Preface

The bibliography covers the period of July 1, 1952, to April 30, 1954. Listed herein are the publications of general circulation and the noteworthy professional and scholarly activities of approximately 195 faculty and staff members from 32 departments and offices. University publications and theses presented for advanced degrees also are given. Independent but affiliated agencies, which publish their own bibliographies, are not represented.

A few items are included which were omitted from the preceding bibliography (1944–52).
