined by estimated productivity of selected crops or uses	6
3. Acreage and percentage distribution of lands by class of agricultural suitability	8
4. Acreage and percentage distribution of lands by use (1961-62)	10
5. Percentage ratings given to individual factors in the Modified Storie Index Formula tabulated by land type (non-irrigated situation)	130
6. Ranges in land productivity indexes for master productivity ratings	131

FIGURES

1. Chart showing proportions of irrigated and non-irrigated lands in various classes of agricultural suitability	9
2. Typical map delineations showing land type symbols	12
