STATEMENT BY SENATOR DANIEL K. INOUE

Mr. President:

The Consular Treaty with the USSR which President Johnson yesterday strongly urged the Senate to approve has my support. I will vote for it and I call on my colleagues on both sides of the floor to vote for it also.

With the President, I believe that the provisions of this agreement would advance the national interest. I believe that we must reach this conclusion regardless of whether we personally believe in "building bridges" to the East or seeking to reduce areas of potential future misunderstanding while sending our boys to fight in Vietnam.

This is not a treaty which gives the Soviets something they badly want and gives us less in return. Remember, it was a Republican Vice President - not the Soviets - who proposed an exchange of consulates in 1959. It was a Republican Secretary of State - not the Soviets - who proposed the negotiation of a consular convention during the same year. If the establishment of a Soviet consulate in the U.S. is such a valued goal of the Soviet leadership, why didn't they accept Vice President Nixon's offer and open a consulate in New York in 1959 when they had

the chance?

COPY

the chance? If a consular convention is something the Soviets have always wanted, why did they wait for us to ask for it for thirty years after we established diplomatic relations with them?

The answer is that this treaty benefits the U.S. more than it benefits the Soviet Union. That is why we proposed it, that is why we took the initiative in negotiating it, and that is why the Administration is pressing for its ratification today. It benefits us because it helps us to protect the increasing numbers of Americans who travel to the USSR each year. Some 18,000 went there last year - from my State and every State in the Union. I am glad to say that so far no Hawaiians have been jailed or detained in the Soviet Union. But I understand that more than twenty incidents of this sort have come to the attention of the U.S. Government since this treaty was signed in 1964. A young man from Massachusetts - Newcomb Mott - died in Soviet hands under unexplained circumstances in 1966. A Peace Corps Volunteer from Maryland was jailed in the Soviet Union - and fortunately later released - this year. A former Army Lieutenant from Utah spent more than 60 days in solitary confinement in a Leningrad jail, and his companion from Arkansas is now out on bail after more than eighty days imprisonment. He may well go to Siberia to serve a three year sentence - for a foolish but hardly heinous infraction of Soviet law.

-3-
COPY

infraction of Soviet law.

In May of this year it may be possible for the first time for Americans to fly from New York to Moscow non-stop at low excursion fares. We can assume that this will lead to an increase in the number of Americans who travel there - and the number of Americans who may get into trouble there. The next American in a Soviet jail may be from Hawaii - and when this happens I intend to get on the phone to the State Department and ask them to get him out -- quickly. I hope they don't have to answer "Well, Senator, we had a treaty which would have helped him, but the Senate voted it down..." I realize from my mail that many oppose this agreement.

There are many who write to me and who write to all of you - sane people whose opinions we respect - who have serious misgivings about this agreement. Some feel we should enter no agreement with the Soviets while we are fighting in Vietnam. Others believe this treaty presents grave dangers to our internal security. Both these arguments deserve to be studied before we vote to approve or reject this treaty. I suggest that this can be done most dispassionately if we remove the Consular Convention from the framework of "bridge-building" or initiatives towards the East and look at it on its own merits - as an agreement between sovereign states which,

-4-
COPY

sovereign states which, if it is to be ratified, should be of concrete net benefit to us.

Because it contains guarantees committing the Soviet Union to notify American officials of the arrest or detention of American citizens and to permit visits to such Americans within four days and on a continuing basis thereafter, I believe it provides these benefits - benefits which are needed more than ever while the war in Vietnam is going on and the Soviets are consequently treating Americans accused of violating their law more harshly than usual. I believe that Vietnam should not be an obstacle to ratification for this treaty does not provide aid and comfort to the enemy but prudent protection for ourselves.

The internal security issue has been much discussed already. But I see nothing so terrible in the prospect of a Soviet consular office in an American city with a staff of 10 or 15, provided we are granted similar facilities in the USSR. The President has said that in his judgment the treaty raises no problems for the national security. The Acting Attorney General and the Director of the FBI have said that such influx of 10 or 15 Soviet officials - added to the 1,000 already here - can be handled effectively and efficiently. I accept this. More than 200 people immigrated to this country from the Soviet Union last year alone, to live and work among us.

-5-
COPY

work among us. They are relatives of Americans, longing for the free life they can enjoy in this country, and none of us would deny them - or their American relatives - this privilege. Yet this certainly creates a potential threat to the internal security, for among these may be the faceless Colonel Abel of the 1970's, far more difficult to identify and control than the Soviet official whose activities are known. Are we ready to close our society, to make a secret of the entire nation, to betray our tradition - to guard against the curious eye? Is our social fabric so flimsy that we must resort to such measures?

Finally, let me touch briefly on the issue of immunity. This treaty - the first of its kind we have ever signed with a communist government - differs from past consular treaties in that it grants full immunities from criminal jurisdiction to consular employees on a reciprocal basis. I believe that Americans we might send to a consulate in the Soviet Union need and deserve this protection. Our country requires it too, for the security hazard of exposing these officials to imprisonment and interrogation in a communist country is obvious. We must pay a price for this shield - we must grant the same protection to Soviet officials here. But I believe the price is worth paying.

Mr. President, I believe this treaty merits the approval of the Senate and the nation, and I intend to vote for it.

NEWS FROM SENATOR DANIEL K. INOUE
6, February 1967

A \$30,007 Manpower Development and Training Act project to train 20 unemployed workers in Hawaii as accounting clerks was announced today by the office of Senator Daniel K. Inouye.

The 27-week program will be conducted at Kauluwela School in Honolulu.

#####

FOR IMMEDIATE RELEASE

FEB 4 1967

OFFICE OF MANPOWER LIAISON

U.S. DEPARTMENT OF LABOR

(This is an advance notice of the funding of a Manpower Development and Training Act Project. It is intended for your immediate use. Departmental public announcement will be made at a later date.)

FEB 6 1967

Sec. of Labor W. Willard Wirtz and Sec. of HEW John W. Gardner have jointly approved the Manpower Development and Training Act project known as S 7006. This project was developed and submitted for approval by the Hawaii Employment Security and Vocational Education Departments.

The Project will provide 20 unemployed workers with training in the following occupations:

<u>Occupations</u>	<u>Weeks of Training</u>
Accounting Clerk (E)	27

This project as approved will cost a total of \$ 30,007 ; the Federal Government will provide 29,104 of these funds. \$ 20,977 represents training allowances to be paid to trainees and \$ 9,030 represents total training costs. Training will be conducted at

Kauluwela School, Honolulu

The Manpower Development and Training Act became law on March 15, 1962. The Department of Labor and HEW were given responsibility by the Congress in two main areas: (1) identify current and prospective manpower shortages; and (2) seek out persons who can be qualified for these positions through education and training.

Identification of occupations where workers are in short supply and selection of persons qualified for training to fill these positions is the responsibility of the Department of Labor. Classroom training of persons for particular skills is the responsibility of the Department of HEW. After successful completion of the course placement of trainees into jobs for which they are newly fitted is made through the Employment Service.

Senator Daniel K. Inouye today rejected a proposal that the official state flag of Hawaii be redesigned "to steer away from any aspects of British colonialism."

The suggestion, made by a Maryland flag manufacturer, was a reference to the British Union Jack in the upper left corner of the Hawaii State Flag.

"Our flag has flown proudly over the islands as the flag of the Kingdom of Hawaii, the Republic of Hawaii, the Territory of Hawaii, and the State of Hawaii," Senator Inouye said. "It is a very precious part of our heritage and may it ever be so."

Dan W. Salamone, head of the Textilevania Company, Hyattsville, Maryland, made the suggestion in a letter to Senator Inouye.

Salamone suggested that "the new symbolism of the flag of Hawaii be incorporated in a change or redesign which might be more appropriate for a state of the United States."

"In the past there has been a marked tendency, even in the flag of the United States, to steer away from any aspects of British colonialism and we sincerely feel that this would be most appropriate now with the Hawaiian symbol," Salamone said. The flag manufacturer added that "we would be most happy to make any suggestions that would incorporate a proper legend of the warmth and beauty of your people and your Islands."

The Hawaii State Flag was designed prior to 1816. The Union Jack is believed to have been included out of consideration for Captain George Vancouver of Great Britain's Royal Navy who gave Hawaii its first flag when King Kamehameha I placed the Island of Hawaii under the protection of Great Britain.

Mr. Dan W. Salamone
Textilevania Company
P. O. Box 655
Hyattsville, Maryland

Dear Mr. Salamone:

Thank you for your suggestion that the Hawaii State flag be redesigned.

I must advise you that the existing state flag is too much a part of Hawaii's precious heritage to be redesigned at this time. It has served as our flag during the Kingdom of Hawaii, the Republic of Hawaii, the Territory of Hawaii and the State of Hawaii.

Should you care to proceed further, I would suggest that you write Governor John A. Burns, Iolani Palace, Honolulu, Hawaii. I should caution you that you will undoubtedly receive the same reaction from the Governor.

Sincerely,

DANIEL K. INOUE
United States Senator

Re: Flag of Hawaii

Dear Senator Inouye:

Being designers and manufacturers of flags for States, Nations and Organizations of all types throughout the World, we would like to suggest to you that the new symbolism of the Flag of Hawaii be incorporated in a change or re-design to something which might be more appropriate for a State of the United States.

In the past, there has been a marked tendency, even in the Flag of the United States, to steer away from any aspects of British colonialism and we sincerely feel that this would be most appropriate now with the Hawaiian symbol.

We are aware of the romance and feeling that sometimes attaches to flags and we are also cognizant of the fact that a flag should directly represent the ideals, hopes and aspirations of a people from the point of view of their present status.

We would like to suggest to you that you undertake to recommend through your State's channels that the Flag be redesigned.

In this respect, we would be most happy to make suggestions that would incorporate a proper legend of the warmth and beauty of your people and your Islands.

Very truly yours,

TEXTILEVANIA COMPANY

Dan W. Salamone

THE FOLLOWING IS THE TEXT OF A SENATE FLOOR SPEECH BY
SENATOR DANIEL K. INOUE.

Although it may be a surprise to some, we in Hawaii are concerned with air pollution just as are the citizens of New York or California. Smog, smoke and burning debris are still too common sights in many parts of Hawaii. We are fortunate that the trade winds carry off much of the aerial filth, but these winds are limited in their capacity to cleanse, and each year the sources of air pollution multiply.

The State of Hawaii ranks third in the nation in expenditures per individual for air pollution control. In fiscal 1966, our State Department of Health has received close to \$50,000 to improve its air pollution control program, an annual expenditure of 11.7 cents per person.

We have made a start. But I think it is plain that we have a long way to go. The Air Quality Act of 1967, which has been proposed by President Johnson, marks a significant advance. I, for one, fully endorse the President's proposal. Under this legislation, which I am co-sponsoring in the Senate, the Secretary of Health, Education, and Welfare will, for the first time, be able to establish a regional air quality commission in those areas where interstate air pollution problems exist. I know of no area in the nation in which adjoining states have effectively used authorizations in the existing Clean Air Act to attack the problem together.

The proposed legislation would also authorize the Secretary to establish minimum emission control levels for those offending industries which engage in interstate commerce. While Hawaii's industry has made efforts to control air pollution, I think it is unrealistic for us to assume that nationwide industry will show similar cooperation. Though the economic effects of air pollution are many times more costly than the efforts needed to adequately control the problem, the user of air has no real economic incentive to avoid air pollution. Rather, he is motivated to avoid the cost of controlling pollution. We cannot expect an industry in one state to support regulation, when there is no assurance that a competing industry in another state will not be subject to similar regulation. For this reason, we need national standards.

NEWS FROM SENATOR DANIEL K. INOUE

8, February 1967

Page 2

Hawaii would not profit directly from the interstate provision of this legislation but it would from the grants to be made to state agencies. Some of these may be used to inspect the anti-pollution devices required on 1968 model automobiles. Others are for research into methods for reducing air pollutants in fuels.

In the early morning, Hawaii's air is often polluted by smog from industrial smoke and from exhaust fumes. Our State Health authorities seek to bring these sources of air pollution under control, but they need the assistance provided by this legislation.

I am happy to support this proposal. It holds much promise both for our state and for the nation.

(Phone DU-4045)

FOR RELEASE
Saturday
February 11, 1967

10 1967

Secretary Robert C. Weaver of the U. S. Department of Housing and Urban Development has announced approval of a \$7500 preliminary loan for new low-rent public housing for Wailuku on the Island of Maui in Hawaii.

The funds will enable the Hawaii Housing Authority to begin preliminary planning for 50 low-rent homes. All the units will be designed for the elderly.

Following completion of preliminary planning, the local authority will prepare and submit to HUD a program with descriptions of the proposed housing site, sketch plans, and an estimate of the total cost of the proposed housing development. The low-rent public housing program was authorized by the Housing Act of 1937, as amended.

The General Services Administration will inform the Government Operations Committees today of its plans to exchange the surplus Coast and Geodetic Survey site on the island of Oahu for land and air easements adjacent to Barbers Point Naval Air Station in Honolulu, Hawaii, the office of Senator Daniel K. Inouye was advised today.

The government will receive a cash differential under the terms of the land exchange agreement that GSA has proposed for the planned extension of a runway at the air station.

GSA has negotiated with the trustees of the Estate of James Campbell to exchange former Coast and Geodetic Survey site of approximately 43 acres for a parcel of 31.65 acres lined between Barbers Point shoreline and the existing runway.

Additionally, the government is to acquire a flight clearance easement of nearly 100 acres to protect approaches to the runway and \$98 thousand in cash to offset the difference in the appraised value of the properties.

21, February 1967

The State of Hawaii will receive \$2.1 million in U. S. Office of Education allotments for educationally-deprived children for fiscal year 1967, Senator Daniel K. Inouye said today.

The County breakdown follows:

City and County of Honolulu	\$1, 598, 665
County of Hawaii	\$ 299, 051
County of Maui	\$ 129, 470
County of Kauai	\$ 81, 574

A statewide total of 12, 460 children, ranging in age from five to seventeen years, will be assisted by the program.

The funds will be used to assist local education agencies, handicapped children, juvenile delinquents in institutions, ^{and} dependent and neglected children.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Washington, D.C. 20410

FEB 24 1967

HUD-No. 1039
(Phone 382-4045)

FOR RELEASE
Saturday
February 25, 1967

Secretary Robert C. Weaver of the U. S. Department of Housing and Urban Development has announced approval of a \$581,751 loan for construction of 40 low-rent homes in Honokaa, Hawaii. All of the new homes will be designed for the elderly.

Average cost to build and equip the new public housing dwellings is estimated at \$9,150. All contracts for construction will be awarded by Hawaii Housing Authority.

The loan will provide funds for construction and equipment, site acquisition and improvement, utilities, planning and design fees, space for management, maintenance and tenant activities, and administrative costs. The HUD loan will be repaid from proceeds of the sale of the local authority's long-term bonds to private investors.

A contract between HUD and the local authority also provides for annual contributions by the Federal Government. These contributions will help keep rents within the means of low-income families. The low-rent public housing program was authorized by the Housing Act of 1937, as amended.

STATEMENT RE CUTBACK OF HIGHWAY CONSTRUCTION FUNDS
BY SENATOR DANIEL K. INOUE

Joint Hearings - House and Senate Public Works Committee
February 27, 1967

Mr. Chairman:

The State of Hawaii is extremely concerned by the cutback in federal highway fund allocations, as well as the "freeze" on funds previously allocated but uncommitted, as we re announced recently by the Bureau of Public Roads.

Because of Hawaii's territorial status, it was not included in the Interstate Highway Compact until 1960, some four years after other states became eligible under the 90-10 federal aid formula. Because of this delay and the neglected condition of the State's roads, our federal highway program has always lagged behind mainland standards. Not until the past two years has the State been able to make a strenuous effort to close the gap. During the current fiscal year, our State Department of Transportation had planned on having, under agreement, a total of \$49.6 million in federal highway construction projects.

But with the announced cutback, only \$22.1 million in projects can be put under agreement, a reduction of 55.4 percent; the remaining \$26 million has been deferred until after July 1967. Based on income

multipliers of from 1.7 to 1.8 percent developed in the State, the cutback will result in the withdrawal of from \$44 million from the state economy. In Hawaii's small economy, this income loss is considerable-- the equivalent of a 17 percent reduction in its major industry, tourism.

The construction industry, of course, has been the first to feel the impact. At the urging of state officials who were anxious to close our federal highway construction gap, consulting engineers, real estate appraisal and heavy construction firms increased their personnel and equipment inventories to meet our highway construction program needs.

A state survey indicates that some \$8 million of heavy construction equipment on Oahu is presently being purchased or leased on a time payment basis by contractors. Heavy construction equipment valued at \$12 million and representing over 60 percent of the total available equipment of this type on the Island of Oahu is now idle.

Most of these firms have already been adversely affected by a serious reduction in new starts in the private construction field brought on by the tight money market.

The Hawaii Trucking Association, whose members include many trucking firms almost wholly dependent upon a healthy construction industry, has expressed the fear that many of its members may be forced to the brink of bankruptcy during the next eighteen months.

There are, for example, 54 dump truck operators on Oahu, a majority of whom operate less than five trucks each. One association member who invested his life savings in a single truck reported his truck was used less than five days in December 1966.

Unlike highway contractors in other states, our contractors are unable to compete with contractors in neighboring states. The Oregon highway program was cut by 29 percent for fiscal 1967 and 1968, but Oregon contractors are able to bid on and perform work in Northern California where the cutback was not as large.

Idle equipment in Hawaii stays idle until additional work is available.

With idle equipment have come layoffs. 27.2 percent of the unemployment claims in the state last December were from the construction industry. Unless the problem is alleviated, I fear this number will increase.

Finally, I would like to point out that many of the projects we will have to defer are in the vicinity of Pearl Harbor Naval Shipyard on Interstate Highway H-1, where increased military activities due to Vietnam have resulted in severe overloads on our existing highways. I can assure you gentlemen that some of our Honolulu traffic jams will match anything you may see in the metropolitan Washington area.

It is virtually impossible to fully evaluate how badly our economy will be damaged by these federal highway fund cutbacks. With Hawaii's rapidly growing population and increasing traffic congestion, delays in highway construction hurt all segments of the population. Members of the Hawaii Congressional delegation and state officials are most seriously concerned.

I ask that you give careful consideration to the special problems these unexpected cutbacks have raised in our island state.

The University of Hawaii today received National Science Foundation grants totaling \$97,389 as part of an expanded program aimed at accelerating the output of students with advanced degrees in science, mathematics, and engineering, according to Senator Daniel K. Inouye.

The grants included \$50,812 which will enable the University to appoint nine students for full-time graduate study for nine to 12 months beginning in the fall of 1967. Four graduate teaching assistants will also be appointed for full-time study during the summer months.

An additional \$46,577 was allocated to continue previous traineeships, Senator Inouye said. Associate Dean Morton M. Rosenberg will be in charge of the program.

FEB 27 1967

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
Office of Education
Washington, D. C. 20202

FEB 24 1967

Notification to Members of Congress

Program: CIVIL DEFENSE ADULT EDUCATION

Basis : In accordance with the provisions of the Federal Civil Defense Act, as amended (P.L. 920, 81st Congress) and under the provisions of Department of Defense Work Order No. DAHC 20-67-C-0003

The State of Hawaii Department of Education, Honolulu, Hawaii, under contract with the U.S. Office of Education, will conduct a program of civil defense education for adults and a program of training for radiological monitors in communities throughout the State.

The education program provides adults with a basic understanding of the threats of the nuclear age and of the means for protection against these dangers.

The monitor training provides for the instruction of individuals who will be assigned to positions as radiological monitors in shelters and monitoring stations throughout the State.

Work under this contract began January 1, 1967 and will continue through December 31, 1967.

This contract provides for reimbursement to the State for expenditures in the amount of \$26,583.00.

NEWS FROM SENATOR DANIEL K. INOUE
1967, February

The following grant awards were announced by Senator Daniel K. Inouye during the month of February:

\$35,953 grant to University of Hawaii from the Welfare Administration, Office of Juvenile Delinquency and Youth Development for a project entitled "To continue activity as a research and training center for the treatment and control and prevention of juvenile delinquency."

\$6,900 from U. S. Public Health Service to University of Hawaii School of Public Health for public health training program.

\$20,100 from National Science Foundation to University of Hawaii (Hilo campus) for construction of raindrop tower and design study of vertical wind tunnel.

Hawaii will share in a \$67,880 U. S. Office of Education grant to the Wisconsin State Department of Public Instruction. The Wisconsin State Department of Public Instruction is administering an experimental public information project to improve communication and public information programs for state education agencies. Hawaii, together with Colorado, Florida, New York, Washington, and West Virginia is one of the participating states. A previous grant for the project totaled \$316,649.

\$50,334 research grant from Public Health Service, National Institute of Allergy and Infectious Diseases, to the Bernice P. Bishop Museum for the first year of a three year project entitled "Trombiculidae Acarina Prostigmatai of New Guinea."

\$22,048 research grant from Public Health Service, National Institute of Allergy and Infectious Diseases, to University of Hawaii for the first year of a three year program called "Studies of Natural Products with Antiviral Activity."

\$31,367 research grant from Public Health Service, Bureau of Environmental Health to the University of Hawaii for the first year of a four year project called "Air Spora in Hawaii."
